Executive Summary

Master plan is a statutory instrument to guide and regulate the present and future utilization of land, expansion and zoning of city for a period of 25 years. Hosur city has been witnessing rapid urbanization in the last two decades. This is due to salubrious weather, employment opportunities, growth of industrial estates and good connectivity. To develop Hosur city and its surrounding areas on a sustainable basis, a master plan has been prepared based on GIS, analysis of data collected from various fields and interaction with stakeholders. The objective of the master plan is to transform Hosur city into an industrial and floricultural hub in Tamil Nadu.

Population in Hosur city has been analysed for period of over four decades as per the census records and the projected population for horizon period of 2046 is estimated. The existing infrastructure facilities are analysed and gaps are identified and strategies are worked out for meeting the requirements of physical infrastructure such as water supply, underground sewerage system, storm water drain, solid waste management, traffic and transportation, marketing facilities for agricultural products and social infrastructure such as housing, educational and health facilities for the projected population for the year 2046.

This document captured strategies for improving blue and green assets, open spaces, protecting Asian elephants, ways and means to reduce the environmental pollution, strategies for growth of agro-based, metal-based industries and mineral-based industries for enhancing the economy in the planning area. The plan discusses methods to reduce the impact of natural disaster impinging the planning area.

Overall, the master plan-2046 is focused on harmonious development of urban and rural areas in Hosur New Town Development Area (HNTDA).

Verified RealEstate™

1.Introduction

1.1 Hosur was under Hoysala's dynasty during 1200 AD. It was known as 'Chevidapadi' in the 10th century and Murasunadu in the 13th century. From 16th century onwards it came to be called as Hosur.

1.2 Hosur town is located in the north western part of Krishnagiri district in Tamil Nadu. It stretches between Latitude 12°43' N and Longitude 77°49' E. The average elevation of Hosur town is 880m above mean sea level. The town experiences distinct wet and dry season of moderate climate throughout the year. This makes ideal for cultivation of roses on large scale and establishment of agro and metal-based industries. During the techno boom in India, Hosur served as a satellite town for the electronic city, Bengaluru.

1.3 Hosur town is bound on the north and northeast by Zuzuvadi and Avalapalli village, on the East by Chennathur village, on the South by Rangapanditta Agraharam, on the southwest and west by Mathigiri and Mukondapalli.

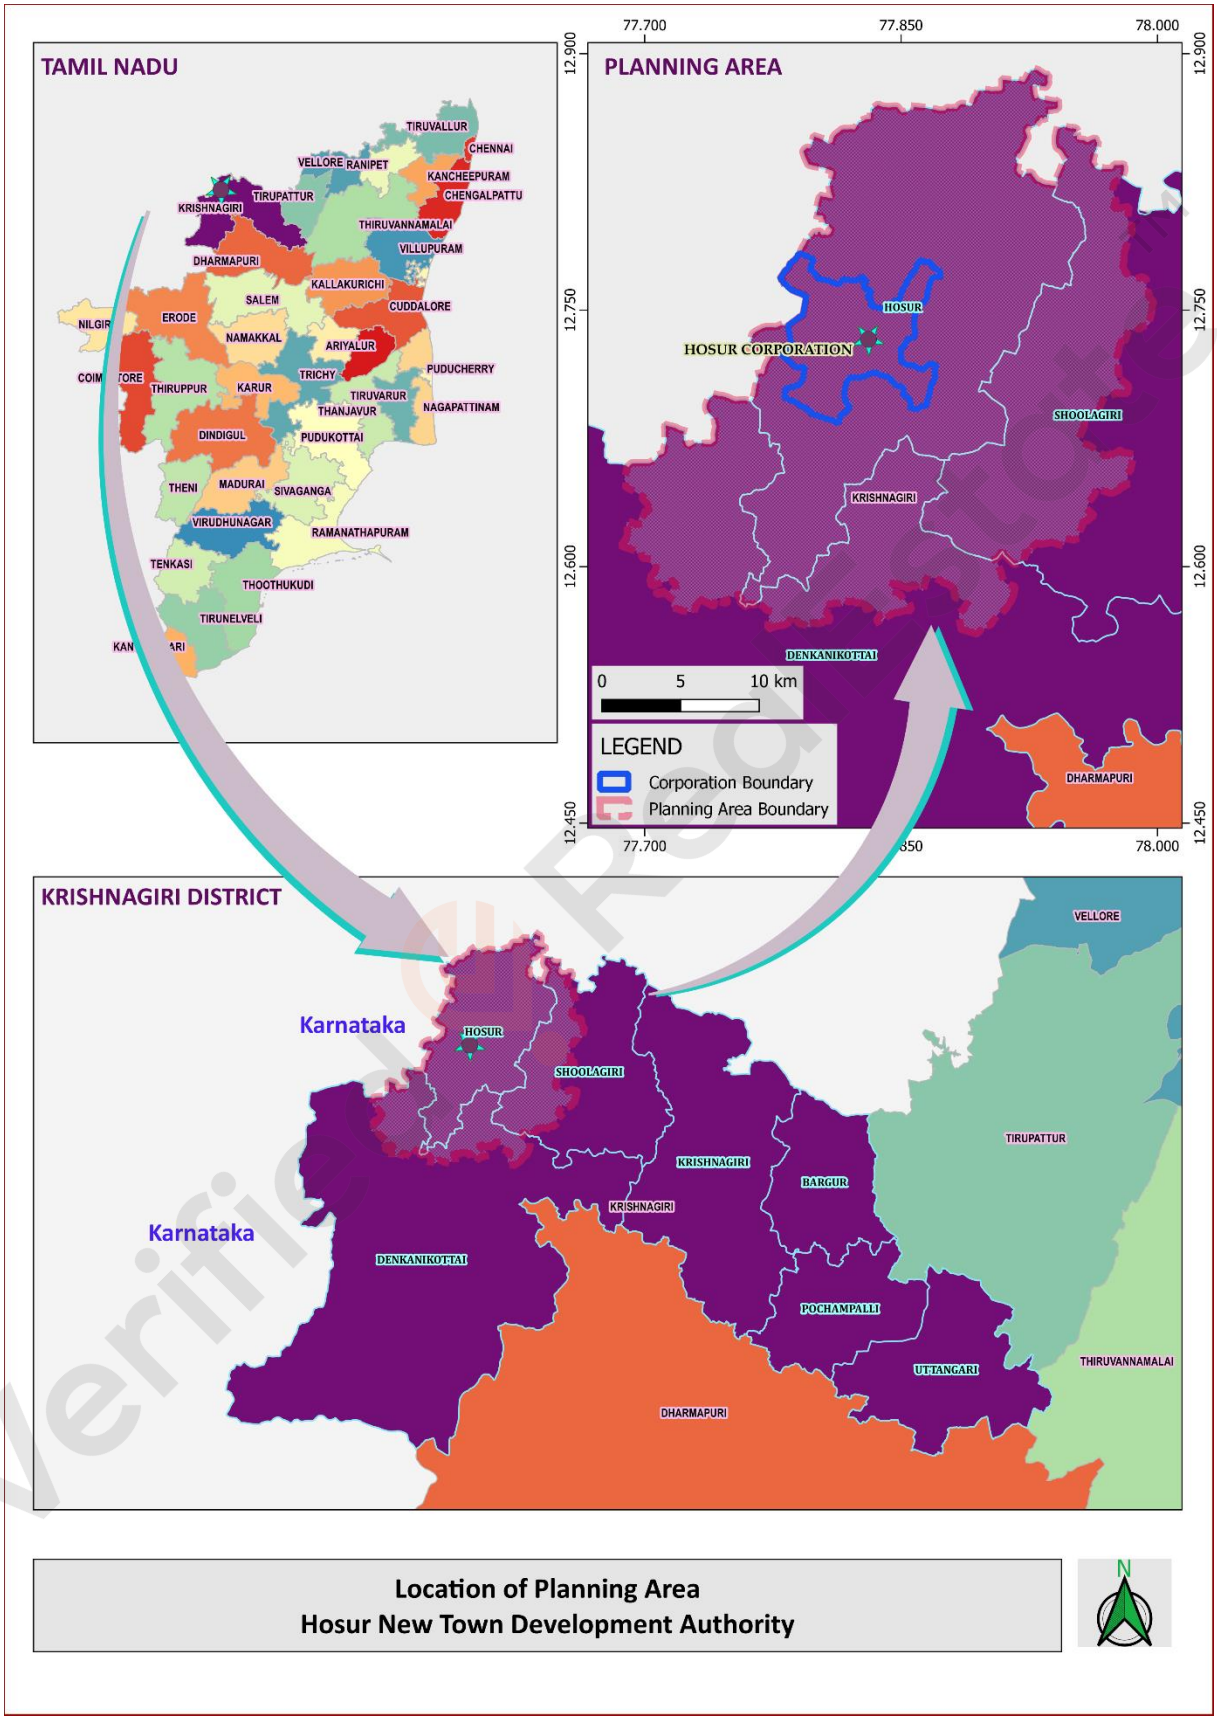

1.4 Population in Hosur town area has been increasing since 1991. It increased from 84,394 in 2001 to 1,16,821 in 2011 with growth rate of 38.42 percentage. The density of Hosur town is 11,521 people per sq.km. The sex ratio stands as 968.

1.5 Hosur New Town Development Area (here in after referred as the planning area) comprises Hosur corporation, Kelamangalam town panchayat and 120 revenue villages. The geographical location of the planning area is shown in Figure-1. Geologically, the terrain of the planning area comprises rocks 4,600 million years old. They are denuded and the terrain is mostly undulated.

1.6 The planning area is bounded on the north and northwest by Karnataka, on the east by Shoolagiri taluk and on the south by Denkanikottai taluk. Hosur town and northern part of planning area are located in the elevated region. The gradient flows from NW-SE. The Thenpennai River and Chinnar River flows through the planning area. The Kelavarapalli dam blocks Thenpennai River water for recharge and it flows further to Krishnagiri reservoir dam. The planning area has huge parcels of reserved forest.

Figure 1: Geographical Location

Location of Planning Area
Hosur New Town Development Authority

Figure 2: Planning Area Connectivity

1.7 Red soil is manifested in the planning area. It suits cultivation of agriculture crops and horticulture crops on a large scale. Wells are the major source of irrigation in Hosur area, supplemented by tanks and canals. The tube wells forms an important source of irrigation in Hosur taluk. The wells dug under private sector with pump sets are seen in most places and private tube wells are the next source in utilizing the ground water potential.

1.8 The Public Works Department and Panchayat Union have been maintaining Government tanks, ponds and supply channels. These water sources play an important role in the irrigation.

1.9 Industries ranging from small scale, medium and large scale are concentrated in the planning area. The area is known for quarrying of black and multicoloured granites. The polished granites are marketed in European countries, Australia and United States of America. Hosur town is located at the junction of Golden Quadrilateral Corridor and has an excellent connectivity with the neighbouring towns and cities as shown in the Figure 2.

1.10 Hosur was constituted as a selection grade town panchayat in 1962. It was upgraded to second grade municipality in G.O.Ms.No.5 Municipal Administration and Water Supply Department, dated 07.01.1992. In 1998, Hosur was upgraded to selection grade municipality. Later, town panchayat Mathigiri and village panchayats Avalapalli, Chennathur, Mukondapalli (including Motham Agraharam) and Zuzuvadi (including Santhapuram and Anumepalli Agraharam) were included in Hosur and upgraded into selection grade municipality as per G.O.Ms.No:262 Municipal Administration and Water Supply Department dated 25.10.2010, which is shown in Figure 3.

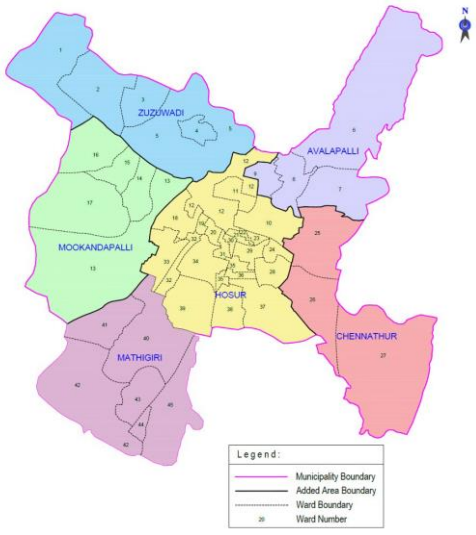

Figure 3: Hosur with Expanded area

1.11 Then, Hosur selection grade municipality was upgraded to special grade municipality as per G.O.Ms.No.62 Municipal Administration and Water Supply Department, dated.25.06.2012. Later, Hosur municipality was upgraded as municipal

Verified RedEstate ™

corporation as per G.O.Ms.No.40, Municipal Administration and Water Supply Department, dated.28.02.2019. It covers an area of 60.86 Sq.km

1.12 Hosur and its contiguous town and villages witnessed increasing urbanization due to spectrum of factors such as salubrious weather, good connectivity, availability of skilled and unskilled human resources and growth of industries. In order to promote urban growth in a strategic direction, Hosur and its sphere of influence areas, were brought under the concept of master plan.

1.13 Accordingly, the master plan was formulated for only the critically urbanizable area comprising Hosur town and its contiguous areas, Mathigiri, Achettipalli, Chennathur, Nalligabetta Agraharam, Mukondapalli, Moranapalli, Motham Agraharam, Onnalvadi, Rangapanditta Agraharam, Santhapuram Agraharam and Zuzuvadi embracing an area of 94.10 Sq.km and Gazetted on 23.05.1984. This plan is named Hosur New Town Development Plan. The extent of the villages is given in Annexure-I.

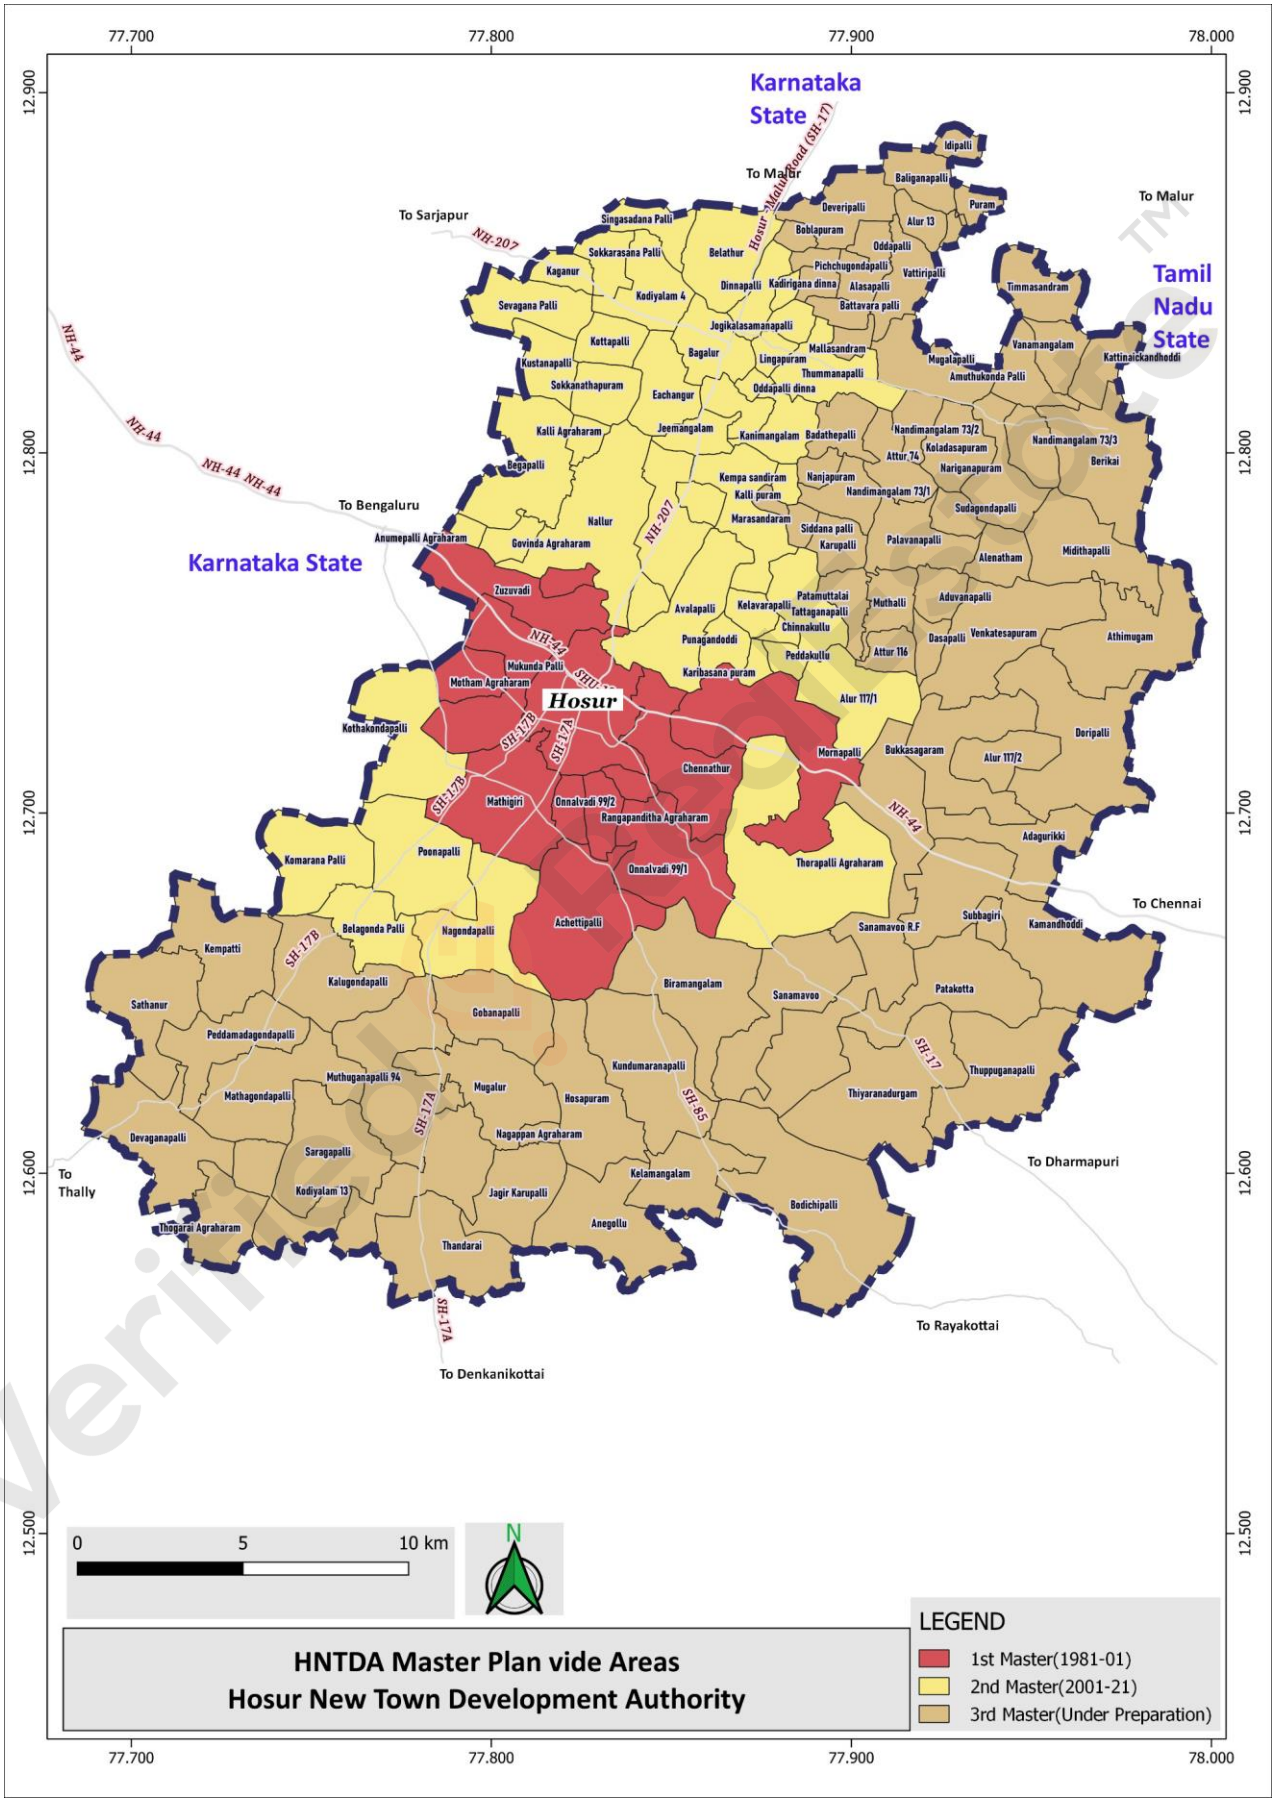

1.14 Later, with urbanization and industrialization expanding into adjacent villages of Hosur new town development area, the new master plan was prepared for Hosur, Mathigiri and 55 villages with an extent of 292.01 Sq.km. This master plan was consented by Government on 17.12.2002. The list of villages with their extent is given in Annexure-II.

1.15 With the urban sprawl further extending into peripheral areas of Hosur town, additionally 73 villages with an extent of 442.06 Sq.km were added to the existing area. Thus, a total of 734.07 Sq.km was delineated and notified on 29.05.2017 for preparation of master plan. The list of villages with their extent is given in Annexure-III. The growth history of master plan area is shown in Figure 4.

1.16 In order to sustain the growing population and the developing needs of the Corporation, Hosur New Town Development area (HNTDA) is constituted. The planning area constitutes Hosur Corporation area (including Hosur Town and 8 villages), Kelamangalam Town Panchayat and 120 villages.

SWOT Analysis

1.17 An analysis has been conducted in the planning area to assess the Strength, Weakness, Opportunity and Threat with a view to capitalize the strengths and opportunities and to overcome the weaknesses and threats for advancing the development of the planning area on sustainable basis. These are shown below:

Strength	Weakness
✓ Corporation ✓ Locational advantage ✓ Salubrious weather ✓ Well connected by roadways and railways ✓ Concentration of metal based and agro-based industries ✓ Low cost of living	○ Development restricted on the eastern side by Sanamavoo reserved forest and on the western side by Karnataka ○ Undulated terrain ○ High land cost ○ Economical potential has to be shared with Karnataka ○ Inadequate infrastructure facilities
Opportunities	**Threats**
➢ Large tracts of land for development ➢ Proposed Industrial estates ➢ Rich deposits of granites and rough stones ➢ Availability of skilled and unskilled human resources ➢ International flower auction centre	❖ Burgeoning population ❖ Shrinkage of agriculture lands due to conversion and other purpose ❖ Movement of elephants ❖ Depletion of ground water resource ❖ Land, air, water pollution caused by industries and mining activities

Verified RealEstate™

2.Hosur New Town Development Area – Vision 2046

2.1 Hosur will be a dynamic centre creating a strong link between the states – Tamil Nadu and Karnataka. It evolved as an industrial town which is also in a location to support the housing demand of its local and other industries in the proximity. Considering the rich prospects in industries and floriculture, the master plan 2046 has been formulated for the planning area with the following vision, goals and objectives.

2.2 Vision-2046: The vision is to develop Hosur New Town Development Area into a leading industrial hub and floricultural hub on a sustainable basis.

Goals that will be pursued over the plan period are as follows:

Goal–1: Development of agricultural resources and mineral resources

Goal-2: Development of human resources and promotion of public participation

Goal-3: Development of industries in the four sectors namely micro, small, medium and large

Goal-4: Conservation of ecosystem and bio diversity.

Verified RealEstate™

2.3 Objectives for 2046

The vision and goals will be achieved through the following objectives:

- Effective utilization of natural resources such as granite and rough stones, creating capital and infrastructures for floriculture business and improving the connectivity for boosting the economy
- Providing housing for all sectors of society and creation of physical infrastructure facilities such as water, drainage and management of solid waste and creation of health and educational facilities
- Setting apart land for development of industrial estates, availability of credit facilities and water supply
- Reducing pollution in the realms of air, water land and sound to appropriate measure, increasing the green belt, conservation of water bodies such as rivers, lakes and ponds, improving ground water recharge through rain water harvesting and measures of protection of wild life.

Verified RedEstate™

3.Demographics

Population Growth Trends – Hosur town

3.1 Human resource are a valuable resource for country's development. The population size provides an indicator of the physical and environmental characteristics. In Hosur town, population has been increasing since 1951. In 1961 the population of Hosur town was 11,683. It then gradually increased to 16,591 in 1971 and rose to 27,129 in 1981. From 1991, Hosur town witnessed a steep growth in population. It was 41,739 in 1991 and attained a population of 84,394 in 2001. As per the census 2011, the population in Hosur town catapulted to 1,16,821 registering a growth rate of 38.42 percent compare to 2001.

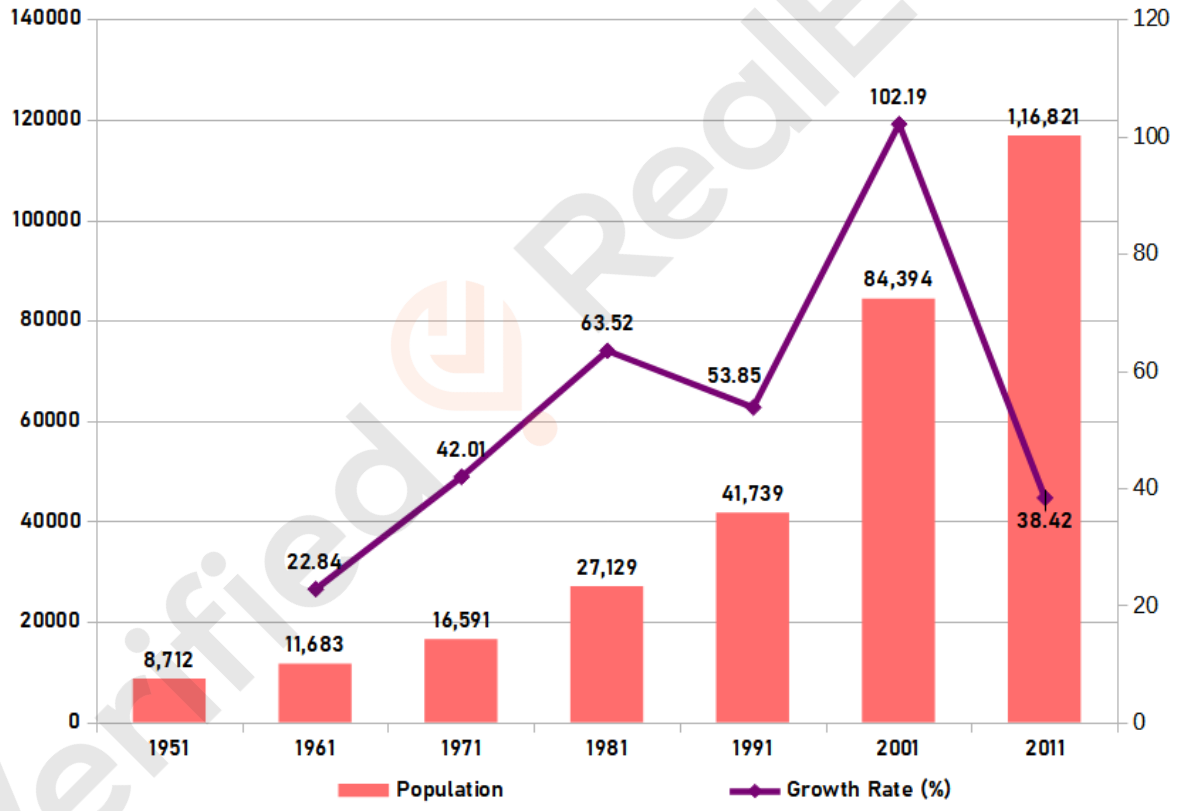

Figure 5: Population Growth Trend in Hosur Town

3.2 The planning area has a population of 1,75,875 in 1981. Due to increasing employment opportunities in the fields of secondary and tertiary sectors, the population in the area has increased from 1981 to 2011 and the growth rate registered in the area is shown in the Table 1.

Table 1: Population Growth Trend

Area	Population				Decadal Growth Rate		
	1981	1991	2001	2011	1981-91	1991-01	2001-11
Corporation	46,078	75,466	1,51,426	2,45,354	63.78	100.65	62.03
Kelamangalam	7,108	9,082	11,052	13,321	27.77	21.69	20.53
Rural	1,22,689	1,61,120	1,94,116	2,42,934	31.32	20.48	25.15
Planning Area	**1,75,875**	**2,45,668**	**3,56,594**	**5,01,609**	**39.68**	**45.15**	**40.67**

3.3 As per the census 2011, the distribution of population in the planning area is shown in the Figure 7.

3.4 Density of population represents the number of persons in an area. Hosur town has a density of 11,521 persons per sq.km. It is higher than that of population in the cities of Krishnagiri (6203 persons per sq.km), lower than Vellore (15,949 persons per sq.km) and Chennai (26,553 persons per sq.km). It is also higher than the state average of 555 persons per sq.km. In the planning area, the density of population is high in the corporation, moderate in town panchayat and less in revenue village. The details are given in Annexure-V.

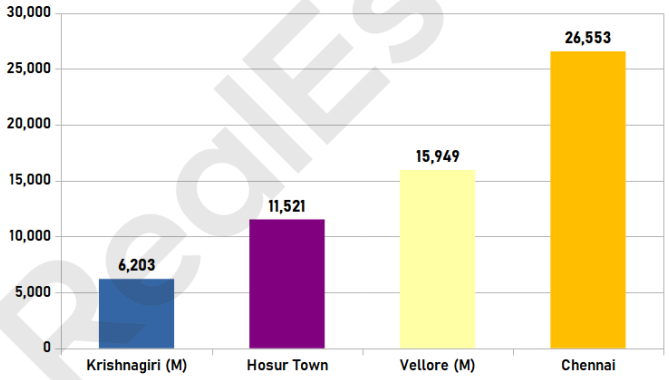

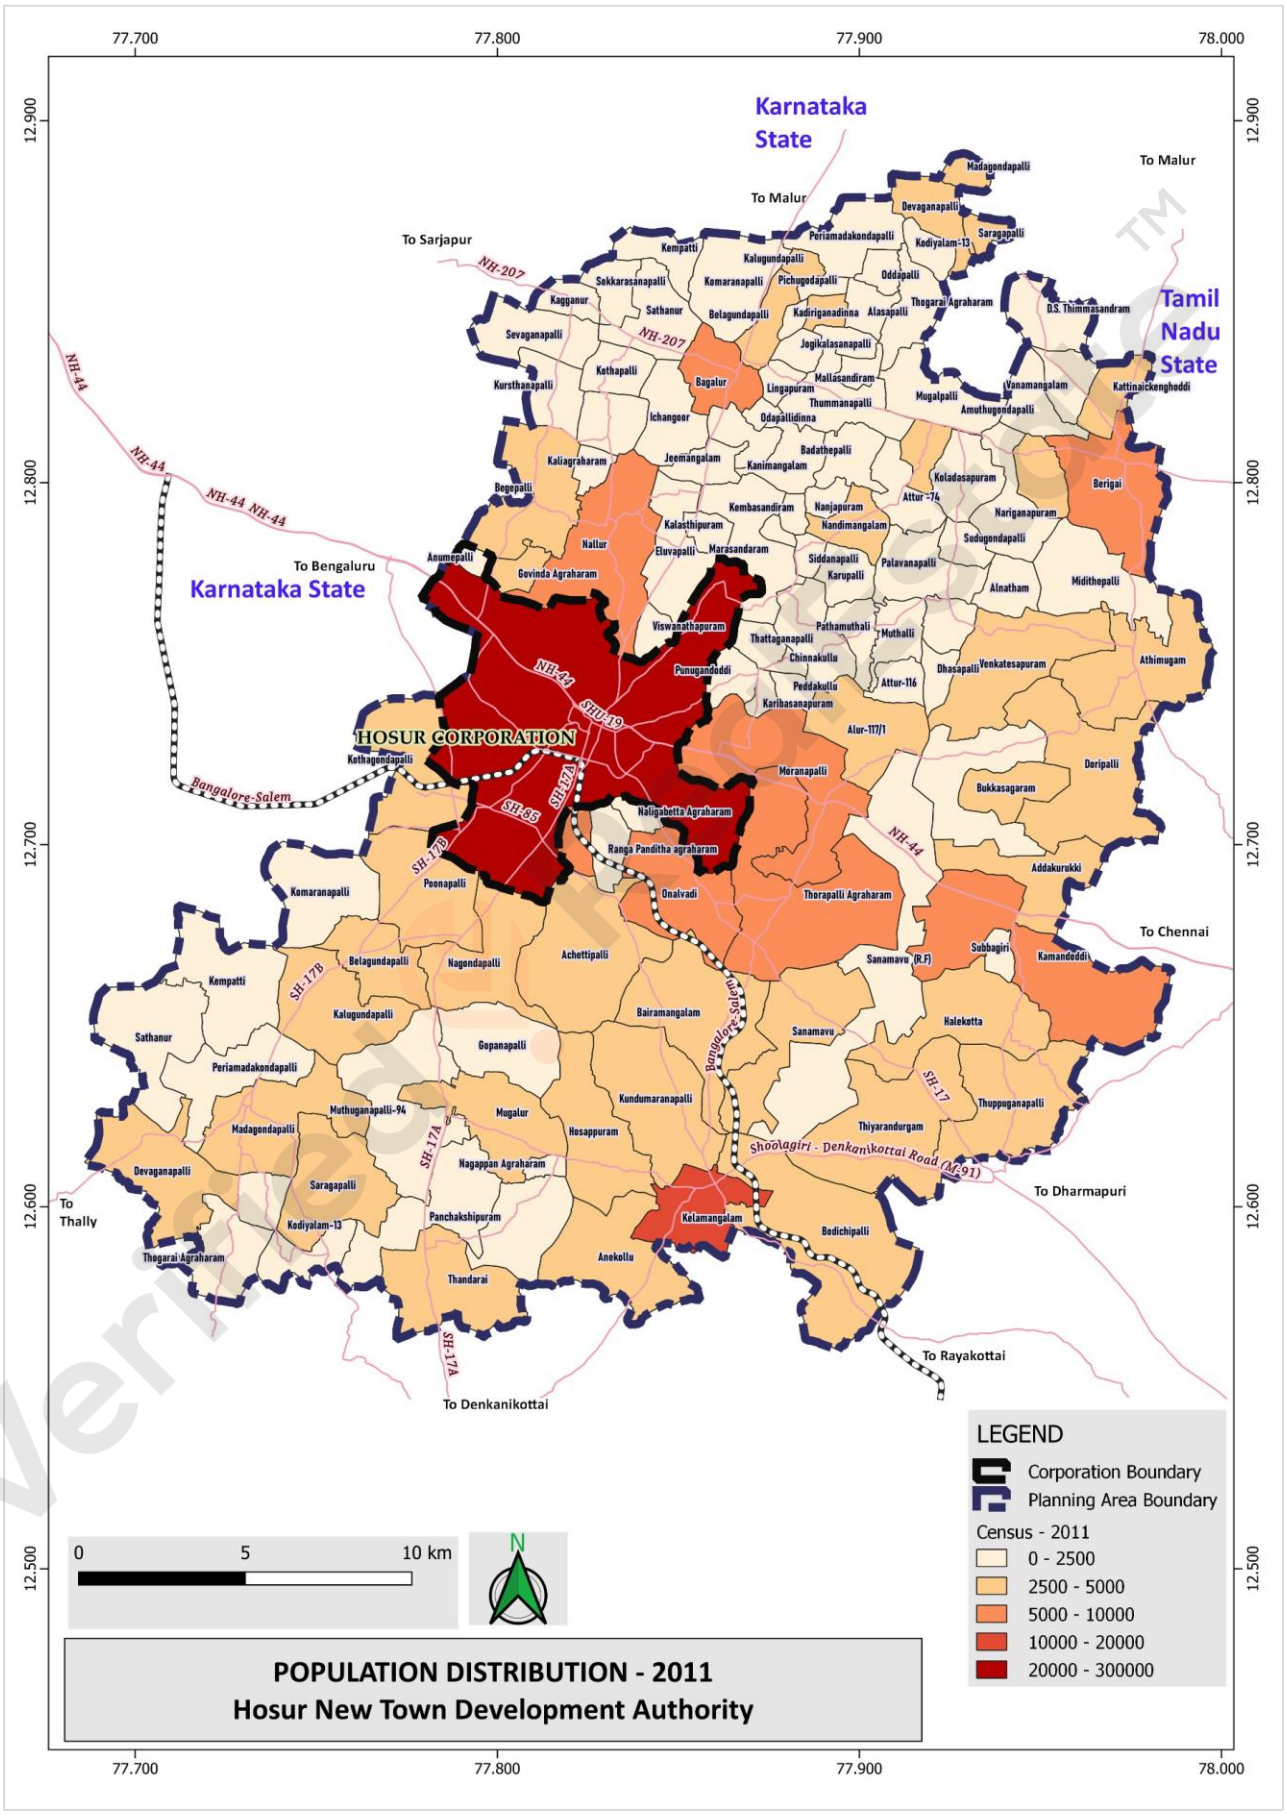

Figure 6: Population Density in Hosur Town

3.5 Sex ratio is number of females per thousand males. Hosur town has sex ratio of 968. Which is higher than the sex ratio of Krishnagiri district (958) and lower than the state average (996) as per the census 2011. The low sex ratio in Hosur is due to migration of male workers for employment leaving their families in native place. The town panchayats Mathigiri and Kelamangalam has sex ratio of 973 and 993 respectively. Among the revenue villages, Belathur village has highest sex ratio of 1302 and Sanamavoo R.F revenue village has lowest sex ratio of the 615. The sex ratio in town panchayats and revenue villages in the planning area is given in Annexure-V.

Verified © RealEstate

Figure 7: Population Distribution in the Planning Area

Verified Information TM

3.6 The literacy rate of Hosur town is 87.40 % which is higher compared to the state average literacy rate of 80.33% as per 2011 census. The male literacy rate is 90.92 % and whereas the female literacy rate is 83.74 %. The literacy rate in the town panchayats and revenue villages are given in Annexure-V.

Population Projection for 2046

3.7 Population projection is the fundamental stage in the planning process. The method of projection impact overall planning approach as it determines the magnitude of resources required. The population projection is carried out for all the settlements separately using three methods namely, arithmetic, geometric and incremental increase method.

The arithmetic method observes population changes in the past trend and continues to project for successive decades maintaining the trend. This method is more suitable for historical and developed town.

Geometric method looks at population changes in terms of percentage and projects based on growth rate trend. This method is more suitable to a city when a city is in initial stage of development.

Incremental increase method is projected considering the increase in increment of population from the past decades. This method is more suitable for town which has much scope for development.

3.8 The population for the planning area has been worked out for the years 2021, 2031, 2041 and 2046 using the three methods and is plotted in the Figure 8.

The population projection for the year 2046 based on the three methods are shown in the Table 2.

Verified RealEstate TM

Table 2: Population Projection using three methods

Year	Arithmetic		Geometric		Incremental Increase	
	Corp.	Planning Area	Corp.	Planning Area	Corp.	Planning Area
1981	46,078	1,75,875	46,078	1,75,875	46,078	1,75,875
1991	75,466	2,45,668	75,466	2,45,668	75,466	2,45,668
2001	1,51,426	3,56,594	1,51,426	3,56,594	1,51,426	3,56,594
2011	2,45,354	5,01,609	2,45,354	5,01,609	2,45,354	5,01,609
2021	3,10,824	6,08,490	4,62,341	7,76,522	3,46,530	6,79,995
2031	3,76,295	7,16,043	8,71,227	12,56,430	4,47,706	8,59,187
2041	4,41,765	8,23,594	16,41,724	21,14,002	5,48,882	10,38,380
2046	4,74,500	8,77,370	22,53,640	27,76,581	5,99,469	11,37,516

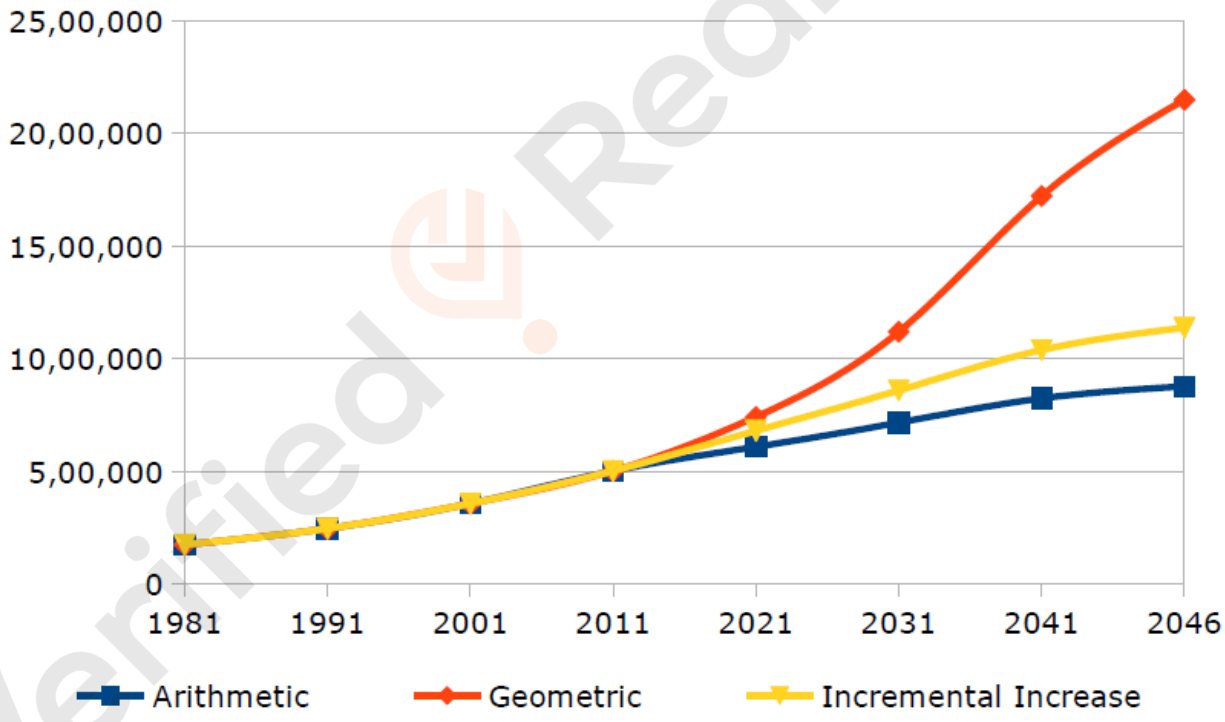

Figure 8: Population Projection for the Planning Area

3.9 According to the data maintained by Hosur Corporation, the estimated population for 2021 is 3.20 lakh, which is close to the incremental increase method. To keep up the development, the incremental increase method is well suited and based on population is projected for 2046 the planning area. This is given in the Table 3.

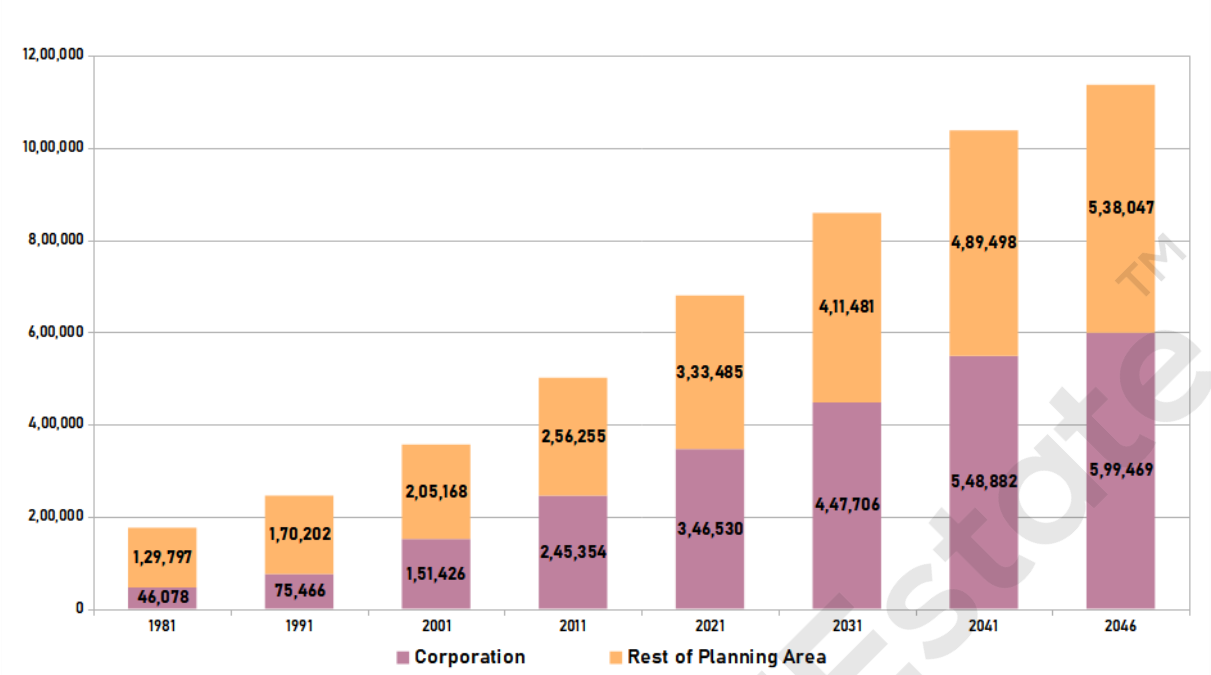

Figure 9: Population Projection using Incremental Increase Method

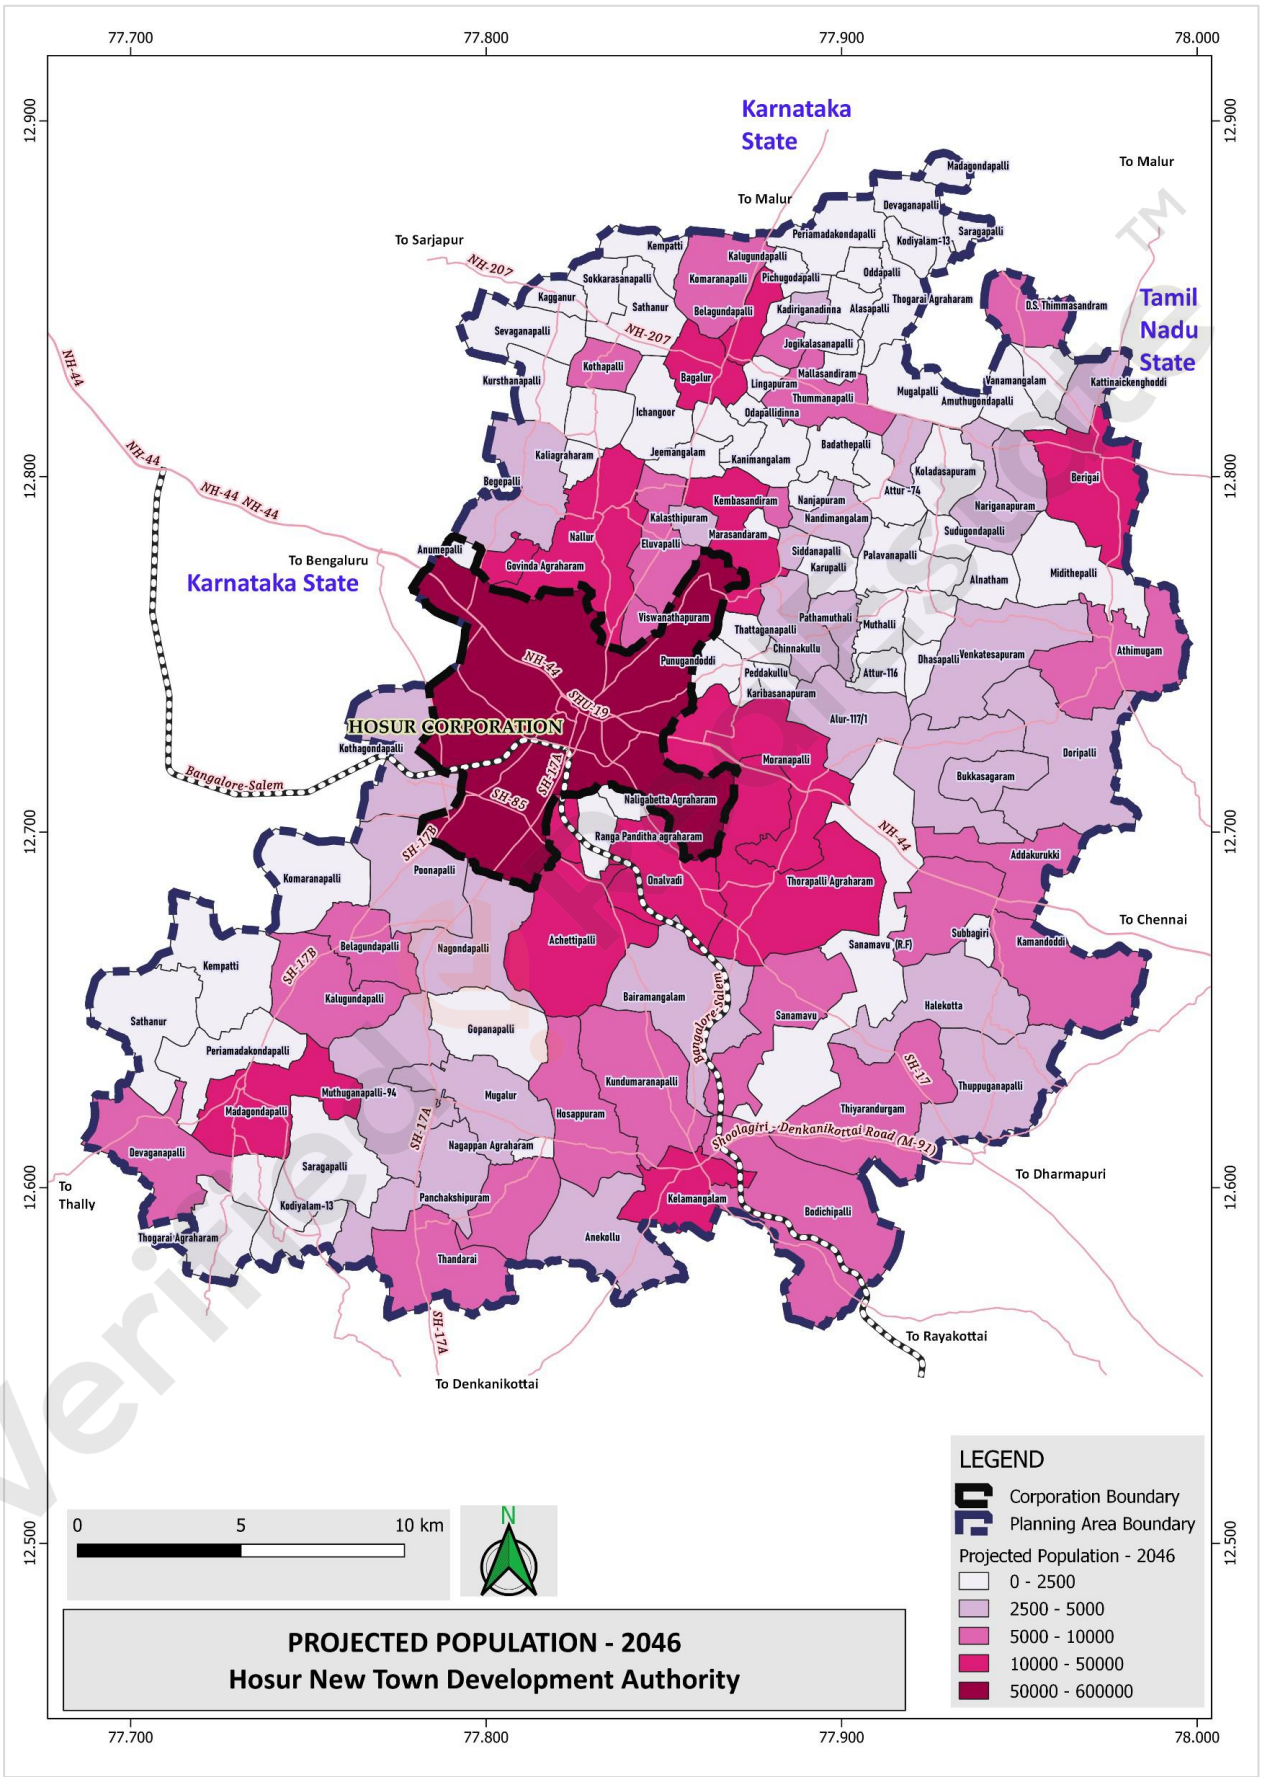

Table 3: Population Projection for 2046

Year	Planning Area	Hosur (Corporation)	Kelamangalam (TP)	Hosur (Rural)
1981	1,75,875	46,078	7,108	1,22,689
1991	2,45,668	75,466	9,082	1,61,120
2001	3,56,594	1,51,426	11,052	1,94,116
2011	5,01,609	2,45,354	13,321	2,42,934
2021	6,79,995	3,46,530	15,740	3,17,725
2031	8,59,187	4,47,706	18,158	3,93,323
2041	10,38,380	5,48,882	20,577	4,68,921
2046	11,37,516	5,99,469	21,786	5,16,261

3.10 The Figure 9 shows the projected population for planning area for corporation and rest of the planning area. Projected population distribution of the planning area is shown in Figure 10. This chart shows a sturdy growth rate for the population for planning area.

Verified RedEstate TM

Figure 10: Population Projection for the Planning Area -2046

4.Environment

4.1 The Forests, agriculture resources, mineral resources and water bodies in the Planning area has to be conserved for future generation.

Climate, Environment and Issues

4.2 Hosur experiences distinct wet and dry season of moderate climate throughout the year, with occasional heat waves. The summer heat is moderated by fairly frequent thunderstorms. The coolest month is January with an average low temperature of 17.1°C and the hottest month is May with an average high temperature of 33.6°C.

4.3 The average humidity is 31%. The month with the highest relative humidity is October (77.17 %). The month with the lowest relative humidity is March (43.75 %).

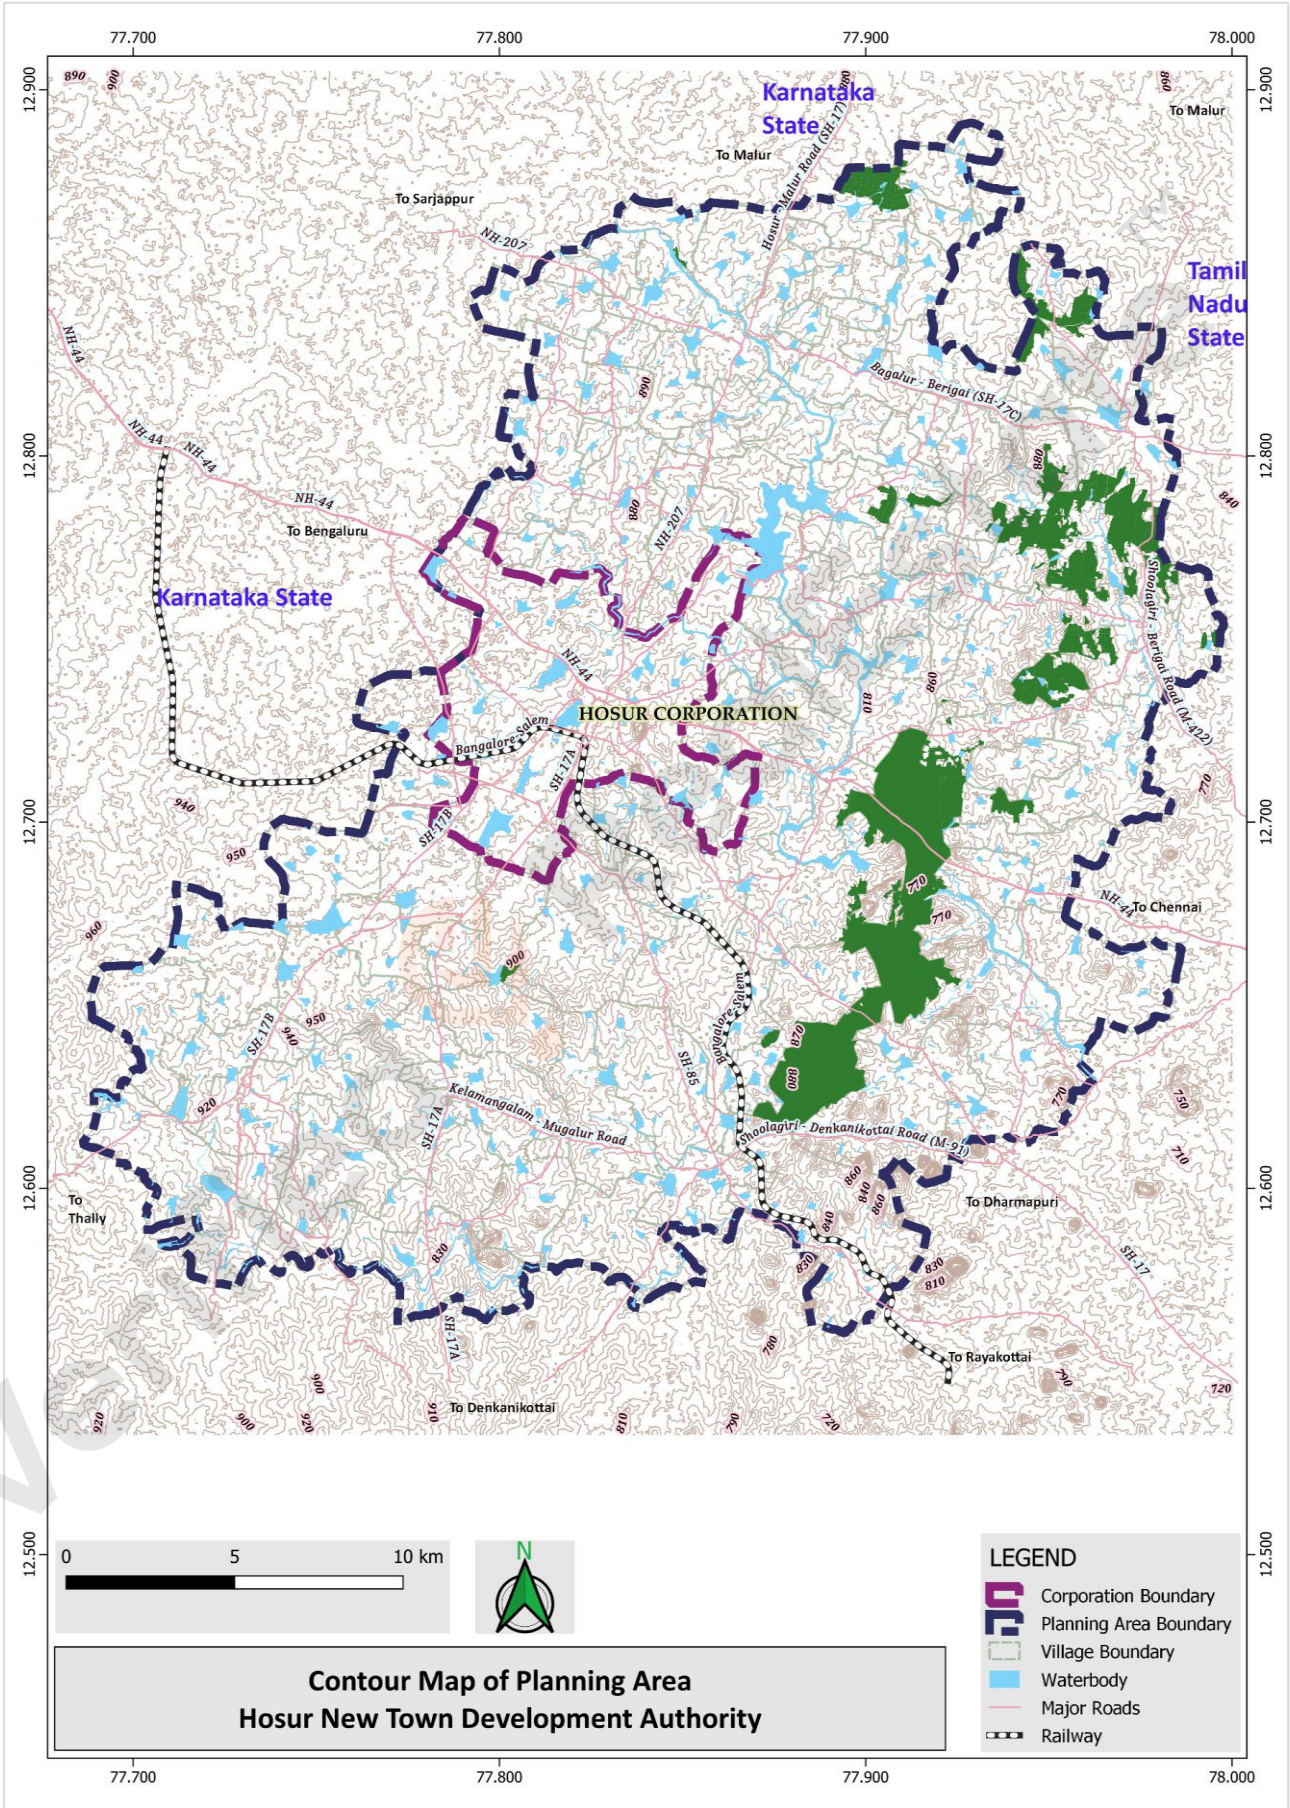

4.4 Hosur and its hinterland receives maximum rainfall during the north east monsoon is from October to November. The total rainfall received during 2021 is 1130mm against the normal rainfall of 842mm.

4.5 Planning area lies in an undulated terrain and located in elevated position on this district compared to other parts of district. The geomorphology of region is denudation like land form with buried pediments and slightly aged hills with wedge top. The gradient flows from northwest to southeast. The average elevation of this region is 880 m above mean sea level. It is shown in the Figure 11.

4.6 The natural resources such as land, water, air and biological resources is impacted by the developments. The industrialization and urbanization are polluting these natural resources. The strategies to mitigate the effects of pollution are discussed in this chapter.

Verified RedEstate ™

Figure 11: Contour Map of the planning area

Water Pollution

4.7 Thenpennai river flows across planning area for a length of 41.79 km. The river feeds Kelavarapalli dam which is contaminated mainly due to untreated and partially treated sewage from Bengaluru, solid waste dumping and mixing of domestic sewage into the river stretch flowing from Channasandra bridge to Bagalur bridge. In the year 2020, Central Pollution Control Board (CPCB) declared the river as polluted. Thus, the important water source for the corporation is curtailed. CPCB has taken action to mitigate water pollution by increasing Sewage Treatment Plant (STP) in Bengaluru by evicting dyeing industries along the Thenpennai River and proposed continuous effluent monitoring.

Figure 13: Waste dumping – Bagalur bridge

4.8 During the field visit near Kodiyalam village, the frothing in water is observed. The water is dark grey in colour.

Figure 12: Pollution of Thenpennai River

4.9 CPCB has to constantly monitor the industries and to ensure zero discharge from the industries located in the Planning area and ensure establishment of ETP (Effluent Treatment Plant) in the industries. The treated effluents are either recycled back to the process or discharged on their own land for green belt development after satisfying the standards.

Air Pollution

4.10 Air pollution is caused by emission from industries, vehicles and dust generated by mining of granites and rough stones. Various awareness campaigns, workshops, rallies are being conducted regularly to highlight importance of keeping the environment free from pollution. During festival seasons such as Deepavali and Bhogi, an awareness campaign is launched to reduce air and noise pollution.

4.11 Air quality shall be monitored by Tamil Nadu Pollution Control Board (TNPCB), Krishnagiri district through various measures including encouraging the use of electric vehicles.

Pollution due to Mining

4.12 The mining of granites, rough stone and polishing of granites are causing the air, water, land and noise pollution. Mineral resources can be worked out for improving the economy by taking the following measures for reducing the impact of mining on environment.

Air Pollution

- The emission of contaminants to the atmosphere by proper planning and zoning of quarrying areas.
- Water sprinkling on road that transport minerals from mines
- Black topping of the main transportation roads to the possible extent.
- Avoiding crowding of trucks by properly spacing them to avoid the concentration of dust emission at any time
- Covering the trucks by tarpaulin sheets during ore transportation
- Proper maintenance of HEMM (Heavy Earth Moving Machinery) to minimize gaseous emission
- Imparting sufficient training to operators on safety and environmental parameters
- Development of green belt / plantation around mine, along the roads, backfilled area in various undisturbed areas within the mine lease areas etc.

Water Pollution

- Industrial effluent treatment systems shall be introduced wherever necessary and maintained properly.
- Safety barriers shall be provided for all water bodies and no mining activities shall be carried out in the safety barrier area.
- Mitigate measures like construction of garland drains formation of earth bunds shall be followed in the waste dumping areas to avoid wash off.
- Domestic effluents shall be treated in scientific manner
- Required statutory clearances shall be obtained and all precautionary measures to be adopted wherever pumping of ground water is involved.

Verified RealEstate™

- Recycling of water used in crusher units and prevention measures of polluted water into water bodies by proper storage within the unit so as to avoid water contamination

Noise Pollution

- Planting rows of native trees around mine, along the roads, other noise generating centres act as acoustic barriers.
- Sound proof operator's cabin for equipment may lead to less noise generation.
- Proper and regular maintenance of equipment may lead to less noise generation
- Air silencers of suitable type that can modulate the noise of the engines of machinery shall be utilized and shall be maintained effectively.
- Providing in-built mechanism for reducing sound emissions.
- Providing ear muffs to workers exposed to higher noise level and to those persons operating or working close to any machine.
- Conducting regular health check-up of workers including Audiometric test for the workers engaged in noise prone area.

Land Degradation

4.13 Scientific reclamation measures shall be adopted to reduce the impact of land environment due to mining. Quarrying of Granite and Rough stone pits after back filling may be used for land reclamation and the unfilled quarry pits may be used for ground water recharge and as fishery ponds.

Biological environment

- The quarrying areas in the district are mostly of dry areas, afforestation to be carried out in the quarrying areas.
- Necessary mitigate measures like dust suppression, proper maintenance of equipment, black topping of roads etc., to be carried out to prevent dust generation & any further impact on the vegetation.
- Conservation plan for schedule –I species if any to be prepared in consultation with the Forest Department and the proposals given in the conservation plan to be strictly implemented.

Verified RealEstate™

Enhancing Blue Assets

4.14 Water conservation is the most important strategy for water planning and management for the future decades. Planning water conservation can help reduce per capita demand. The success of conservation measures depends on public support and behaviour change. Public water conservation campaigns shall raise awareness in all levels of society about the importance of saving water to cope with its scarcity and ensure sustainability. The aim is to change citizen attitudes and behaviour to improve water use efficiency.

4.15 The rivers that flows across planning area is Thenpennai river for a length of 41.79 km and Chinnar river for a length of 13.70 km. Wells are the major source of irrigation, supplemented by tanks and canals. Kelavarapalli reservoir is situated near Hosur Corporation. Thenpennai River carries water to this reservoir. The list of major water bodies is given in the table below.

Figure 14: Kelavarapalli dam

Table 4: Major water Bodies

No	Name of the Water Bodies	Village/Town	Area in Ha
1	Ramanaicken Eri	Hosur Corporation	52.90
2	Komudinanjaiyan Eri	Thogaraiagraharam	43.46
3	Nagendra Eri	Belagondapalli	32.34
4	Sinnappakodigal Eri	Mathigiri	30.45
5	Nayan Eri	Kodiyalam	28.18
6	Berikai Kulam	Berikai	26.59
7	Thatharao Eri	Zuzuvadi	25.42

4.16 Under Tamil Nadu Sustainable Urban Development Programme, Hosur Corporation has undertaken Model City scheme for Urban Design Improvements. The major works under this scheme include restoration of upstream water bodies, Restoration of Kalkeri Lake and Anthivadi Lake and redevelopment of Ramanaicken Lake. This scheme has to be expedited for improving the water supply.

Table 5: Restoration and Redevelopment of Water bodies

Restoration and Redevelopment of Waterbodies

Anthivadi to Ramanaicken Lake	

Verified @ RealEstate™

Conservation of water bodies

4.17 It is essential to conserve the water bodies to improve the ground water level. Planting trees around the lakes and linking water bodies will improve the water flow. The developments are prohibited around the water bodies leaving setbacks are shown in Table 6. Water bodies spread in the planning area are shown in the Figure 15.

Table 6: Recommended Setback around Water Bodies

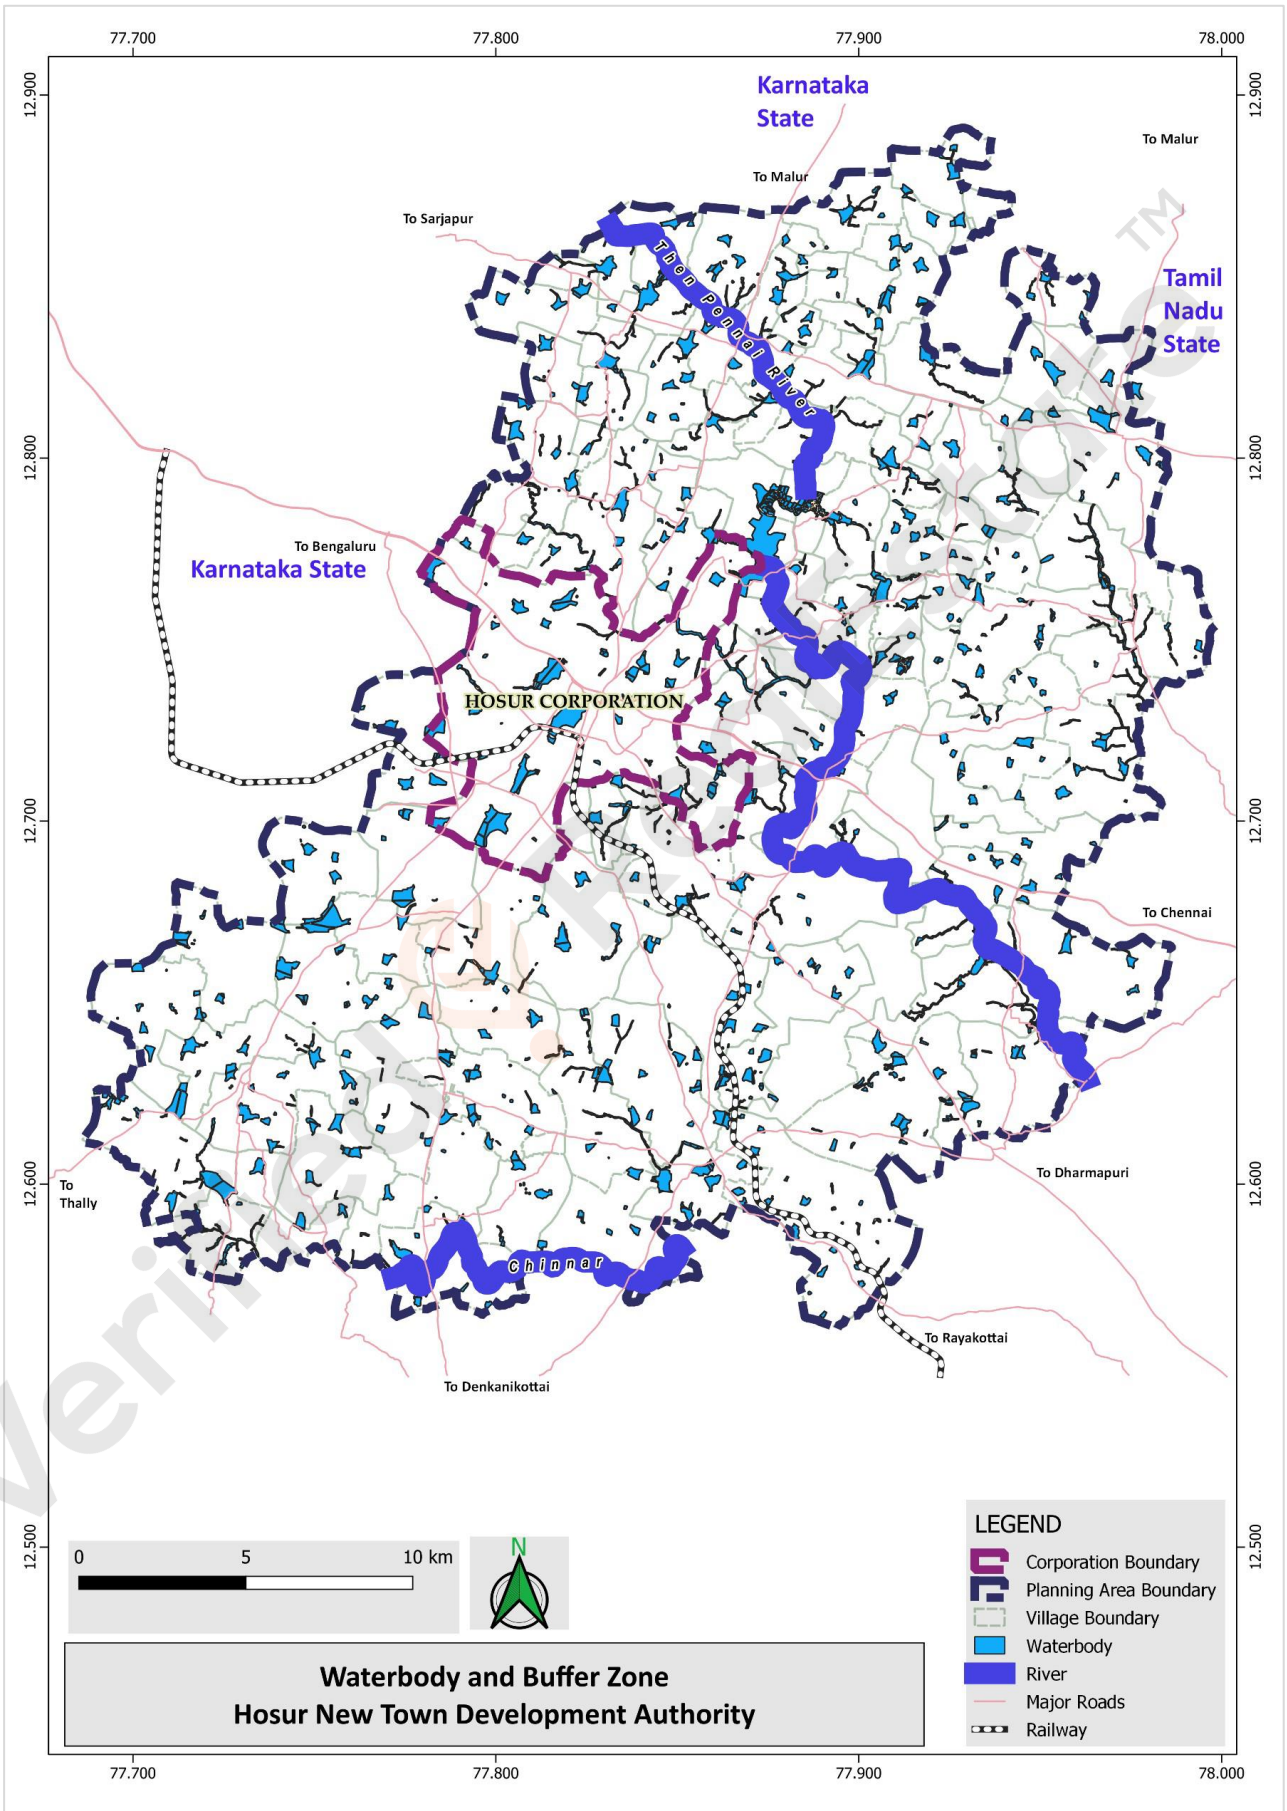

No.	Water Bodies Setback	Setback (in metres)
1	Field Channel of width less than 1m width	1
2	Major Canal more than 1m width	3
3	River	15
4	Lake	3

4.18 In addition, the following measures may be adopted for conservation of water

- Fostering public awareness in water conservation
- Encourage Rain Water Harvesting (RWH) mechanism in every building
- Suggest indicators to measure conservation and efficiency
- Update database of all the relevant information in GIS format after water audit
- Sustainable urban drainage management

Verified RedEstate ™

Figure 15: Water Body and Buffer Zone

Green Assets

4.19 Planning area has a forest cover of 42.30 sq.km. It accounts for 5.76 percent of the total geographical area of planning area. This is categorised as tropical dry deciduous forest, which is home for variety of flora and fauna. The details are given in the Table 7.

Table 7: Flora and Fauna in planning area

Flora			Fauna		
1	Trees species	168	1	Mammals	38
2	Shrubs species	67	2	Birds	262
3	Climbers' species	22	3	Reptiles	30
4	Bamboos species	2	4	Amphibians	10
			5	Butterflies	172
	Total	**259**		**Total**	**512**

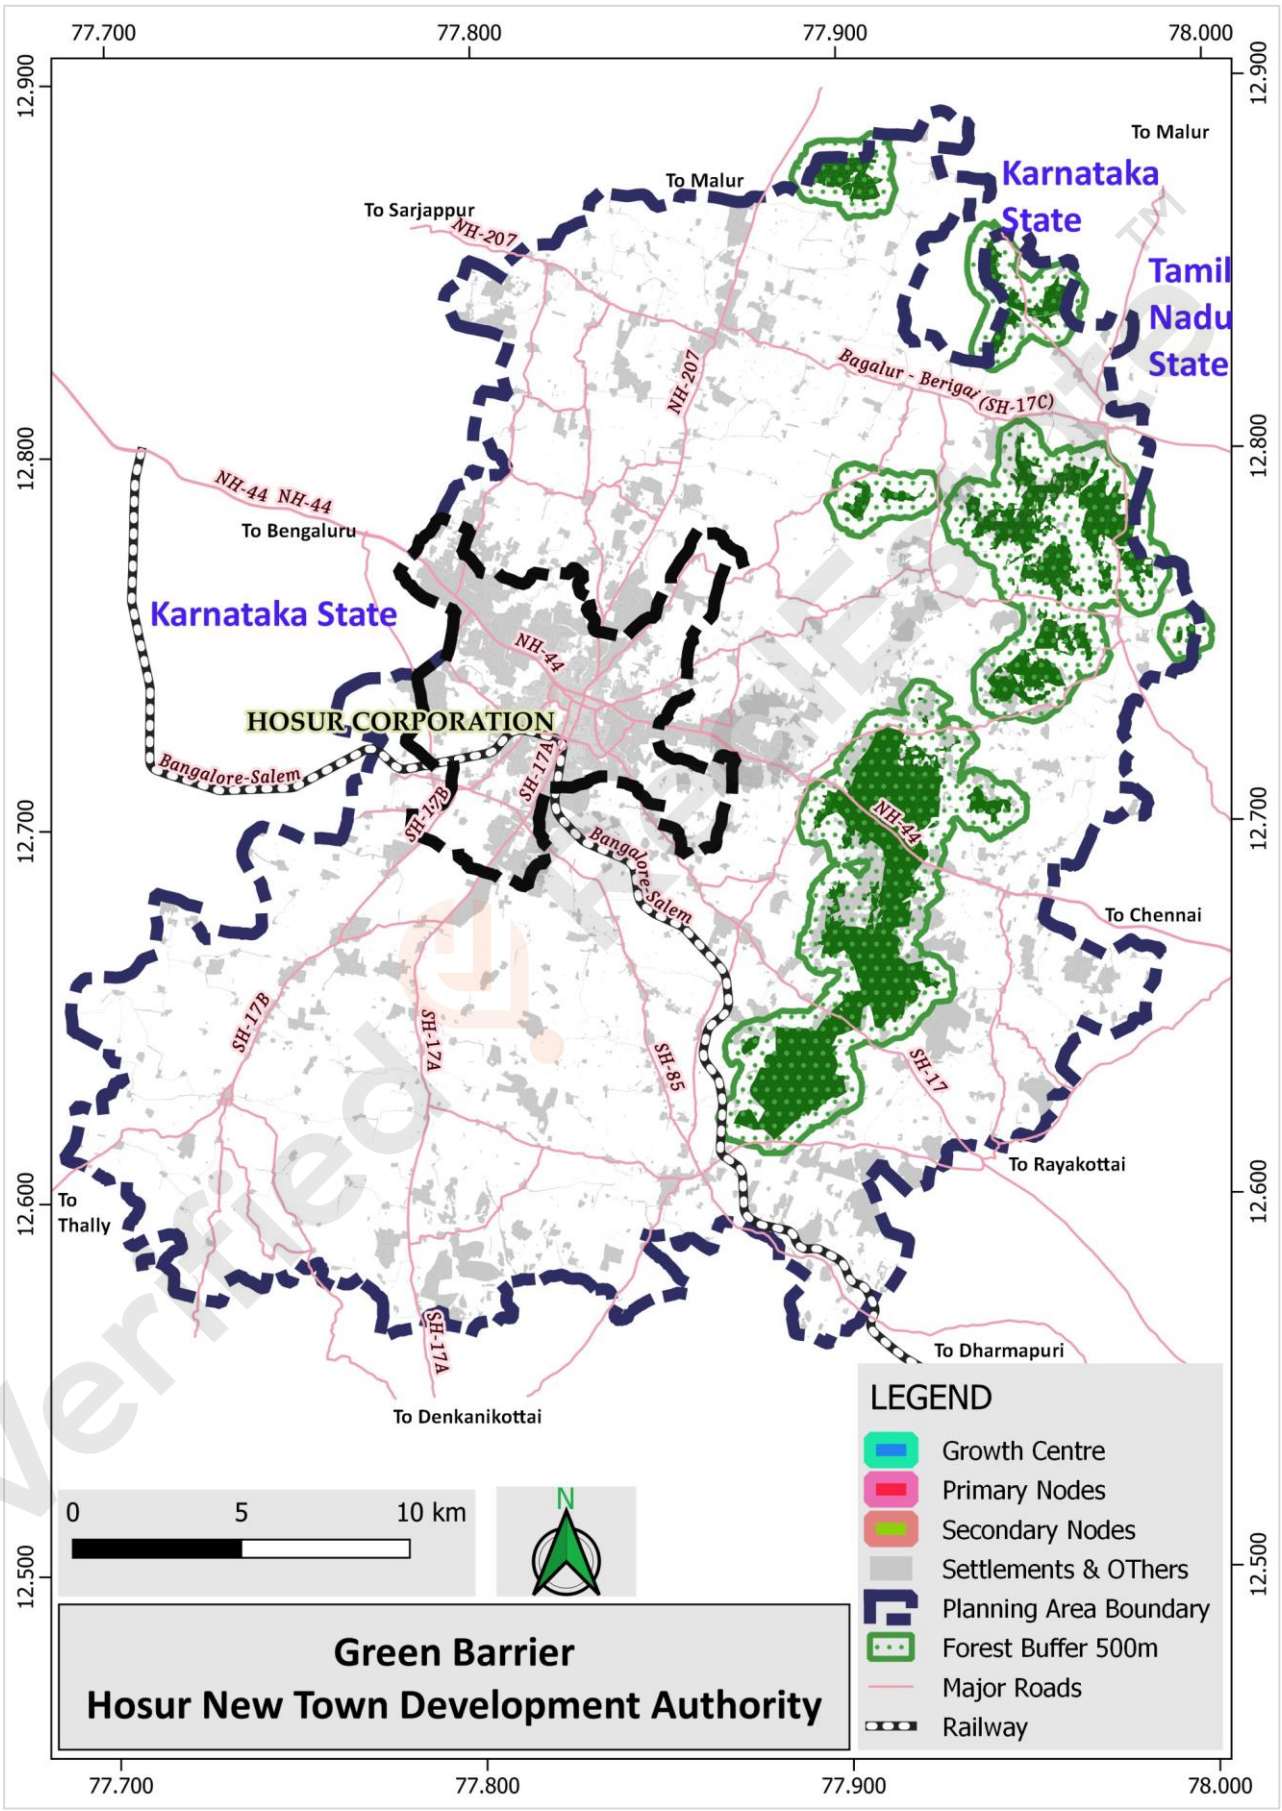

Green Belt

4.20 Greenbelt in India refers to a buffer zone created beyond which industrial activity may not be carried on. This concept has developed through a long line of cases and today, greenbelts are present not only for the purpose of protecting sensitive areas to maintain ecological balance but are also be found in urban areas so as to act as a sink for the harmful gases released by vehicles and industries operating in the city area. In this regard, comprehensive Guidelines for Developing Greenbelts have been compiled by the Central Pollution Control Board (CPCB).

4.21 As per the stipulations of MoEF, greenbelt is to be provided all along the boundary by planting tall, evergreen trees and the total green area including landscaping area will be 1/3rd (about 33%) of the industrial area. Depending on the size, activity and environmental impacts of the industry; extent of land available, agro-climatic conditions, at least 5 m wide greenbelt of two rows of tall and evergreen plants shall be grown at the rate of 600 per acre (1500 per Ha). Central Pollution Control Board suggested indigenous plantation with recommended spacing in order to protect the environment.

Verified RealEstate ™

Figure 16: Green Barrier

4.22 The planning area has multiple economic bases like industries, agriculture, horticulture and floriculture. Development of industries in and around planning area is unavoidable as the land value peaks in core corporation. Existence of forest and animal activities in the planning region make the area as environmental sensitive. To conserve the forest, master plan created the concept of Green Barrier in the forest area. A buffer of 500 m green belt is provided from the boundary. Development proposals around those zones are avoided. The buffer zone of forest area is shown in the Figure 16.

4.23 Hosur is known for Industrial developments. Existing SIPCOT 1 and 2 along with Proposed Phase 3 and 4 contributes more for industrial development. Presence of SIPCOT and its location is still an attractive destination for automobile and other industries. To conserve environment, Green Belt concept is introduced by CPCB. Each industry has to plant trees with suggested species, numbers and spacing, to reduce the environment degradation by reducing the air pollution.

4.24 Besides to increase the green belt, it is recommended to take up social forestry in vacant government lands, mined areas and on road sides.

Verified RedEstate™

Endangered Species

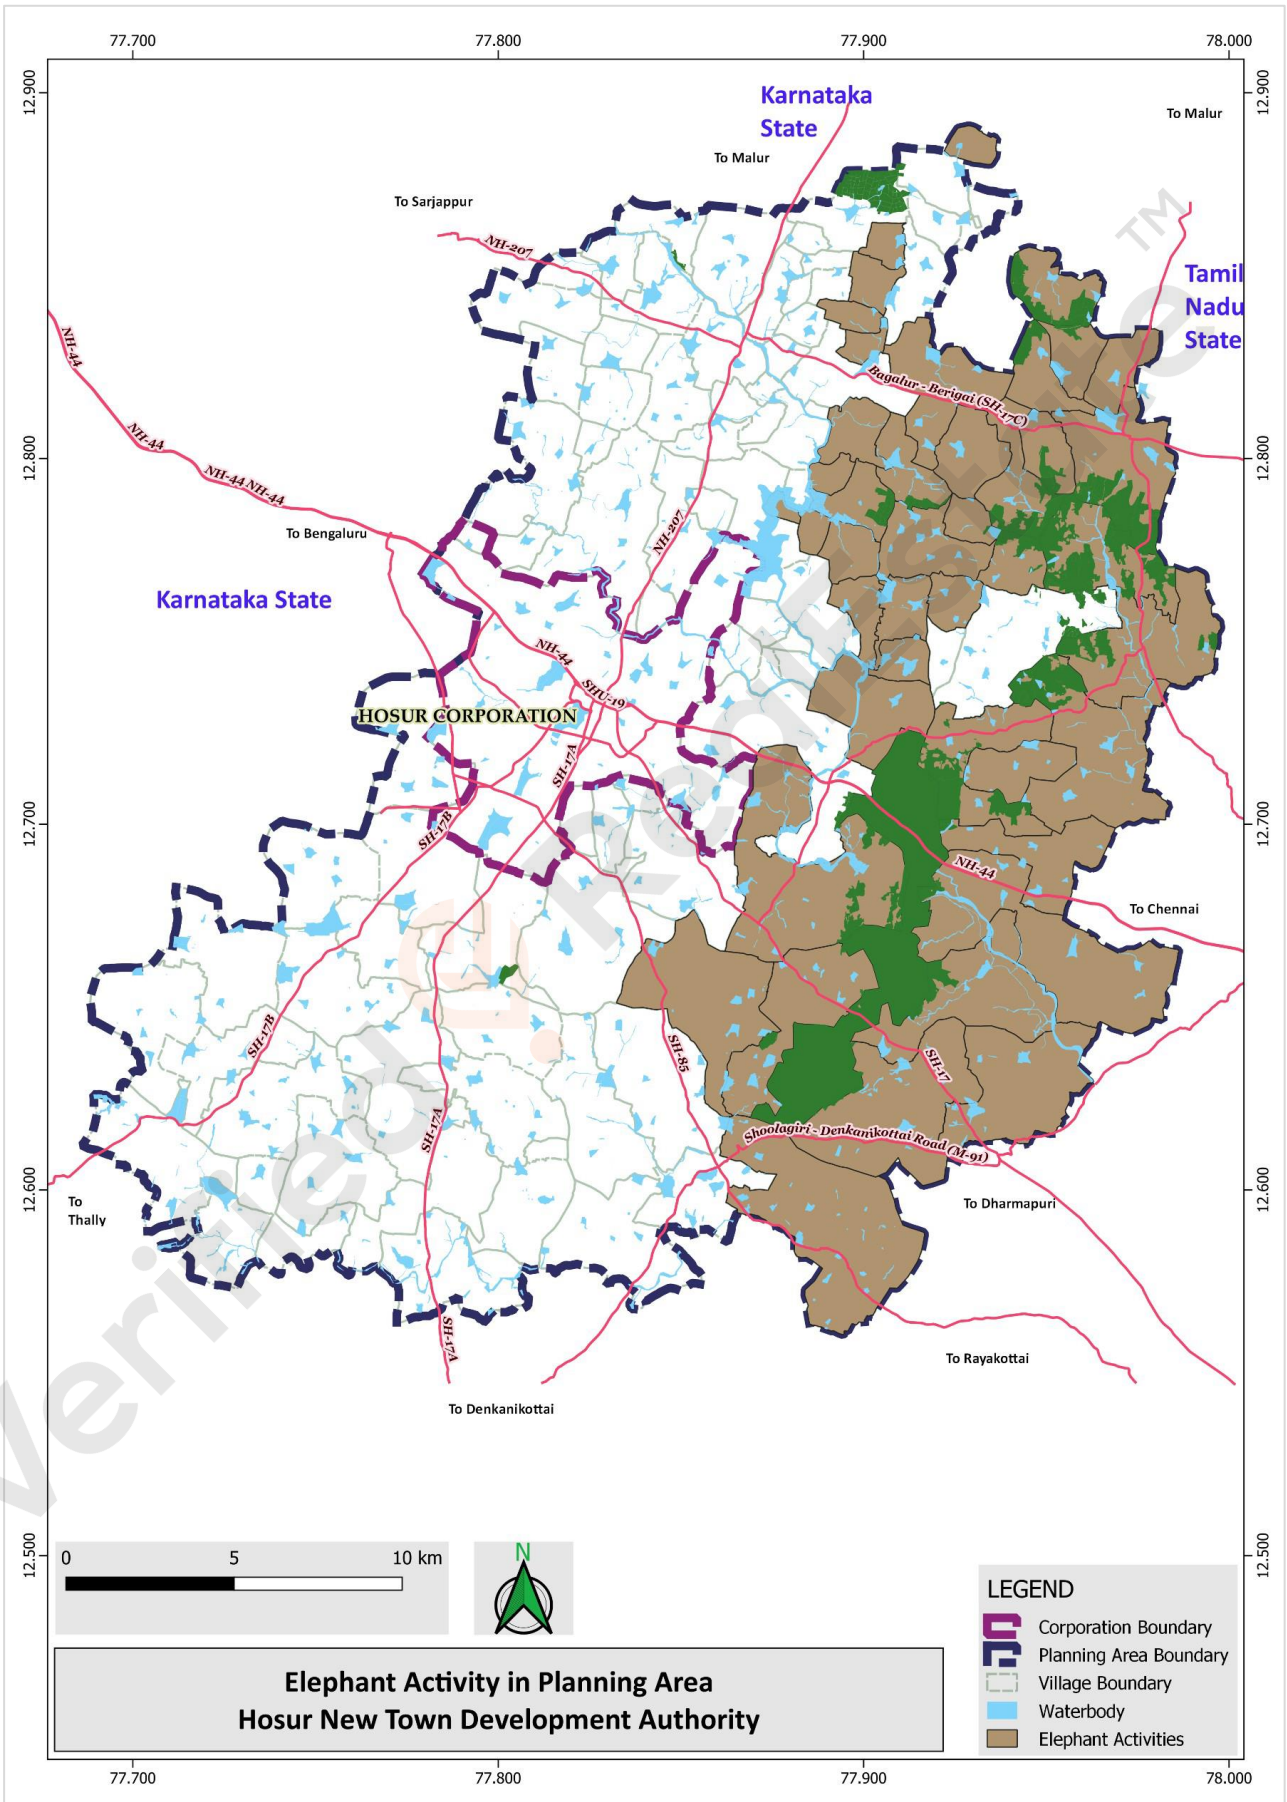

Figure 17: Signage in NH-44 for Elephant Crossing

4.25 The elephant habitat of Mysuru-Nilgiri landscape supports one of the largest populations of elephants in the country. The forest area covering an extent of 42.30 sq.km lies on the eastern side of the planning area. The Sanamavoo reserved forest occupies an area of 16.55 sq.km in the planning area. The national highway (NH-44) runs across Sanamavoo reserved forest. The forest is an abode for many wildlife and the most important is Asian Elephants that are under endangered species category. An elephant passage exists in the planning area and this causes human- conflict resulting in causalities on both sides. The existence of elephants is threatened by laying highways, railway tracks, constructing dams and forest being converted into commercial plantation, thereby the area of forest is reduced and fragmented by human activities. Due to elephants crossing, alert sign board has been kept along the NH-44 as shown in Figure 17.

Verified & Registered

Figure 18: Elephant Activity in Planning Area

Protection of Endangered Species

4.26 It is recommended to construct an elevated passage for elephants to cross NH-44 near Sanamavoo reserved forest. The elephant passage alignment shall be identified by conducting the detailed survey. This corridor shall be notified and legally protected under appropriate law to prevent encroachment and limit developmental activities and the industrial corridor that is detrimental to animal movement. It shall also be declared as eco fragile area and necessary process under taken to secure it with people's participation.

Figure 19: Animal Cross-way

Verified RealEstate™

5.Economy

Emerging Industrial Hub

5.1 Hosur has a strong and vibrant economy. Since Hosur town experiences salubrious weather, it suits cultivation of flowers such as Roses, Jasmine, Mullai, Crossandra, Chrysanthemum and Marigold, vegetables and fruits on a large scale. This agrarian advantage to cultivate these crops has given the town a cutting edge in agricultural sectors when compared to its neighbouring towns.

5.2 During 1950's, the industrial development attained much focus. The geographical factors such as regional positioning of Hosur, pleasant weather, passing of golden quadrilateral, proximity to electronic city of Bengaluru, passage of Salem-Bengaluru broad gauge line through Hosur town, International airport in Bengaluru, availability of both skilled and unskilled workers have led to the establishment of industries on large scale such as agro-based industries, stone processing industries, engineering manufacturing industries, (IT) industries, automobile industries, leather and paints, and electronic goods, etc. Presently, Hosur is also emerging as an Electric Vehicle (EV) manufacturing hub. This has created huge employment opportunities resulted in growth of urbanization in the planning area. Now, Hosur area is an industrial hub in the western part of Tamil Nadu and the floriculture hub in India.

Workforce Distribution

5.3 The total working population in Planning area of Hosur Corporation is 2,10,202. of which male workers population is 72.10% and female workers population is 27.9%. The number of male and female workers in planning area are given in the Table 8.

Table 8: Work force participation

Area	No. of Worker		
	Total	Male	Female
Hosur Corporation	94,411	73,780	20,631
Kelamangalam(TP)	5,522	3,833	1,689
120 revenue villages	1,10,269	73,934	36,335

Verified PadEstate™

Workforce Projection

5.4 As per the census 2011, the working population in the planning area is 2,10,202 which is 41.90 percent to the total population. This percent is used to estimate both urban and rural. The workforce projection is tabulated in Table 9.

Table 9: Projected Work force 2046

Year	Population	Projected Working population
2011	5,01,609	2,10,202
2021	6,79,995	2,84,917
2031	8,59,187	3,59,999
2041	10,38,380	4,35,081
2046	11,37,516	4,76,619

Economic Activities

5.5 Agro-business, flori-business, metal based and mineral based industries are the leading economic activities in the Planning area.

Agriculture

5.6 Moderate weather, red soil with irrigation facilities provided by tank and wells suits cultivation of spectrum of agro crops, horticultural crops and flowers. The agricultural land including pastures land and grazing land in the planning area constitutes 42 percent of total area. Krishnagiri block shows the highest cropping intensity 175.29% in the state with Hosur at 113%. Cropping intensity of above 100% infers that more than one crop is raised in a year.

5.7 The major crops grown are Paddy, Ragi, Cholam, Red gram, Black gram, Horse Gram, Mango, Coconut, Cabbage, Banana, Tomato, Cauliflower etc., and the major cash crops are groundnut, flowers and cotton. The horticultural crops such as mango, banana, grapes, guava etc. Roses, Jasmine, Mullai, Crossandra, Chrysanthemum and Marigold are grown widely in the area.

5.8 Agro products are marketed through regulated markets, co-operative marketing societies, Uzhavar sandhai (Fruits and Vegetables), Wholesale markets and Local Shandies. Apart from these Weekly markets and daily markets also exists. Hosur is

Verified RealEstate™

the major distribution centre for vegetable fruits and flowers to Chennai and Bengaluru.

Floriculture and Horticulture

5.9 Hosur town is bestowed with ideal condition for commercial floriculture such as Spray Roses, Jasmine, Mullai, Crossandra, Loose Chrysanthemum, Marigold Dutch Roses, Gerbera and Carnation throughout the year. It has emerged as an important sub-sector of agriculture generating substantial income for small and marginal farmer. The annual production of flowers from Krishnagiri district is 39,383 MT.

5.10 The area under flower cultivation in Krishnagiri district is 3702 Ha. Flowers are exported to countries like Australia, Singapore, Malaysia, UK and UAE. Through the export of flowers substantial foreign exchange of Rs 150 to 200 crore is earned annually. Under National Horticulture Mission, financial assistance in the form of 50% subsidy is given to the farmer to take the cultivation of flowers for the benefit of farmers and boost the economy. Based on the demand for floriculture, International Flower Auction Centre is established at Moranapalli village in the planning area. The flowers are not only marketed in local markets but also in other districts, across states and all over India.

5.11 Taj mahal, Avalanche, Sweet Avalanche, Peach Avalanche, Royal Circus, Gold Strike, Revival, Bon heur, Corvette and various varieties of roses are cultivated by TANFLORA which is located in Amudhakondapalli village in planning area. TANFLORA is India's first project in agricultural export zone scheme, a joint venture of Tamil Nadu Industrial Development Corporation Limited (TIDCO) and CCL flowers Private Limited, Bengaluru. It provides land and centralized infrastructure, state-of-the-art post-harvest logistics and marketing facilities to 25 growers. The revenue is shared between TANFLORA and growers in 25:75 ratio on FOB basis.

Figure 20: Floriculture in Planning Area

Verified RealEstate™

5.12 Flowers produced are marketed through integrated flower market complex in Hosur with 80 shops. Also, the flowers are auctioned both online and offline in the international flower auction centres in Moranapalli. It spreads over extent of 7.6 acres with farmers and training centre, halls for sorting, distribution, auction and purchase, cold storage and other facilities. It can handle 5 lakh flower per day which can be expanded.

5.13 The flori-business is beset with lack of international linkage, lack of post harvesting facilities and lack of credit. To overcome the problems, it is recommended for establishment of an international airport in Hosur, which facilitates direct exports of cut flower to foreign countries. This ensures higher income to the actual flower growers.

5.14 Creation of post harvesting facilities and financial succour in form of credit to farmers would encourage more farmers to step into the flower business. An annual event showcasing the types of flowers produced for export would further boost of floriculture in Hosur area and also promotes tourism.

The list of crops yields in the three main Firkas are listed in Table 10.

Demonstration farm

5.15 Hosur cattle farm in Mathigiri is a demonstration farm that cover an extent of 1,641.41 acres. The farm raises Red Sindhi cattle and Kangeyam cattle to encourage pure breeding and to preserve native breeds.

Verified RegEstate™

Sericulture

5.16 Government Sericulture Training School was established in 1973. The objective is to impart training for persons in pursuit of sericulture. During the year 2005-06, it was registered under Tamil Nadu Societies Registration Act 1975 and named Tamil Nadu sericulture training institute. Sericulture is one of the auxiliary agricultural activities pursued by farmers for supplementing their income. The weather regimes in Hosur area amply supports the cultivation of mulberry and production of cocoon.

5.17 It is largely carried out in Thally, Shoolagiri, Hosur and Veppanapalli blocks. The mulberry cultivation also called Moriculture is an allied activity of sericulture. The details of cocoons produced in 4 blocks and the value of it are shown in the Table 11.

5.19 Infrastructure for increasing the shelf life of agriculture crop, horticulture crops and flowers need to be strengthened for augmenting income for the farmers and to the state economy. The existing whole sale market shall be permitted to undertake regeneration. This shall facilitate modernization and capacity enhancement for meeting the future requirements. Mundys, storage and cold storage facilities shall be permitted to develop within Hosur area. Conversion of industrial plots into warehouses shall be permitted within industrial uses. Vegetable market is proposed at Moranapalli survey number 915 with an extent of 3.5 hectares.

Verified RedEstate

Figure 22: Market Facilities in Hosur

Verified Real Estate

Granites

5.20 Hard and ancient rocks are capable of taking polish are called Granites. In Hosur, Denkanikottai belt, Bodichipalli in Denkanikottai taluk has rich deposits of Pass Paradiso and Red Multi colour granite, Kalugondapalli, Thogarai Agraharam and Devaganapalli in Denkanikottai and Addagurukki in Hosur are endowed with Black granites or Dolerite in geological parlance. Mining leases for colour granite and black granite have been granted in their patta lands over an extent of 9.53 Ha. TAMIN, a State-owned corporation has been mining Black granite in Devaganapalli. Besides, rough stones are abundant in Hosur, Shoolagiri and Denkanikottai taluks. They are used to manufacture jelly stone/coarse aggregate and M-sand. Leases have been granted to 64 private persons to quarry rough stones in their patta lands covering an extent of 172.21 Ha in the planning area. The granites are polished in a number of units located in Shoolagiri and Hosur areas. They are exported to United States of America, England, Australia and European countries and a major source of foreign exchange earner. Through seigniorage fees, imposed on production of granites, a substantial revenue is generated to Government.

5.21 The mineral potential in this belt is not fully realized. The mining and quarrying operations in Hosur area has been impacting 4 spheres of the Earth namely Lithosphere, Atmosphere, Hydrosphere and Biosphere. Mining and quarrying activities leaves huge pits, creating eyesores, and these uncovered pits serve as death traps for humans and animals, leasing out agricultural lands to mining activities cause reduction of area under the agriculture. Excavation of granites, movement of HEMM such as excavators, tippers and transportation of granites generate huge debris. Those debris in size less than 10 microns are potential threats to human beings in causing respiratory diseases such as Bronchitis, Emphysema and Asthma. Air pollution is also caused by emission of sulphur-di-oxide, carbon-mono-oxide from diesel driven mining equipment, compressors, generators, etc. Huge tracts of vegetation are cleared for mining activities stressing the habitats of fauna and flora.

5.22 Geological investigation in this belt shall be carried out for identification of workable deposits, and revenue generated from mineral resources could be augmented. Systematic, sustainable and eco-friendly mining must be planned and executed to abate the environmental degradation. The strategies to reduce the environmental impacts, include frequent water sprinkling on the roads transporting Granites and Rough Stones, black topping the transport routes from mines to the

Verified RedEstore

arterial roads, strict enforcement on covering the trucks with tarpaulin sheets and maintenance of HEMM to minimize the gaseous emissions are suggested to reduce air pollution. The defacement of land shall be restored by taking up land fill and vegetation. Green belt with native species such as neem and pungan trees must be developed around the mine site to reduce air and sound pollution, this will make the surrounding ecosystem more functional and stable.

MSME

5.23 As in other parts of India, Micro-Small and Medium Enterprises (MSME) sector play a major role in setting up of industries, generating employment and bringing socio-economic empowerment. The number of micro small and medium industries, total employees and investments are shown in the Table 13.

Table 13: List of MSME industries

No	Industries	Number of Industries	Total Employees	Investment (in Lakh)
1	Micro	8,452	47,178	53,219.00
2	Small	1,995	33,926	128,608.00
3	Medium	48	3,374	31,835.00
	TOTAL	**10,495**	**84,478**	**213,662.00**

Source: District Industries Centre, Krishnagiri

5.24 The State Government has been taking concerted efforts to decongest Chennai and its neighbouring districts by taking industries of every kind to Tier I and Tier II cities. By this, Hosur could be the biggest beneficiary and set to have large number of industries. Aerospace Engineers Private Limited which is an MSME unit based in Salem entered into a contract with Boeing, the World's largest commercial and defence aircraft manufacturer, to produce and supply critical civil aviation components and parts. Tamil Nadu State Government policy is to produce in Tamil Nadu for export to every part of the globe. Tata Electronics and Taiwan's Delta Electronics are building massive manufacturing units in and around Hosur and the presence of two companies will foster another major player in the sector to choose the industrial town. Hosur is also one of the nodes of the Defence Corridor as announced by the Government.

Verified RealEstate ™

SIPCOT Industrial Estate

5.25 State Industries Promotion Corporation of Tamil Nadu Limited (SIPCOT) was set up in 1971 as part of State initiative to develop industrial growth. Initially, it was started in 16 locations across the state. Out of 16 areas, Hosur was selected for establishment of industrial complexes. Later, it is expanded in planning area. Thus, it became an industrial town housing more than 2000 general engineering enterprises.

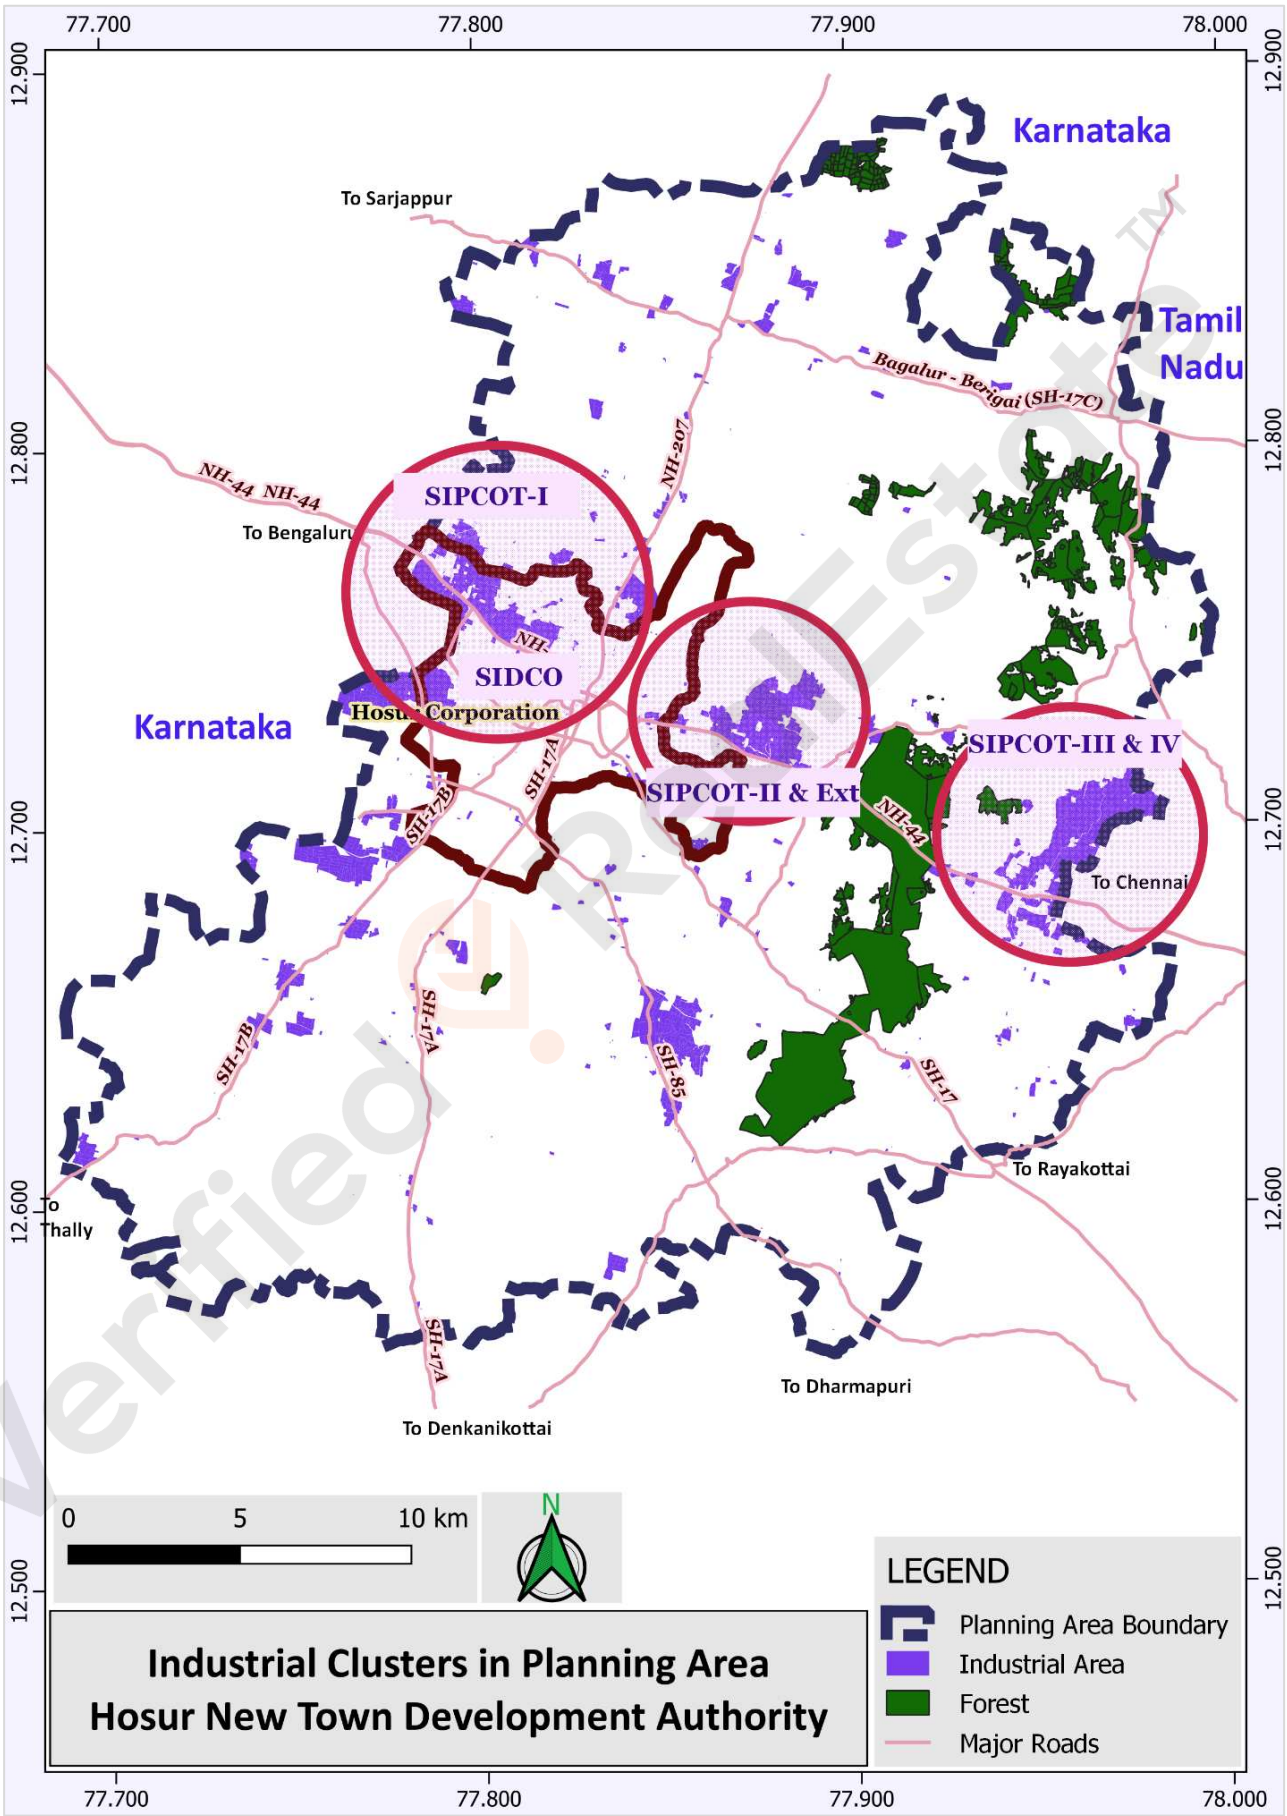

5.26 Under Phase 1, Industrial Estate was established at Zuzuvadi was developed abutting NH-44 with an extent of 1235.86 acres. Large industries like Ashok Leyland, Titan, Tanishq, Lakshmi Automatic Looms, Hindustan Unilever limited, GRB Dairy Foods, TTK Prestige limited, GE India Ltd., Carborundum Universal Ltd. WENDT India Ltd. etc. were set up in this phase. About 239 industrial units were allotted space in the complex.

5.27 Under Phase 2 industrial estate was setup at Moranapalli and Thorapalli Agraharam, covering an extent of 456.88 acres. Later about 399.76 of land was added to provide additional industrial units as Phase II Expansion. About 124 industrial units were allotted space in the complex. Few of large industries set up were Ashok Leyland, Gabriel India Limited, Terex India Private limited, Marudhar Rocks International limited, Mylan Laboratories Ltd, First Steps Baby wear Pvt Ltd., Weg India Pvt Ltd., VeeBee Medicare Pvt Ltd.

5.28 In Adagurukki and Doripalli, industrial complexes is established under phase 3 and 4 by SIPCOT with extent 121.07 Ha and 389.585 Ha to meet the growing demand for industrial space in Hosur area. The SIPCOT industrial development shall increase the employment generation and make a vibrant economic activity in the region.

Verified RealEstate™

Figure 23: Industrial Cluster in the Planning area

ELCOT IT Park

5.29 ELCOT IT park is situated on NH-207 at Viswanathapuram village opposite to Hosur Corporation office with an extent of 106.28 acres. It is featured with 16 IT park plots and ELCOT office building was constructed. This provides opportunity to develop Hosur also as an IT Hub.

Figure 24: ELCOT IT PARK, Hosur

5.30 For expanding the industrial activities in the area, it requires following measures

1. Feasibility of setting up an airport in Hosur for promoting the town as Industrial hub, IT hub and floriculture hub.
2. Bengaluru Metro can be extended to Tamil Nadu border for free movement between the two cities.
3. To promote policy on transforming Hosur into a hub for manufactures of electric scooters and their accessories.
4. Hosur is one of the nodes of the defence corridor, and hence infrastructure needs to be strengthened.

Hospitality

5.31 Hosur is fast emerging as an important industrial town in the western part of Tamil Nadu. This requires hotel facilities including budget hotels, guest houses, lodges, boarding houses and serviced apartments accommodating various economic groups.

Services remain as tertiary sector with skills and jobs in retail and travel, hospitality, logistics, IT/ITES, banking and financial services and insurance.

Verified © RealEsto

6.Heritage, Culture and Public Spaces

Heritage and Culture

6.1 The Chandrasoodeshwarar temple was constructed during 1261 A.D during Hoysala dynasty regime which adds a historic value to this location. Lord Shiva is the main deity along with Goddess Parvati. During the Tamil Month 'Masi', temple car festival takes place for 15 days.

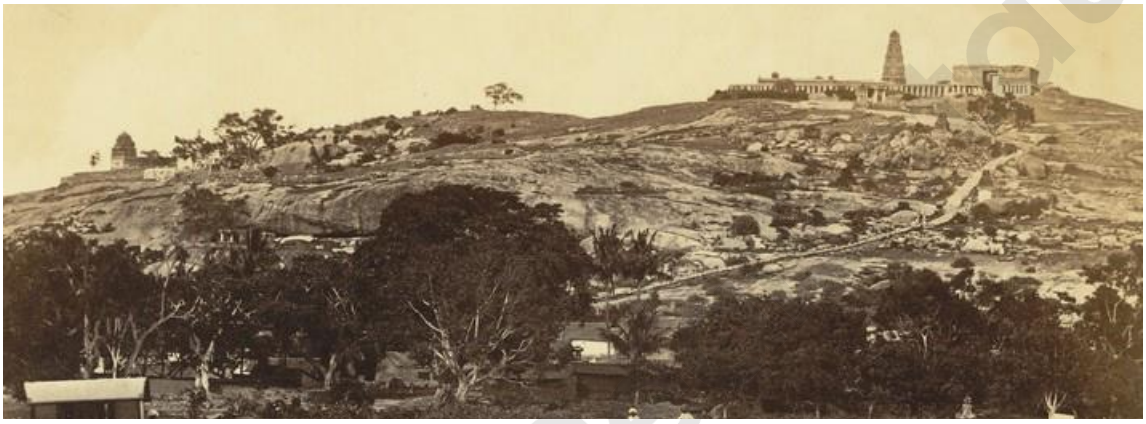

Figure 25: Old View of Chandrasoodeshwarar Temple

Temple History

6.2 Devotee Dharmadevan was in penance to get Lord Shiva's blessing near Thenpennai river. Lord Shiva appeared in front of him and gave him boon. He wished to be His vehicle and Lord Shiva turned him into bull. To spread the speciality of this place, he wished to create a hill in the shape of Rishaba (Bull). Lord Shiva accepted his request and acknowledged to stay for a while with Parvathi.

Figure 26: Present view of Chandrasoodeshwarar Temple

6.3 To bring Parvathi to the hill, Lord Shiva transformed himself into iguana and made Parvathi to follow him. After sometime Parvathi and her friends became tired and thirsty. So Parvathi requested Swamy Alaknanda to clear their thirst, so he created a tank (Pachai Kulam). Because of iguanas glittering appearance Parvathi became curious, continued to follow it and reached the hill. Two sages (Muthkalan and

Uchchayanan) watching this, thought to help Parvathi and followed her. The iguana disappeared suddenly after it heard noise from two sages. Parvathi surprised and became angry and cursed those sages to be deaf and dumb. Sages were requested to Goddess Parvathi to retract the curse. Parvathi considered their request and prayed to Lord Shiva.

6.4 Lord Shiva appeared in lingam form and said that as promised to Dharma Devan, to bring Parvathi to the hill, he took iguana incarnation. His curse will be revoked after you see me in iguana incarnation again said Lord Shiva and disappeared. Those sages in their rebirth were born as twins as deaf and dumb. While going for hunting those people reached the hill and happened to see Shiva in iguana avatar. Their curse revoked from there on, they can hear and speak.

6.5 The temple has its historic value to this town. The temple and surrounding hill area shall be conserved. Local holiday announced on 18th march 2022 for celebration of car festival of this temple. Huge number of pilgrims from all the parts of Tamil Nadu and from Bengaluru visit the temple during the festival times. As a result, lodging facilities for economical rates, drinking water facilities, transport, needs to be strengthened.

Multi-Lingual Culture

6.6 As Hosur is located in the state border, it is a multi-lingual culture area. Majority of the people speak Tamil, Telugu Kannada and Urdu. The percentage of persons speaking these four languages are given in the Table 14.

Table 14: Population by mother tongue

Details	Tamil	Telugu	Kannada	Urdu	Others
Population by Mother Tongue	2,27,382	1,73,738	92,107	30,024	16,412
Percent to Total	42.13	32.19	17.07	5.56	3.05

Source: Census-2011

Utilisation of Public Spaces

6.7 Parks, playgrounds and open spaces are 'lung' of the city. These public spaces provide better relaxation and quality of urban environment. Hosur corporation has total park area of 6,63,719.25 Sq.m. Notable parks are Ramanaicken lake park with

walking path, Nethaji park, Brindhavan Nagar part etc. Available park space per head stands as 2.71 sq.m - as per census 2011, which is very low when compared to standard per head requirement which is 10-12 Sq.m area per person recommended by URDPFI (Urban and Regional Development Plans formulation and Implementation) guidelines.

6.8 Assuming 12 sq.m per person, Corporation Park space required for the projected period 2046 is 7.19 Sq.km as given in Table 15. Corporation has taken initiative to increase green cover like developing Miyawaki forest near Ramanaicken Lake and planting trees around water bodies are appreciable. To support further, creating avenue along highways and major road plays key role to tackle environmental challenges. Kelamangalam has a park space of 1,320 Sq.m.

6.9 Entertainment and shopping centres are the main recreational activities in Hosur town. These activities attract population from all part of Krishnagiri district. The projected open space requirement of planning area is shown in the Table 15.

Table 15: Open space requirement

Year	Hosur Corporation		Planning Area	
	Population	Open Space requirement (Sq.km)	Population	Open space requirement (Sq.km)
2021	3,46,530	4.16	6,79,995	8.16
2031	4,47,706	5.37	8,59,187	10.31
2041	5,48,882	6.59	10,38,380	12.46
2046	5,99,469	7.19	11,37,516	13.65

6.10 The existing parks can be spruced up and new parks can be created using the infrastructure amenities fund.

Verified RealEstate™

7.Housing and social infrastructure

Housing for All

7.1 Housing is one of the basic needs in the civilized human existence. The growth in population and increase in land value makes affordable housing dream for a huge section of the population. This also leads to formation of slums, poor living conditions and lack of infrastructure. To address the issue of providing affordable housing for all, Government of India announced Nation Urban Housing and Habitat Policy in 2007. Housing has been provided under the Government schemes such as Atal Mission for Rejuvenation and Urban Transformation (AMRUT), Valmiki Ambedkar Awas Yojana (VAMBAY), 2 million housing programme, Jawaharlal Nehru National Urban Renewal Mission (JNNURM), Interest Subsidy Scheme for Housing the Urban Poor (ISHUP).

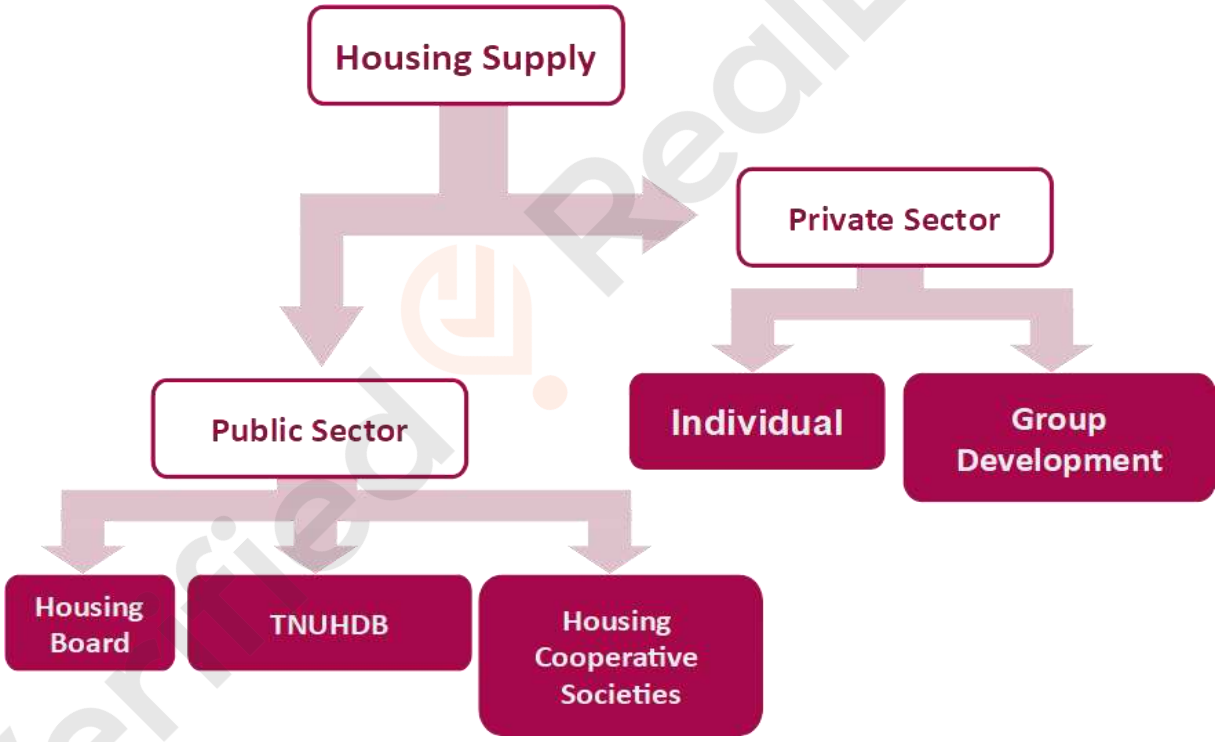

Figure 27: Housing Sector

The mismatch between housing supply and the demand results in the rise in land price and rent which affects the affordability. The housing demand has been calculated by considering factors such as housing backlog, new demand generated due to increase in population, homeless population level of congestion in the existing dwelling units that would need replacement and the availability of the vacant housing stock in the city.

7.2 Government has provided various policies and fiscal incentives to promote housing on both, the demand and supply sides mainly to cater for poorer segments of the society.

7.3 The housing supply is provided by both public and private sectors in India. Most of the housing supply comes from private sector in India. In the planning area, the public sector plays an active role in planning and implementing the housing projects. Tamil Nadu Housing Board has various projects within planning area at various locations like Avalapalli HUDCO, Eluvapalli village for HIG, MIG and LIG. The other participants in housing supply in public sector are TNUHDB and housing co-operative societies. Presently, Tamil Nadu Housing Board has been implementing housing projects near ELCOT IT Park with 40-HIG and 30-MIG flats. Bagalur HUDCO, Tamil Nadu Housing Board has been constructing 20-MIG flats.

Figure 29: Flats by TNHB in Hosur

Figure 28: Locations of TNHB projects

7.4 Tamil Nadu Urban Habitat and Development Board (TNUHDB), has a vision to achieve slums free cities by 2023. It has implemented various Housing, slum Development and Rehabilitation and Resettlement programmes to improve the living conditions of the slum families in Tamil Nadu.

7.5 The total slum population in Hosur corporation is 19,514 with total number of 5,819 household (Census, 2011). Hosur corporation has 26 non-notified slums. This slums population constitutes about 7.95 % of total population in the Hosur corporation. Such slum areas suffer from poor quality of built stock, inadequate services, lack of amenities and open spaces, and lack of proper access even for disaster mitigation putting them at high risk.

7.6 The houseless population in the corporation is 151 as per census 2011. The number of households is estimated to 68.

7.7 TNUHDB has implemented rehabilitation projects in Ezhil nagar with 696 units in two phases and another project in Punagandoddi village with 336 units is under construction.

7.8 The proposed residential land use is spatially distributed along the growth centres. This spatial distribution enables the development to initiate along the growth nodes and radiate to the internal regions in the later stages. The household requirement for the projected population is estimated based on the average household size of previous decades.

7.9 The number of households in Hosur corporation in 2011 is 62,170. The household size in corporation and planning area is 3.9 and 4.1 respectively.

Table 16: Household Size

No.	Area	Population	No. of HH	Average HH Size
1	Tamil Nadu	7,21,47,030	1,85,24,982	3.9
2	Hosur corporation	2,45,354	62,170	3.9
3	Kelamangalam (TP)	13,321	3,098	4.3
4	Rural	2,42,934	56,141	4.3
	Planning Area	**5,01,609**	**1,21,409**	**4.1**

The following table shows the projected number of household in the planning area based on the projected population and household size.

Verified RealEstate ™

Table 17: Projected Household in planning area

Year	Household Size	Population	Household
2021	4.1	6,79,995	1,65,852
2031		8,59,187	2,09,558
2041		10,38,380	2,53,263
2046		11,37,516	2,77,443

7.10 The population density of Hosur corporation in 2011 is 40 pph. The density shall increase to 98 pph during the ultimate plan period 2046. The corporation area can accommodate more housing if the density is increased. The density of planning area in 2046 shall be 15 pph (persons per hectare) with higher density near growth nodes and sparse density in rural areas.

7.11 To meet the demand of increased households, it is necessary to earmark adequate areas for development. To facilitate, residential area has been increased from 49.75 sq.km to 268.32 sq.km to the plan period 2046. Private sectors shall take up housing projects at an affordable price. Tamil Nadu Housing Board and Tamil Nadu Urban Habitat Development Board shall come out with more housing projects to cater the housing requirements. Loans at low interest rate may be arranged to the buyers.

Provision of Social Infrastructure

7.12 Social infrastructure is the key element in urban development. It includes a wide range of built facilities, services and networks of organizations. These community facilities consist of schools, hospitals, police/fire/ambulance stations. Work in this area will draw on the findings of previous local Government open space and recreation studies.

Educational Facilities

7.13 The educational institutions in the planning area vary from primary schools, senior schools to colleges. The total number of schools in the planning area is 302. The details are given in the Table 18.

Verified RealEstate™

Table 18: Existing Schools in Planning Area

Grades of School	Numbers
Primary (I-V)	210
Middle (I-VIII)	46
High School (VI-X)	29
Higher Secondary (I-XII)	17
TOTAL	**302**

Figure 30: Educational facilities

7.14 The URDPFI guidelines recommends the educational facilities for the population. These are the norms to maintain grades in school facilities as listed in Table 19.

Table 19: Norms for Schools

No.	Grade	Norms	Area Requirement (Ha)
1	Primary School (I-V)	1 per 5000 population	0.4
2	Higher Secondary School (VI-XII)	1 per 7500 population	1.8

Source: URDPFI Guidelines

Projected Demand

7.15 Upon analysis of existing number of schools to the recommended number, at present the planning area has adequate educational institutions. The projected requirement of educational facilities is listed in the Table 20.

Table 20: Projected School Requirement

Year	Population	Primary	Middle and Secondary
		5000	7500
Existing		210	92
2021	6,79,995	136	91
2031	8,59,187	172	115
2041	10,38,380	208	139
2046	11,37,516	228	152

Higher Education

7.16 There are 7 educational institutions offering collegiate education. The details are given in the Table 21.

Table 21: Higher Education Institutes

Types of Higher education Institute	Number
Medical College	1
Engineering College	1
Arts and Science	3
Nursing College	1
Veterinary College	1
TOTAL	**7**

Source: Primary Data

7.17 Besides there are 2 polytechnic colleges and 2 Industrial training institute offering training to students' communities.

7.18 According to URDPFI guideline, for every 1.25 lakh population, one college needs to be provided. In comparison with the standards, the number of colleges are observed to be more than sufficient.

7.19 Recommendations

- For the projected population of 2046, an additional number of primary and senior secondary needs to be planned by opening new schools or strengthening

the school to accommodate the growth of children population. The requirement can also be meet out by upgrading the existing schools.

- In order to improve the literacy rate, the education through digital modes can be implemented extensively.

Health Facilities

7.20 Planning for health sector is the important part of social infrastructure planning. Health status is an indicator of human well-being. Investments in health sector have direct relationship with longevity and improvements in physical and mental development of people.

Existing Status

7.21 There are 6 and 10 urban and rural primary health centres. Also, there are 57 subcentres in the planning area. There are two Government Hospitals namely one E.S.I Hospital with 35 beds at Mukondapalli and one Hosur Taluk hospital with 140 beds. Besides, private institution is also functioning in Hosur area.

7.22 The URDPFI guidelines and IPHS standards recommends one health sub-centre for every 5000 population. Likewise, primary health centres in urban and rural areas shall cater to a population of 50,000 and 30,000 respectively. For every 2,50,000 population, one hospital with more than 100 beds needs to be planned.

Projected Demand

7.23 For 2046, there shall be a requirement of 6 primary health centres in urban area and 8 primary health centres in rural area. The details of projected health facilities are listed in the Table 22.

Verified RealEstate™

Table 22: Future requirement of health facilities in 2046

Year	Population		Taluk Level (250000)	PHC (Urban) (50000)	PHC (Rural) (30000)	Sub-Centre (5000)
	Urban	Rural				
Existing	2,58,675	242,934	2	6	10	57
2021	3,62,270	3,17,725	3	7	11	64
2031	4,65,864	3,93,323	3	9	13	79
2041	5,69,459	4,68,921	4	11	16	94
2046	6,21,255	5,16,261	5	12	17	103

Recommendations

7.24 The recommendations for health care development are as follows:

- The area required for the new establishment of these facilities is estimated as 0.2 sq.km.
- The existing health centres can be upgraded.

Fire Station

7.25 Fire and rescue service station is located in the SIPCOT industrial complex. According to the URDPFI Guidelines on location of fire station, it is recommended to have a fire station for every 2 lakh population with a radius of 5-7 km. With the increase in population density, it is recommended to provide a fire station.

Table 23: Standard for Fire Station

No.	Description	Standard	Area (Ha)
1.	Sub-Fire Station	Within 3-4 km radius	6.0
2.	Fire Station	1 per 2 lakh population or 5-7 km radius	1.0

Verified RealEstate™

8.Transport and Mobility

Transport Infrastructure

8.1 Transportation is one of the main infrastructures to development of a city. Burgeoning industrial development in Hosur area leads to large scale people and goods movement on daily basis stressing the existing transport infrastructure. The number of commercial vehicles registered in the Regional Transport Office, Hosur in 2021 is 525 compared to 347 commercial vehicles in 2020. It has registered an increase of 51.29%. The number of non-commercial vehicles registered in the Regional Transport Office, Hosur in 2021 is 18,478 compared to 18,857 non-commercial vehicles in 2020 which has decreased 2%. These commercial and non-commercial vehicles along with vehicles of other district and states that passes through Golden Quadrilateral strain the traffic infrastructure in the area.

8.2 At present, Hosur have two modes of transport roadways and railways. Roadways are dominant transport in this area. The plan has studied the existing transport facilities recommended strategies for expansion of roadways, railways to keep pace with urbanization, industrializations and road safety.

Road Network

8.3 The planning area is well connected by road network. The classification of roads and its length are given in Table 24 and the details of road classified as national highways, state highways, major district road and other district road that are given in Annexure-VII. The major road networks are shown in the Figure 33 and 34.

No.	Road Class	Total Length km.
1	National Highways	40.47
2	State Highways	83.55
3	Major District Roads	43.80
4	Other District Roads	108.95
	TOTAL	**276.77**

Source: Highways Department, Krishnagiri Division

Verified © PeglEstate™

Bus Connectivity

8.4 Hosur bus terminus, constructed under IUDP scheme with 52 bus bays is located on the NH-44. The buses are plying to all over Tamil Nadu and parts of Karnataka. The number of bus fleets departing every day is 2978 comprising 1004 local and 1974 mofussil buses. The bus terminus is inadequate for the increased fleet strength of buses.

Figure 31: Hosur bus terminus

8.5 Bus connectivity to Bengaluru city is abundant from Hosur bus terminus. Since Hosur is in border of state, all inter and intra-state passes through Hosur bus terminus. Due to this, mofussil departure is higher than the local departure. On average, this bus terminus operates 124 local and mofussil buses per hour. Local buses need more halt time than the mofussil buses, therefore this bus terminus cannot handle the demand. There are no sufficient parking facilities available for two and four wheelers.

Figure 32: Taluk Office Road

Corporation roads around bus terminus are narrow and on-road parking leads to traffic congestion. Railway station road, Taluk Office Road, MG and Nethaji roads are more congested due to presence of more commercial activities.

8.6 Hosur corporation has maintained roads are listed based on surface material in the Table 24.

Figure 33: Existing Road and Rail Network in Hosur Corporation

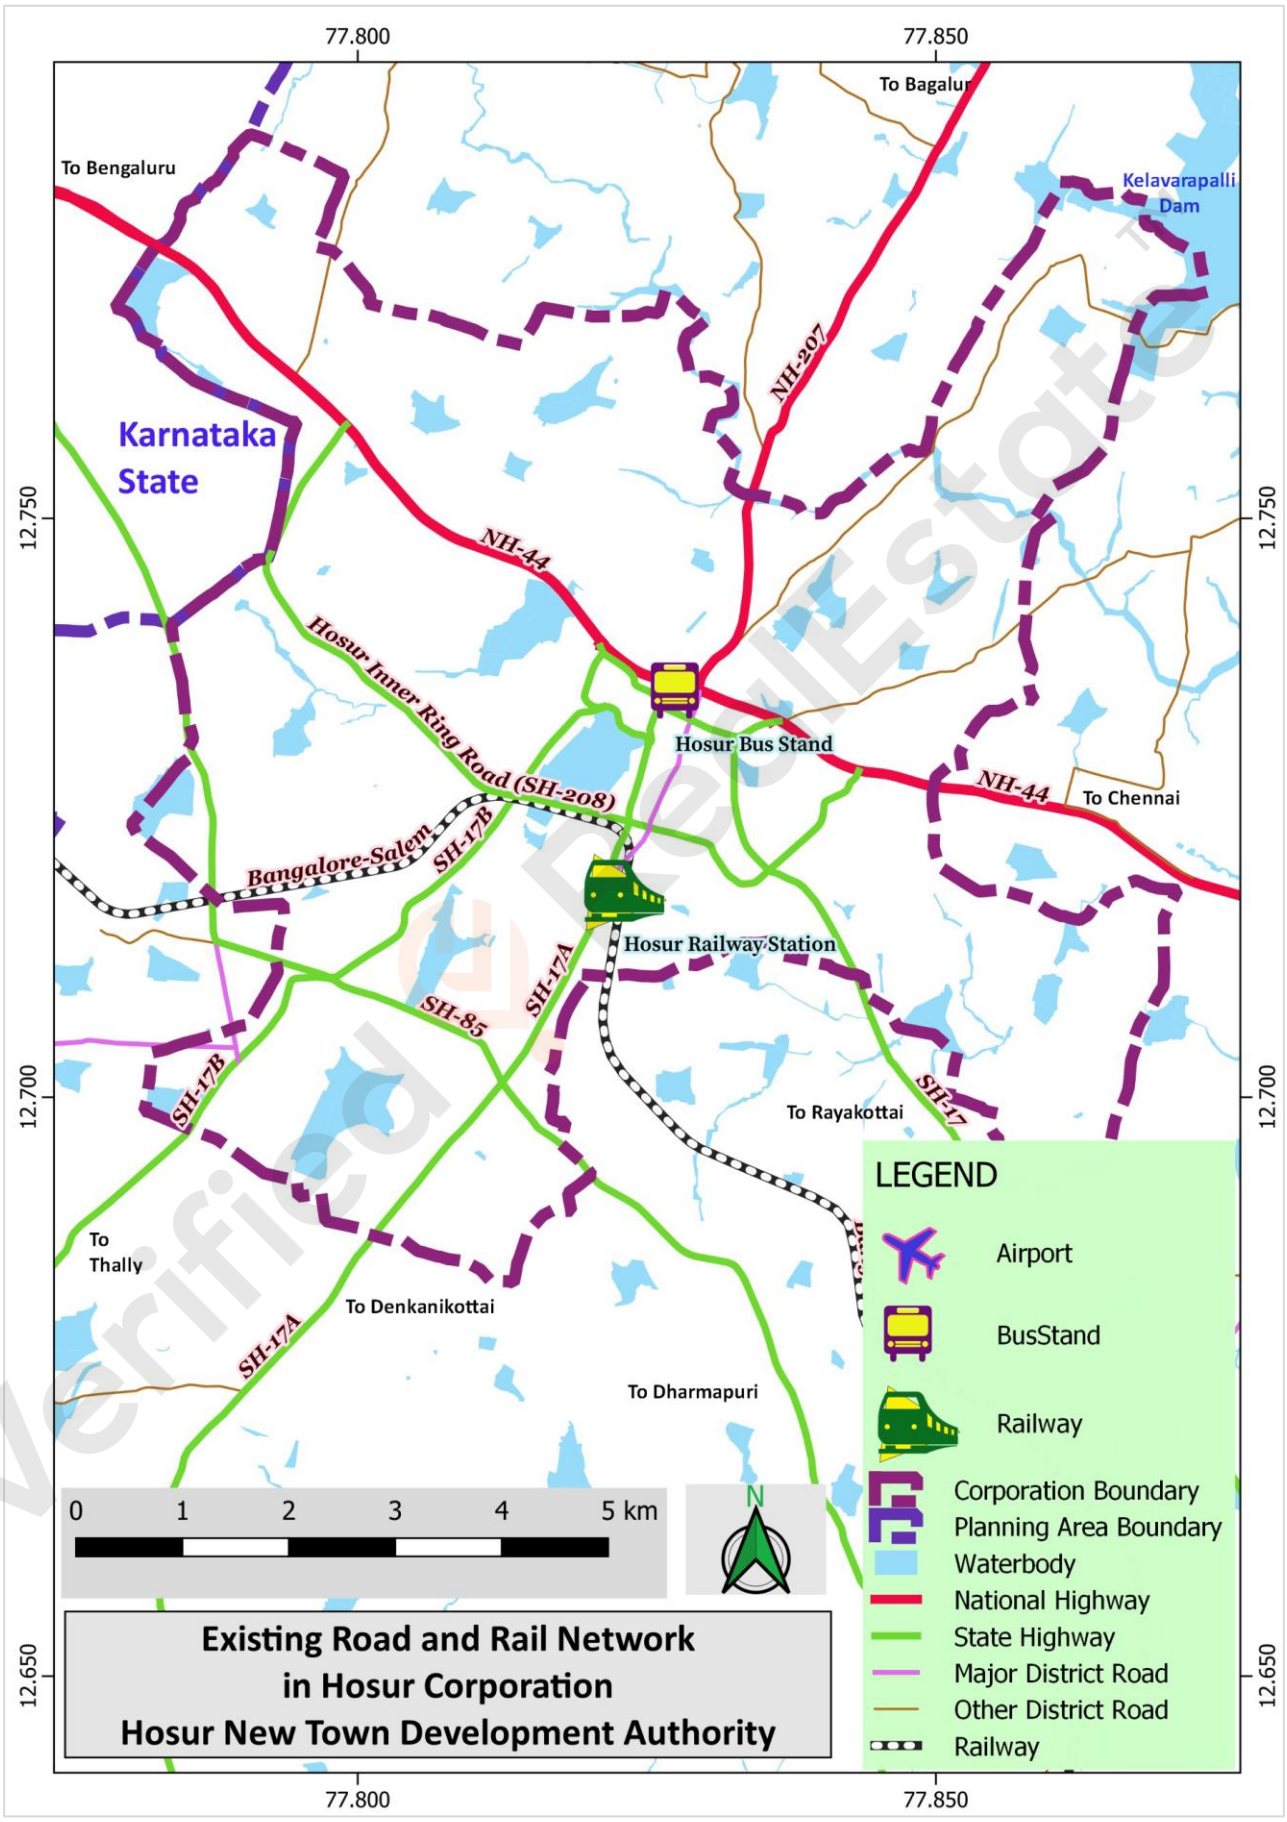

Figure 34: Existing Road and Rail Network in the planning area

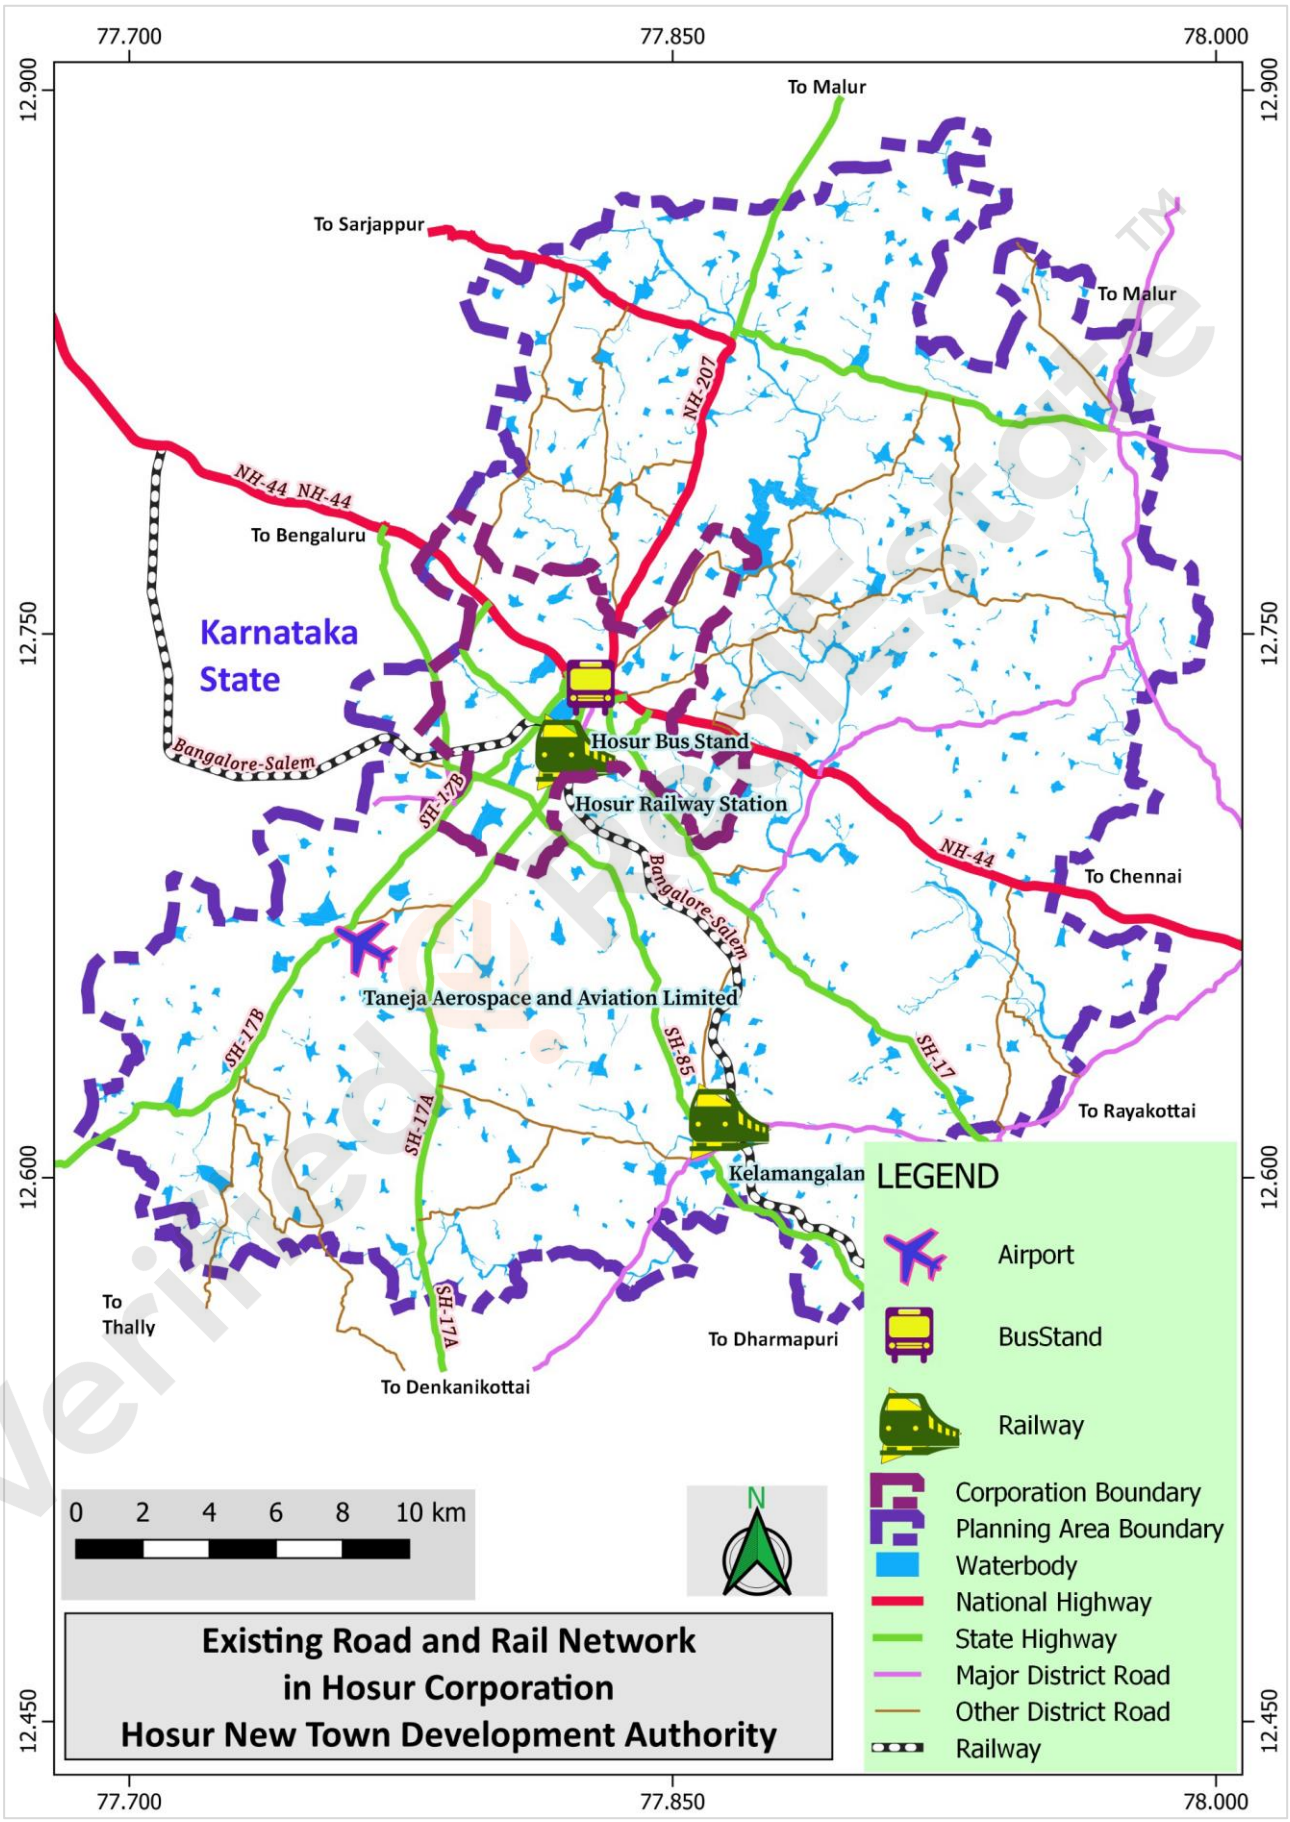

Table 24: Classification of Roads and its Length

No.	Category	Length (km)
1	Bitumen Road	325.25
2	Concrete Road	163.48
3	Paver Block Road	13.02
4	Earthen Road	133.50
	Total	**635.25**

Source: Hosur Corporation

Railway Network

8.7 Rail network connects Bengaluru and other parts of Tamil Nadu from Hosur. Daily trains are running between Bengaluru and Salem via Hosur. The distance between bus terminus and station is 1.8 km. The connectivity between railway station and bus terminus can be easily connected through modal split like para-transit, public transport (mini bus) or any other non-motorized transit.

Figure 35: Hosur Railway Station

8.8 The railway line is a very circuitous route to Bengaluru taking 70 Kilometre from Hosur instead of 40 kilometres by bus route through National Highway. Hence, preference to bus mode is more rather than train to reach Bengaluru or Salem. However, the goods train service scheduled to run 4 times in the morning and 4 trips in the evening.

8.9 The new railway line proposal from Hosur to Jolarpettai via Thirupattur, Bargur, Krishnagiri is proposed by Southern Railways. The planning area is a hub of industrial

Verified GreenEstate ™

and agricultural products. Hosur is also developing as an electrical vehicle manufacturing hub. Railway mode of transportation is sustainable mode over roadways and airways. Therefore, Hosur to Jolarpettai connectivity will play more role in the industrial development of this region.

Airports

8.10 Taneja Aerospace and Aviation Private limited are present in the Belagondapalli village of the planning area. Currently, this airport is serving as a Training academy, Chartered Trips services and industrial activities. It is not functioning for domestic purpose.

8.11 Under Ministry of Civil Aviation, Regional Connectivity Scheme-Ude Desk ka Aam Naagrik (UDAN), this airport has been selected to operate flight for domestic purpose to Chennai in the first phase. The ministry has signed a deal with Tamil Nadu Government on 8th June 2017 for the project funding as 80 and 20 percent as Central and State contribution for the scheme implementation. As per this scheme, flights shall fly from Hosur to Chennai and Vice Versa. Later, it may expand to other parts of India based on the demand. This airport's impact shall be more from the southern region of the Bengaluru. It will take two hours to reach Bengaluru International Airport from southern side of Bengaluru. For the people from electronic city and southern side of Bengaluru city, this airport reduces their travelling time by half.

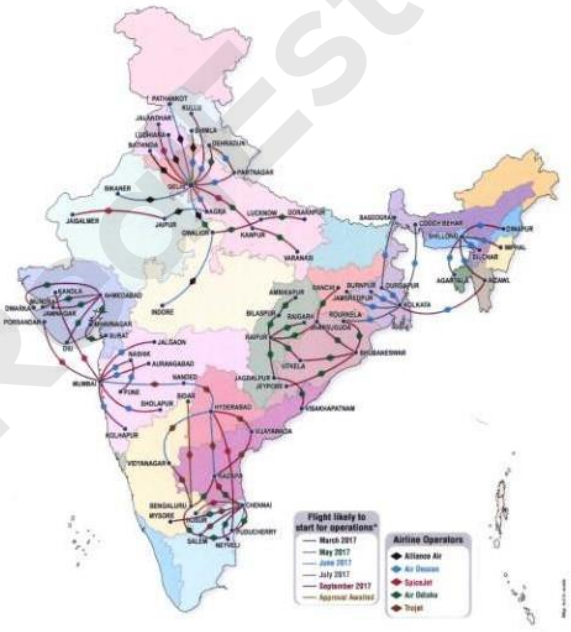

Figure 36: India Map showing UDAN Scheme - Air Connectivity

Traffic Analysis

8.12 Generally, road networks are good resemblance of a well-planned area. The hierarchical connectivity of the roads, junction design, ease of parking in and out, and lack of cul-de-sac are the good indicators of planned urban road network and urban

area. The analysis of road network reveals that some of the area is having more dead ends or cul-de-sac as shown in the Figure 37.

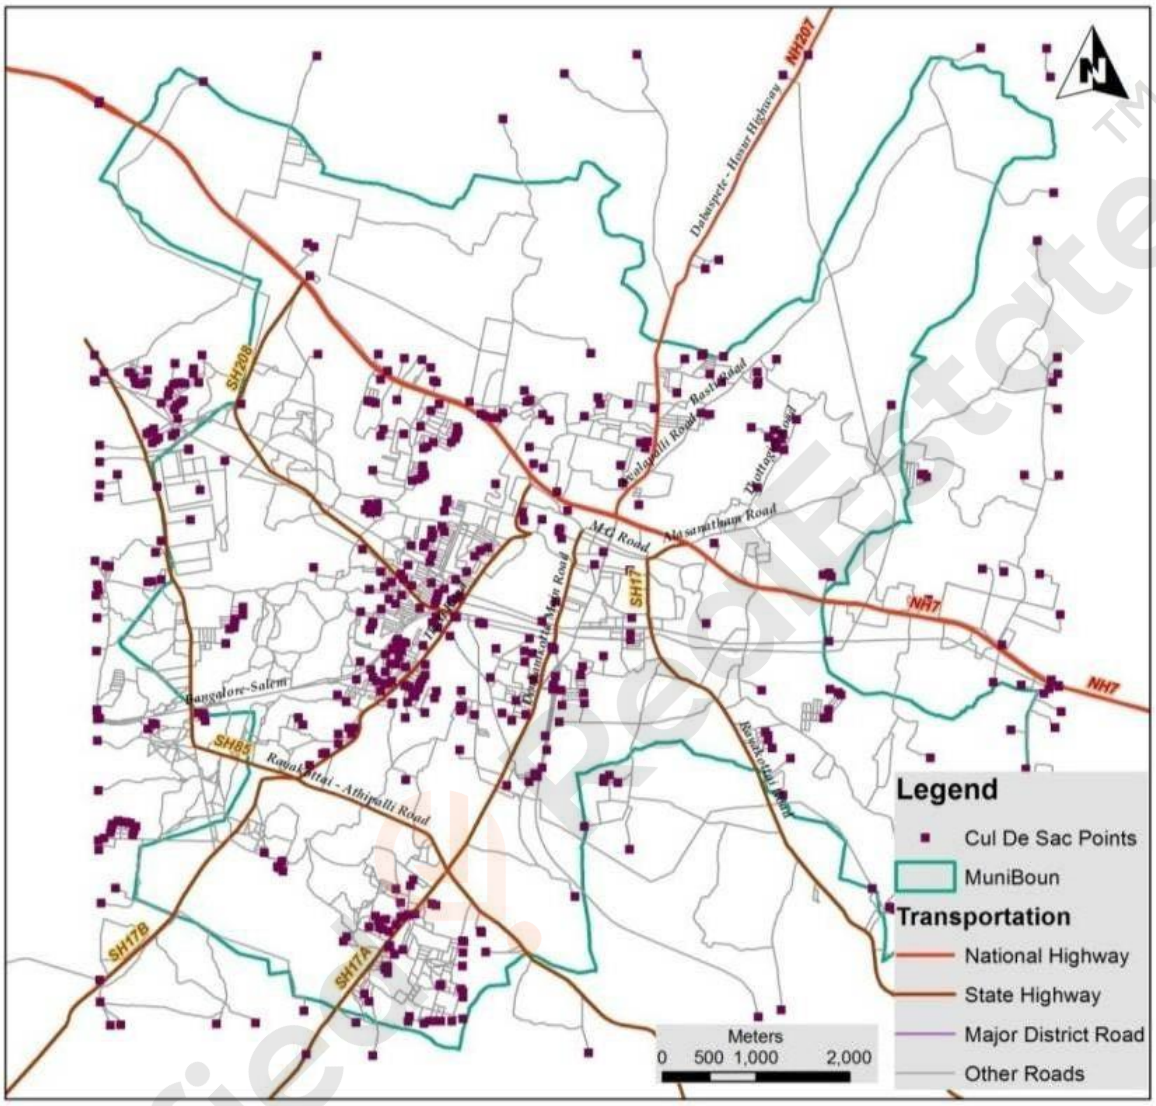

Figure 37: Cul-de-sac within the planning area

8.13 Hosur town is developed mainly along the NH-44. The NH-207 and SH-17A runs as the main arterial road of the town. Heavy traffic is observed on 6 stretches of roads

- SIPCOT entrance
- Bagalur junction
- Nethaji road
- Old Bengaluru Road (M.G Road)
- Taluk office road
- Inner ring road (SH-208) entrance

Figure 38: Hosur-Bagalur Road Junction

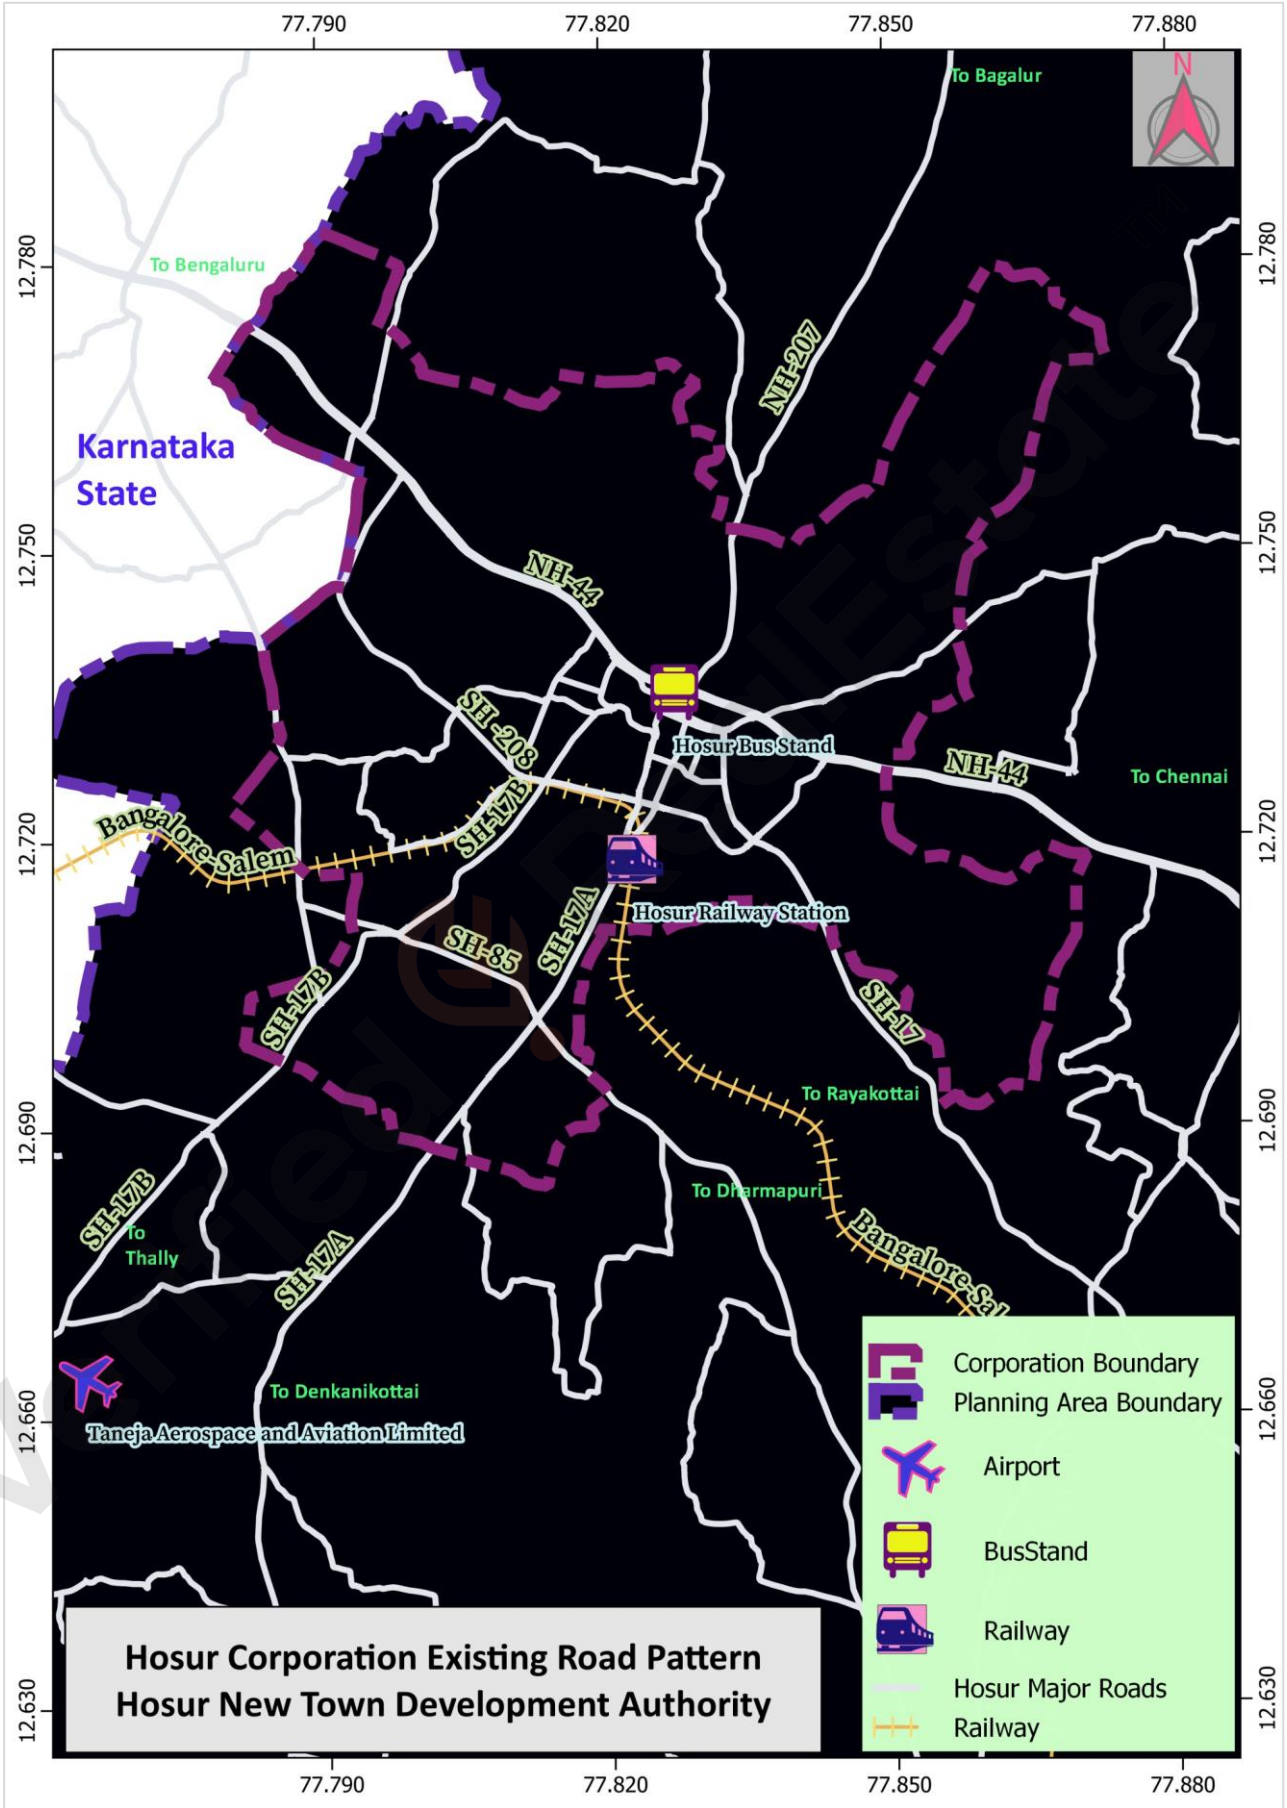

Road Pattern

8.14 The road pattern closely resembles radial road networks with bus terminal as the centre. The radiating roads from the centre are NH-207 towards the north, Alasanatham Road towards northeast and SH-17, SH-17A and SH-17B towards southeast, south and southwest respectively. The state highway (SH-208) is the inner ring road on the south of NH-44. It is radially connecting the SH17, SH-17A and SH-17B.

8.15 The NH-44 divides the town into north and south. Further, NH-207 runs in the north zone dividing it further into two quadrants of upper part. This can be interpreted from the Figure 39. In order to understand the vehicular growth, Hosur commercial and non-commercial vehicles are tabulated and compared with district and state.

Verified Regi

Figure 39: Road Pattern in Hosur Corporation

8.16 Key Findings

- Traffic congestion on entry and exit of bus terminus and Bengaluru Road junctions
- Encroachments on pedestrian path
- Road side shop occupying road space
- On-road parking on the highway and other major roads.
- Buses stopping on the Highways carriage way creating traffic and paves way for accident.
- Elephants crossing NH-44 creates resulting in human animal conflict
- Narrow roads and lack of road hierarchy

8.17 To ease the traffic congestion and to provide hassle free movement of vehicles, the following strategies are recommended. The proposed new roads and widening of roads are shown in the Figure 40.

Table 25: Ongoing new road project

S.No.	Code of road	Stretch of Roads	Width in m	Length in km
1	A1 - A1	Zuzuvadi to Moranapalli	30	18.24
2	A2 – A2	Road from Sathanur to Deveripalli (NH-948A) STRR (Satellite Town Ring Road)	70	46.5
3	A8 – A8	Road from Kothakondapalli to Thuppuganapalli road (NH 844)	60	22

8.18 These road projects are taken up by NHAI and needs to be expedited for improving the traffic circulation.

Table 26: New Road projects

Figure 40: Proposed Road Network

HOSUR NEW TOWN DEVELOPMENT PLANNING AREA

Verified Interactive

Grid of Road Network Plan

8.20 Hosur town was developed organically. As mobility and vehicle increases, the traffic and pollution tend to increase. To create hierarchy, after regional connectivity of the planning area, the intra-city connectivity needs to be ensured. In this master plan, grid road network is planned so as to strengthen and handle the increasing traffic to support the development. The road network is analysed and observed to have linear radical network with the highway as its spine. The grid road is suggested keeping in mind the hierarchy of street and division of activities in each zone. The road that needs to be strengthened shall be identified

8.21 The average walkable distance in an urban area varies between 700 m to 1.2 km depending upon gender, ethnicity, age, purpose, etc. For this study, approximately 1.2 km is taken as the walkable distance and the grid size is assumed to be 2 km. However, due to the location of SIDCO and SIPCOT industrial clusters in the northern side of NH44, the size of grid achieved is approximately 3km by 2km. Upon detailed study, the ideal grid size shall be planned and designed according to various parameters including increasing need for future urban mobility.

8.22 The Figure 41 shows a grid road formation pattern for Hosur to create better connectivity. The planning area needs to have a hierarchy of roads as well. For grid pattern of roads, existing 16 roads needs to be widened. The list of roads is shown in the Table 28 and Figure 42.

Grid network system of design is an old and effective design of street alignment. Cities like Chandigarh, Gandhi Nagar, Puducherry from India and New York, Toronto and Barcelona are popular grid based designed cities.

Verified RedEstate™

- Expediting construction of additional bus terminus at Moranapalli
- Operating shuttle service between bus terminus railway stations using electric vehicles.
- Suburban rail connectivity to Bengaluru through Electric Multiple Unit (EMU) or Mainline Electric Multiple Units (MEMU)
- Comprehensive Traffic and Transportation Study

Creating Parking Facilities

8.25 Parking is one of the major problems which has an impact on transport development. The availability of less space in urban areas has increased the demand for parking space especially near bus terminals.

Figure 44: Satellite Imagery of Bus Terminal Showing on-Street Parking

8.26 Parking has some ill-effects like congestion, accidents, pollution, obstruction to fire-fighting operations etc. The main reasons are haphazard parking in Hosur are reduction in Right of Way (ROW) and lack of infrastructure integration as shown in the Figure 44. Before taking any measures for the betterment of conditions, data regarding availability of parking space, extent of its usage and parking demand is essential. It is also required to estimate the parking fares also.

8.27 The two-wheeler parking facility is situated adjoining to the bus terminal. However, the car and other vehicles are mostly parked on street. This irregular on-street parking is observed at Bagalur junction on NH44. With the increased number of parking need, the parking facility has to be planned.

Verified RealEstate™

9.Physical Infrastructure

Water Supply

9.1 Water supply is an important parameter for a settlement's growth. The master plan assesses the existing status and plan for the projected population.

Existing Status

9.2 Water is supplied to the planning area by three sources namely wells, Hogenakkal combined water supply scheme maintained by TWAD and Perandapalli river source. The present rate of water supply to the Hosur Corporation is 27 MLD. Against the per capita requirement of 135 lpcd, Hosur corporation has been getting water at the rate of 110 lpcd. The frequency of water supply ranges from 2 to 5 days. In unserved areas, water is supplied through tanker service. The details of sources of water are shown in the Table 29.

Table 29: Source of Water Supply

No	Source of water supply	Design quantity in MLD	Realized quantity in MLD
Hosur Corporation			
1	Hoganekkal CWSS	14.64	6.00
2	Perandapalli River Source	6.50	2.00
3	Well Field Source Scheme	19.00	19.00
Kelamangalam Town Panchayat			
4	Hoganekkal CWSS	0.65	0.5
5	Local Well sources	0.521	0.521

9.3 Hosur corporation has been facing acute shortage of water supply. The water level in many bore wells has gone down and yield is also less. One of the important water sources Kelavarapalli Dam is stopped due to contamination. Thenpennai river upstream is polluted and it is declared unfit for consumption by Tamil Nadu Pollution Control Board (TNPCB). Based on the report of Joint committee on "Frothing of Chemical foam in River Thenpennai" published in November 2021, the cause for contamination is Untreated/Partial treated sewage from Bengaluru. This report further

Verified RealEstate ™

suggested that all the industries shall be closely monitored for discharge of treated effluent by Tamil Nadu Pollution Control Board.

Key Findings

9.4 The current water supply is below 135 lpcd. Corporation wards receive water at a frequency of 2 to 5 days once. 24X7 water supply is one of the indicators of better level of service.

The major water source Kelavarapalli reservoir is contaminated

The percentage of household connection is 58.47 percent and this has to increase to 100 percent

Projected Demand

9.5 As per the guidelines of CPHEEO the supply of water supply to town and municipalities is given under the Table 30.

Table 30: Standards for Water Supply

No.	ULB	Water Supply (lpcd)
1	Towns provided with piped water supply but without sewerage system	70
2	Towns provided with piped water supply with sewerage system & Towns adjoining the boundary of Corporation	90
3	Municipalities provided with piped water supply without sewerage system	90
4	Municipalities provided with piped water supply with sewerage system	135

Source: CPHEEO Guidelines

9.6 For the projected population, the water demand is calculated based on the norms recommended by (TWAD) Board. The water demand for Hosur corporation during the ultimate design year 2046 is estimated to be 80.93 MLD. The demand for Kelamangalam town panchayat and rural for 2046 is estimated as 1.53 and 28.39 MLD respectively. Thus, the total water demand of the planning area is 110.85 MLD.

Verified RedEstate™

Table 31: Projected Water Supply Demand for Hosur Corporation

Year	Projected Population	Demand Criteria (lpcd)	Available from all sources (MLD)	Total Demand (MLD)	Deficit (MLD)
2021	3,46,530	135	40.14	46.78	4.64
2031	4,47,706	135	40.14	60.44	20.3
2041	5,48,882	135	40.14	74.1	33.96
2046	5,99,469	135	40.14	80.93	40.79

Table 32: Projected Water Supply Demand for Kelamangalam

2021	15,740	70	1.021	1.1	0.079
2031	18,158	70	1.021	1.27	0.249
2041	20,577	70	1.021	1.44	0.419
2046	21,786	70	1.021	1.53	0.509

Table 33: Projected Water Supply Demand for Rural Area

Year	Projected Population	Demand Criteria (lpcd)	Available from all sources (MLD)	Total Demand (MLD)	Deficit (MLD)
2021	3,17,725	55	17.47	17.47	-
2031	3,93,323	55	21.63	21.63	-
2041	4,68,921	55	25.79	25.79	-
2046	5,16,261	55	28.39	28.39	-

Recommendations

9.7 The effective rain water harvesting shall assist in increasing the water table level. This in turn shall augment the bore well resources.

9.8 Water conservation projects shall be proposed to increase water source as well. The town has different levels of water bodies from ponds to lakes which ultimately connected to the river. The linkage of these water bodies and maintaining these water bodies can help in meeting the demand of water on a longer run recycling of grey waters.

Verified by PeoplEstate

Sewerage

9.9 Currently, the main mode of individual disposal in Hosur town is through septic tanks, soak pits and through public convenience. The road side drains carry storm water are mixed with sewage. According to Hosur underground sewerage DPR 2015, the drains are not functioning properly due to stagnation of sewage and sullage. The water bodies are also polluted and unsanitary conditions are causing unhealthy and unhygienic conditions.

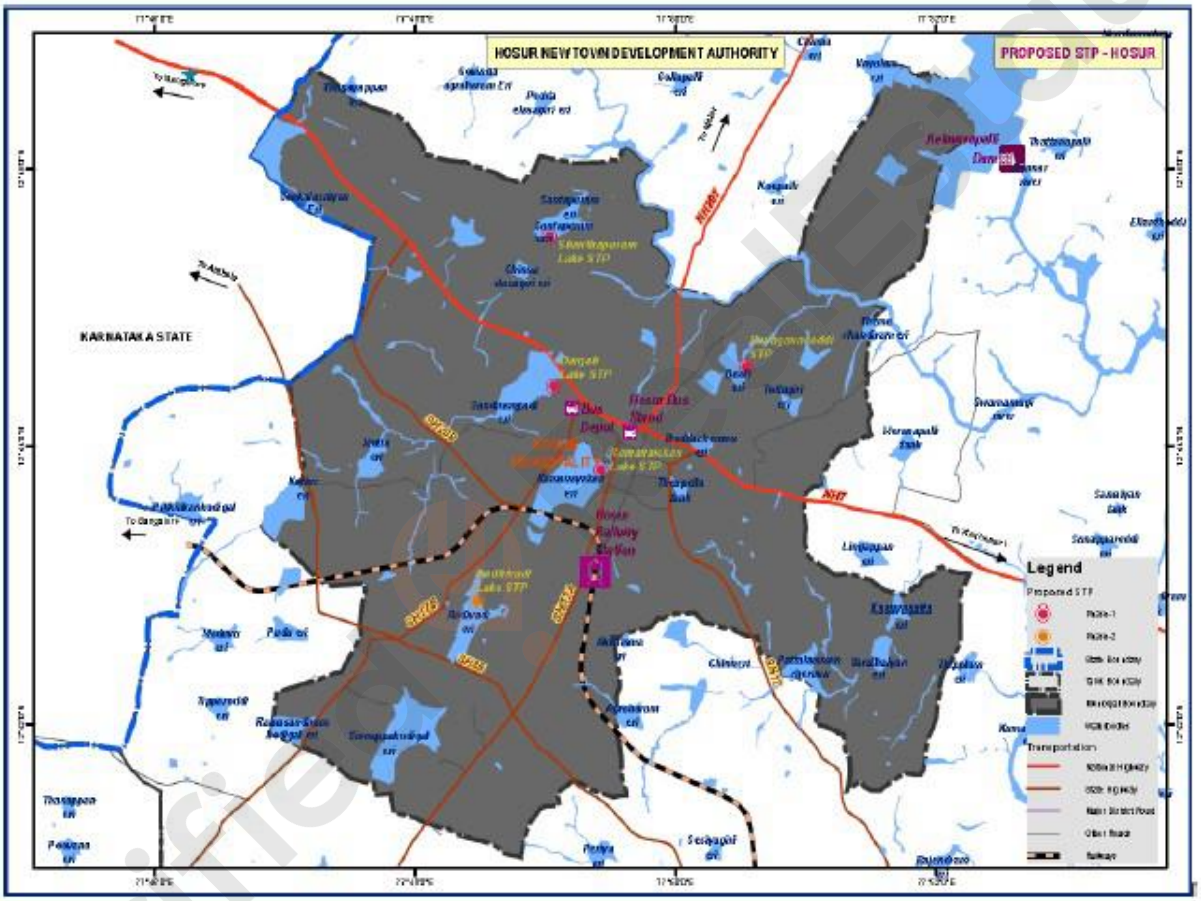

Figure 45: Proposed STP Locations in Corporation

9.10 The proposed UGSS network of length 514 km by gravity and 29 km by pumping is planned to be constructed in two phases. There are five large lakes in the Corporation. The Ramanaicken Lake, Anthivadi Lake and Santhapuram Lake are fully dried up where as Darga Lake and Basti Lake are partly dried up and filled with sewage and sullage. To revive the lakes for the purpose of ground water recharge, recreation and park development, construction of STP's at the edge of lake bed, treating the sewage to pollution control norms, disinfecting and discharging the effluents in to the

Lake to support sustainable development of lakes apart from preventing encroachment and unauthorized activities is considered as better option. Five STPs have been proposed at Punaganadoddi, at the boundary of Darga Lake, Santhapuram Lake and Ramanaicken Lake and Anthivadi.

9.11 Key Findings

- Sewerage Network is to be constructed in two phases for the existing planning area. Expedition of services reduces unhygienic conditions
- Five STPs are proposed near water bodies. The effluent discharge needs to be monitored regularly.
- UGSS is designed for existing corporation. As the corporation expansion is underway, the services shall be extended.

Projected Demand

9.12 Generally, 80% of water supply is assumed as generated sewage. Therefore, sewers are proposed to be designed for a minimum waste water flow of 110 litres per capita per day throughout the design period. As the water table is below 10 meters and the sewers are not likely to be laid below 10 meters, only 2 litres per capita is considered for infiltration. Based on the above considerations, sewerage designed flow is considered as 112 litres per capita per day.

Table 34: Projected Sewage Generation in Hosur Corporation

Year	Projected Population	Demand criteria (lpcd)	Total Generation (MLD)
2021	3,46,530	112	38.81
2031	4,47,706	112	50.14
2041	5,48,882	112	61.47
2046	5,99,469	112	67.14

Recommendations

9.13 The UGSS DPR (2015) proposes the following recommendations for enhancing Underground Sewerage System. The environment, social and economic impacts have been assessed and an environmental management plan has been proposed for mitigating the impact during design, construction and operation and maintenance stages by the contractor. The implementation of mitigation plans by the contractor at

Verified PeqIEstate™

all the stages is proposed to be evaluated by a committee. The Underground Sewerage System has been planned to improve significantly the environment and reduce pollution of the water bodies.

Storm Water Drain

9.14 Storm water drainage aids in regulating the urban floods and rainwater run-off in a planned manner. This shall assist in enhancing the ground water and surface water recharge. The area lies at an altitude of 880 metres above mean sea level. The undulated terrain both helps and hinders the rainwater run-offs. If planned properly based on the terrain, the rainwater and storm water can be regulated in a planned manner. The covered and uncovered drain length of corporation is 127.42 km and 139.26 km respectively. Total drain length is 266.68 km.

Table 35: Existing Storm Water Drain in Hosur Corporation

Description	Length in km
Drains	266.68
Road	635.25
% of Roads with Drain	41.98

9.15 Certain low-lying area that are vulnerable to flooding occurs. The Disaster Management Plan 2020 prepared by Krishnagiri district clearly defines the flooding zones as Medium vulnerable zones which is further discussed in Environment chapter below.

9.16 The existing storm water drainage system parameters benchmarked against the normative/standard requirements or service levels as prescribed by reference guidelines/standards such as CPHEEO guidelines, prevalent level of services in similar cities with functional (good) urban infrastructure is furnished in the Table 36.

Table 36: Normative Standards Prescribed for Storm Water Drain

No.	Service Indicator	Normative Standard (%)
1.	Road length covered with storm water drainage	130
2.	Pucca Drains (Open & Closed)	100
3.	Road length covered with Pucca drains	130

Verified © RedEstate™

For rural area proper drains are constructed to discharge storm water drained in all streets to the nearby water bodies.

9.17 Key Findings

Hosur lies in undulated terrain. The natural course of water line is changed or blocked. Hence, few areas experience flooding during heavy rain.

Recommendations

9.18 Certain approaches in storm water management aim to rebuild the natural water cycle, i.e. to store run-off water (e.g. retention basins) for a certain time, to recharge ground water (e.g. infiltration basins) and to use the collected water for irrigation or household supply. Most indigenous approach to storm water management collects the rainwater run-off in surface watersheds such as ponds, lakes in the region. It is recommended to clean and regenerate the existing water bodies and link them to create a hierarchy of water collection system.

Rainwater harvesting and management hold tremendous potential for alleviating storm water run-off and increasing groundwater, particularly in urban areas.

Solid Waste Management

9.19 Solid Waste Management (SWM) involves management of various activities related in collection, storage, transportation, processing and disposal of solid waste in an environmentally compatible manner. Towns and cities have become the centres of population growth which accelerates the amount of corporation solid waste generation.

9.20 Solid waste and garbage are daily collected manually and transported through lorries and trucks. Hosur Corporation have introduced door-to-door collection of segregated waste using push carts in some of the developing areas covering a population of 100 percent. The corporation has five number of heavy vehicle and one light commercial vehicle for transportation of the waste to the compost yard. The details of solid waste generation and treatment are listed in the Table 37.

Verified RedEstate

Table 37: Solid Waste Generation and Treatment

Description	Details	
Existing Waste Generation (MT)	72	
Per capita Waste (grams)	293	
Classification (MT)	Dry	35.5
	Wet	36
	e-waste	0.25
	Hazardous	0.25
Method of Collection	Door-to-Door	
Method of Composting	Aerobic, Bio-Methanation, Bio-Mining	
Composting Facilities	Micro-compost Centres (MCC)– 11	
Capacity of MCC (MT)	55	
Compost yard at Dasepalli Village	10 MT capacity (Area – 9.23 acres)	

Source: Hosur Corporation

Figure 46: Compost Yard at Dasepalli Village

9.21 The waste collected and transported through Lorries is dumped in the compost yard at Dasepalli village, which is located 16 km away from the city. The existing dump yard is located away from residential area. Kelamangalam town panchayat daily waste generation is 0.5 tons and has a compost facility with 3 acres in Jakkeri which is located out of planning area.

Verified RedEstate™

9.22 Rural area has basic infrastructural facilities like segregation sheds, compost pits, street garbage bins, tricycles / pushcarts, e-carts, implements, etc. 'Thooimai Kaavalars' are engaged in door-to-door collection and segregation of waste into biodegradable and non-biodegradable to dispose the waste or convert the waste into manure.

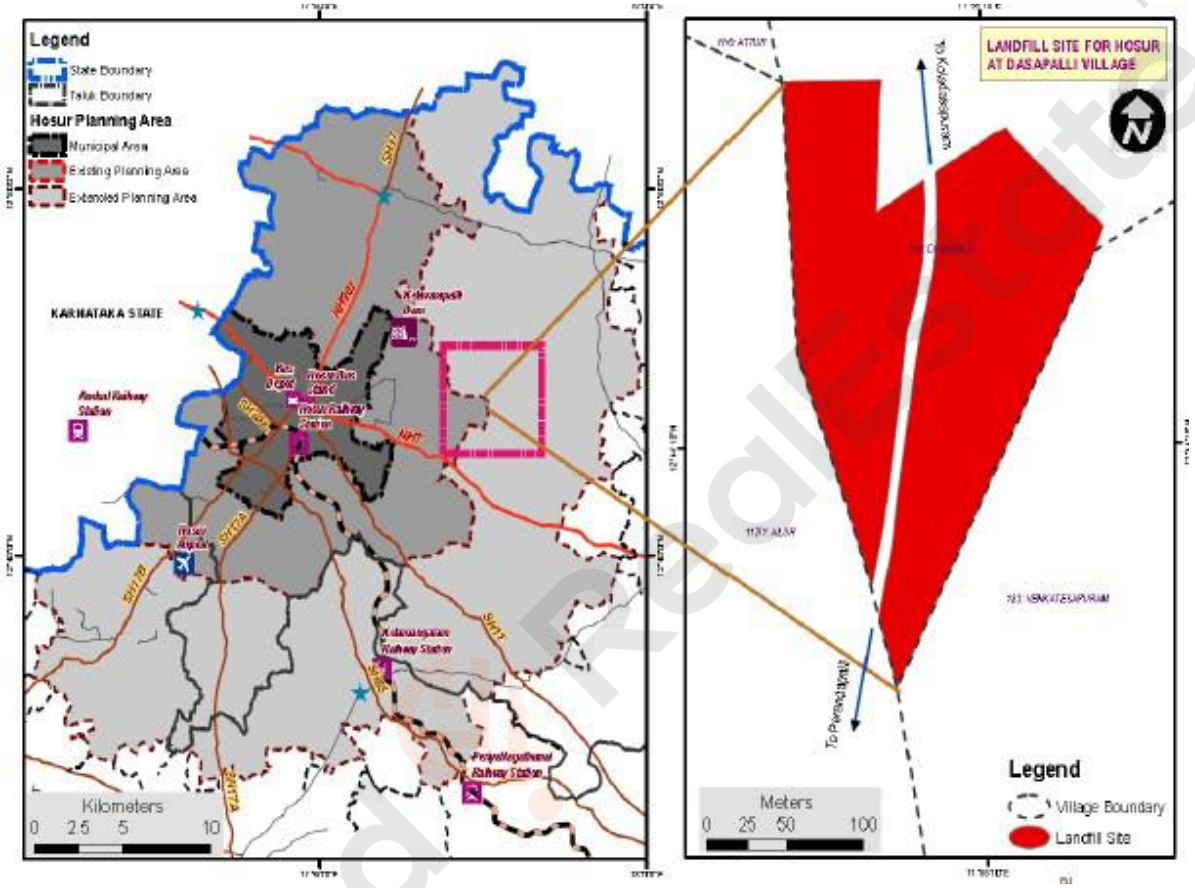

Figure 47: Location of Compost Yard

9.23 To process the waste generation, various systems are in place including bio-mining, bio-methanation and Micro-Compost Centre (MCC). An additional Dry Incineration facility plant is under construction with capacity of 10 tons per day (TPD). MCC with 55MT capacity can be increased as the city is set to expand its area. Bio-Mining facility with 1,02,968 cum quantity of waste processing facility is under construction. All these solid waste management systems can cater to the increasing waste generation. However, waste segregation and disposal can be done better at source. An awareness at household and street level can assist in managing waste processing at city level.

Verified RealEstate™

Key Findings

- The waste management system is satisfactory i.e., 100% collection of waste generation. Additional incineration and bio-mining waste processing paves way for better waste management
- Micro-composting site are available within corporation. ULB plans to expand MCC facilities to cover the entire corporation.

Well planned allocation of available resources, the application of proper technology and better sanitation standards, need to be enforced in order to provide environmental protection to the citizens of the growing town.

Projected Waste Generation

9.24 Upon calculating the waste generation at an assumed rate of 300 gm per person for the design period 2046 is 179.84 tons for corporation.

Table 38: Projected Waste Generation in Hosur Corporation

Year	Population	Demand criteria (gms)	MSW generation (MT)	Waste Collection in %	Processing capacity in %	Landfill area in Ha
2021	3,46,530	300	103.96	100	100	3.74
2031	4,47,706	300	134.31	100	100	-
2041	5,48,882	300	164.66	100	100	-
2046	5,99,469	300	179.84	100	100	-

9.25 Village Panchayat with more than 10,000 population, adjacent to urban area, tourism and pilgrims centre, more floating population, with large industries and Institution are eligible to create Micro Compost Centre as per Rural Development and Panchayat Raj. MCC should be away from water bodies. Three compost yards are proposed in Kelamangalam, Belagondapalli and Berigai are 36.325, 0.840 and 2.730 hectares respectively.

Verified RealEstate™

9.26 Automated waste collection system (AWCS)

Waste from bins collected from streets and buildings are pumped to collection station using vacuum pressure at a designed speed in the range of 60 to 90 kmph through piped network. The collected waste then transferred to disposal site.

Figure 48: Automated waste collection system

Source: Sunshine coast council

Benefits of using AWCS are listed below

- Minimum human intervention
- Less space requirement
- Cleaner city

Electricity

9.27 Electricity is fundamental necessity to every household. To sustain the industrial and commercial activities power infrastructure is inevitable to the planning area. Power supply is produced from renewable and non-renewable sources and distributed to industries and households by Tamil Nadu Generation and Distribution Corporation (TANGEDCO). The existing substation capacities are assessed and compared with the future requirements of the planning area. Planning area has 16 existing Grid substations with capacity of 913KV.

Table 39: Details of TNEB Substations

No.	Villages	Name	Remarks	Capacity in KV

Total Non-Grid				**913**
Grand Total				**1543**

The total power requirement for the projected population 11,37,516 is estimated as 834KV based on URDPFI guidelines, one substation for every 15,000 population with 11KV capacity.

The power production of country consists of 60.90 % of non-renewable energy, which is not sustainable. The following recommendation to encourage use of renewable energy.

Verified RedEfforte

Recommendations

9.28 Development of Solar Cities programme by the Ministry of New and Renewable Energy (MNRE), Government of India, is an immense opportunity for contributing towards a sustainable India in the coming years. This programme is a crucial step towards supporting Indian cities for the development of renewable energy and energy efficiency projects and curbing conventional energy demand by 10% in the next five years. This master plan recommended strategies for implementation of conservation of non-renewable energy and thrust on use of renewable energy.

Figure 49: High Tension Line

9.29 State government initiative for the same is being executed in all public buildings in process of replacing the conventional energy with renewable energy by Tamil Nadu Energy Development Agency (TEDA). The key aspects detrimental to energy demand like population growth and city economic growth has also been considered for ascertaining a city's future conventional energy demands.

9.30 Achieving significant reduction in energy consumption requires collective effort by all city departments, other government departments, businesses, industries and citizens. It is the responsibility of leaders in all tiers of Government, commerce, industry and civil society to promote action towards more efficient and renewable energy use. The following may be promoted in the planning area.

- Promoting use of solar water heating system in major commercial
- Use of solar powered street lights
- Use of Solar home systems
- Use of Solar photo volatile cells for home inverters
- Installation of Renewable energy systems for public and semi-public buildings

9.31 District cooling system (DCS)

Space cooling demand is expected to increase 11 times. District cooling system (DCS) supplies cooling energy in the form of chilled water from a central district cooling plant

Verified © RedEfate™

to multiple buildings through a distribution network of insulated, underground pipes. The scale of DCS can be varied from industrial estate to city level.

Process of District Cooling System

Schematic sketch of district cooling system is shows, the three major components of the DCS process such as chilled water plant, distribution system and energy transfer station. The chilled water supplied through distribution system and the air handling units converts the chilled water in to chilled air and supplies to end users.

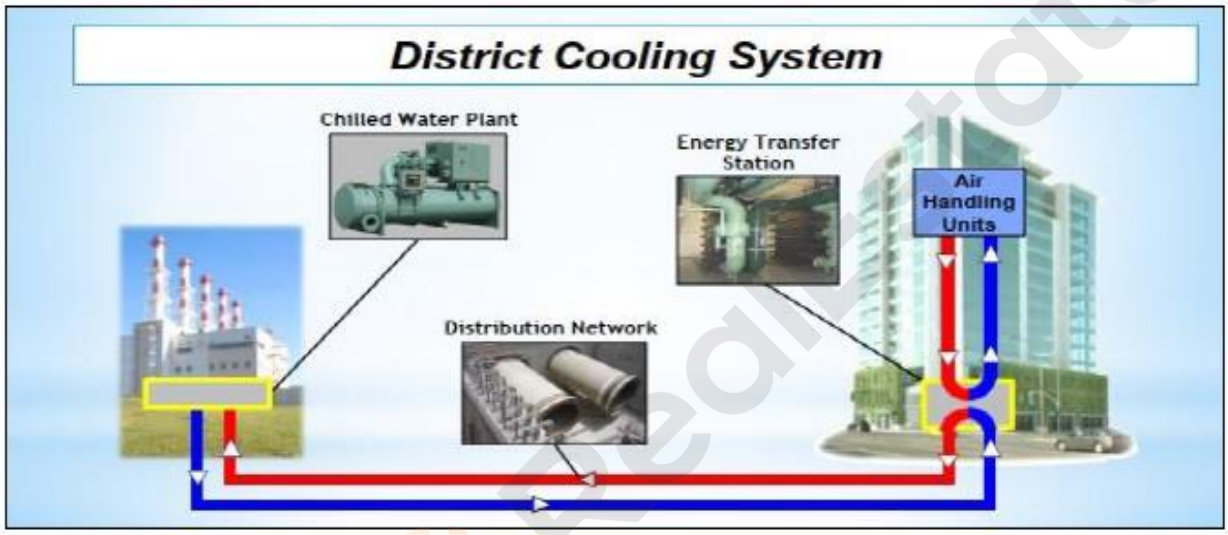

Figure 50: District Cooling System

Benefits of District Cooling System:

- Reduced primary energy consumption for cooling system: 30% - 70%
- Reduced peak power demand: 30%-35%
- Reduced CO2 emissions: 30%-35%
- Local jobs and alternative revenue to municipalities
- Benefits to local power grid including local generation, resilience, and balancing
- High reliability of cooling
- Greater resilience to power and fossil fuel price volatility
- Ability to use large scale renewable cooling

Verified Realestate™

10. Disaster Management and Resilience

10.1 The State Disaster Management has identified various zones for seismic risk, wind and cyclone hazard zones. Area falls under seismic zone II which is classified as low risk zone. The level of wind and cyclone hazard is low in most part of Krishnagiri district including the planning area. Certain area in the planning area is vulnerable to flood during rainy season.

Flood Prone Areas

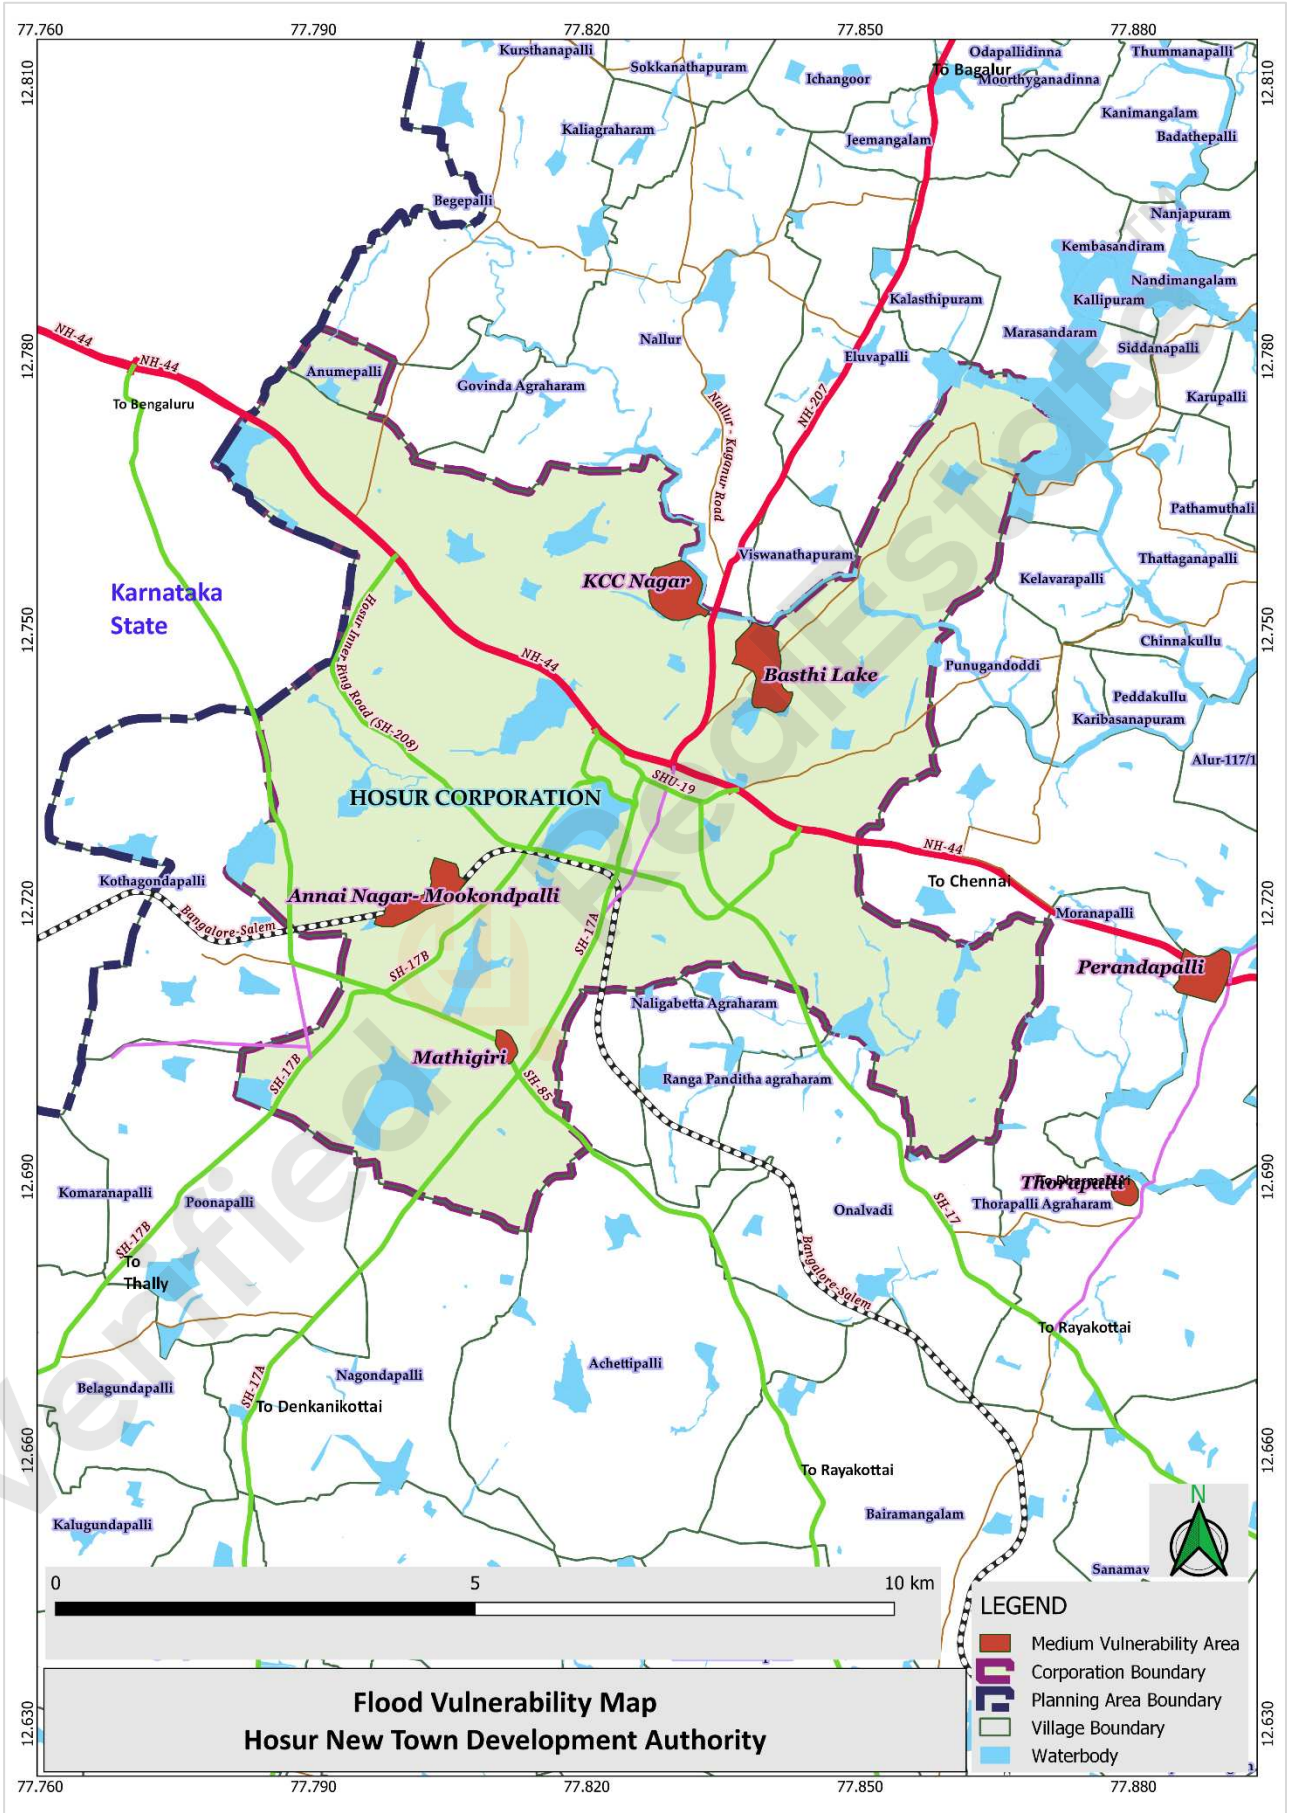

10.2 The Figure 51 shows the flood prone areas in planning area. The following relief centres has been identified for accommodating the persons affected by floods. The details are given in the Table 40.

Table 40: Flood Prone Area and Relief Centres

No.	Flood Prone Area	Name of Relief Centres	Distance to Relief Centre (km)
1	Annai Nagar – Mukondapalli	Chenniey's Mahal, Appavu nagar	1

Figure 51: Vulnerable locations by Flood

Verified Legitimate

11. Spatial Studies

11.1 The spatial development of the core area is analysed based on various factors. These factors in turn reveal the potential of the land for different uses. This chapter shall elaborate the factors and its impact on future development potential.

Spatial Analysis using Satellite Imagery

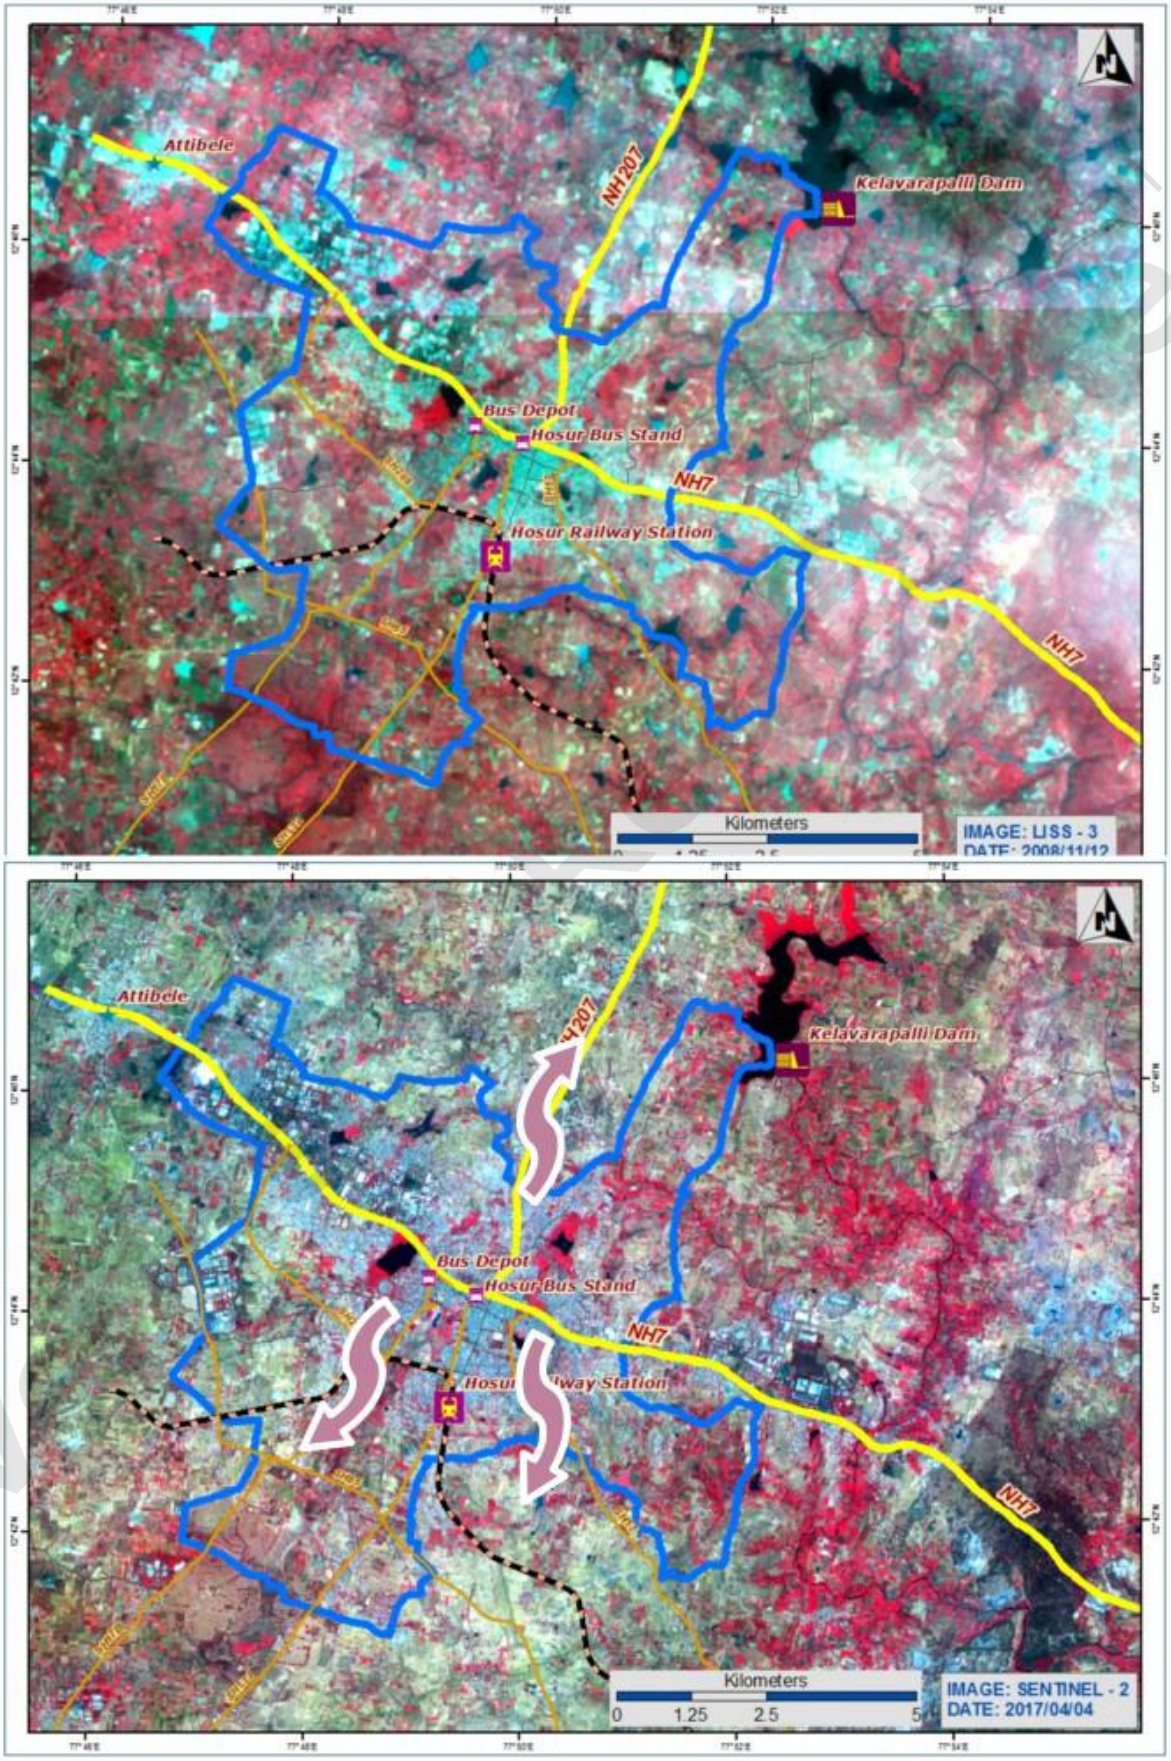

11.2 The growth pattern and direction of the planning area is assessed by comparing two satellite images. The satellite images used are 23m resolution LISS-3 (2008) and 10m resolution Sentinel (2017) images. This aids in assessing the direction of development over the past decades. Normally, the development on the ground can be differentiated more than 5 years of difference. Therefore, a decade gap aids in assessing the development pattern.

11.3 The land development is differentiated using LISS-3 and Sentinel – 2 satellite imagery by False Colour Composite (FCC). In this FCC method, the red colour represents the agriculture area. While comparing the LISS-3 images of 2008 and 2017, the area under agriculture has significantly reduced. This patently shows the conversion of agricultural land to other developed area.

11.4 From the Figure 52, it is observed that the corporation is grown more towards Bagalur, Belagondapalli, and Mathigiri compared to other directions.

Verified by PeglEstate ™

Figure 52: Decadal Satellite Imagery (2008, 2017)

Factors Influencing Urban Form

11.5 The development proposals and decision made in the recent past will impact the urban form in the future

- Locational advantage
- Industrial developments in and around Planning Area
- Expansion of Corporation

The development in Hosur is modified from Ribbon based development into continuous spatial development. The developed scenario will result in development of undeveloped land parcels.

Weighted Overlay Analysis

11.6 The weighted overlay analysis is carried to find potential zones for development, considering factors that stimulates growth like road, railways, soil and settlement are given higher weightage. Similarly, the land to be conserved like forest, water bodies, fertile soil etc. are assigned low weightage. The result shows that the development is towards Bagalur on northern and southern side, and eastwards that are prompt zone for development. Dark colour shows most suitable for development and the light colour shows least suitable for development.

Growth Node

11.7 A growth node is a potential centralised hubs for development where there is an activity and the infrastructure to support it with commercial activities alongside the public transport modes. The structures of these nodes are polycentric and not defined by administrative borders. Instead, they are functional areas including the hinterland of a city and the peri-urban areas with flexible borders depending on local and regional developments. Any transport infrastructure, enterprise, manpower and administrative level therein are part of the node.

11.8 Hosur is destined as Growth Centre of this planning area. Higher order services such as bus terminus, railway station, and facilities like sewerage, water supply, are available from this centre to all over planning area. To reduce the stress on this growth centre, nodes has been identified for the planning region based on proximity to growth centre (Hosur Corporation), types of services and accessibility to higher order facilities, potential zone analysis. The growth nodes are further classified into primary and

secondary nodes of the planning area on the basis of nearness to Hosur Corporation. The identified growth nodes are listed in the Table 41.

Table 41: Growth Nodes

Factors	Bagalur	Belagondapalli	Kelamangalam	Berikai
Proximity to Highway	NH-207	SH-17B	SH-85	
Rail Connectivity			Kelamangalam Railway Station	
Population Growth Rate (2001 – 2011 Census)	19.52	20.14	20.53	25.02
Proximity to Growth Centre	12 km	12 km	20 km	23 km
Potential Zone Analysis	Suitable	Suitable	Suitable	Moderately suitable
Proposals		Training Airport to Domestic Airport Upgradation		

11.9 The primary nodes of the planning area are Bagalur and Belagondapalli. Immediate developments until 2030 focused on this nodal region. The reason for immediate development can be attributed to their closeness to the corporation. In the future, it also has the potential to be merged within corporation area. Hosur planning region has agro-based economic, so to retain most of the agriculture-based activity the primary nodes are focused for the development.

11.10 Kelamangalam and Berikai are identified as secondary nodes of the planning region to be focused for the horizon period 2046. Though it is farther from corporation area, it has influence from neighbouring settlements. In case of Berikai, presence of TANFLORA and its connectivity to Shoolagiri is a huge advantage for development. The strategic location of Berikai on the road connecting Shoolagiri and Malur adds an edge for growth.

Verified RealEstate™

11.11 Kelamangalam is located on the State Highway 85. The upcoming developments like GMR investments can enhance the potential of the urbanisation in the area. As these nodes are near to forest area, most of the areas are under agricultural activities. The growth centre and nodes are shown in figure 55.

Land Use Planning Strategies

11.12 The spatial strategy for development is analysed for the planning area, based on the connectivity, agriculture sustainability, retaining green cover and industrial economy.

11.13 Connectivity – The well-connected roads ensure the steady growth of a planning area. The Primary and Secondary nodes are well connected in the planning region. The southern part of the corporation has two ring roads. In order to de-congest, traffic ring road is proposed in the northern region by NHAI. The widening roads and linking the missing roads are linked for the development of the planning region.

11.14 Sustaining Agriculture- Primary nodes shall be focused for diversified development. Land beyond primary nodes must be retained for agricultural purposes.

11.15 Green Barrier – Land beyond primary nodes shall be retained for agricultural purposes. From Kelamangalam to Berikai, the area acts as green barrier. Developments near forest is not encouraged in this region to reduce human animal conflict

11.16 Industrial Economy – Industrial activities are encouraged along NH-44 and near primary nodes to keep the growth in steady pace.

Conceptual Plan

11.17 Hosur Corporation is located on the western part of the planning area. The major industrial zones are located abutting the highway on the peripheral area of the Corporation. The commercial activities pertaining to day-to-day life, health care and inter and intra-regional connectivity are centrally located. The residential zones are distributed in closer to work place. Thus, the residential zone covers mostly the central, northern and western parts of Corporation. Therefore, entire planning area has scattered residential settlements with industrial and agricultural activities in close proximity. In regard to the planning area, the faster development observed in the

Verified RedEstate TM

north and south. The reserved forest stretches from north-south on the eastern zone of planning area.

11.18 The vision is to create a sustainable Industrial hub and floricultural hub. Inducing the economic activities as well as the preservation of the natural resources is a key determinant. The areas under hill, forest, agriculture fields and quarry are maintained with minimum interventions in that area. The proposed development shall complement the produces from the agricultural fields and the quarries within the area. The water bodies within the planning area have to be maintained. The conceptual plan of the planning area is shown in the figure 54.

11.19 The primary focus is to create regional connectivity through ring roads. Subsequently, street alignment is proposed for effective traffic flow within the planning area. As development happens, Hosur may get stressed. However, the growth nodes shall assist in decentralizing the development. The growth nodes and villages around these centres are delineated for further development in future decades. The hierarchy of infrastructure will be distributed along these nodes.

11.20 The villages around Bagalur are Echangur, Kodiyalam, Belathur, Dinnapalli, Lingapuram, Oddapalli Dinna and Murthiganadinna. The villages Kalugondapalli is in close proximity to Belagondapalli. These two centres have greater potential for development in the following decades. The facilities cater to higher order in these nodes. Belagondapalli is closer to the corporation, so most of the people in the vicinity approach Hosur Corporation for higher order facility.

11.21 The villages around Berigai are Nandimangalam and Kattinaickandhoddi. Kelamangalam and Bodichipalli are far from the corporation. Kelamangalam is a town in the periphery of planning area. The growth nodes along with its influential villages are shown in the figure-55. In next few decades, it has a far greater potential to function as an urban centre with all necessary infrastructure. Hence, this master plan proposes to build required infrastructure for the growing population in the nodes. Compost yards are planned in each identified growth nodes.

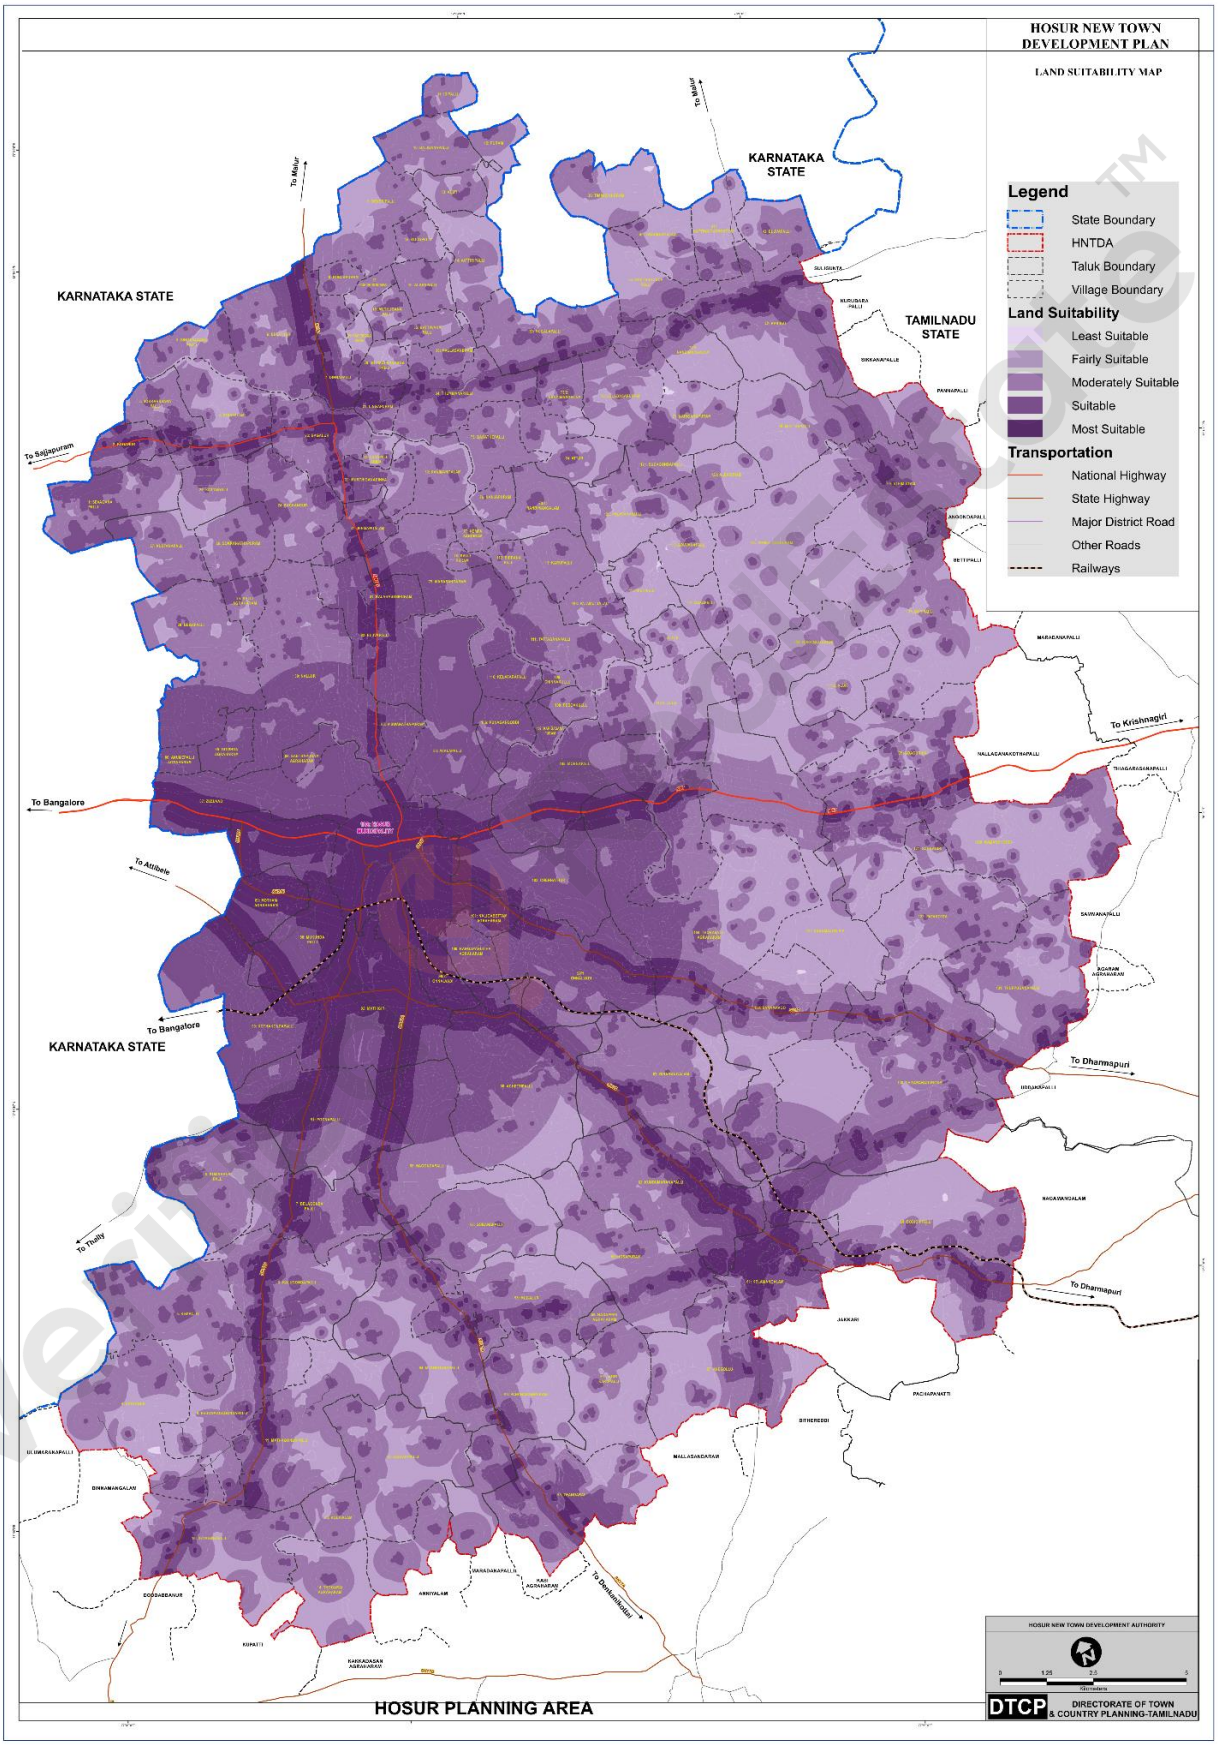

Figure 54: Conceptual plan

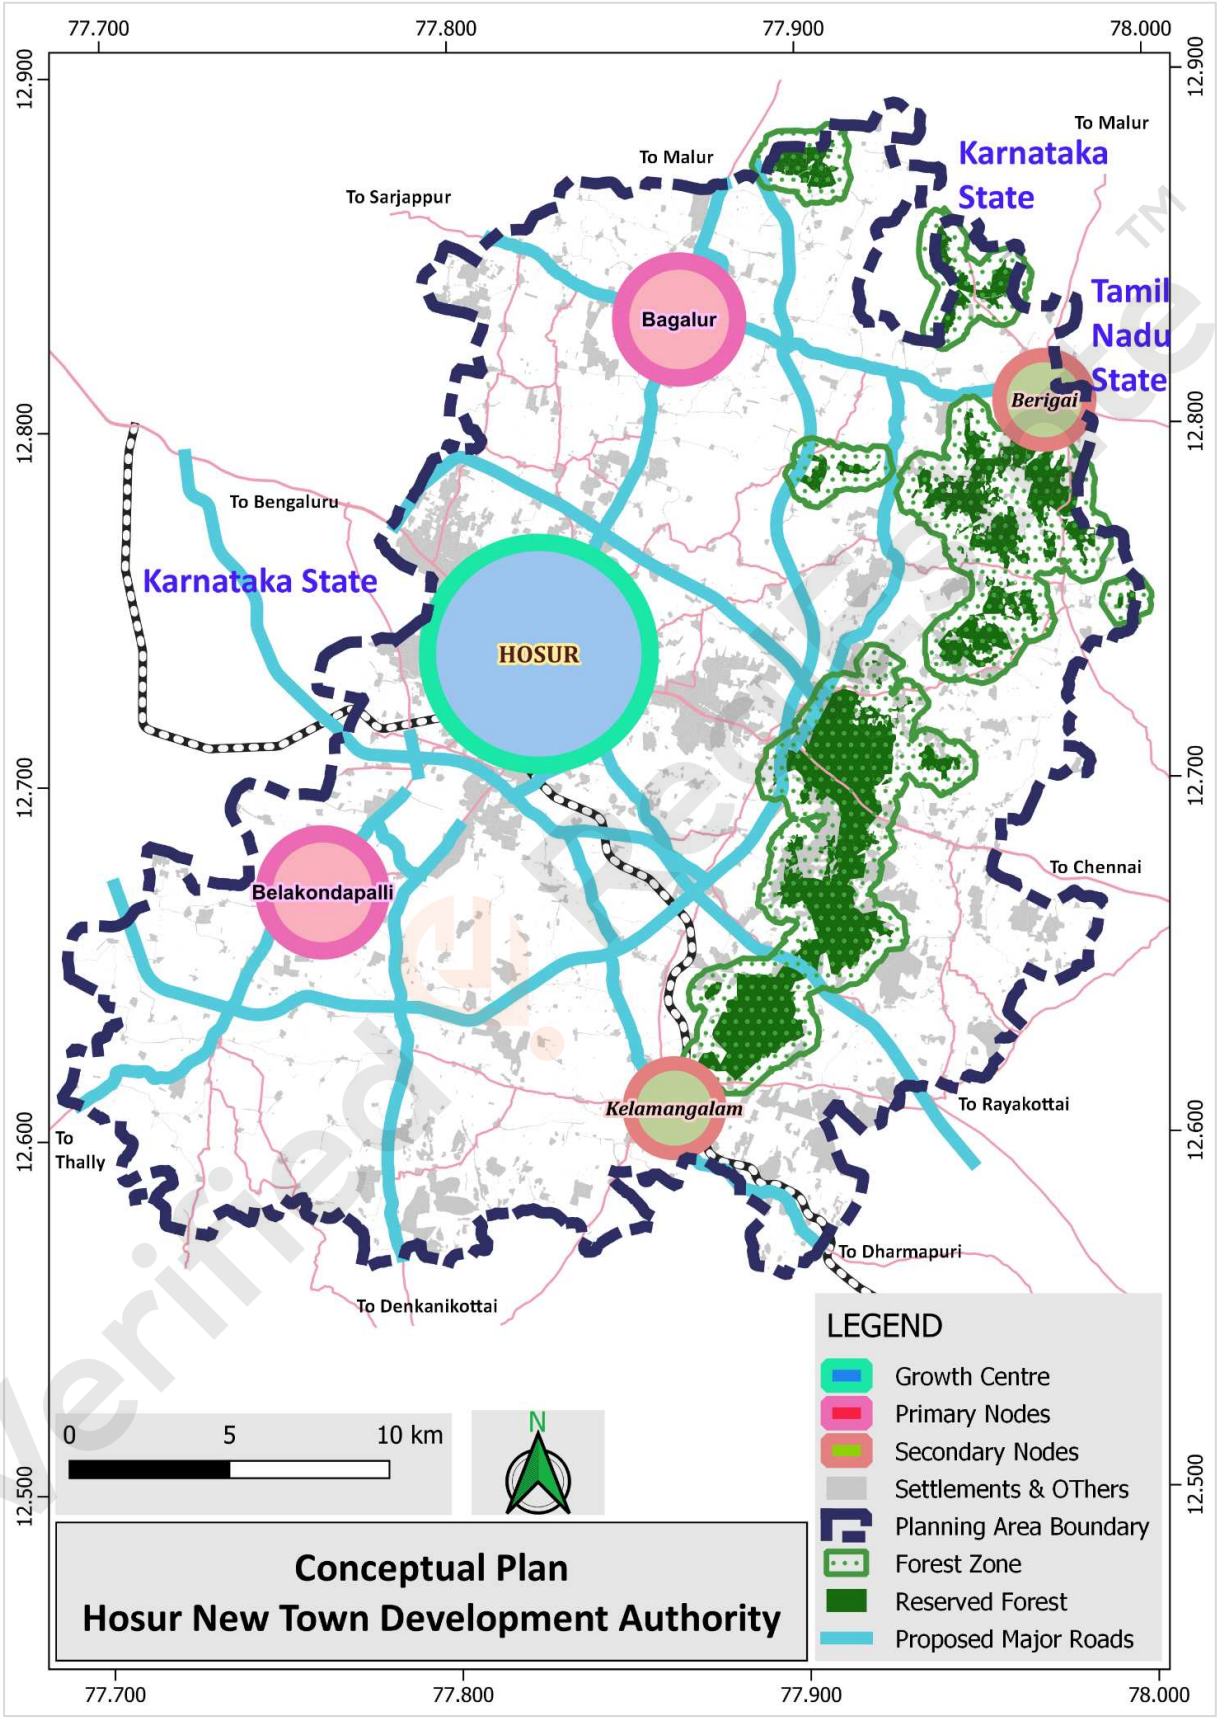

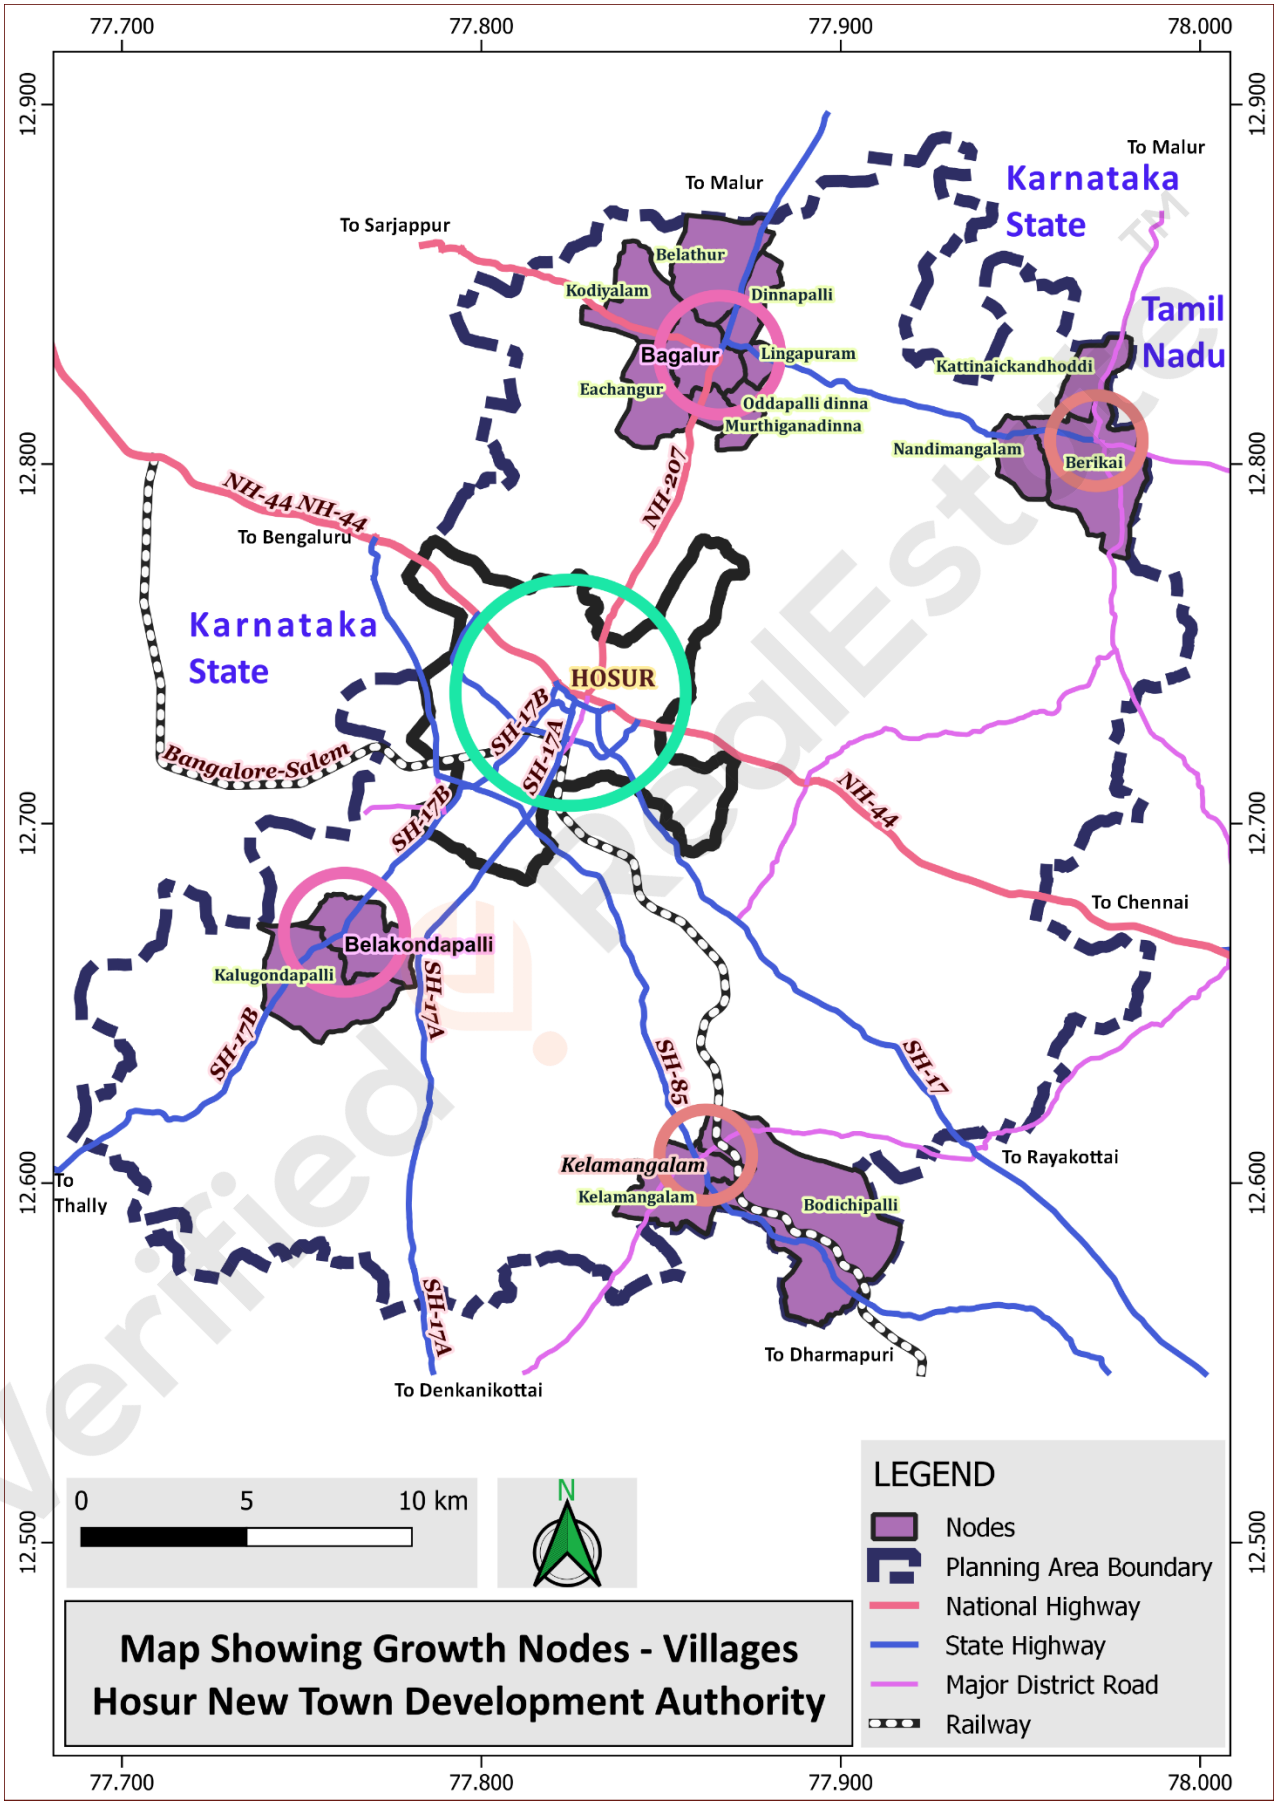

Figure 55: Growth Nodes of planning area

12. Land Use

12.1 The spatial distribution of land for various urban uses are computed, by considering the needs of the future population and also based on the past and existing status. Existing land use of the planning area is analysed.

12.2 The land use is analysed categorically, as Residential, Commercial, Industrial, Institutional, Transportation, Recreational, Water bodies, Agricultural and Others. The others consist of Hills, Quarry and Forest. The land use is prepared in accordance with Tamil Nadu Combined Development and Building Rules 2019.

Land Use Pattern for Planning Area (2021)

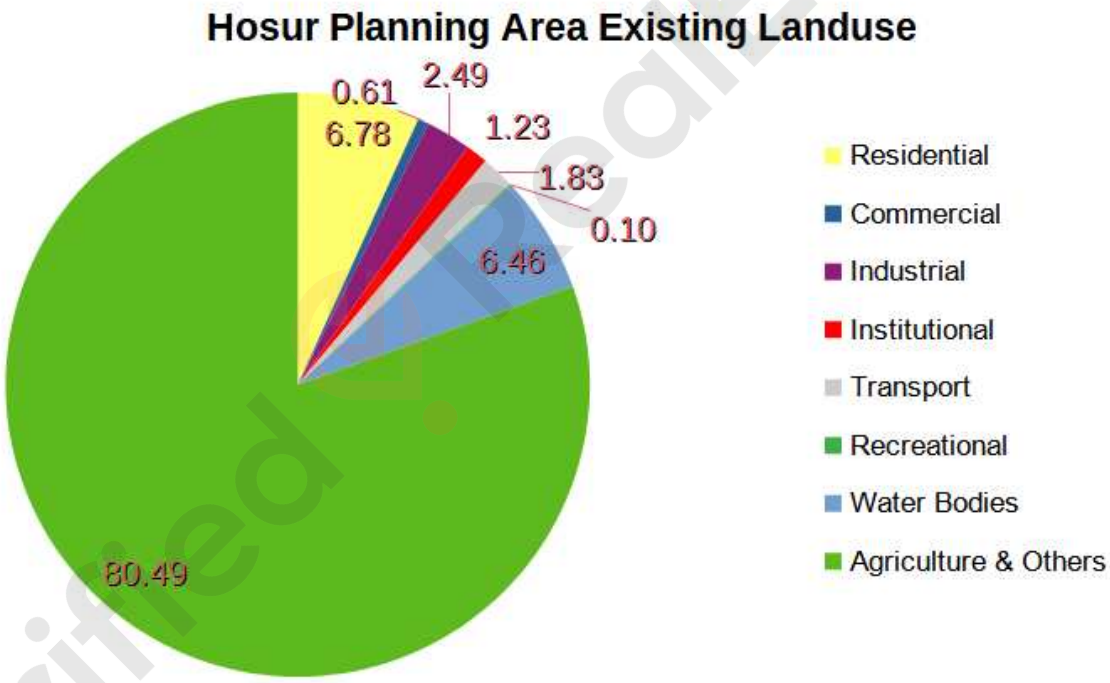

Figure 56: Existing Land Use Breakup for planning area

12.3 The planning area comprises of Hosur corporation, Kelamangalam town panchayat and 120 revenue villages. The total extent of planning area is 734.07 sq.km. Existing land use pattern of planning area is given in the Table 42.

Verified RealEstate™

Table 42: Existing Land Use Breakups for planning area – 2021

No.	Land use Classification	Existing Land use area – In Ha	% to developed area	Percentage to Total area (%)
1	Residential	4,975.19	51.96	6.78
2	Commercial	448.93	4.69	0.61
3	Industrial	1,830.20	19.11	2.49
4	Institutional	906.34	9.47	1.23
5	Transport	1,344.63	14.04	1.83
6	Recreational	70.10	0.73	0.10
	Total Developed area (A)	**9,575.39**	**% to Un-developed area**	
7	Water Bodies	4,745.49	7.43	6.46
8	Agriculture & Others	59,086.61	92.57	80.49
	Total Undeveloped area (B)	**63,832.10**		
	Total area (A+B)	**73,407.48**		**100**

12.5 Residential use to the developed area is 51.96 percent and 6.78 to the total planning area. 80.49% of undeveloped area of agriculture and others shows the availability of land for the development in corporation and planning area. The industrial use shares 19.11 % to the developed area of the planning area. SIPCOT-1 and SIDCO industries are dominated in corporation area and SIPCOT-2 and its extension and other major industries are spread across the planning area. Presence of large to small scale industries shows the industrial potential of the planning area. The land to be conserved like forest, grazing land, water bodies with extent of 128.14 sq.km are under undeveloped area.

Verified RealEstate™

Review of Master Plan

12.6 The review of second master plan (2001-2021) comprising Hosur town and 56 villages covering an area of 292.01 sq.km was consented by Government on 17.12.2002. The spatial growth direction and extent of proposed land use from the 2nd master plan 2021 as shown in Figure 57 is studied. The proposed land use of the consented second master plan is given in table 43. The realised (actual) development versus the proposed for the same area of 292.01 sq.km is given in the table 44.

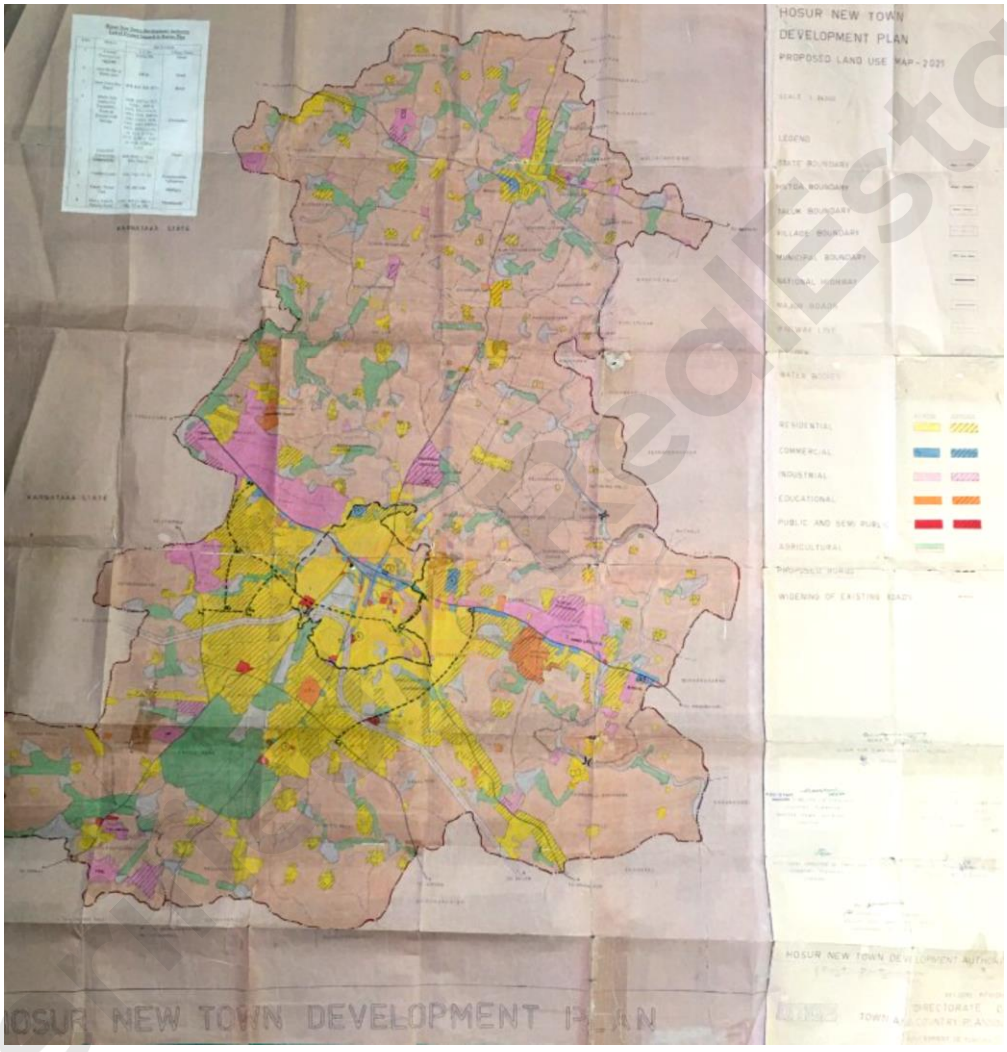

Figure 57: Proposed Land Use map (2001-2021) Consented Master Plan

- Master plan was planned for Hosur town and 56 villages covering an area of 292.01 sq.km. Whereas the current master plan is for 734.07 sq.km.
- From 2nd master plan, development was predicted along the NH-44 and southern part of Hosur. In current master plan, due to industrial development, the growth is distributed in the southern part of corporation and in north

towards Bagalur, which can be attributed to the industrial development in Sarjapur.

- From 2nd master plan the developed area shares 47 percent. The realised developed area of the previous master plan is 24.52 percent to the total planning area of 292.01 sq.km
- The 2nd master plan developed area shares only 13.04 percent to the total planning area. This is mainly due to increase in overall planning area from 292.01 sq.km to 734.07 sq.km.
- The residential area proposed from 2nd master plan for the plan period 2001 to 2021 was 8699.15 ha with 63.34 percent to the total developed area. The realised residential area is 51.84 percent to the total developed area of the second master plan. In the realised land use-2021, residential use shares with 4975.19 ha extent with 51.96 percent to the total developed area.
- The proposed density of the 2nd master plan is 34.49 persons per hectare to the residential area and 21.84 persons per hectare to the total developed area. Realised density to the residential use is 100 persons per hectare, whereas 53 persons per hectare to the total developed area. Increase in density shows the population growth of the planning area.
- Commercial use of 638.00 ha was proposed in the 2nd master plan with 4.64 percent to the total developed area. The realised commercial use shares 5.69 percent to the developed area. The commercial use of present land use 2021 is 448.93 Ha with 4.69 percent to the total developed area. Commercial developments are observed all along the major roads NH-44, Bagalur road (NH-207) Thally road, Rayakottai road
- In the 2nd master plan, proposed industrial area was 2975.18 ha with percentage of 21.66 to the total developed area. The realised industrial use shares 21.11 percent to the developed area. Industrial developments is almost achieved as proposed from the 2nd master plan. The present Industrial area – 2021 is 1830.20 Ha with a percentage of 19.11 percent to the developed area.
- The Public and Semi-public and Educational use were dealt separately in the 2nd master plan (2001-21). In the current master plan (2021-46) based on TNCDBR 2019, both uses brought under institutional use. In the 2nd master plan, Education and Public and Semi-Public use together shares 10.36 percent to the total developed area. The realised institutional use shares 10.38 percent to the developed area. The present Institutional use shares 9.47 percent to the total developed area to the extended planning area.

Verified RealEstate™

Table 43: Proposed Land Use as per Master Plan Consented in 2002

No.	Proposed Land use	Area in Ha	% to developed area	% to total area
1	Residential	8,699.15	63.34	29.77
2	Commercial	638.00	4.64	2.18
3	Industrial	2,975.18	21.66	10.18
4	Educational	655.00	4.78	2.24
5	Public and Semi-Public	766.00	5.58	2.62
6	Traffic and Transportation	Included in residential		
	Total Developed area (A)	**13,733.41**	**100**	
7	Agricultural wet lands	1,668.27	10.77	5.71
8	Agricultural dry lands	11,628.73	75.10	39.81
9	Land Under Water	2,188.59	14.13	7.49
	Total Undeveloped area (B)	**15,485.59**	**100**	
	Total (A+B)	**29,209.00**		**100**

Source: Hosur New Town Development Plan (2001-2021)

The actual developed area to the proposed land use from 2nd master plan with 292.01 sq.km extent is shown in the table-44. The present land use achieved from the 2nd master plan is can be compared. Proposed area of residential was 8699.15 ha from the 2nd master plan (2001-2021). Whereas the actual developed area is 3713.13 ha. Commercial area was proposed 638 ha is actually developed 407.85 ha. Industrial was proposed as 2975.18 ha is developed 1512.06 ha. SIPCOT phase 1 and SIDCO were present out of Hosur town. Commercials were concentrated in the NH44 and 207 junction and along NH-44 near Hosur town. Due to the increase in spatial development and land value industries started to take place beyond the erstwhile planning area i.e., 292.01 sq.km. Hence, the municipality and planning area is expanded further.

Proposed Land Use for 2021-2046

12.7 Sustainable land use planning is critical to promote the creation and development of communities containing an array of types and uses of buildings and spaces to meet the diverse needs of residents' daily lives.

According to Urban and Regional Development Plans Formulation and Implementation (URDPFI) guideline, the land use break for an urban area is given in the Table 45.

Verified RealEstate™

Source: URDPFI Guideline

12.8 The proposed population of Hosur corporation is 5,99,469. The population ranges from 5 to 10 lakh is classified as large city. By adapting the same, land use for the corporation area is proposed based on these percentages of large cities land use category. The ground conditions and existing land use are taken into consideration while formulating the land use. When there is undeveloped area available in a planning area, which has much scope and opportunity for the development. At the same time, for the sustainable future, authority needs to retain the agricultural activities.

12.9 Planning area has an extent 734.07 sq.km. out of this, development are restricted in forested area that occupies 42.30 sq.km., grazing land that covers an extent of 14.79sq.km., water bodies that embraces an extent of 47.45sq.km, hills with an extent of 23.6 sq.km. The total area where developments are restricted is 128.14 area. Thus an area of 605.93 sq.km is available for development.

12.10 The undeveloped area consists of agricultural lands, Hills, forest and land under water body. Agricultural dry lands are considered to take up for future urban development for the plan period of 2046. Based on the above criteria and considering the existing trend of development, the land use for the plan period of 2046 is proposed.

Verified RealEstate™

Proposed Land Use for Planning Area 2046

12.11 The land use for the fringes of planning area is planned based on future employment generation, natural and migrated population growth, infrastructure allocation and natural constraints namely water bodies and reserved forest.

Figure 58: Proposed Landuse 2046 - Planning area

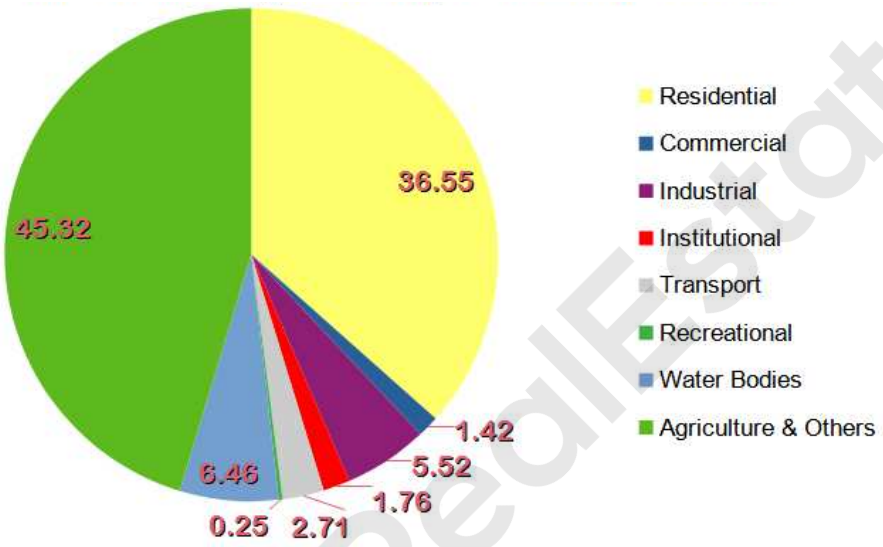

Table 46: Proposed Land Use Breakups for planning area

No.	Proposed Land use	Area in ha	% to developed area	% to total area

Verified RealEstate ™

Residential

12.12 The plan proposed 26,832.65 Ha area for residential use, to accommodate the projected population for 2046 as 11,37,516. The residential land use is increased from 4,975.19 Ha to 26,832.65 Ha. The proposed residential use is inclusive of future commercial, roads and parks. Hosur Corporation shares almost 52.70 percent population of the planning area. The land use distribution focused on concentrated towards corporation area, city expansion and also along the identified growth nodes.

12.13 The existing density is 100 persons per hectare to the residential area and 52.38 persons per hectare to the developed area. Projected density to the year 2046 is 42.39 persons per hectare to residential area and 32.45 persons per hectare to the developed area which can accommodate even more persons.

12.14 The settlements is scattered all over the planning area, due to the connectivity. The rural settlements also grows over a period. Hence the residential use proposed to the scattered settlements as well. The residential pockets are proposed along the SIPCOT-1 and SIPCOT-2, Nallur, Begapalli, Kalli agraharam, Govinda agraharam, Eluvapalli, Kalahasthipuram, Jeemangalam, Vishwanathapuram, Echangur, Sokkanathapuram, Kusthanapalli, Murthiganadinna, Kanimangalam, Badathepalli, Thummanapalli, Kottapalli, Sevaganapalli, Kaganur, Sokkarasanapalli, Kodiyalam, Nandimangalam, Kolathasapuram, Singasadanapalli, Belathur, Boblapuram, Baliganapalli, Alur, Adagurukki, Thuppuganapalli, Achettipalli, Kempatti, Kothakondapalli, Kumaranapalli, Thandarai, Deveganapalli, Madagondapalli

Commercial

12.15 Commercial use is proposed to an extent of 1042.73 Ha with 1.42 percent to the planning area. The existing commercial area spreads on area to major roads and junction like Bengaluru Road (NH-44), M.G road, Nethaji road, Tanks Street, G H road. Due to the development in planning area commercial proposed along the Bengaluru road, Bagalur road and along the major corridors. A commercial complex in Hosur corporation and market area in Moranapalli are proposed to boost the commercial activities in the planning area.

12.16 The commercial area is proposed in the main road junction of Kodiyalam, Berikai, Moranapalli, Achetipalli, Thorapalli Agraharam, Biramangalam, Kundumaranapalli, Kelamangalam, Kelavarapalli, Nagondapalli, Kempatti,

Madagondapalli, Kalugondapalli etc. revenue villages. Residential use abutting 9m and above road width are eligible to be commercial uses.

Industrial

12.17 Hosur is envisioned to be a prominent industrial hub of the state. The industrial use proposed 3711.10 Ha with 5.06 percentage of the total planning area. Hosur has seen a rapid growth after industrialization due to SIDCO, SIPCOT 1 and 2.

12.18 To continue with the momentum, the industrial clusters identified abutting SIPCOT phase 2 and its expansion area, ELCOT IT Park in Vishwanathapuram, Kothakondapalli, Komaranapalli, Devaganapalli, Nagondapalli, Kundumaranapalli, Anegollu, Biramangalam, Kamandhoddi Sevaganapalli, Kaganur and Muthuganapalli, Battavarapalli. Proposed SIPCOT phase 3 and 4 also falls on the edge of planning area

Institutional

12.19 The institutional area is proposed with an extent of 1294.79 Ha with 1.76 percent to the total planning area, which includes the educational and public and semi-public uses to provide services to people. The veterinary college and Hospital in Nagondapalli is a renowned institution in the district. Mathigiri cattle farm, Adhiyamaan group of colleges in Chennathur and Moranapalli village, Sericulture training institute and other schools. Since Hosur is a taluk headquarters the administrative offices and taluk offices are part of the Institutional land use. Airport at Belagondapalli is expected to be operational as domestic airport under UDAN scheme. Major pockets of institutional use are proposed in Mathigiri, Avalapalli, Govinda Agraharam, Nallur, Kalli agraharam, Idipalli and Dinnapalli.

Transportation

12.20 Transportation use shares 1992.37 Ha area with 2.71 percent to the total area. The sector which connects all the use for their activity. The planning region is proposed with regional to street level connectivity to ensure ease of circulation. Satellite town ring road (NH-948A) connects the planning area from south west to north east radially connecting to the existing state highways, along with Industrial corridor (NH-844) and Zuzuvadi to Moranapalli highways are proposed by NHAI. A1 to A8 and B1 to B9 are proposed in the master plan. To ease traffic flow in the corporation and additional bus terminus is proposed in Moranapalli village.

Verified RealEstate™

Recreational

12.21 The proposed recreational area is 185.30 Ha with 0.25 percent to the total planning area. Hosur corporation has Ramanaicken lake park, Brindhavan Nagar park etc... With 66.4 Ha parks and open space area. Existing park space per person for Hosur corporation stands as 2.71 sq.m against the standard of 10 to 12 sq.m per person. To improve the quality of environment, 12 sq.m per person is assumed. Required open space is estimated for Hosur corporation and planning area is 7.19 sq.km and 13.65 sq.km for the plan period 2046. To provide entertainment facilities to the people, recreational area near Kelavarapalli dam is proposed. The recreational use is not only limited to the proposed recreational use, the proposed residential area consists of parks and playground that will contribute in recreational area up on development.

Water bodies

12.22 Existing area of water bodies are retained in the proposals as well. Water bodies with extent of 4745.49 with 6.46 percent to the total planning area is retained. Water bodies are to be conserved for sustainable environment.

Agricultural and Others

12.23 Agricultural economy plays a vital role in the planning area's economy. To encourage and sustain agricultural activity such as floriculture, horticulture, and moriculture, to sustain the agro based activity, an extent of 33,603.06 Ha is retained in the planning area. Presence of International flower auction centre and proposed market complex at Moranapalli will enhance the agricultural and floriculture activities. The area to be conserved like reserved forest, grazing land and hill area are retained in the proposals for environment sustainability.

Verified RealEstate™

The proposed land use is compared with URDPFI guidelines ranges. As the projected population is over 5 lakh for the horizon period, the city falls in large city category. The land use percentage is compared as urban and total planning area.

Table 47: Land Use Compared with URDPFI Guideline

No.	Land use	URDPFI Large city	Land Use (%)

14. Conclusion

14.1 The master plan identified the issues, potential and gaps in the planning area. The population projected for the year 2046 is 11,37,516. For this population, document has recommended creation of additional physical and social infrastructure facilities, strategies for sustainable development of agro-based industries, metal based and mineral based industries, flori-business, and strategies for improving the circulation, strategies for protecting the blue and green assets with emphasis on expanding the area under green belt. This document has proposed land use pattern following the guidelines of URDPFI. Adoption of this master plan for the Hosur New Town Development Area will take the planning area in an oriented path of sustainable development in all spheres.

New Alignment Road Projects:

1. 30 m wide (A1 – A1) Road from Zuzuvadi to Moranapalli – 18.24 Km.
2. 70 m wide (A2 – A2) Road from Sathanur to Deveripalli – 46.5Km in (NH-948A) STRR (Satellite Town Ring Road).
3. 30 m wide (A3 – A3) Road from Alur to Advanapalli – 6.23 Km.
4. 30 m wide (A4 – A4) Road from Chennathur to connecting Kelamangalam link road – 4.97 Km.
5. 30 m wide (A5 – A5) Road from Thalli road to Denkanikottai link road – 2.47 Km.
6. 30 m wide (A6 – A6) Road from Thally road to Athibelle Kelamangalam road – 1.17 Km.
7. 30 m wide (A7 – A7) Road from Bagalur to Dinnapalli ring road–7.45 Km.
8. 60 m wide (A8 – A8) Road from Kothakondapalli to Thuppuganapalli road (NH 844)– 22 Km.

Road Widening & Improvement Projects:

1. Hosur to Thally Road 18 to 30 m (B1 – B1) from Zuzuvadi to Moranapalli – 15.24 Km.
2. Road 18 to 30 m (B2 – B2 Hosur to Denkanikottai road]) Road from Mathigiri to Thandarai – 14.35 Km.
3. 18 to 30 m (B3 – B3 [Hosur to Kelamangalam]) Road from Achettipalli to Bodichipalli – 18.03Km.
4. 18 to 36 m (B4 – B4 [Hosur to Rayakottai road]) Road from Onnalvadi to Thuppuganapalli – 15.09 Km.
5. 24 to 36 m (B5 – B5 [Hosur to Bagalur road]) Road from Viswanathapuram to Bagalaur – 8.99Km.
6. 18 to 30 m (B6 – B6 [Bagalur to Kaganur]) Road from Bagalur to Kaganur – 5.79Km.
7. 18 to 30 m (B7 – B7 [Bagalur to Belathur road]) Road from Bagalur to Belathur road – 3.26Km
8. 18 to 30 m (B8 – B8 [Bagalur -Berikai]) Road from Lingapuram to Berikai – 11.40 Km.
9. 18 to 30 m (B7 – B7 [Bagalur to Belathur road]) Road from Bagalur to Belathur road – 3.26Km.
10. 18 to 30 m (B8 – B8 [Bagalur -Berikai]) Road from Lingapuram to Berikai – 11.40 Km.
11. 12 to 30 m (B9 – B9 [Koladasapuram to Aduvanapalli]) Road from Koladasapuram to Aduvanapalli village – 5.42 Km.
