CHAPTER - I INTRODUCTION

1.01 The process of urbanisation has been very rapid in Tamil Nadu and it has accelerated during 1961-71 period. The rapid growth of urban centres (28% since 1961 *) has taken place without a con-comittant increase in facilities for healthy life. This problem of rapid growth without the provision of capital intensive social amenities is not confined to metropolitan centres alone but is equally pronounced in all the urban centres of the state. There are 34 urban centres in the Region in 1971 as against 31 in 1961.

1.02 Urban Planning has been gaining importance throughout the world on account of the rapid increasing population and consequent urbanisation trends. Migration from Rural Areas into urban centres is a significant occurrence of the era encouraged by employment potential and industrialisation in cities and towns. Such in-flow of population creates serious problems affecting the safety and comforts of the people residing in cities. It results in straining the existing services such as water supply, drainage, transport apart from lowering the standards of sanitation creation of slums in haphazard manner and overcrowding. All these undesirable and un-healthy trends will continue to increase in future; therefore it becomes

Verified RegEstate ™

Scanned with CamScanner

a matter of vital and urgent importance to control and regulate growth of urban centres with a view to minimise the evil effects and to ensure safe, healthy and comfortable living for the citizens, believing in the universal concept as "Prevention is better than cure".

1.03 The realisation of this problem in initial stages resulted in framing the Tamil Nadu Town Planning Act 1920 which envisages the compulsory preparation and submission of General Town Planning Schemes providing for organised growth in the Municipal area. But due to lack of finance and competent technical personnel in the Municipalities it could not be accomplished . The need for the preparation of the Master Plan as a must for major towns was realised during Third Five Year Plans only. The new Tamil Nadu Town and Country Planning Act 1971 provides for declaration of Local Planning area and constitution of Local Planning Authority as well as preparation, sanction and implementation of master Plan for Local Planning Areas. This act also envisages power for acquisition and disposal of land for Planning purpose and power to mobilise fund.

1.04 Master Plan envisages orderly growth of the Town by assessing the land requirements for various urban uses and facilities and providing for the same

Scanned with CamScanner

1.06 From the above table it may be seen that the class II and III towns are growing at much faster rate than all other towns excepting the Class VI Towns. Also it is a fact that the Class I and II towns also constitute 44% of the total urban population of the region. Therefore the immediate task of the planners in the state is planning for orderly growth of Class I, II and III towns. Since, Tiruvannamalai comes within this range planning for the town becomes a necessity.

1.07 Tiruvannamalai is a first grade municipality and also the Taluk head-quarters of the same name in the North Arcot District. As per the G.O.Ms.No.670 dated 16.3.74 the Tiruvannamalai Local Planning Area has been declared. But there is no Master Plan prepared for this town. This again necessitates the preparation of a comprehensive Master Plan immediately. Moreever, the Vellore-Dharmapuri Draft Regional Plan Report has suggested four main corridors for distribution of urban population for 1991. The predominent one is known as Vellore-Krishnagiri Axis. Master Plans have been prepared for almost all urban centres along this axis. The next important one is Tiruvannamalai Dharmapuri Axis, in which Tiruvannamalai is given first priority for preparation of Master Plan, considering these factors preparation of master plan for Tiruvannamalai has been taken up.

CHAPTER II

Delineation of Planning Area

2.01 The Planning area delineation is the first and foremost work in preparation of Master Plan.

Surveys were conducted to ascertain the Planning area for this town. Studies on the following aspects were made.

1. Physical features.
2. Movement of people for employment, educational pursuits, medical facilities etc.,
3. Movement of vegetables, milk etc to town.
4. Demographic factors.

1. Physical Features

2.02 The Town has grown around Arunachaleswarar Temple as the nucleus. The temple is located at the top of Tiruvannamalai hill a lofty one. Naturally this hill has been a physical barrier for the growth of the town on the west side. In the other directions, the land is undulating with irrigation tanks strewn all over. There is a vast expanse of agricultural lands separating the town from the adjoining area. In the near vicinity, there is no settlement having more than 1800 population around. The village Adiyur with just a population of 1836 is on Kanji road nearly 5½ K.M. from the main town on north-west side. The village Venkikal with 1707 population is 4 K.M. is in the north on Vellore road. The village Durgini with population

Verified © RedEstate ™

Scanned with CamScanner

of 1241 and Samudram of 1219 persons are respectively. 7 K.M. and 6 K.M from the main settlements. It is thus seen these settlements are very small and are suificiently away from the main settlements.

2. Movement of People

Work: The town has got mostly oil mills and Rice mills. The other two industries of importance are 1) Tansi and 2) Indian Steel Rolling Mill. Each of these employs about 30 people only. So it is clearly seen that people coming into the town for the sake of employment is practically nil.

The movement of people for Technical education in the Industrial Training Institute is mainly observed from 1) Asanampattu 2) Perambet 3) Vettavalam 4) Zavadi hills and 5) Polur. It is observed that the Government Hospital serves adjoining villages of about 60 since it is the largest hospital available for this area. The inpatient strength is 317 and the out patient strength is 4,600 per month. This Government Hospital is effectively utilised by the following villages. 1) Thandarampattu 2) Inamkariyandal 3) Iyyampalayam 4) Nallavanpalayam 5) Mallavadi 6) Palayanoor 7) Meiyur 8) Sirupakkam 9) Edapalayam and 10) Variyur

The movement of vegetables and milk to this town is found from about 35 villages of

Verified © RedEstate ™

Scanned with CamScanner

which, the following villages supply milk at the rate of more than 100 litres per day. 1) Vettavalam 2) Arunthirapattu, 3) Alandur 4) Sathanur 5) Melpallipattu 6) Mummalai 7) Kriyamangalam 8) Andapattu 9) Varapuram 10) Pounkulathur 11) Poondi 12) Reddiyarpalayam 13) Thandarampattu and 14) Radhapuram. The movement of vegetables to this town is observed from the following villages which are supplying a considerable quantity of vegetables. 1) Mathur 2) Kilnathur 3)Pallikondanpattu and 4) Adaiyur.

Demographic factors

The growth of the adjoining villages were studies in the last two decades to find out whether there has been decent growth in population. The vicinity villages have mostly less than 500 population.

There has not been any appreciable increase in population excepting a few hundreds. The Tiruvannamalai Town has gained a population of 14,929 during the last decade.

From all the above physical features movement of work and demographic study, even though some villages supply milk and vegetables to the town and also people come for educational persuit to the town.

Verified RealEstate™

Scanned with CamScanner

Actually the town is practically independant and has not much influence from the environs. The town is further more separated by vast green spaces which conclusiom that the planning area can very well be the town limit itself. Hence the proposals area also drawn by delineating the planning area as the town area.
