TIRUNELVELI – MASTER PLAN

CHAPTER-1

MASTER PLAN LEGAL FRAME WORK

1.01 GENERAL:

1.01.01 Master plan is a directive document intended to guide the urban development of a city and its environs in an orderly manner. It is a suggestive broad land use plan with a suitable transportation network. It is prepared based on the existing trend of development of the city and its environs to meet the urban needs of its future population.

1.01.02 After independence, the urbanization in the country has been accelerated due to developments in industrial and agricultural and other economic fields. The urbanites in the State of Tamilnadu has multiplied by four times in the last six decades since 1941. The 1991 census revealed that Chennai metropolitan area alone accounted for 29.5% of the total urban population of the State and another 21% are shared by the next five major urban agglomerations of Madurai, Coimbatore, Thiruchirapalli, Salem and Tirunelveli.

1.01.03 Tirunelveli is the sixth largest city of Tamilnadu with corporation population of 411831 lakhs as per 2001 census. Tirunelveli is the head quarters of Tirunelveli district and is fastly developing urban centre and it extends its influence over the entire Tirunelveli district, Thoothukudi district and Kanniyakumari district a part of Viruthunagar district.

1.01.04 Tirunelveli city is not by itself a separate entity. But it has to depend for its own requirements on its vicinity areas. The vicinity area in turn have to depend on Tirunelveli city for the day to day requirements with regard to the various amenities which they themselves do not have. This indicates that Tirunelveli urban development cannot take place without taking into account its vicinity area which are linked with one another so that these will be an integrated urban development.

1.01.05 Hence it is essential to prepare a master plan for Tirunelveli city which will provided broad guide lines for the future development pattern with adequate infrastructures section 17 of the Tamilnadu Town and Country Planning act 1971 provides for preparation of master plan and highlights the contents of the master plan.

1.01.06 Under the power vested in section 10(1) (b) of Tamil Nadu Town and Country Planning act 1971, the Government may notify any area as local planning area and under section 10(4) the Government may confirm this notification, section 11(3) of the act provides for the constitution of "Local Planning authority" constituted under this act shall prepare and submit a plan, called the "master plan" for the local planning area. The master plan may proposes or provides for all or any of the following matters namely:

(a) The manner in which the land in the planning area shall be used.
(b) The allotment or reservation of lands for residential, commercial, industrial and agricultural purposes and for parks, play fields and open spaces.
(c) The allotment or reservation of land for public buildings, institutions and for civic amenities.
(d) The meeting of provision for national highways, arterial roads, ring roads, major streets lines of communication including railways, airways posts and canals.
(e) The traffic and transportations pattern and traffic circulation pattern.
(f) The improvements of major roads and streets.
(g) The area reserved for future developments, expansion and for new buildings.

Verified by RealEstate™

(h) The provision for the improvement of areas of bad layouts or obsolete development and slum areas and for relocation of population.
(i) The amenities, services and utilities.
(j) The provision for detailed development of specific areas for housing, shopping, industries and civic amenities and educational and cultural facilities.
(k) The control of architectural features, elevation and frontage of buildings and structures.
(l) The provision for regulating the zone, the location, light, number of storages and size of buildings and other structures, the size of the yards and other open spaces and the use of the building structures and land.
(m) The stages by which the master plan shall be carried out and,
(n) Such other matters as may be prescribed.

1.02 TIRUNELVELI LOCAL PLANNING AREA:-

1.02.01 In existing the powers under section 10(1) (b) of the Town and Country Planning act 1971, the Government had published the intention of declaring Tirunelveli local Planning area in G.O.M.S. No.354, Rural development and local administrative department dated 16.02.1974 and it was confirmed under section 10(4) of the act 1971 vide in G.O.M.S.No. 1503 Rural development and local administrative department dated 21.06.1974 with 51 number of villages formed as a local planning area. The local planning authority has been constituted in the G.O.M.S.No. 1138 Rural development and local administrative department date 07.06.1976 under section 11(1) and (3) of the act 1971. Again the Tirunelveli local planning area was renotified under section 10(1) of the act vide G.O.No.2087 Housing and Urban development department dated 15.07.1979 with including additional villages falling under the urban land selling act 1976 and the same confirmed under section10(4) of the act 1971 vide in G.O.M.S.No. 366 Housing and Urban development department dated 05.05.1984. The above said 10(1) G.O.No.2087 Housing and Urban development department dated 25.11.1988 and renotifyed as in G.O.M.S. No.1565 Housing and Urban development Department, dated 16.06.1993 under section 10(4) of the act 1971 subsequently certain areas have been declared as Gangaikondan new town development area so as to be submit for revised consent. The table No.1.1 shows the details of survey numbers, block, ward in Corporation area and villages. The table 1.2 shows the survey numbers comprised in the revenue villages of the vicinity are.

1.02.02 In exercising the provisions made in the section 11(1) and 11(3) of act 1971, the government in G.O.M.S.No.1138 Rural; development and local administrative department dated 07-06-1976 according to that, master plan was prepared and submitted for consent under section 24(2) of the Act 1971 vide resolution No.1 dated 18-03-1994 of the Tirunelveli local planning authority and it was consented in G.O.M.S.No.505 Housing and Urban development department dated 20-07-1994. Now again it is submitted for revised consent under section 24(2) of the act 1971.

1.03 ADMINISTRATIVE WING OF CORPORATION

1.03.01 The Commissioner of City Municipal Corporation is the head of administrative wing and is responsible for the overall management and general administration of the Corporation. He has four Assistant Commissioner for his assistance. The Municipal Corporation is divided into four zones namely Tirunelveli, Palayamkottai, Melapalayam and Thatchanallur. Each zonal office is headed by the Assistant Commissioner. The zonal has been brought into existence with a view to decentralize the function and responsibilities and to make the administration more efficient and responsive.

1.03.02 The Corporation has six departments to discharge the function and responsibilities vested with it various statutes. The following are the six departments.

1. Engineering, water supply and drainage
2. Public health and sanitation
3. Planning
4. Accounts
5. Revenues
6. Personnel and Administration.

CHAPTER – II
INTRODUCTION

2.01. LOCATION

2.01 Tirunelveli is one of the historic and religious centers in Tamilnadu. It is located 8’44 N latitude and 77’44 E longitude an elevation of 36.39m MSL on the lake of the perennial river Tamiraparani and on NH – 7 (Banaras-Cape Comarin Road) about 654 KM south of Chennai, the state capital and 82 KM north of Kanyakumari, 52 KM west of Thoothukkudi and 54 KM east of Tenkasi. It is also situated at the junction of southern railway, with consisting of broad gauge lines and meter gauge lines. Map no. 1 shows the location of Tirunelveli City.

2.01. PHYSICAL CHARACTERISTICS:
TOPOGRAPHY

2.02.01 The general topography of the L.P.A. is a flat terrain in nature and the altitude is 36.39m above MSL and is endowed with small mountains and hillocks. It has natural slope towards the river. The blue metal and lime stone and the mineral resources available with in the L.P.A. limit. The type of growth is linear ribbon development.

2.02.02 The climate of Tirunelveli may be said to be equable. The maximum temperature is 39.4°C in the month of may and minimum is 21.7°C in the month of January. From about the middle of February temperature increases steadily. In May which is usually the hottest month in the interior, the mean daily maximum temperature is 39.4°C. The weather is quite hot in April, May and June. Sometimes reaches 42.5°C with the onset of the southwest monsoon by the end of May or beginning of June, there is some drop in temperature. By about the middle of October, both day and night temperatures decrease appreciable. The period from November to January is the coolest part of the year with the mean daily maximum temperature of about 30 to 31°C in the interior parts. The mean daily minimum in these months is about 22 to 23°C.

Verified RedIEstate ™

RAINFALL:

2.02.03 The normal rainfall for Tirunelveli is 95.6mm. The average annual rainfall during the last year of June or at least close of the Southwest monsoon wind starts sweeping the region. During July-August period these winds become violent and sand storms start especially in the red sandy soil tracts. This at times accumulates heaps of sand in cultivated regions thereby causing damage to the standing crops the average annual rainfall received by L.P.A. in the last year was 102 to 127mm.

HUMIDITY:

2.02.04 The humidity is regarded maximum in the period of October-December and found to be high in the month of November as 98% and minimum is noticed in the month of May as 29%.

WIND:

2.02.05 The wind direction is predominantly towards North and West in the morning periods and South and East in the evening periods.

1. Generally light to moderate in strength.
2. Between May and September winds are mainly north westernly or Westernly.
3. From October to February winds are mainly North easternly or easternly.

CLOUDINESS:

2.02.06 During the months of April and May, the sky become heavily clouded and threatening tin the afternoons on many days when thunderstorms follow. In the southwest and northwest monsoon seasons, the sky is heavily clouded or over cast.

SOILS:

2.02.07 Along the Tamiraparani river valley red loam or sand with strips of black soils are found. The black soil is of high consistency value compared to the red soil. The black soil of river valley overlies a stiff yellow colour. Red soils in the higher reaches are poor but along the river streams and irrigation facilities they are good.

2.02.08 The origin of the river Tamiraparani lies at Agasthiyar Periya pothigai hills at a height of 2050 meters in the western ghates. The river valley is narrow but has got rich alluvial soil. It enjoys the full benefit of both monsoons. As such it has perennial supply of water and has the richest lands on either side. The lower river valley enjoys a good network of irrigation systems making full use of the water resources. The lowest river valley is one of the densely populated areas in the southern region. The urban complex of Tirunelveli, Palayamkottai and Melapalayam is situated in this river valley and occupies a postal position in the agglomeration of settlement in the lower valley.

2.03. HISTORY

2.03.1 "If the boundary of the town is made with stone it will not be of aesthetic beauty and therefore boundary is fenced with paddy fields" says a Tamil poet about Tiru-nel-veli the town has been surrounded on all sides by paddy fields. As such the town was called as 'nelveli' which means paddy-hedge. Since the temple in the town is dedicated the lord Siva, the around the temple is called as Tirunelveli. Around 1560, the town was rebuilt by Viswanatha, the founder of Nayak dynasty who also erected many temples in it. Tirunelveli was the earliest Pandiya's capital. The Nayaks ruled Tirunelveli from Madurai during 16^{th}, 17^{th} and early of 18^{th} Century.

2.03.2 The antiquity of Tirunelveli town is evident from the fact that the town and temple at its centre were referred is sivite semons of 7^{th} century A.D. the name TIRU-NEL-VELI (The sacred paddy hedge) describes generally that part of the town which is massed around the temple of Swamy Nellaiyappar.

Verified RedEstate™

2.03.3 The history described that a fine broad road flanked on either side by rise fields and shaded by on avenue of maruda trees leads to the old town of Tirunelveli passing through a mandapam to be the entrance of the great temple. Here the formation of the town whose reconstruction was attributed to Ariyanantha mudaliyar the lieutenant of Viswanatha Naicker (A.D.1559-69) can be made out. Around the temple are the four main streets at right angles. East to West and North to South beyond the main streets towards the west the design is lost in congested habitation of the poor classes.

2.03.4 On the temple, Fergusson says in his book "History of Indian and Eastern Architecture", through neither among the largest nor the most splendid temples of Southern India that at Tirunelveli will serve to give a good general idea of the arrangement of these edifices and has the advantage of having being built on one plan at one time without subsequent alterations or changes.

2.03.5 It was the singularity of being a double temple the great square being divided in to equal portions of which one is dedicated to the God Siva and the south half to his consort Parvathi. The general dimensions of the whole enclosure are 850 X 756cm, the larger dimension being divided in to two equal portions each.

2.03.6 The temple contains numerous inscriptions namely records of Veerapandiya (A.D.950) Rajendra Chloa-I (A.D. 1101-44) Kulothunga(A.D.1074-1118), Maravarma Sundarapandian-I (A.D.1216-35), Maravarma Sundarapandian-I (A.D. 1238-51). Maravarman Kulasekara deva-I (A.D.1268-1308) and Maravarman Kulasekara deva-II (A.D.1314-21) many of these records contained announcement of the first rate of significance and the selection of Tirunelveli for their publication clearly indicates the importance of the place in the early time under the Madura Nayakkars, Tirunelveli appears to have been treated definitely as the headquarters of the Southern port of their territories Palayamkottai, about 5KM away, was fortified and was regarded as sufficient production for the capital.

2.03.7 Palayamkottai was fortified under the native rulers and its defenses were intact at the time when it passed in to the hands of British. It subsequently followed the base of their operations during poligar wars. The fort was not dismantled until comparatively recently, when the garrison of one or more native regiments which had been stationed here even since the British occupation was finally withdrawn.

2.04. GROWTH:

2.04.1 The history of Tirunelveli is inextricably interwoven with that of the perennial Tamiraparani River, probably the only major water source in the state which has surface flow now all throughout the year. Tirunelveli and Palayamkottai are the important towns of the district. Tirunelveli is situated on the left bank of Tamiraparani River and Palayamkottai on the right bank. Palayamkottai as administrative head quarters and with the establishment of educational institutions industries and government offices, exhibited remarkable development. In the year 1948, a portion of Melepalayam village was deleted from this limits of Palayamkottai Town and was constituted as a separate Municipal Town with effect from 1.10.1948. These three Municipal Towns with few surrounding villages have been fused to form Tirunelveli Municipal Corporation.

2.04.2 Tirunelveli local planning area, comprising of the three Municipalities and surrounding villages were notified as Tirunelveli local planning area in 1974 and an authority was created in 1976. Again a revised local planning area including a few more villages falling under the urban land (ceiling and regulation) Act 1978, was notified in 1979. Again certain modification were made and finally confirmed in the year 1988. The L.P.A. included three municipalities' one town panchayat and sixty seven revenue villages. The L.P.A. extends over an area of 35377.80 hectares.

2.5 TOURIST IMPORTANCE:

The local planning areas have some tourist spots in and around. This are briefly explained below.

Verified & Certified

2.5.1 CORPORATION AREA:

SWAMY NELLAIYAPPER TEMPLE AND KANTHIMATHI AMBAL TEMPLE

2.5.1.1 The temple of Swamy Nellaiyappar and Kanthimathi Ambal is situated in the centre of the Town and at a distance of 2KM from the railway station. The old name of the Town, Tirunelveli which was known in the past as Thenpandiyanagaram, is a part of the Town which has developed around the temple of Nellaiyappar from the distance itself. One can have a beautiful view of the great gopurams were built according to the rules laid down in the agamasastras by Rama pandian. Nellaiappar Kanthimathi-Ammal temple and Krishnapuram temple are the places with in the city frequently visited by the tourists. When summer sets in the domestic tourist season begins coinciding with the vocation for schools all over the country. The influx of domestic visitors stretches from April to the end of June. The period from November to March offers the November to March offers the climate for foreign tourists to explore the scenic and religious sports in and around Tirunelveli. Thus by exploring available tourists potential of the city and surrounding areas, the tourist both domestic and foreign can be developed for 8 to 9 months in a year. It is observed that the tourist flow has been increasing over the years. Tirunelveli city provides good catering services for tourists.

Nindrasir Nedumaran who reigned in the seventh century A.D. also contributed by constructing and renovating important parts in this temple. A beautiful flower garden originated in 1756 A.D. Next to this chain mandapam welcomes with many colorful fragrant flowers. This garden had been designated by Thiruvengadakrishna mudaliyar. A square vasantha mandapam with 100 pillars were found in the midst of this garden.

DISTRICT SCIENCE CENTRE, TIRUNELVELI, (NATIONAL COUNCIL OF SCIENCE MUSEUMS, GOVERNMENT OF INDIA)

2.5.1.2 The district science centre is unique Institution, situated on the banks of the Tamirabarani popularizing science inculcating the spirit of enquiry, fostering creative talents and infusing scientific temper in life or its objectives. This autonomous body is a unit of the National Council of Science Museums, attached to the Department (HRD), Government of India. This is one among the 124 centres in the country. The centre has three permanent galleries as ocean, a semi permanent gallery on popular science and a six acre science park where numerous exhibits help create awareness of scientific development among the people.

A good collection of films and video cassettes on nature, wild life, computers etc., given face lift to the centres. It organizes video and planetarium shows (Planetarium shows the night sky during day time). The centre gives heart beat demonstration at the animatorium has a sky observatory to view heavenly bodies through telescope and science demonstration and lectures on everything from electronics to salts, kits are also lent to schools for effective classroom communication. In addition to the above facilities, the District science centre is also organizing the following programs mobile science exhibition, planetarium film show, temporary exhibitions, science drama and science fair etc.,

THIRUVALLUVAR TWO TIER BRIDGE,

2.5.1.3 The two tier over bridge, namely Thiruvalluvar Bridge at Tirunelveli junction was constructed to avoid the railway line crossing. The total length of bridge is 800 meters. This type of two Tire Bridge constructed in Tirunelveli is the first of its kind in India. This bridge was opened for traffic in 1972. This two tier over bridge consist of 25 spans of which 13 arc of bow string arch, each with a width of 30.30 meters and 12 are single tier R.C.C. girder each having a width of 11.72 meters.

HOLY TRINITY CATHEDRAL (OOSI COPURAM),

2.5.1.4. Holy Trinity Cathedral a small, elegant and beautiful church was built in 1826 by Rev. Rhanius and opened to public for worship on 26 June 1826. It took only 175 days for its construction which cost about Rs.2000. This small church with an oblong edifice measuring 64’ X 30’ still serves as a nucleus for

this massive cathedral which developed in later years. This amount came as donation not only from Chiristians, but from Hindus and Muslims as well. Venga mudaliyar had donated 168 acres of punjai land for the maintenance of this church. Many renovations and additions were made to this structure.

In the year 1845, a tall stately steeple of 158' soaring in to the sky which was added by Rev.Pettilt and has made the church a land mark all over the district. This church is locally well known as "Oosi gopuram" as a land mark. The resonate bell gifted by friends in England and installed in 1850, has unfailingly chimed the hours calling the faithful to worship over the years and the clock set in the tower is railed up on by the entire town as its beloved Big Ben. Many improvement extension and renovation works have taken place subsequently in the years 1846, 1853, 1858, 1869, 1870, 1876, 1926, 1932 and 1937. In 1940 Bishop Stephen Nellai raised its status as the Holy Trinity Cathedral, painting, flooring and other extensions were made in the succeeding years. This church is involved in many social services like paying visit to hospitals. This church plays a vital role not only in spiritual up-liftment of this people but also in the material up-liftment like providing education, distributing free food and clothing and helping them in the construction of their houses etc.,

MURUGAN TEMPLE AT KURUKKUTHURAI

2.5.1.5 There is a small Murugan Temple at Kurukkuthurai which is situated at the bed of Tamiraparani River. The holy water from Kurukkuthurai is taken to Nellaiyappar Temple daily for pooja purposes. Kurukkuthurai temple and its mandapam often gets submerged when there is flood in the river.

THE CATHOLIC MISSION IN PALAYAMKOTTAI

2.5.1.6 The presence of Catholic followers in Palayamkottai dates back to 1838 when parish of Palayamkottai was entrusted to the Society of Jesus. The Palayamkottai Church was built in 1863. Since Palayamkottai was head Palayamkottai Church was built in 1863. Since Palayamkottai was head quarter of Sulesiasticil district missionaries had to visit frequently to meet their superior.

ST. ANTONY'S CHURCH

2.5.1.7 As most of the Catholic were living near market a separate chapel was built for them dedicated to the Thoumaturage St.Antony. It is a centre for pilgrims and also serving as a mortary chapel as it stands in the centre of graveyard. The cemetery now closed for fresh burial except for priests. It is now the chief centres of the Christian mission in South India and posses a large number of educational and other philanthropic institutions established by the mission agencies.

2.5.2 TOURIST PLACES IN VICINITY AREA:

2.5.2.1 **Krishnapuram Sculptures.**

The Venkatachalapathy temple at Krishnapuram village on the Tirunelveli-Tiruchendur main road about 12 Kms from Tirunelveli is one of the few specimens depicting the architectural marvel and grandeur. It is indeed a treasure house of stone sculptures many rare intricately carved sculptures made of granite stone are fine exhibits of architectural skill. This temple is dedicated to Lord Venkatachalapathy with his consorts.

On either side the temple is complete in it self since it is following temple agamas.

It is said that Krishnappa nayakkar of Nayak dynasty had commissioned, some famous sculptures from Vijayanagaram and they have left behind a wonderful collection of sculptures. That tell us tales of heroic love and tragedy. Gumbhabisegam function was held during May 2000. Many pilgrims are gathered during week ends at present.

2.6.TOURIST PLACE AROUND TIRUNELVELI L.P.A.

PAPANASAM:

2.6.1 The Tamiraparani river in its course, has fall down in Palanasam known as Kalynathirtham. This water falls is considered as a sacred bathing place for Hindus. It is here at Papanasam which is about 40 Kms. away from Tirunelveli in Ambasamudram Taluk. A dam is also constructed in this river for regulating supply of water for irrigation and for generation of electricity.

MANIMUTHAR DAM:

2.6.2 There are three dams across the river Tamiraparani two above Papanasam and one at Manimuthar at Kallidaikurichi which is about 34 Kms. away from Tirunelveli Town. The Manimuthar project completed under the second Five year plan in 1958 comprises a reservoir of million cu.m. capacity, and built across Manimuthar river, which is a tributary of Tamiraparani. The reservoir supplement suppliers to hectors of existing lands under the several Tamiraparani channels and precariously rain fed tanks in Ambasamudram, Tirunelveli. The Manimuthar dam site and the park has been visited by a large number of tourists and the holiday makers.

KANYAKUMARI

2.6.3 It is situated at the confluence of three oceans namely the Bay of Bengal, the Indian oceans and the Arabian Sea. It is the only place in the whole of India were in one can witness both the sun set and the rising of the moon simultaneously on full moon days the temple here is held sacred from time in memorial and it attracts people from far and wide. The other tourist's attractions of this place are natural sceneries sands of different colors and calm breeze. The Gandhi mandapam and the recent addition of mandapam on rock, Vivekananda. Which is about 200 yards away from the coast also attract lot of tourist's to the place. A ferry service run by the Vivekananda rock memorial committee carry the tourist's to the rock an back to the coast.

THIRUCHENDUR:

2.6.4. Tiruchendur which is about 60KM away from Tirunelveli is an important place of pilgrime for Hidus the ancient temple is called, Sri Subramaniyaswamy temple situated at the seashore is considered as a holy place of worship and this part of the seashore as a sacred bathing place and therefore this town is frequented by pilgrims from all over Indai.

COURTALLAM:

2.6.5. Courtallam is the western gnats, near Tenkasi 65Kms away from Tirunelveli. The famous water falls hare have proved good health for bathers, in addition to being a place of tourist interest. The water falls namely the Main falls, the Five falls, the Tigen falls, the Chitharuvi, the Old falls, another New falls and some more falls attract a large number of tourist's during the season that is during the month of June- September.

KALUGUMALAI:

2.6.6. Kalugumalai or 'The hill of vulture' is situated on the road connecting Kovilpatti and Sankarankoil. It is massive alone of rocks with 300' hight approximately which can be seen from a far of place. The place is famous for it rock at temple called Vettuvankovil. A temple dedicated to Lord Subramanayaswami is also located at the foot of the rock.

PANCHALAMKURICH:

2.6.7. Panchalamkurichi is situated 3KM north of Ottapidaram. The famous freedom fighter Kattabomman fort is located here. At present only the remaining of the fort is seen in the site. Since it has

Verified © RealEstate

been destroyed by the British of late in 1975 the Government of Tamilnadu have constructed a fort in Panchalamkurichi in memory of the freedom fighter.

SANKARANKOIL:

2.6.8. The lord Siva and Gomathiamman temple is famous here 'Adithapasu' effects large crowds during July or August of every year. The town is situated west of Kovilpatti and attracts pilgrims, devotees in and around districts.

SRIVAIKUNDAM:

2.6.9 Srivaikundam is famous of the Temple dedicated to Lord Vishnu known as Srivaikundapathiswami with a lofty gopuram. The Thiruvenkadamudaliyar mandapam is rich with sculpture of yalis, elephants and warriors. The Ekadasi mandapam is opened on festival. The temple served as a fort to Veerpandiyakattabomman the famous freedom fighter. The kailasanatherswamy temple contains six inscription of the times of Kattabomman.

PATHAMADAI:

2.6.10 It is known for its beautiful hand woven corai mats. The weaving profession which has traditionally intermingled with a life style of the locals is a notable cultural heritage of this town. The life style and the social practices of this weaving community are very unique pertaining to their profession this is also the birth place of Swamy Sivananda, the famous saint and philosopher.

KALAKKADU SANCTUARY:

2.6.11. The Sanctuary is situated in area of 223Sq.Km in Tirunelveli District, including the foothills of westernghats and adjoining area. The flora ranges forest of tropical wet evergreen to tropical dry deciduous and thorn forest at macaque common longer, nilgris, sambar, sloth bear, gour etc are some of the endemic wild life species. Besides a wide range of birds and reptiles are also seen here. The season of the Sanctuary is September to March.

MUNDANDURAI:

2.6.12. There is nothing to differentiate this Sanctuary from that of Kalakkadu except absence of the elephant and gouruar. It is situated in Tirunelveli district and extends over an area of 567Sq.Kms. The flora of this Sanctuary varies from dry deciduous to tropical we evergreen forest with patches of pure reeds. Various species of fauna and varieties of reptiles and insects are found preserved here.

OTTAPIDARAM:

2.6.13. This is the birth place of V.O.Chidambaram, the famous freedom fighter and a greater lawyer. His maiden venture in navigation against the East India Company caused his imprisonment. That is why he is popularly called as 'Kappalottia Tamizhan'. His home has now become memorial.

ARIYAKULAM:

2.6.14. A variety of birds congregate here in a large number from March to June for breading Koonthankulam another important bird Sanctuary of this district is situated 30Kms from Tirunelveli.

CHAPTER – III
POPULATION AND EXISTING LAND USE

3.01 NECESSITY

The study of population and characteristics forms the basic for any planning process. The population size is a basic yard stick for estimation of all future needs like water supply, planning infrastructure facilities and employment opportunities etc.,

3.02 POPULATION CHARACTERISTICS

CORPORATION AREA

From the table 3.01 it can be seen that on rise and fall is noticed from decade to decade. There had been some considerable fluctuations in population growth, during the past decades. It has registered a steep variation during the decades 1971-1981, 1991-2001 as 20.78% and 28.12% respectively in Corporation area. This may be attributable to the various aspects like the formation of the Corporation and other public and private offices and Institutions etc., The steep down in variation noted in 1981 to 2001 is due to the residential growth moved to outside three Municipal limit at that period.

3.03 VICINITY AREA

From the table 3.01 it can be seen the increase in population during the decade 1971-81 and 1981-1991 is 15.70% and 40.21% respectively but it is decreased in 1991-2001. It is due to the public in rural area migrated towards corporation area.

POPULATION VARIATION

TABLE 3.01

CORPORATION AREA				VICINITY AREA		
Year	Population	Increase	% of variation	Year	Population	% of variation
1971	241013	-	-	82145	-	==
1981	291104	50091	20.78	95038	12893	15.70
1991	321454	30350	10.43	113250	38212	40.21
2001	411831	90377	28.12	82830	(-) 49370	(-) 58.86

Source: District census book and Corporation records.

3.04 POPULATION DENSITY

The Tirunelveli Corporation spreads over an area of 108.65Sq.Km. The gross population density of the Corporation had increased to 3790 persons per Sq.Km in 2001.

Thatchanallur: Highest population density of 229 persons per Hectare and highest residential density of 85 dwelling units per Hectare are found in the ward no.7

Palayamkottai: Ward no.22 and 23 have highest population density of 348 PPH and residential density of 8 dwelling units per Hectare.

Melapalayam: Highest population density of 1180 PPH and residential density of 207 dwelling units per Hectare are found in ward no.36.

Tirunelveli: Ward no.53 contains the highest population density of 529 PPH and highest residential density of 114 dwelling units per Hectare.

POPULATION DENSITY OF TIRUNELVELI CORPORATION

TABLE – 3.2

Year	Population	Gross Density (Person/Sq.Km)
1971	241030	2218
1981	291108	2679
1991	321445	3376
2001	411831	3781

The population density of the vicinity is works out 3.5 persons per hectare which is very low.

OCCUPATIONAL PATTERN FOR VICINITY AREA
TABLE – 3.6

Sl. No.	Sector	2001		
		Workers	% of total workers	% of total population
1.	Primary Sector	12891	31.97	15.38
2.	Secondary Sector	14640	36.25	17.43
3.	Tertiary Sector	12814	31.78	15.28
4.	Total Workers	40315	-	48.09
5.	Total Non Workers	43515	-	51.91
Total Population		83830	100	100

From the Table, it may be seen that the workers involved in Primary Sector has decreased from 9.32% to 4.2% from the year 1971 to 2001. It is informed that that agricultural activities are very low in corporation area where as this sector is medium in Vicinity area with information of agricultural activities are enough.

The workers involved in Secondary sector has decreased from 39.87% to 35.61% from the year 1971 to 2001. It indicates that the people are engaged in household industries. In Vicinity area the activities are more or less equal with other sectors of Vicinity area.

The workers involved in Tertiary sector has highly increased from 50.81% to 60.19% from the year 1971 to 2001. It informs the activities in construction, trade and common transportation, communication and other services are increased. It is due to growth of urbanized settlements. In Vicinity are this sector is equal with other sectors.

3.08 ECONOMICAL GROWTH:

3.08 The economic base of Tirunelveli LPA is mainly constituted with the service sector activities like administrative services (district headquarters), agricultural marketing and service, tourism, banking, technical training, agro machinery repairs and educational services etc., followed by the contribution of small scale industrial activities. The tertiary activities flourish as there is continued growth in arrivals of Pilgrims and tourists. The vast hinder land comprising mostly the agricultural lands has contributing to the growth of Tirunelveli town as a commercial centre, while the number of educational institutions established at Palayamkottai, which has been responsible to make it as a popular educational centre. Beedi manufacturing has once been as important economic activity at Melapalayam. Production of Handloom cloths and other household industries have made their contribution to the economic growth of the city as a whole. The mat weaving at Patamadai a close by settlement has also lent its share to the growth.

The beedi manufacturing at Melapalayam is wanning away from the scene of economic activities due to increase of individual income and increased health awareness about the dangers associated with smoking. The mat weaving activity is on the decline due to changing habits in the usage of materials for beeding purpose.

3.09 EXISTING LAND USE:

3.09.1 For all planning purposes a correct definition and inventory of the existing use of all lands are essential since every change in the use of land constitutes a planning problem and it is subjected to the planning permission under the Town and Country Planning Act 1971.

3.09.2 Accordingly an existing land use map have been prepared in respect of every land in Tirunelveli Local Planning Area by district field survey in the year 2004-2005.

3.09.3 There is an inter mixture of land use in the corporation area that has to be rearranged for harmonies and integrated land development viz., proposed zoning regulation. There is also a considerable variation in the density of residential areas situated with in the limits of these words. In the early days it have not had any kind of plan or any type of land use regulations to guide this urban growth as it occurred consequently. The urban development has been quite, haphazard before the detailed development plans were taken up. Different part of the urban complex developed with various mixed urban land uses exhibited by location of different economic activities. The purpose of the zoning regulations framed in the for-going chapter on its proposals, are not so much to rectify these defects but to ensure that the future developments will follow in an orderly pattern.

3.09.4 The table 3.7 shows the existing land use break up details of Tirunelveli Local Planning Area. It divides mainly into two parts namely Corporation area and Vicinity area. In Corporation area an extent of 2039.75 hectares of land over as developed area, it constitutes as 18.78% of total Corporation area, rest of these are coming under undeveloped area. In Corporation area wet lands and water bodies are occupied as 2/3rd of Corporation area.

3.09.5 In vicinity area an extent of 1505.08 hec. of land covers as developed area it constitutes as 4.13% of total Vicinity area, rest of these area coming as under undeveloped area more than 50% of lands are classified as dry lands in Vicinity area. When compared with Corporation area, the wet lands and water bodies are less in extent.

3.09.6 The total extent of Local Planning Area is 351.59 Sq.km. In which an extent of 108.65 hectares is included in Corporation area, which constitutes of 30.90% of Local Planning Area and an extent of 242.92 Sq.km is included in Vicinity area which consituties 69.10% of Local Planning Area.

The following paras explain the land use developments as in existing land use map.

3.10 RESIDENTIAL USE
CORPORATION AREA

3.10.01 The residential developments are mostly concentrated in the heart of the Tirunelveli town, Pettai, Kokkirakulam, Vannarapettai, the area between Tiruchendur Road an Thiruvananthapuram Road i.e., South bazaar area, Kottur Road area, Samathanapuram area and heart of the Melapalayam and Thatchanallur area. The planned residential area are developed as colonies mostly in Palayamkottai area namely N.G.O. “A” Colony, N.G.O. “B” Colony, Perumalpuram, Rahmuth Nagar, Tirunagar, Shanthinagar, Thiyagarajanagar, Anbunagar, E.B.Colony, Maharajanagar, Anna Nagar, New Nehru Nagar, State Bank Officers Colony, I.O.B. Colony, Welcome Colony, Housing Board Colonies in V.M.Chatram, K.T.C. Nagar etc., and in Melapalayam area namely Xavier’s colony, Thai nagar etc. The scattered residential developments are along Sivanthipatti road, NH7 road beyond southern side of Government engineering college, Papanasam Road, Tuticorin Road, Tiruchendur Road, Mukkoodal road, and Madurai road etc., The residential area occupies 1202.18 Hectares of land which contributes 58.94% of developed area and 11.06% of total corporation area.

SLUMS:

3.10.2 Tirunelveli city has 68 pockets of slums distributed in 36 wards out of total 55 wards. No slum wards in the city accounts of 19 wards. The slum population (92735 persons) of the Corporation constitutes nearly one-fourth (22.55%) of the Corporation total population. Thatchanallur zone has the highest share of about 40% of the slum population equally distributed among then. The largest slum of the city Nellaiyapuram has a population of 4800 persons and is situated in ward No.45 of Tirunelveli and smallest slum on Sevalaperi Road lies in ward No.16 of Palayamkottai. The Corporation has taken up and executed work relating to provisions of water supply storm water drains, public toilets, sanitation, road improvement and street lights etc. Apart from these basic services have been provided under national slum development programme (NSDP). All these improvement works have been carried out only in notified slum, as the Corporation/TNSCB cannot carryout such works legally in un-notified slums, Tirunelveli, which is a leading commercial and service centre for the rural hinterland is also a district head quarters. Hence it attracts migrants from nearby settlements resulting in growth of unauthorized squatter settlements and slums. High rents, prohibitive land prices very limited or no access to credit facilities for the urban poor and lack of credit worthiness have been the important factors contributing to the growth of the slums.

VICINITY AREA:

3.10.3 In vicinity area the earliest residential developments are built up. The residential uses are being developed in the following village area.

Verified @ RealEstate

1. Southern portion of Keelantham Village
2. Parpakulam
3. Sivanadipatti.
4. Munnirpallam
5. Taruvai
6. Narasinganallur
7. Ramayanpatti
8. Thalayuthu

It occupies 806.65 Hectares of area which continues 50.26% of developed area of vicinity area but it is only 3.32 of total vicinity area.

3.11 COMMERCIAL USE:

CORPORATION AREA

3.11.1 The commercial activity of population area serves all needs of major part of the district. The commercial institution in the Corporation area can be classified into three different categories.

1. Whole sale trading centres
2. The retails shops
3. Private officers and commercial fans

WHOLE SALE TRADING CENTRES

3.11.2 The vegetables are collected from surrounding villages and distributed to retail shop merchants. The godowns for storing vegetables are located along eastern side of Nainarkulam tank of Tirunelveli town.

In Corporation area there are two daily market, one is at Tirunelveli Town and another one is at Palayamkottai. There is a weekly shanty at Melapalayam held at every Tuesday. The Grocery godowns are mostly concentrated along west car and north car street of Tirunelveli town. The Jewel parks area mainly located on the West Car Street and Koolakadai bazaar of Tirunelveli town.

There are two popular textile stores in the Corporation are namely RMKV and POTHYS, located along north Car Street. Most of the people from southern part of Tamilnadu and Kerala purchase their wedding silk sarees from these shops.

RETAIL SHOPS

3.11.3 The commercial activities of retail business are mostly concentrated along Swamy Nellaiyappar High Road, S.M.Road, Madurai Road, Thoothukudi Road, thiruvanathapuram Road etc., Most of the retail shops are located also near by Junction Bus Stand.

PRIVATE OFFICES – COMMERCIAL FIRMS

3.11.4 Most of the commercial firms related to % marketing officers are functioning in Junction Bus Stand area, Palayamkottai Bus Stand are and along S.N.High Road.

The Commercial activities occupy 91.83. Hectares of land which contributes 4.5% of developed area.

There are two Uzhavar Santhai maintained by Agricultural Department. One is at Maharaja Nagar and another it at Tirunelveli Town, which serves the need of planned residential.

Verified RealEstate™

TIRUNELVELI HALWA

3.11.5 On unforgettable tasty cuisine of Tirunelveli is the Halwa. While closely looking at the roots of the tradition and background of this delicious item it is found to have an interesting history. It was a small merchant who first started the Rajasthani Halwa stall "Sri Lakshmi vilas" near Tirunelveli Bus Stand in 1808. In few years the sales were high and the item had become famous and reached all over the State with in few decades this dish had become an important item even in the festivals of remote rural areas. They had started to call it as Tirunelveli Halwa. Even now Tirunelveli Iruttukadai halwa is famous for its taste.

VICINITY AREA

As concerned the commercial use in vicinity are which are in lesser extent some commercial establishment are located in Ramayanpatti village, Talayuthu area etc. It occupies 8.65. Hectares of land which contributes 5.54% of developed are in vicinity.

3.12 INDUSTRIAL USE
CORPORATION AREA

3.12.1 The corporation area is comparatively backward in industrial development. At present the major developments are three cotton spinning mills namely Ganapathy Mill, Nellai Cotton Mil and Subburaj Spinning Mill located along Madurai Road which supplies yarn for manufacturing cloths. South India Co-operative Spinning Mills is located in Narasinganallur.

INDUSTRIAL SECTOR

3.12.2 The city has the distinction of having the first spinning mill established under co-operative movement at Pettai in 1958. Tamilnadu Sugar Corporation limited has established a factory at Tirunelveli, which has a capacity to crush 1250 tonnes of cane a day. Another major industry located in the Vicinity area of the city is cement factory established by M/s. India Cements. There are two plants one in Sankar Nagar and another in Thalayuthu. The quantities of Portland cement produced by these two plants have crossed 13 lakhs tones per year.

INFRASTRUCTURE FACILITIES FOR INDUSTRIES

3.12.3 The State Government has provided the required infrastructure for stimulating the industrial growth in Tirunelveli city by establishing an Industrial Estate. The Small Industrial Development Corporation (SIDCO) has constructed the Industrial estate at Pettai area on the northern part of the city.

Beedi rolling, safety matches making, mat weaving and processing and manufacturing of palm fibre and articles from Palm trees and hand loom weaving of textiles are the main household industries are found in the city and its adjoining hinterland.

Bell Pins factory along NH7A in which stationery items like Pins, Chips, Nails, Stapler Pins etc., are manufactured. Kumar Spinning Mill is located at Suthamalli.

Some agro industries, service industries including automobile repairs and the Small Scale Industrial units are located at Pettai. The other industries such as rice mill automobiles, engineering workshops and printing presses etc are mostly located on S.N.High Road and Thiruvanathapuram Road.

Small Industrial units are springing up in the industrial estate located at Pettai. The TANSI is located within the premises of Industrial Estate. The two wheeler sales establishments like TVS, Bajaj, Hero Honda, LML etc are functioning along the Thiruvananthapuram Road. Tyre retreating units, Pipe manufacturing factories, Chickory manufacturing units, Utensil manufacturing industries etc., are located in Thatchanallur.

Verified @ RealEstate

INDUSTRIES IN THE VICINITY AREA

3.12.4 It is seen that major industrial units are located mostly outside the urban area. Considering certain locations advantage such as easy access by road, cheap cost of the land, lower tax rates etc., service and ancillary industries are concentrated in the urban areas as stated above. A detailed description of the major industries in the vicinity area are given below.

Bharat Motors limited which produces coil products is located at Pettai (Rural) area. 35 workers are employed in the industry and 130 HO installations are installed for the operation. The products are fibreflex, rubberized coir mattress, pillows and cushions.

The Tirumalai Spinning Mills Ltd is located at Tiruppani Karisalkulam village. The mill spreads over as area of about 3 hectares of land. But now it is not functioning. Another neighboring industry is match industry named as "Bright Match works". Artificial flower export private limited is located in Ramayanpatti Village. Milk chilling centres, Rubber industry, Manufacturing etc located in Ramayanpatti in which 300 workers are employed. Washers and waste Co., Cotton mill are the other industrial units located in the vicinity area which are worthy mentioning. In Munnirpallam and Taruvai village are few number of stone crushers industries are functioning. In Ramayanpatti village and Sethurayanpudur village lime process industries, lime stone quarries are located along Sankarankoil Road.

3.13 EDUCATIONAL USES

3.13.1 CORPORATION AREA

In the Corporation are there are 23 Elementary Schools, 5 Middle Schools and Higher Secondary Schools are maintained by Tirunelveli City Municipal Corporation. Most of the schools are catering to the educational needs of middle class family children in the surrounding villages. Most of the students are commute from Tirunelveli town to Palayamkottai to avail good educational facility.

3.13.2 Palayamkottai town in the Corporation area is popularly known as Oxford of South India. In the Palayamkottai area many matriculation schools are developed as large number of Government offices are accommodated in the area. The educational requirements of the pupils in the Corporation area as well as vicinity are mostly met by the educational institutions situated in Palayamkottai town. There are approximately 146 numbers of educational institutions in Corporation area, most of these are maintained by private, additional to the Corporation schools, there are 17 numbers of primary schools, 22 numbers of middle schools, 12 numbers of high schools and 29 numbers of higher secondary schools run by private. There is a Reformatory schools located near new bus stand at Veilukandankulam.

3.13.3 In the Corporation there are 6 numbers of arts and science colleges namely: Madurai Draviyam Thaiymanavar Hindu College at Petta, St. Johns College, (these two colleges were started in 1871), St. Xavier's College in (1950) which is autonomous status, Sadaktabdulla Appa College at Palayamkottai for co-education (in 1971), Rani Anna College for women, Sarah – Tucker College which is the first college come up in 1985 exclusively for ladies.

3.13.4 There is one Government College of Engineering in the Corporation area and private engineering college located on the northern bye pass road namely Francis Xavier Engineering College.

3.13.5 There is no Polytechnic in the corporation area. There are 5 industrial training institutes of these one is maintained by Government which is located at Pettai, rest of these maintained by private.

3.13.6 Indian medicine Siddha College Hospital is located at the junction of Tiruchendur road and Thiruvanandapuram road. Medicinal shrubs are grown with in the college and medicines are prepared by the hospitals authorities.

3.13.7 In Palayamkottai area there is one school for blind and one for deaf and dump is located near Anna Stadium and Central Jail respectively. There are three Secondary grade teachers training

institutions are located in the town. Many reputed Computer Institutes are functioning in the Corporation area.

3.13.8 The above educational institutions caters the educational need of Corporation area, vicinity area as well as for entire district.

VICINITY AREA

3.13.9 In the vicinity area there are 4 higher secondary schools, 32 High Schools and 104 Primary Schools functioning for the educational needs of the vicinity area. There is one arts and Science College in Munnirpallam village for ladies only another one is called as Saratha College for Women from 1986 located at Ariyakulam Village. One Physiotherapy college located on Thoothukudi road. In Munnirpallam village one Integrated Road Transport (IRT) Polytechnic is located on the Kanniyakumari Road.

MANONMANIUM SUNDARANAR UNIVERSITY

3.13.10 Manonmanium Sundaranar University (M.S.U) was set up tin the year 1990. Named after the famous poet, Prof.Sundaram Pillai, the university has a strong network of 102 affiliated colleges, many of these colleges have contributed significantly to the cause of higher education for many decades. There are five colleges, which are more than 100 years old. The university campus is located at Abishekapatti, 9 Km away from Tirunelveli town.

3.14 PUBLIC AND SEMI PUBLIC USE

This heading consists of

1. Public offices such as Government and Quasi Government offices.
2. Medical facilities
3. Transport and Traffic
4. Public utilities such as water supply, drainage facilities, street lighting, recreation facilities, solid waste management.
5. Religious buildings,
6. Notified park and play fields etc.

3.14.1 PUBLIC OFFICES

CORPORATION AREA

As Tirunelveli is the district head quarters, many district level offices are functioning here, which are listed below:

1. Collectorate:

It is located on the eastern River bank of Thambiraparani River. At once the buildings were constructed by the British Government for administration purpose. Now Tirunelveli district collectorate is functioned here. In the premises Commissionerate of City Police, District Employment Office, Palayamkottai Taluk Office, District Revenue Office, Public Relative Office, Assistant Commissioner of Excise Office, Cell Office, District Rural Development Office, Chief Educational Office, District Panchayat Development Office, Treasury, Hotel Tamilnadu etc are located.

Verified RealEstate™

District Superintendent of Police Office, Women Police Station and P.W.D. Circle Office at Samathanapuram. There are 7 police stations in the Corporation area, which are functioning under the control of Commissioner of City Police in the places namely. Perumalpuram, Melapalayam, Pettai, Thatchanallur, Palayamkottai, Tirunelveli town and Tirunelveli Junction.

In Corporation area divides 11 postal pincodes by postal telegraph department. Each pincode have separate sub head post office at Palayamkottai, Tirunelveli junction are predominant.

The Corporation are have some communicational media broad casting centres like Karan T.V., Doordarsan relay tower, B.T.S tower, F.M. Stations etc.

VICINITY AREA

In the vicinity area there are 2 police stations located at Munnirpallam and Sivanthipatti.

At Krishnapuram Indian Geographical Equator Research Centre is located.

Animal Husbandary Hospital, Cattle farms etc are located in Ramayyanpatti Village.

MEDICAL FECILITIES

3.14.2 The city municipal corporation maintains two hospitals, four Allopathic dispensaries, two Sidda dispensaries and eight Maternity centres. In addition to the above, three Government hospitals (Tirunelveli Medical College Hospital, Melapalayam Government Hospital, Government Sidda Hospital) 52 numbers of private Hospitals, 90 numbers of private dispensaries and 15 numbers of diagnostic centres etc., functioning. Tirunelveli Medical College Hospital serves the medical needs of population in entire district which is discussed below.

Tirunelveli Medical College Hospital is located in an extensive area of about 300 acres of land at Highground, Palayamkottai. It was started in the year of 1965, affiliated to the University of Madras, with an admitted strength of 75 students for an academic year. However theses students had to undergo their first year study in the local arts and science colleges. In July 1966 the first batch of Second year MBBS students started attending the classes in the newly constructed Anatomy Block, other departments like Pharmacology, Pathology, Microbiology and Social and preventive medicine functioning in the subsequent years. Since, 1988 on the formation of Dr. MGR Medical University it has been affiliated to the Medical University. The following Post Graduate degree diploma courses are conducted in the college; M.d. General Medicine-2, M.D.Pathology-1, M.D. Microbiology-1, M.D.Ortho-2, M.D. Forensic Medicine-1, M.S. General Surgery-2, D.G.O-4. The college celebrated its Silver Jubilee in the year 1990.

The Government Siddha Medical College was started at Palayamkottai on 30th November 1964. This was an affiliated college of Madras University till March 1966 and from 1967 to 1988 it was affiliated with Madurai Kamaraj University and since 1989 to Dr. MGR Medical University.

PRIVATE HOSPITALS

3.14.3 The important private hospitals are 1) Galaxy Hospital which is on the northern Bye Pass Road 2) Shifa Clinic which is Junction area 3) Sakthi Diagnostic Centre at Vannarpettai 4) Ramalakshmi Maternity Hospitals at Udayarpatti which is very popular hospital in this are for the past 30 years 5) Gandhimathi Hospitals at Tirunelveli town 6) Karthik Hospital at Perumalpuram 7) Agnes Hospital and Annai Velankanni Hospital for maternity at Murugankurichi 8) Venkateswara Hospital at Maharajanagar.

VICINITY AREA

There are 3 primary health centres with 2 beds each located in vicinity area. One is Rajavallipuram, another one is at Munnirpallam and third one is at Reddiayapatti. In Kandiaperi Government Hospital with 10 beds is functioning. There are 10 health sub-centres in vicinity area which

Verified RedEstate™

are at Ramaiyanpatti, Alaganeri, Melapattam, Sivanthipatti, Kunnathur, Melaputhaneri, Thiruvannathapuram, Thimmarajapuram, Konganathanparai and Thirppanikarisalkulam. There are also 6 Hospitals, 9 maternity centres are 14 clinics are available to cater the medical needs of the people in vicinity area.

3.15 TRANSPORT AND TRAFFIC

3.15.1 Location of a city in terms its transport connectively is crucial for the grown of the city. Tirunelveli city is very well connected by radial corridors in all the directions by both roads as well as railway lines. The most important natural barricade to the road and rail transport system in Tirunelveli is the Tambiraparani river which bifurcates the Tirunelveli Local Planning Area in to two parts, it suffers from lack of circumferential road to provide the orbital links to the bye passable traffic. The radial network passes through several settlements with in LPA with following characteristics.

TABLE 3.8
ROAD NET WORK OF TIRUNELVELI CORPORATION AREA

Sl. NO.	Name of the Road	Classification	Length of the Road with in Tirunelveli (LPA Kms)	Carriage way width (Meters)

BUS STAND

3.15.3 The Corporation maintains three bus stands in its jurisdiction. One is Periyar Bus Stand, which is old junction bus stand, located at heart of the Tirunelveli Corporation city buses are operating in the bus stand. Second one is Palayamkottai Bus Stand, located on the NH-7. Third one is new bus stand, located in the Veilugandankulam which is constructed two years back.

The salient features of the bus stand are.

- The total cost outlay Rs.6.28 Crores.
- 68 bus bays
- Terminals building has a public utility that includes Post Office, Police Outpost, advance booking counters etc.,
- Facilities for physically handicapped are available.
- Excellent lighting provided for the facility with 5 nos of high most lights.
- 128 shops offering a variety of goods for the traveler and the city.
- Restaurant.
- Parking space for 2 and 3 wheelers provided it is functioning from 1.04.2003.

3.15.4 PUBLIC UTILITIES

Tirunelveli Corporation is a junction where the Tenkasi meter gauge line and Tiruchendur meter gauge line meet with Kanniyakumari Maniachi broad gauge line. The railway junction serves as the main railway station for the district of Tirunelveli, Thoothukodi and Kanniyakumari. In addition to that Tirunelveli town railway station, Palayamkottai railway station is located in Local Planning Area. They are only sub urban railway station. The Tirunelveli junction railway station is favorably located close to the Tirunelveli junction bus stand. There are four platforms for passengers in the Tirunelveli railway station and one platform for goods. Indian oil petroleum tanks are located very close to the stations.

3.16 WATER SUPPLY

3.16.1 The LPA has protected water supply from the source of Tamiraparani River. The water is purificated in the pumping stations at Kondanagaram, Manappadaiveedu, Tirumalaikolunthupuram, Krukkuthurai, Suthamalli and Tiruvannathapuram. There are 56 over-head tanks with capacity of water of 364.5 lakhs litres. The percapita supply of water is 65.36 liters. But IWS standard for one person is 135 liters. There are 1278 number of public functions, 1355 hand pumps, 146 number of power pumps providing by the Corporation for public water supply needs. The Corporation has given 40153 water supply house service connections. The present water distributions are even though for the extensions are the supply is very limited. Water supply for the villages in the LPA areas are using sub-soil water through bore wells and open wells.

DISTRIBUTION SYSTEM

3.16.2 The protected water is distributed to the city through 40153 domestic and 2003 domestic connections, 1264 public fountain and 36 major OHTS. This is being supplemented by 2.88MLD water

extracted from under ground sources through 1436 bore wells. The distribution system consists of rising mains and distribution lines with a total length of 335.74km and raising mains 17km.

The tables below reveal that Tirunelveli zone has the highest coverage 91% by the distribution line. But the ratio house service connections (Hsc) to the households is 37% only.

3.17 SANITARIES:

3.17.1 The Corporation maintains 12 numbers of Pay & Use toilets, 152 numbers of public latrines, most of the people in the Corporation area using water closet in their houses for sanitation purpose.

UNDER GROUND SEWERAGE SCHEME:

3.17.2 Tirunelveli town and junction of the Corporation area have under ground drainage systems from 1989. In Palayamkottai and Melapalayam, the under ground drainage scheme is being under implementation with an estimate of 52 crores. In which the Corporation is met 3.25 crores from public through obtain in the deposit amount while setting building approvals. Balance amount will be met out from State Government share, Ministry of Environment Forest share, local body share, and public share. The salient future of the under ground sewage scheme are as follows;

Total drainage pipes	:	206 Kms
Primary drainage pipes	:	15 Kms
Branch drainage pipes	:	191 Kms
Pumping drainage pipes	:	12 Kms
Pumping stations	:	3 Nos
Daily collected sewage	:	242 lakhs litres
Extent of purification station	:	65 acres of Ramayanpatti Station
Safer implemented ward	:	10 Nos
Safer connections given	:	1650

In the rest of the areas, the cesspools are provided, in future under ground sewerage scheme will be extended in these areas. The villages other than corporation area have no organized sewerage system at all. The target for completing scheme will be September 2005.

3.18 RECREATION FACILITIES
CORPORATION AREA

3.18.1 In the Corporation area few recreations clubs are located at Palayamkottai, the Cosmopolitan club, Lion's club, Rotary and Ladies club are the major clubs. In Tirunelveli town there is one Sangeetha Sabha, where in musical concerts are often conducted apart from religious discourses. In Melapalayam town there is no recreational club. There is one district library located in Palayamkottai in which many peoples are reading books and taking notes, this buildings is functioning in Government land. 100 to 125 readers are utilized this library. In addition to that three branched libraries are in the Corporation area. In addition to that 11 magazines reading centres are located by conducting voluntary organizations.

In the Corporation area 14 cinema theaters which serves the people of the Corporation area in respect of recreation majority of cinema theatres are located in Tirunelveli Town.

VICINITY AREA

In the vicinity area there is no cinema theaters. The people in the vicinity are going to cinema theaters located in the Corporation area for reservation. There is no organized parks and play fields in the Vicinity area.

Verified PeqiEstate™

3.19 PARKS, PLAY GROUND AND OPEN SPACES:

3.19.1 Parks and open spaces are necessary for the residents of any town as this provides sample facilities for children and the grown up for a proper recreation unfortunately the public parks, open spaces, play fields in Tirunelveli, Melapalayam and Palayamkottai towns are inadequate.

The VOC play ground at Palayamkottai is owned by the Palayamkottai municipality. The area of play ground is about 1.84hectare. In addition a public stadium (Anna Stadium) has been constructed at the Palayamkottai town near the High ground hospital. Sufficient galleries and rest rooms have been provided and maintained by district sports club.

There is no public play ground in Tirunelveli and Melapalayam towns. There are some play grounds attached to educational institutions which, however is still them. The list of parks, play grounds and open spaces notified these towns are given in annexure.

3.20 RELIGIOUS BUILDINGS

3.20.1 CORPORATION AREA

There are 57 nos of temples nos. of churches and nos. of masques in Corporation area. "Arulmigu Nellaiyappar, Arulthiru Ganthimathi Ambal tirukkovil" is predominant one. In 08.04.2003, Gumpabishegam was held at this temple, with retaining works and alterations were carried out, this kovil is administrated by the Joint Commissioner, Tirunelveli under the act (III) of Hindu Religious and Charitable Act. The following temples are important in the Corporation area.

1. Palayan Salaikumaraswamy Kovil at Sindupoonthurai
2. Subramaniyaswamy Kovil at Kurukkuthurai
3. Kailasanathaswamy Kovil at Kailasapuram
4. Chanthipillayar Kovil at Tirunelveli Town
5. Perathuselviamman Kovil at Vannarpettai
6. Thandargal Nayinar Tirukkovil at Tirunelveli Town
7. Narasingaperumal Tirukkovil at Tirunelveli Town
8. Varadharajaperumal Tirukkovil at Tirunelveli junction
9. Kariyamanickaperumal Tirukkovil at Tirunelveli Town
10. Kannamman Puthu Amman Kovil at Tirunelveli Junction
11. Aayirathamman Tirukkovil at Palayamkottai
12. Ramasamy Tirukkovil at Palayamkottai
13. Mutharamman Kovil at Palayamkottai
14. Thirupurantheswarar Tirukkovil at Palayamkottai
15. Alagiya Mannar Rajagopalasamy Koil at Palayamkottai
16. Getwell Anjaneyar Kovil at Tirunelveli Junction
17. Balasubramaniyaswami Kovil at N.G.O. Colony.

On every Tuesday and Friday many pilgrims are accumulated in the above temples.

VICINITY AREA

3.20.2 Arulmigu Venkadachalapathy Tirukkovil is located at Melathiruvenkadanatha puram. This kovil is called as South Tirupathi and famous Vishnu Stalam in southern region. Many pilgrims gathered during the festivals on December-January period. Arulmigu Etteluthu Perumal Kovils is located in Alaganeri Village. On every Sundays many business people are coming to this temple. The following temples are located in Vicinity area.

1. Venkadachalapathi Tirukkovil at Timmarajapuram

2. Sivakoluntheeswarar Tirukkovil at Palamadai

Verified Real Estate

3. Varasithivinayagar Tirukkovil at Santhinagar

4. Venkadachalapathi Tirukkovil at Thiruvenkadanathapuram
5. Agneeswarar Tirukkovil at Rajavallipuram

6. Venugopalaswamy Tirukkovil at Kilanatham

7. Nathiyamman Tirukkovil at Thirumalaikolunthupuram

8. Viswanathaswamy Tirukkovil at Kilanatham

CHAPTER – IV

ANALYSIS AND ASSESSMENT

4.01 GENERAL

In order to have a correct estimation of the problems and deficiencies of requirements for Tirunelveli, Palayamkottai, and Melapalayam urban complex as well as the vicinity villages in the local planning area studies and analysis have been made and presented in the proceeding chapters. The methodology adopted for the preparation of the proposals is condensed in the following heads.

I. The plan period
II. Population projection
III. Assessment of working force in various economic activities
IV. Assessment of land requirements
V. Land use zoning.

4.02. PLAN PERIOD

For estimating the future requirements for a projected a careful study of the existing situation is necessary. The plan period has been taken up to 2021 and the proposals are drawn up to accommodate the population and requirement of land 2021.

4.03 POPULATION PROJECTION:

Assessment of land requirements for various urban needs is assessed based on the population projection. In the assumed planning period of 2021 the development of L.P.A. may expand beyond its present limits of developments so to arrive at the present population of the town and its growth are considered generally.

TABLE 4.01

POPULATION VARIATION ANALYSIS

Year	Corporation Area			Vicinity Area		
	Population	Increase	% of variation	Population	Increase	% of variation

= 121514

Table 4.02

POPULATION FORECAST:

Sl. No.	By method of	Corporation area		Vicinity area	
		2011	2021	2011	2021
1	Arithmetical	468770	525709	84458	85036
2	Geometrical increase method	493291	590864	84718	85565
3	Incremental increase method	508654	605477	102697	121514

It is ascertained from the corporation record the mid-term population as on 31-03-2005 is 4,40,000. the increase of population from the year 2001 for the years is approximately as 30,000, the average increase population forecast for the year 2011 will be about is 7,500. Considering this trend of growth of population forecast for the year 2011 will be about 4,90,000. The figure is coinciding the geometrical increase method. Hence the figure arrived from this method will be taken for the planed period. The population for the year 2011, 2021 will be approximately 5,00,000 and 6,00,000 for the Corporation area.

The population for vicinity area for the year 2001 is 83880. It is ascertained from the office records Assistant Director of Panchayat the mid-term population for villages comprised in Vicinity are the population for the year 2005 is approximately 85500. considering this trend of growth, the population for the year 2011 will be 90,000 and for the year 2021 will be 1,00,000. Therefore the population of the L.P.A for the year 2011 will be 5,90,000, 2021 will be 7,00,000.

Verified RealEstate™

4.04 ASSESSMENT OF WORKING FORCE IN VARIOUS ECONOMIC ACTIVITIES

Having worked out the total anticipated population in 2021, the total workers composed in the population have to be assessed. Further the total workers have to be split up among the different economic activities. It is accepted that the population in the age group 20-59 falls under working age group. However the entire population classified under working age will not be employed due to various reasons. Hence, it is obligatory to estimate age break up along with the participation rate for assessing the total workers. Since age completion population is available only for 1961. It has been taken as a guiding factor to assume and assess the workers in 2021. In this chapter assessment of urban workers alone has been taken for study since urban workers engaged in various economical activities whereas the rural workers mostly engaged in primary activities.

The percentage of age break up of population for 1961 for the urban complex and assumed percentage are given below;

Table 4.03

ESTIMATED AGE BREAK UP IN TIRUNELVELI LOCAL PLANNING AREA:

Age Group	% to the total population	
	1961	2021
Below 15	35.76	36.00
16 – 34	35.04	35.00
35 – 59	23.56	25.00
60 & above	5.64	4.00

As per the 1961 age composition of population, the working age viz., 16-59 worked out to be 56.60%. Little increase in this percentage can be anticipated in 2021 due to reduction in mortality rates. Therefore 60% has been assumed as working age group in 2021 as shown in the above table. Accordingly the working age population in urban complex area will be 7 X 60/100 = 4.20 lakhs. The agricultural nature of the Local Planning Area will be prevalent over the plan period. However the secondary sector and tertiary sector has been given priority keeping in view of the present trend of developments. The suggested percentage according to a study made by the Town and Country Planning organization, New Delhi in relation to the break up the three economic sectors of a town, having a population between 200 to 500 thousands, the existing percentage and proposed percentage are given in table below.

TABLE 4.04

OCCUPATIONAL PATTERN IN TIRUNELVELI LOCAL PLANNING AREA:

Economic Sector	Existing percentage 2001	Towns of size 200 to 500 thousands	Proposed assumed % in 2021
1. Primary (Agriculture)	4.20%	2.0%	5.0%
2. Secondary (Industrial)	35.60%	44.0%	40.0%
3. Tertiary (Services)	60.20%	54.0%	55.0%
Total	100.00%	100.0%	100.0%

Since fertile agricultural lands are constitute the primary sector, the percentage of primary sector proposed could not be reduced up to the rate suggested by Town and Country Planning Organization. Therefore 5% has been proposed for primary sector.

In view of the present trend of development in the industrial fields within the urban complex and it is assumed that the industrial development at Thoothukudi may have its influence over Tirunelveli also,

Verified by PeopleState

percentage of the secondary sector has been raised to 40%. The higher percentage has been decided to provide in respective of tertiary sector as 55%. The components of the tertiary sector are commerce, transport and services.

In vicinity area the existing working force break-up area 31.98% of total workers in secondary sector and 31.78% of total workers in tertiary sector. As said previously the total workers will be 60% of population in 2021. the anticipated working forces has been proposed as 30%, 35% for primary, secondary and tertiary sector respectively based or trend of growth and preservation of agricultural lands.

TABLE 4.05
ANTICIPATED WORKERS IN VARIOUS SECTIONS 2001

By method of	Corporation area		Vicinity area	
	% adopted	Workers	% adopted	Workers
1. Primary (Agriculture)	5%	21000	30%	18000
2. Secondary (Industrial)	40%	168000	35%	21000
3. Tertiary (Services)	55%	231000	35%	21000
Total	100%	420000	100%	60000

4.05 LAND USE REQUIREMENT

4.05.1 RESIDENTIAL USE

Residential is major use by land use requirement for residential use is working out based on the density of the people and the percentage fixed by the Director of Town and Country Planning. Tirunelveli master plan as a long time development plan the special distribution of land of various land use are calculated dating in the consideration the future size and shape of LPA.

It is enquired with Corporation the population as on march 2005 is about 4,40,000. The population to the development are of hectare in Thatchanallur Zone is 339, Palayamkottai zone is 150, Melapalayam zone is 262, Tirunelveli zone is 215 out of four zones, the Palayamkottai zone have extent of developed areas the overall density of population in the developed area is about 216 persons per hectares. Hence for the population 6 lakhs in 2021 the developed area required will be 600000 / 175 = 3429 since adopt 175 persons per hectares; this included the existing residential development area.

4.05.2 COMMERCIAL USE:

There are different standards adopted for assessment of land requirement in respect of commercial uses. In respect of Tirunelveli composite Local Planning Area for assessing land requirement in this uses a standard of 2500 persons/hectare is adopted. The area works out to 600000/2500 = 240 hectare. which includes existing commercial developments extend of 91.83 hectare.

4.05.3 INDUSTRIAL USE:

The total workers expected to be engaged in this sector is calculated as 168000 persons. Adopting an average standard workers of 1000 workers (combining heavy, medium and light industries such as special and hazardous, general, controlled, a small scale service, house hold industries) per hectare, the area requirements worked out to be 600000/1000 = 600 hect. Since the Planning area has weaker Industrial development, So 1000 persons per hectare is adapted.

4.05.4 EDUCATIONAL USE:

The educational institution for the year 2021 are estimated and projected based on the suggestions made by the State Planning commission in its report “towards urban development”. The anticipated educational institutions are worked out in table 4 in which the age group between 11 to 17 constitutes 18.9% and age group between 18 to 24 constitutes 15.7% of total population.

Verified RealEstate

TABLE 4.06

ANTICIPATED STUDENT POPULATION AND EDUCATIONAL INSTITUTIONS DURING 2001

Age Group	Grade	Percentage assured	Expected No. of students to the projected population		Population to enrolment	Anticipated actual enrolments of students		Standard adopted	Existing Institution	2011		2021	
			2011 5.90lakhs	2021 7 lakhs		2011 5.90lakhs	2021 7 lakhs			Total required	Additional required	Total required	Additional required
11-17	Higher Secondary School	18.90	111510	1323000	0.45	50180	59535	1500	37	40	3	40	3
18-24	Arts and Engineering College in and around the LPA	15.80	93810	1113000	0.30	28143	28143	2000	11	14	3	17	6

From the table, it can be seen that, the requirement of Higher Secondary Schools for the plan period are 3, and college for the plan period are 6. These will be proposed in the LPA.

Verified RealEstate ™

4.05.5 PUBLIC AND SEMI-PUBLIC USE:

Under this head, the departments of Central and State Government including local bodies, health institutions and other religious buildings are included. The workers engaged in public sector services such as transportation, civil supply co-operative and banks have been adopted for the area requirement in this category of use. Though there is no specific standard for adoption, an average of 1000 persons per hectare has been adopted to workout 600 hectares.

In advanced countries the usual standard adopts for this category is nearly 3 hectares of land for every 1000 population. But this standard will not be practicable in our country there 0.25hect. for every 2000 population has been adopted for working out the area and the space requirement will be 0.25 / 2000 X 590000 = 74 hectare. Including the existing playground available the educational institutions.

4.05.6 AGRICULTURE USE:

The remaining lands other than lands proposed for the above urban uses come under this use. Wet lands, dry lands, water bodies, channels, hillocks, forest and quarries are kept as agriculture uses only. This may be terms as undeveloped are of the urban complex.

Considering the above suggested uses and the existing trend of development of the urban complex, the following land use break up can safely be assumed and the proposed land use pattern for the corporation area in Tirunelveli Local Planning Area is shown in table.

4.05.07 PROPOSED LAND USE REQUIREMENT IN

VICINITY AREA

The future population for the year 2021 for the vicinity area is 1, 00,000 as desired in previous paras. The developed area required for the future population is 1, 00,000 / 50 = 2000hectare. The land uses are worked out based on the factors furnished by DTCP.

RESIDENTIAL USE

The required residential use area is 0.77 X 2000 = 1540 hectare. This includes the existing residential use developments.

COMMERCIAL USE:

The required commercial use area is 0.03 X 2000 = 60 hectare. Many villages have weaker commercial section. Hence the commercial use area is to be proposed in the village's located adjoining Corporation area.

INDUSTRIAL USE:

The industrial are required for the future population is 0.10 X 2000 = 200 hectare.

EDUCATIONAL USE AND PUBLIC AND SEMI PUBLIC

The area required for this use for future population need, is 0.10 X 2000 = 200 hectare. The Tamilnadu Electricity Board has proposed to install Power Grid station at abishegapatti village.

AGRICULTURE USE:

Rest of the developed area is can marked as agricultural use based on the consideration of preservation of wet lands.

Verified RealEstate™

TABLE – 4.07

Proposed land use requirement for various uses in of Tirunelveli Local Planning Area – 2021.

Sl. No.	Name of Use	Assessed area for Corporation in hectare	Assessed area for Vicinity in hectare
1	Residential	3429	1540
2	Commercial	340	60
3	Industrial	600	200
4	Educational and Public and Semi Public	600	200

4.06 IDENTIFICATION OF TRAFFIC PROBLEMS

4.06.1 Intersection

The traffic volume is found to be very congested in the following road junctions need improvements.

Barani hotel junction.
Anna Statue junction
Murugankurichi junction
Samathanapauram junction
Palai Bus Stand junction
Kokkirakulam junction
Melapalayam junction

Most of the junctions are located in busy commercial areas catering to high volume of pedestrians and vehicles traffic. Therefore improvements of these junctions are essential.

4.06.2 PEDESTRIANS:

Heavy pedestrians movement is noticed around Nellaiyapper temple which is focal point of tourism and commercial activities another location which has the connected about safety is the busy area around bus stand near railway junction. In Palayamkottai zone the Palai bus stand and Palai market are important locations were pedestrian movement is heavy and pedestrian safety is at stake.

4.06.3 PARKING:

The steep growth in the ownership of two wheelers car and intensification of commercial activities in the cone city has created great demand for parking in the following locations.

North car street.
West car street
Palai market. (Tiruchendur road and north bazaar)

The parking in these areas is mostly on the road margins. The parking space available in the above locations is much less than the parking vehicles.

In commercial areas where these are no open spaces, vehicles are often parked on the carriageway obstructing the free flow of traffic and thus reduces the capacity of the link. It is observed that sufficient parking lots are not provided, with in the premises of the public building like lodging houses, private hospitals, commercial complexes etc.. The vehicles are found to he parked on the carriage way in from of these building. This affects the free flow of traffic and capacity of the road considerably.

Verified RedEstate™

4.06.4 PUBLIC TRANSPORT

Town buses are operated from Tirunelveli town and railway station to many places in and around the city. Town bus services are operated from junction bus stand. Moffussial buses are operated only from the new bus stand to almost all major towns in Tamil nadu. Most of the moffussial buses are passes through Vannarpettai Chellapandian statue. Passesngers are accumulated in this intersection. This causes heavy traffic volume.

There are about 327 town bus services operated by TNSTC and 70 by private services. In the case of moffessal operation s438 services are operated by TNSTC, while the private operators run about 86 services. There are approximately 56 bus stops in the city. The area all around is well connected by public transport buses. Even though there are five railway stations in the city, the number or persons traveling by train is very negligible. Since most of the roads has two lane carriage ways the buses stopped at bus stops obstruct the free movement of traffic bus stops are provided at close to the intersections thus affecting the movement of vehicles at intersections.

Taxis and auto are the predominant modes in the city. These were found to be parked inside Tirunelveli junction bus stand, near fly over on railway feeder road, near Lakshmi theatre, near palai bus stand, near Government hospital. Theses should orderly regularize.

4.06.5 COMMERCIAL VEHICLES:

At present there is no separate travel terminal in any of the LPA under consideration. Trucks coming to Tirunelveli are found to be passed on the tank bund road which is bus route. There are also many booting offices in this stretch of road which creates lot of congestions in this road. Light commercial vehicles which are used to distribute the goods, are found to be parked in large numbers on the railway station feeder road near the flyover. The open ground near the Palay marker is being used as parking area by trucks coming to Palayakmottai. Developments have get not taken place in Melapalayam town which is stall depending on cottage industries like weaving and beedi manufacturing. Hence, movement of commercial vehicles is less in Melapalayam. The Govt. of India has proposed to install hi-tech park in Nanguneri which is 30 km away from LPA on NH-7. It acquires 5000 acre of land. This project is to be utilized for importing the software product from eastern countries from Thoothukudi harbor and sending these finalized products to western countries through Cochin harbor. For easy transaction, a bye pass road is proposed and starts from southern point of LPA parts end at Thoothukudi road. This bye pass road project is being important with preliminary works.

There is truck terminal to be proposed along the bye pass road.

4.07 TRAFFIC IMPROVEMENTS:

The existing road network system of the town is in adequate to the growing traffic in the LPA and the existing road network has to be improved.

As explained previously, it is recommended that the following traffic improvements works have to be carried out.

1) Median with barriers shall be constructed on S.N.High road from Tiruvalluvar fly over to Victoria memorial arch to segregate the traffic and enhance the traffic stream, speed and safety.

2) To improve the safety to cyclist, a cycle land of 2m width on both sides of S.N.High road from the flyover to Victoria Memorial arch shall be provided.

3) The projection of the Pedestal of anna statue on S.N.High Roads suddenly reduces the carriage way, creating a traffic bottle neck removal of the pedestal with out affecting the statue and the arches in the from shall ensure smooth and safe traffic flow.

Verified by EngiEstate™

4) Encroachments on both sides of road parallel to south car street shall be removed for free flow of moffusal busses destined towards Tenkasi, Cheramnahadevi etc. with out going through the town.

5) The intersection of Madurai road and bus stand road to be improved to ensure easy maneuverability.

6) To improve the inner turning radium on the Northern side (Tirunelveli side approach) of the bridge across Tamirabarani river, a retaining was has already been constructed existing parapet wall on the Southern side of Tirunelveli side approach may be dismantled and the carriage way be widened for easy traffic flow.

7) The four car streets around Swamy Nellaiappar temple, houses, many commercial establishments, Haphuzard parking and encroachments of small vendors have pruned down the carriage way width for moving traffic. It is suggested to remove encroachments and construct a 2.5m wide footpath on the left side of the four streets. Parking should be allowed only on left side of the streets.

8) The small stretch connecting SH-12 and West Car Street to to be winded and the bridge across the channel is to be winded and curves improved.

9) Lorries are found to be parked in the Southern bound road of the tank (Parrllel to North Car Street). To improve the traffic flow it is suggested to fill a small portion of the tank for the parking of Lorries. Parking should be banned on the Southern side of the road. This measure is recommended only as a temporary measure. A trust terminal with necessary infrastructural facilities may be constructed at a suitable location.

10) The existing tank bund road connects the town with Thatchanallur after the level crossing with out touching Tirunelveli junction. It is suggested to widen the carriage way and improve the 2 curves, and a weak narrow bridge to facilitate diverting a sizable traffic and decongest railway junction area.

11) Construction of a circular connector road of 1.8km length for SH-12 and NH-7 at Sripuram and Thatchanallur along Sivasakthi theater may be taken up to link the developments taking place between, these two highway Corridors.

12) A small link road to connect NH-7 and ongoing NH-7 bye pass near Lakshmi hospital / Udayarpatti tank is recommended to be constructed. This link will induce more traffic to use the bye pass and also divert the Chennai bund traffic without going through Thatchanallur settlements and level crossing.

13) Circular link roads are proposed to be constructed to connect Pottalpudur road, Quilon road (SH-2) and Rajapalayam road outside the town area. The proposal if implemented will reduce traffic congestion inside the town.

14) The bridge on NH-7 at Thatchanallur just after the level crossing is very narrow. It is necessary the bridge to ensure smooth and safe movement of traffic.

4.08 NEW LINKS:

The Nellaiyappar road which serves as the only connecting link to the major roads namely, Sankarankoil road, Tenkasi road and Cheranmahadevi road which is highly congested and the V/C ratio is less than the 15 kmph. On both sides of Nellaiyappar road, it is a density developed area particularly around the Nellaiyapper temple. The scope for further widening is almost none existing and therefore the only alternative that is available is an alternative route at least to divert the through traffic. Therefore new links have been suggested to improve the accessibility particularly along this road. In table 5.1 shows the details of the new link roads.

Verified Real Estate

The land required to form the new link is available and therefore a suitable land use development plan is required to be prepared as on action area plan only for this area covered by new links. This will ensure restriction of haphazard developments which will congest the new links also.

4.09 WIDENING OF EXISTING ROADS:

The radial road network in Tirunelveli not only suffers from lack of circumferential links but also narrowness. The V/C ratio arising out of traffic assignment under the scenario, has clearly established that on major roads the ratio is highly congested situation. One of the major reasons is the narrowness of the roads therefore depending upon the availability of land and the traffic flow pattern, widening of roads found to be extremely important. The traffic assignment under scenario 2 is also based on the suggested road widening.

The table 5.1 shows the stretches of roads requiring widening and the cost estimate details in order to bring down the V/C ratio to a manageable level. The land required for widening is available and the widening of the road network needs to be completed before 2011.

4.10 RING ROAD:

4.34 Tirunelveli is yet to be fully connected by a circumferential road; through a bye pass road for a length of 6.14kmis under completion. In view of the need for segregating the through traffic at the periphery of the city itself and to safeguard the city from environmental pollution arising out of the transport vehicle it is essential to from a ring road connecting all the major radial corridors. The proposed ring road alignment takes advantage of some of the existing stretches of road. The existing road stretches need improvements and up gradation to the level of new formation.

4.11 PROPOSED BRIDGES:

There are five level crossings. Three level crossings need ROB so as to ensure uninterrupted flow of traffic.

4.12 FOOT PATH

On several stretches of the roads in Tirunelveli foot paths lead the pedestrians to walk on the carriageway resulting in accidents and congestion. About four stretches of roads which urgently need provisions of foot path are shown in Table 5.1.

4.13 LEVEL CROSSING

Elimination of level crossing at five locations by rail over bridges in an immediate necessity to avoid traffic delays.

4.14 TRUCK TERMINAL

At the periphery of the city along NH-7(Madurai Road) a large number of trucks are always parked. The Sankarnagar Cement industry attracts a large number of truck traffic. Trucks origination from Nagercoil, Kanniyakumari region also halt at Sankarnagar on the road for rest or repair etc. Therefore instead of allowing the trucks to create a traffic bottleneck along the NH-7, it would be ideal to develop an organized truck terminal in the vicinity of Sankarnagar along NH-7.

4.15 WATER SUPPLY

The quantity of water supply to each zone namely Tirunelveli, Palayamkottai, Melapalayam and Thatchanallur ward the per capita supply prevailing in the zones are furnished in the table below. The average per capita supply for Palayamkottai and Tirunelveli are 138 local and 125 local respectively. This may be the attributed to the to the presence of educational institutions and state and central government

office etc., to which the corporation makes bulk supply, but Melepalayam and Thatchanallur zones receive water supply ratio at the rate of 40 to 50 lpcd which needs to the entranced. The Corporation people have received the average water supply at the rate of 87.5lpcd.

The treatment facilities are available at Kurukkuthurai head work only. The design capacity is 4 lakhs litres and capacity of 4 lakhs is being fully utilized. No treatment facilities are available in all other head works such as Melapalayam Veedu, Thirumalaikolunthupuram, Theepatchiamman Kovil, Kondanagaram, Suthamalli. There are eight pumping stations for pumping to reservoirs. A total quantity of 36 million liters of water is bringing pumped daily for supply. But most of the pump sets which have attired the design period need to the replaced. The leakage in entire system could be substantial because most of the pipe lines are more than 30 years old.

The city water supply system has 36 elevated reservoirs and 2 ground level reservoirs for storage of water for distribution. The total quantity of water capacity of these reservoirs amounts to 14.4 million liters.

The protected water is distributed to the city through 40153 domestic connections, 1264 public fountains and 36 over head tanks. Tirunelveli zone has the highest coverage by the distribution lines. Thatchanallur and Palayamkottai have the medium coverage distribution and Melapalayam zone has the latest coverage distribution system. This indicates the necessity for extending the distribution line to the newly developing colonies.

In addition to the above conventional source of supply the corporation has provided with 1347 numbers of bore wells / hand pumps and 89 numbers of power pumps for supplementing the water supply systems. The above facility will be more useful in respect of consumers who do not have piped water supply.

The city municipal corporation divides 55 election wards. Thatchanallaur zone have ward no. 1 to 10, 39,54 and 55, Palayamkottai zone have ward no. 11 to 18, 20 to 25, Melapalayam Zone have ward no 19,26 to 38 and Tirunelveli zone have ward no, 40 to 53. It is observed from the corporation records that,

1. Only 39% of the total house holds got house services connections in the Corporation.

2. Among the four zones in the corporations the Palayamkottai zone has the highest percentage of house service connections. Other zone have 35 to 45 percentage of house service connections.

3. The ward no.19 (ie) Maharajanagar area has the highest number of house service connections in Melapalayam zone.

4. The ward no.12 and 38 have the very least percentage of house service connections compared to other wards in the Corporation.

5. In Tharchanallur zone expect ward no. 6 and 54 all other wards are below 50% of the house service connections all other wards are below 50% of the house service connections.

6. In Palayamkottai zone ward no. 11, 12, 15, 17, 18 and 23 are below 50% of the house service connections.

7. In Melapalayam zone except ward no.19 and 26 all other wards have the average of 30% to 40% of the house service connections.

8. In Tirunelveli zone also most of the wards have less than 50% of the house service connections.

9. The Municipal Corporation may consider setting a target of provisions of at least 60% service connection over the next five years.

Verified © PeelEstate

10. The existing slow ands filters located at Kurukkuthurai can be upgraded with rapid gravity filters so as to have better water supply facilities.

4.16 DRAINAGE AND SANITATION.

Nine wards out of 55 are having sewerage system since 1976. Now the facility is being extended to all areas except a few wards at an estimated cost of Rs.52.00 crores under the Scheme of National River Action Plan and the work of which is going on and the same will be completed in 2005 and thus 70% of the city will be having this facility. The sewage water to be collected at Ramayanpatti in an extent of 183 acres will be treated and used for the cultivation of cash crops to yield revenue out of it. Once the project is implemented the pollution of Tamiraparani river, canals and tanks available in the city will be minimized.

The city is having 152 nos. of community toilets; 13 nos. of pay and use toilets; 25 nos. of urinals and 12 nos. of integrated sanitation complexes, 14 nos. of Vambay toilets. All the existing dry latrines are already converted with flush out types. The total length of sewer line available is 40 Kms. with 3000 no. of house service connections. The length of open drains available is 288.99 Kms.

4.17 SOLID WASTE MANAGEMENT:

This Corporation has experimented many innovative ideas in solid waste management successfully. To solve the scarcity of sanitary workers, the people through their welfare associations were motivated to clean and keep their own colonies neat with their own source. For this purpose the Corporation is paying Rs.5/- per family per month to the Association and with this amount the people themselves through their welfare associations will clean their colonies by engaging their own sanitary workers and personal supervision. Thus incurring expenditure in cleaning these colonies is minimized from corporation side. In another system the people are motivated to collect the garbage's in two separate plastic buckets, one is for the biodegradable solid wastes and other is for non-biodegradable wastes. At a predetermined time the Corporation scavenger will collect these garbage's from door to door. This is also functioning well in many colonies since 1999 because of the efforts taken by the Public Health officials. All the solid wastes generated in the city are all being collected through 25 lorries; 4 tractors; 4 autos and these are all being dumped in the Ramayanpatti compost yard after weighing in the computerized weighing machine available in the compost yard. Because of these innovative measures taken by Corporation the no. of trips by the vehicles has increased along with tonnage of garbage's. The total no. of workers engaged are 813 nos.; the dustbins available are 337 nos.; steel containers 100no.; 26 nos. of bullock carts, wheelbarrows 100 nos. To avoid environmental degradation because of the existence of the compost yard in Ramayanpatti, a man made forest has been created in this site by planting 10000 tree saplings with the help of Forest Department. The daily collection of garbage is 120 tons.

Verified for TNPCB Estate

CHAPTER V

LAND USE PROPOSALS

5.01 OBJECTIVES

5.01 Tirunelveli Local Planning area had grown without proper planning control. To have effective control over further development. Tirunelveli Local Planning Authority prepares a Master Plan for its Local Planning Area. The aim and objectives of the plan is as follows.

1. To designate appropriate and viable functional units distinguished but complementary to one another.
2. To utilize the every bit of the land for the optimum benefit of the people depending upon.
3. To provide necessary facilities and urban infrastructures to cater the needs of all the persons, keeping an eye on economy.
4. To provide adequate amenities and open space within the limits of economy.
5. To create a healthy comfortable and safe environment to live.
6. To improve the existing circulation pattern and transportation system and provide safe and efficient transportation network.
7. To conserve the agricultural land to the possible extent.
8. To create a climate for more industrialization and improve the city conditions of one an all.
9. To stimulate the commercial and other tertiary activities to create more employment opportunities and improve the earning capacity of one and all.
10. To make the town functionally efficient and economically viable.

5.2 PROPOSED LAND USE – CORPORATION AREA

5.2.1 RESIDENTIAL USE: The existing residential use in the Corporation area is 1203 hect. As per assessment, the area required for residential use is 3429 hect (ie) additionally 2226 hect. of area is to proposed for this use for 2021.

The Corporation has 76 Detailed Development Plans. In which 38 D.D.Plans are approved under section 29 of the T&C.P Act 1971, 4 D.D. Plans are consented under section 25 of the Act 1971 and 11 D.D. Plans are approved with comprehensive variations under section33 (2) of the Act 1971. It covers 4045 hect. Of land. In these D.D.Plans 1528 hect of land is reserved for this use. Other than these areas, the remaining areas are to be proposed for residential use. Mixed Residential use is proposed in the following pockets, based on the trend of growth.

(a) opposite to Rani Anna College
(b) North western side of TANSI area,
(c) On both sides of NH7 and the pockets between the southern fringe of Corporation and Melapalayam D.D.Plan No.5 and 6 Perumalpuram D.D.Plan No.8.

5.2.2 COMMERCIAL USE

The existing commercial use in the Corporation area is 92 Hect. As per the assessment, the area required for the commercial use is 340 hect. (ie)additionally 48 hect of area is be proposed for this use.

It is observed from the Detailed Development Plans in the Corporation area that 91 hect of land is proposed for the commercial use. In addition to that, the following areas are earmarked for the commercial use.

(a) On both sides of by pass road to a depth of 45 m
(b) Northern side of Sivalaperi road near Anthorniyar Charch
(c) On both sides of S.N.High road at Sripuram
(d) On northern side of TANSI
(e) On both sides of Sankarankovil road on the fringe of Corporation.

Verified RealEstate

5.2.3 INDUSTRIAL USE:

Industrial sector is under weaker section in the Corporation area. The existing industrial developments in the Corporation area is 216 hect. As per the assessment the area required for the industrial use is 600 hect.(ie) additionally 384 hect of land is to be proposed for this use.

It is observed from the detailed Development Plans in the Corporation area that only 25 hect of land is proposed for industrial use. Enough space is not available for proposing this in the Corporation area. However some more area is to be reserved in vicinity area for this use.

5.2.4 EDUCATIONAL, PUBLIC AND SEM PUBLIC USE:

This existing land use under this category in the Corporation area is 530 hect. As per Assessment the area required for this category is 600 hect (ie) additionally only 70 hect of land is to be proposed for this use.

It is observed from the Detailed Development Plans in the Corporation area that 36 hect. Of land is proposed for this use.

5.03 PROPOSED LAND USE

VICINITY AREA

RESIDENTIAL USE

Residential use has been proposed in the following villages according to trend of growth.

1. Reddiyarpatti
2. Kilnatham
3. Thalaiyuthu
4. Ramayanpatti
5. Taruvai
6. Munnirpallam
7. Sivanthipatti
8. Narasinganallur
9. Parpakulam

COMMERCIAL USE

Commercial use is proposed in the following villages.

1. Kondanagaram
2. Thiruppanikarisalkulam
3. On both sides on NH7 of Munnirpallam village and Taruvai village
4. Southern side of Tiruchendur road of Krishnapuram
5. Ramayanpatti.

5.3.3 INDUSTRIAL USE

This use is proposed in the following villages of Kondanagaram, Sethurayanputhur and Parpakulam village.

5.3.4 PUBLIC AND SEMI PUBLIC USE:

This use is proposed in the following villages

1. Nochikulam
2. Taruvai
3. Thenkalam.

Verified RealEstate™

Table 5.01 shows the land use in existing and proposed in the planning period.
PROPOSAL LAND USE IN TIRUNELVELI L.P.A.

CHAPTER-6

PROJECT PROPOSALS:

6.01. General

The problems in the Local Planning area are not only due to the activities with in the area but also due to various external factors. Modification of the contributing factors is also not possible. As such the strategy for development and identification of projects for implementation must be carefully organized considering the following principles.

a. Minimum demolition
b. Minimum dislocation of activities.
c. Minimum charges in the traditional outlook urban from and usage of the area. Project under urban renewal programme are proposed to be based on the following general considerations.

i) Conservation and preservation of monuments and buildings.
ii) Shifting of non-confirming and incompatible user units.
iii) Improvement to traffic and transportation.
iv) Improvement to other infrastructure.
v) Environmental up gradation.
vi) Institutional and legislative measures.

6.2 Conservation and preservation of monuments and religious buildings:

6.2.1 Swami Nellaiappar temple: The central feature the Town is the Nelliappar temple dedicated to Lard Siva. The temple since to have been built based on one plan and at one time without much subsequent alterations. The great square is divided in to equal portions of which one is dedicated to the Lord Siva in the Northern half while Southern half to his consort Parvathi. This monumental temple needs conservation and preservation.

The temple requires urgent improvement and fact lift provision of better illumination for the corridors and the sanctum sanctorum is to be made. There is also and urgent need to make some essential minor repairs to the building. A project for the above is prepared as a part of urban renewal programme.

6.2.2 Mandapam in front of the Swami Nellaiappar Temple on Amman Sannathi Street. The road from Victoria memorial arch to East Car Street passes through the temple mandapam. This part of the road is very narrow. The mandapam also needs fact lift through minor repairs. The side drains on the road on sub-

Verified RealEstate

standard and need reconstruction to the storm water from the area to be drained away with out flooding of the road. A project for improvement of this mandapam and road is proposed as this form the main approach and the Town.

6.2.3 VICTORIA MEMORIAL ARCH:

Another monument is the Victoria memorial arch at the entrance to the Town. This was constructed with one central arch with movement of vehicles and two smaller side arches for passage of pedestrians. Due to increase in vehicular traffic, this arch is acting as a bottle neck for the traffic. For reducing the traffic on the narrow road beyond the arch (Sannathi Street) a new link road from the arch to joint the south mount road as proposed in D.D. plan is necessary. The widening of the Swamy Nellaiappar road and the formation of the new link road have to be planned and executed preserving this monumental arch. This project is proposed as a part urban renewal.

6.3 Shifting of non-confirming and incompatible uses:

6.3.1 Wholesale market:

Commodity wise wholesale markets have not grown up in the city. However the wholesale activities now concentrated on the west and east Car Street may create traffic problems in the long run due to its attraction of heavy goods vehicles. It may be appropriate to plan a head and develop a wholesale market district outside the URP area preferably alone the tank bund road where the vegetable wholesale market is already functioning.

6.3.2 Improvement of existing vegetable market

The vegetable daily market in the town is located southern side of the Nellaiyappar temple. During peak hours of the day this area is conjested by the vegetable purchasers. This market is to be improved with necessary modification.

The daily market in the Palayamkottai is highly conjested and affect the traffic. Northern and Southern side of this market, is always busy by the vehicular traffic. Even though the Ulavar shandai is in the Palayamkottai with busy, this daily market is crowded. Hence this market is to be shifted to other suitable place.

6.4. TRAFFIC IMPROVEMENTS

Single Tier Transport over bridge:

75% mofussil buses are diverting at Chellapandian statue to various places. Many passengers are boarding the buses to various places from here. There is only one bus stop near BSNL office. So traffic conjestion is very heavy at this place. A single tier transport bridge may be constructed.

6.5 COST ANALYSIS

Phasing and cost estimates are provided in this chapter. By and large, projects are divided into:

i) Short term (up to 5 years)
ii) Long term (above 5 years)

This division is made based on prioritization of needs and fulfillment of stated objectives.

The abstract of proposed projects is given in 6.6

6.5.1 Sanctioned Schemes (Highways Department)

A list of projects sanctioned by the Government and under execution by Highways Department is furnished below:

Verified Realestate

TABLE 6.5.1

S.No	Schemes	Cost of project in Rs. Crores
1.	Tirunelveli Bypass Road (Land acquisition)	3
2.	Link road from 2/4 of Tirunelveli Rajapalayam Road to 6/2 of Tirunelveli Pottal Pudur Road (Land Acquisition)	0.75
3.	Improvement to road from Sripuram to Thatchanallur via Sivasakthi talkies	0.25

6.5.2 Short-Term Projects

TABLE 6.5.2

A list of short-term projects proposed is given below:

S.No.	Project details	Cost in Crores
1.	Conservation of Preservation of Religious Buildings and Monuments	
2.	Improvements to the Temple by providing better illumination inside the Temple and attending to minor repairs for the conservation of monuments	0.25
3.	Improvements to Mandapam and Amman Sannadhi Street leading to the Temple with repairs to the side drains between Victoria Memorial Arch and East Car Street.	0.35
4.	Conservation of Victoria Memorial Arch	0.10
	Sub Total	0.70
II.	Shifting of Non-conforming uses	
1.	Shifting of wholesale grain market from the west and north car street area(area vacated will be used for retails trade)	0.25
2.	Improvements in the daily market at Palayamkottai	0.20
	Sub Totoal	0.45
III.	Improvements to Roads and Traffic	
1.	Improvements to Swami Nellaiappar High Road	0.50
2.	Improvements to Tank Bund Road connecting Tenkasi road to Madurai road including re-construction of the bridge.	1.00
3.	Providing a New link road between Nellaiappar high road (near V.M. Arch) and Kurukkuthurai road	0.50
4.	Improvements to South Mount Road upto Junction with West Mount Road including strengthening and widening of the carriage-way to S.H standards.	1.50
5.	Improvements to west Mount Road upto junction with Tenkasi road including construction of culverts and strengthening and widening of the carriageway to S.H. standards.	1.00
6.	Improvements to North Mount Road and its extension upto junction with West Mount Road including provision of storm water drain and strengthening and widening of the carriageway to S.H.standards.	1.25
7.	Improvements to Tenkasi road within city limits (Highways)	0.50
8.	Improvements to Cheranmadevi road within city limits (Highways)	1.00
9.	Improvements to Sankarankoil Road within city limits (Highways)	0.70
10.	Relief road to Swami Nellaiappar high road(south) (Swami Nellaiappar Detailed Development Plan)	0.80
11.	Relief Road to Swami Nellaiappar High Road (north) (Thatchanallur Detailed Development Plan)	0.60
12.	Improvement to four car streets including provision of raised foot-path	0.80

Verified RealState™

13.	Improvement to other important roads	0.25
14.	Providing a link road between existing Byepass road and Madurai road (near railway level crossing)	0.45
15.	Improvement to Junction Bus stand (including Improvements to roads)	0.40
16.	Single Tier over-bridge at Chellapandian statue	1.00
17.	Railway over bridges (near Thatchanallur, Sivanthipatti road near Central Jail)	2.50
18.	Improving the Anna Statue intersection including widening and signalization	0.20
19.	Construction of a Subsidiary Bus Stand for Town bus terminals at Old Town	0.30
20.	Providing Truck parking area along Nainar Kulam Tank Bund Road (North Mount Road)	0.75
21.	Providing parking lots(oof-street) of Nainar Kulam Tank	0.15
	Sub Total	15.75
IV.	Infrastructure Development	
1.	Water Supply Improvements to water supply distribution	0.75
2.	Storm water Drainage Provision of underground sewerage in remaining areas Tirunelveli town, Palayamkottai	10.00
3.	Storm water Management Improving the storm water drains and drainage channels in and around the old town.	2.00
4.	Solid waste Management Augmenting the fleet of trucks for collecting and transporting solid waste	0.30
5.	Public Conveniences Constructing Public Conveniences along North Mount Road, Swami Nellaiappar High Road and Tank Bund road	
	Sub total	13.20
V	Environmental Upgradation	
1.	Improvement and deepening of Nainar Kulam by desilting and strengthening the bund to store water all round the year.	0.50
2.	Planting of avenue trees along South, West and North Mount Roads and Government Roads in the City	0.01
3.	Development of park in the exhibition ground opposite to Corporation office	0.05
4.	Improvement to irrigation channels and tanks around old town including desilting and construction of masonry embankments	0.25
	Sub Total	0.81
	Total	30.91

6.5.3. Long term projects:-

TABLE 6.5.3

A list of proposed long-term projects is given below:-

S.No.	Details of projects	Cost in Crores
1.	Improvements of Traffic and Transportation	
1.	Formation of outer Byepass road connecting NH7(Madurai road),NH7A (Tuticorin road), Tiruchendur road and NH7(Kanniyakumari road) including construction of two rail over bridges and one river bridge (excluding land acquisition)	25.00

Verified by RealEstate™

2.	Link road from 2/4 of Tirunelveli-Rajapalayam road to 6/2 of T;irunelvlei-Potal pudur road including R.O.B (excluding land acquisition)	5.50
3.	Provision of new link road between Sankarankoil road and Madurai road (to join near Bye pass junction)	1.00
4.	Link road inter-connecting Kurukkuthurai road and Bye pass road (near New Bus stand)including R.O.B and a rivier bridge across Tamiraparani	18.50
5.	Provision of link between Kaniyakumari road (NH7) to Amabasamudram road (incontinuation of (a) above	101.25
6.	Redesign of the junction Bus stand as Twon bus terminal with pedestrian sub-way and other facilities.	2.00
	Sub Total	153.25
	Improvements of Infarastructure	
7.	Improvements to Storm Water Drains Improving the storm water drains and drainage channels in and around the old town	10.70
	Total	163.95

6.6 ABSTRACT OF PROJECTS:

TABLE 6.4

An abstract of the projects proposed both short and long-term is given below:

Sl.NO.	Proposed Projects	Short Term Cost in Crores	Long Term Cost in Crores
1.	Conservation and preservation of religious buildings and monuments	0.07	--
2.	Shifting of non-conforming and incompatible uses	0.45	--
3.	Improvements to traffic and transportation	15.75	53.25
4.	Improvements to Infrastructure	13.20	10.70
5.	Environmental Upgradation	0.81	--
	TOTAL	30.91	63.95

Total cost estimates of all projects = Rs.94.86 Crores.
(Both short and long term)

6.7 RESOURCE MOBILIZATION:

Urban development projects can be successfully implemented only when the estimation of financial requirements and the methods of achieving these finances are properly assessed and ascertained clearly before hand to raise funds for the various projects proposed in this report, recommendations made in the Master Plan are fully endorsed. The suggesseted sources for fund mobilization are:

There is a provision under section 65(1) of the Town and Country Planning Act 1971, which stipulates that every planning Authority should maintain a separate fund called " The Planning and Development Fund Account". The Government accordingly in G.O.Ms.No 805 dated 8th May 1975, specified that every local authority should contribute a sum not exceeding one percent of the General Fund of such Local Authority to this Account of the Local Planning Authority concerned. This fund is allotted exclusively for under development.

a) From 1% contribution of the Local authorities under the provision of the Town and Country Planning Act 1971, enhancing the revenue of Local Planning Authority through collection of Development charges and other taxes.

b) Loans and grants from the State and Central Governments.

c) Loans and grants from financial institutions like

Verified RealEstate™

- Life Insurance Corporation of India (LIC)
- Housing and Urban Development Corporation of India (HUDCO)
- Nationalized Banks
- Tamil Nadu Infrastructure Finance Corporation (TIFCO)
- Nation Housing Bank (NHB)
- Tamil Nadu Urban Infrastructure Finance Corporation (TNUFSL)

d) Loans and grants from International Financial Agencies like

- World Bank
- Asian Development Bank
- OECF (Japan)

Thus the grants from State and Central Governments, Finance from the Government as per 1971 Act besides financial assistance from financial institutions like LIC, Nationalized Banks and international financial agencies like Worked Bank are endorsed for active consideration.

6.8 GOVERNMENT GRANTS

The Government may constitute a State Town and Country Planning Development Fund for the purpose of furthering the Town and Country Planning functions under the 1971 Act. The Government may from time to time, allocate money from this fund. Money from this fund may be advanced by the Government as grants or loans reviewing the overall situation.

CHAPTER VII

ZONING REGULATIONS AND CONTROLLING OF DEVELOPEMNT

7.01 In order to implement the proposals contained in the master plan, certain essential and important zoning regulations we have to be framed and enforced.

7.02 Every development within the area covered by the Master Plan for Tirunelveli local planning area shall confirm to the regulations prescribed hereunder.

7.03 Proposed land use zones are zoned in the proposed land use map itself. The uses permissible under the various use zones are given separately in the annexure. As per G.O.Ms.No.1730 RD&LA dated 24.07.74.

7.04 The uses permissible in various locations and its survey numbers are also given separately given in the Annexure.

7.05 For implementation of the plan by the local planning authority zoning regulations are absolutely essential. The already approved zone in regulations by the government in their G.O.Ms.No.1730 RD&LA dept. dated 24.07.1974 and subsequent amendment to be made to this G.O. as given in the annexure and enclosed in this report shall apply for the local planning authority. The grant or refusal

Verified RedEstate™

of planning permission shall be as per the above zoning regulations and the development control Regulations.

7.06 If any notification issued under the Panchayat act Tamil Nadu District Municipalities Act 1920 deleniating areas for industrial use is in existence them may be allowed to develop as such except for the areas proposed for specific uses as contemplated in this Master plan proposals for which the zoning regulations as in the appendix shall apply.

7.07 No person shall carry out any development as defined in section 2(13) of the Town and Country Planning Act 1971 without the written permission of the local planning authority.

7.08 Any site approval or planning permission for any development under these rules regulation shall not absorb the applicant of his responsibility to get clearance or permission under other acts, rules.

7.09 While granting permission the local planning authority may enforce such restrictions and conditions as may be necessary under the rules.

7.10 No development shall be in contravention of these rules.

7.11 No land premises for building shall be changed for put into a use not inconformity with the provisions of these rules.

7.12 In the case of an area comprised in a detailed development plan consented/approved under the Town and Country Planning Act 1971 the development to those areas shall be in conformity with the detailed development plan and regulations as per the provisions contained in the respective detailed development plans.

7.13 Where for an area detailed layout plan or land development has been approved by the local planning authority with the approval of the Commissioner of Town and Country Planning the zone on such layout plan shall be applicable and development in the area shall be regulated according to the rules subject to such conditions as any be described in such layout conditions.

7.14 The permission for any layout shall be granted by the local planning authority with the prior approval of the Director or his authorized officer subject to such conditions and regulations as may be stipulated by him.

7.15 The multi storied building shall be permitted along the roads abutting the roads, having a minimum of 18m width by the local planning authority with the prior approval of the Commissioner of Town and country planning subject to such conditions as may be prescribed by the Commissioner of town and country planning.

7.16 The layout sub division of land for building purposes shall be carried out only in accordance with the provisions as specified in the approved layout.

Development charge: - Every development intending to develop and area shall obtain planning permission from local planning authority on payment of developing charges at the rate fixed under the act and rules.

ANNEXURE - A

GOVERNMENT OF TAMIL NADU

ABSTRACT

TOWN PLANNING - Preparation of Zonal plans – Formulation of Draft regulations submitted by the Director of Town and Country Planning Approved.

RURAL DEVELOPMENT AND LOCAL ADMINISTRATION DEPARTMENT

G.O.Ms.No.1730 **Dated the 24th July 1974**

Read:

1. D.O.Lr.No. 28332/MD/73-1 RD&LA dt 7-3-73
2. From the Director of Town & Country Planning Lr. No. 10989/73 SM, dt. 21-3-74.
3. From the Member secretary/ Madras Metropolitan Development Authority D.O.Lr.No. 1983/74-ADI, dt.19.5.74.

ORDER:

The Director Town and Country Planning submitted draft zoning regulations on use of land and buildings particulars in urban areas. These regulations list out the uses permissible in each of the use zones and the restrictions to be imposed. For the purpose of these regulations, it has been suggested that the urban areas may be divided into the following six major use zones.

1. Residential use zone
2. Commercial use zone
3. Industrial use zone
4. Educational use zone
5. Public and semi public use zone
6. Agricultural use zone

Of these, the Residential use zone has been further sub divided into two categories, namely:

1. Primary Residential use zone and
2. Mixed residential use zone

The industrial use zone has been similarly sub-divided into three categories namely:

1. Controlled Industrial use zone
2. General Industrial use zone and
3. Special Industrial and Hazardous use zone

2. The Director has also stated that the Tamil Nadu Town and Country Planning Act 1971 provides for the zoning of areas under section 17(1) and 20(2) (g) through the master plans and detailed development plans respectively. He has recommended that the draft zoning regulations may be approved and communicated to the Local Planning Authorities for adopting as part of the Master Plan for proper land use planning and control in addition to other regulatory measures and that as for the Madras Metropolitan area, a copy of the regulations may be sent to the Member –Secretary, Madras Metropolitan Development Authority for adoption as part of the Metropolitan Development plan with such notification as may be necessary, in consultation with him (the Director) and the Government.

3. A copy of the draft regulations was sent to the Member Secretary Madras Metropolitan Development Authority for his views. He has stated that the comprehensive land use proposals and zoning regulations for Madras Metropolitan Area are under preparation and that the suggestion of the Town Planning Directorate will be considered and incorporated to the extent as may be necessary in the final proposals.

4. The Government have examined the suggestions. They accept the views of the Member-Secretary, Madras Metropolitan Development Authority so far as it relates to the Madras Metropolitan Area and, as for other Urban areas of the state, the Government approve in principle, the draft zoning regulation

Verified RealEstate ™

submitted by the Director is requested to furnish copies of the draft zoning regulations to the Local Planning Authorities as soon as they are constituted.

5. The receipt of this order may be acknowledged by the Director of Town and Country Planning.

/By order of the Governor/

MM. RAJENDRAN
SECRETARY TO GOVERNMENT

/TRUE COPY/

USE ZONE REGULATIONS

1(a) PRIMARY RESIDENTIAL USE ZONE (PR)
Uses Permitted:-

1. All residential buildings including single and multifamily dwellings, apartment dwellings and tenements together with appurtenances pertaining there to.

2. Professional consulting offices **ANNUXURE – B** of the residents and other incidental uses there for.

3. Petty shops dealing with daily essentials including retail provisions, soft drinks, cigarettes, newspapers, milk kiosks, cycle repair shops and single person tailoring shops.

4. Hair dressing saloons and Beauty parlours

5. Nursery and Primary schools

6. Taxi and Auto rickshaw stands and

7. Parks and Playfields.

8. Storage of domestic cooking gas cylinders (Vide G.O.Ms.No.457H & UD Dept. Dated. 01.06.1989)

9. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

10. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No.302 H & UD department dated 12.12.2002).

I(b) Mixed Residential use zone . (MR)
Uses Permitted

1. All uses permitted under use zone I(a) ie., Primary residential use zone.

2. Hostels and single person apartments.

3. Community halls, kalyana Mandapams, religious buildings welfare centres and gymnasia.

4. Recreation clubs, Libraries and Reading rooms.

5. Clinics, Dispensaries, and nursing homes.

6. Government, Municipal and other institutional sub-offices.

Verified RealEstate™

7. Police stations, Post & Telegraph offices, Fire stations and Electric sub stations.

8. Banks and Safe deposit vaults.

9. Educational Institutions excluding colleges.

10. Restaurants, residential hostels and other board and lodging houses.

11. Petrol filling and service stations.

12. Departmental stores or stores or shops for the conduct of retail business.

13. Vegetable, fruit, flower, fish, eggs and meat shops.

14. Bakeries and confectionaries.

15. Laundry, tailoring and goldsmith shops and
16. Cottage industries permissible in residential areas under G.O.Ms. No. 566 dated 13.3.62.

17. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

18. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

II. COMMERCIAL USE ZONE: –

Uses permitted

1. All uses permitted in use zone 1(a) and 1(b) (ie) residential use zones.

2. All commercial and business uses including all shops, stores, market and uses connected with the display and sale of merchandise, either wholesale or retail but excluding explosives, obnoxious products and other materials likely to causes health hazards.

3. Business offices and other commercial and financial institutions.

4. Warehouses, repositories and other uses connected with storage or wholesale trade, but excluding storage of explosives or products which are either obnoxious or likely to cause health hazards.

5. Cinemas, Theatres and other commercial entertainment.

6. Research, experimental and testing laboratories not involving danger of fire, explosion or health hazards.

7. Transportation terminals including bus stands, railway stations and organized parking lots.

8. Automobile repair shops and garages.

9. Small industries, using electric motors not exceeding 20 HP and or employing not more than 25 workers, which are not noxious or offensive due to odour, dust, smokegas. noise or vibration or otherwise dangerous to public health and safety and

Verified RealEstate™

10. Manufacturing and service establishments and commercial uses using electric motors not exceeding 50HP for use incidental to the commercial activities permissible in the zone. (As per the letter of joint Secretary to Government Housing and Urban Development Department, Chennai Letter No.12096 UD IV (i) 93-4 dated 2.8.93 addressed to Director of Town and Country Planning, Chennai.)

11. Restaurants with or without boarding and lodging houses, star hotels and non star hotels (Vide amendment issued in Government letter No. 69759/UD IV 288/11 dated 22.6.1992).

12. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

13. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

III. INDUSTRIAL USE ZONE

Use zone III (a) controlled Industrial use zone (IC)

Use permitted

1. All commercial uses listed under use zone 1(a) 1(b) and 2 ie., residential and commercial use zones.

2. Industries using electric power not exceeding 130HP (L.T maximum load) but excluding industries of abnoxious and hazardous nature by reason of odour, liquid effluent dust, smoke, gas, vibration etc, or otherwise likely to cause danger or nuisance to public health or amenity. Provided that these industries may use steam, oil or gas power during periods of power shortage or failure.

3. Hotels, restaurants, and clubs, places for social inter course, recreation and worship and dispensaries and clinics and

4. Residential buildings for caretakers, watchman and other essential staff required to be maintained in the promises.

5. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

6. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

USE ZONE III (b) GENERAL INDUSTRIAL USE ZONE:

Uses permitted

1. All commercial uses issued under use Zone 1(a) 1(b) and 2 ie. Residential and commercial use zones.

2. All industries without restrictions on the horsepower installed or type of motive power used excluding those of obnoxious hazardous nature by reason of odours liquid effluent dust smoke gas vibration etc. or otherwise likely to cause danger or nuisance to public health or amenity.

3. Hotels restaurants and clubs or places for social intercourses recreation and worship or for dispensaries and clinics and

4. Residential buildings for caretakers watchman and other essential staff required to be maintained in the premises.

Verified PonlEstate

5. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

6. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

III© SPECIAL INDUSTRIAL AND HAZARDOUS USE ZONE:-

Uses permitted:

1. All Commercial uses listed under use zones 1 and 2 ie. Residential and commercial use zones.

2. All industries permissible in the use zone III(a) and III(b) ie. Controlled and general industrial use zones.

3. All uses involving storage handling manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and/ or which may produce poisonous fumes or explosion.

4. All uses involving storage handling manufacturing or processing which involve highly corrosive toxic or noxious alkalies acids or other liquids or chemicals producing flames fumes and explosive poisonous irritant or corrosive gases.

5. All uses involving storage handling or processing of any material producing explosive mixtures of dust or which result in the division of matter into fine particulars subject to a spontaneous ignition.

6. Processing or manufacturing anything from which offensive or unwholesome smells arise.

7. Melting or processing tallow or sulpur.

8. Storing handling or processing of manure offal blood bones rags hids fish horns or skin.

9. Washing or drying wool or hair.

10. Making fish oil.

11. Making soap boiling or pressing oil burning bricks tiles pottery or lime.

12. Manufacturing or distilling sago and artificial manure

13. Brewing beer manufacturing by distillation arrack or sprit containing alcohol whether denatured or not.

14. In general any industrial process which is likely to be dangerous to human life or health or amenity and not permissible in the use zones III(a) and III(b) ie. Controlled industrial and the general industrial use zones.

15. Hotels restaurants and clubs or places for social intercourse recreation and workship or dispensaries and clinics and

16. Residential buildings for caretakers watchman and other essential staff required to be maintained in the premises.

17. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

Verified RedEstate™

IV. EDUCATIONAL USE ZONE (E) -

Uses permitted

1. Schools, colleges and other higher education and training institutions and the uses connected therewith

2. All uses permitted in use zone 1(a) ie., primary residential use zone.

3. Hostels and single person apartments.

4. Recreation clubs, libraries and reading rooms and

5. Restaurants

6. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

7. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

V. PUBLIC AND SEMI PUBLIC USE ZONE (P&S) Use zone

Uses permitted

1. Government and Quasi Government offices
2. Art calleries, museums, acqaris and public libraries

3. Hospitals, sanitories and other medical and public health institutions

4. Barbour, airport, and flying club

5. Organized parking lots and bus and taxi stands

6. Parks, playfields, swimming pools, stadium, zoological gardens, exhibition grounds and other public and semi public open spaces and

7. All uses permitted in the use zones 1(a) and 1(b) i.e., the residential use zones.

8. Software development and training (Vide G.O Ms. No. 260 H & UD department dated.29.10.2002.)

9. Installation of Base Transreceiver Station Towers (Vide G.O.Ms. No. 302 H & UD department dated 12.12.2002).

VI. AGRICULTURAL USE ZONE (AG)

Uses permitted

1. All agricultural uses
2. Farm houses and building for agricultural activities
3. Rural settlements with allied uses

ABSTRACT

Information Technology – Setting up of Base Transreceiver Station Towers and installation of equipment of telecommunication networks – Leasing of space in government offices on a non-exclusive basis to any licensed telecom company on certain prescribed terms and conditions – Orders-issued.

INFORMATION TECHNOLOGY DEPARTMENT

G.O.Ms.No.2 Dated: - 01.04.2002

Read:

1. G.O.Ms. No.7, information Technology department, dated 12.02.2001.
2. From Tvl. Reliance Infocom Limited, Chennai, letter Ref.No.2375/IT/2001-2002 dated 29.01.2002.

ORDER:-

In the G.O first read above, consolidated policy guidelines were issued specifying terms and conditions terms and condition for the grant of centralized permission for the use of public right of way by any private or public sector applicant that proposes to lay optic fibre cable in the National and State Highways and other roads in Tamil Nadu.

2. Tvl. Reliance Infocom Limited, who have been given centralized permission to lay optic cables in Tamil Nadu, have indicated that in order to maximize the coverage throughout the State, permission is required for reining/leasing out Government land/Government buildings for putting up Base Transreceiver Station Tower (BTS Tower) at technically feasible locations. The company has also requested the Government to grant exemption to it from observing side set back rules of Chennai Metropolitan Development Authority/ Directorate of Town and Country Planning for the BTS towers which are only temporary structures and to apply the rules only in the cases of construction of buildings for BTS equipment room, Diesel Generator Set room etc.,

3. The Government after careful consideration and detailed examination have decided to issue general permission to any licensed telecom company providing infocom services to the end users, on a non-exclusive basis subject to certain terms and conditions.

4. Accordingly, the Government hereby accord permission to any licensed telecom company and which is committed to the cause for Government of Tamil Nadu to install its Base Stations consisting of Tower, Equipment room and Generator room, on roof top or on the ground of premises and buildings belonging to Government of Tamil Nadu, subject to availability and technical feasibility, on a non-exclusive basis and also subject to the following terms and conditions.

i) Permission for installing towers, equipment and generator etc. on case-to-case basis will be issued by the district Collectors concerned in consultation with the district office concerned.

ii) Availability of space of 4.5 Mtrs x4.5 Mtrs.

iii) Technical feasibility –Building should be structurally strong to take a load of 3.5 MT to 6.0 MT depending on the height of tower.

iv) A Telecom company providing infocom services and is desirous of utilizing the Government premises / buildings for installing the base stations, should comply with all the regulations and stipulations including that of the Ministry of Civil Aviation, Government of India, in installation of the Base stations, All clearness / permissions,required in the process of establishing the base stations are to be obtained by such company.

v) Permission may be given on non-exclusive basis

vi) The future extension/expansion of building/ premises may be kept in mind.

Verified RealEstate™

vii) Permission may be granted initially for a period of 1o (ten) years.

viii) Damages caused, if such company shall rectify any, and bring back to original condition and to the satisfaction of the authorities concerned.

ix) Leasing of the premises or buildings to such company should not be detrimental to the daily routine and activities of the office or Offices concerned.

x) Appropriate rent shall be charged from such company.

xi) Exemption shall be given to the telecom Companies from side set back rules of Chennai Metropolitan Development Authority/Directorate of Town and Country Planning for the BTS Towers and the said rules shall be applicable only to the construction of buildings.

xii) This order issues with the concurrence of Housing & Urban development, Revenue and Public Works departments.

ABSTRACT

Land Use Zoning – Master Plan Locational restriction software units – Removal – orders – issued

---

Housing and Urban Development (UD IV (2) Department

G.O.Ms.No.260 Dated the 29.10.2002

1. G.O.Ms.No.1730 Rural Development and Local Administration and acquisition Department dated. 24.7.74.

2. G.O.Ms No. 300, IMD (ME2) dated 3.11.97.

3. From the special Commissioner of Town and country Planning is order No.6336/2002/T dated 13.3.2002.

- - - - - - - - - - -

Verified RealEstate™

ORDER:-

In the G.O first cited read above, orders were issued prescribing the norms governing land use zoning in respect of areas coming under Local Planning areas according to the orders issued in the above Government order, the Urban areas are divided into the following six major use zones

1. Residential Use Zone
2. Commercial Use Zone
3. Industrial Use Zone
4. Educational Use Zone
5. Public and Semi Public Use Zone
6. Agricultural Use Zone

Of these, the Residential Use Zone has been further sub – Divided into two categories, namely:

1. Primary Residential Use zone and
2. Mixed Residential Use Zone

The Industrial Use Zone has been further similarly sub – Divided into three categories, namely

1. Controlled Industrial Use Zone
2. General Industrial Use Zone and
3. Special Industrial and Hazardous use Zone.

2. In the G.O second read above, while announcing the information Technology industrial policy.It has been ordered that there will be no locational restriction for setting up units exclusively engaged in software Development and Training.

3. In his letter third read above, the special commissioner of Town and Country Planning has reported that software units exclusively engaged in software development and training, are considered to be non conflicting uses and therefore there will be no locational restriction for setting up of these units in any land use classified,except those lands reserved for special and Hazardous and agricultural land use in the Master Plan, in line with the provisions of amended Development control Rules of Chennai Metropolitan Development Authority, and that the information technology industries also should not be permitted in areas prohibited by various Acts and Rules relating to Coastal Regulation zone, Archalogical site, Heritage site,Airports, Burial ground, Quarry sites, railway properties **181** etc.The Special commissioner of Town and Country Planning has now requested the Government to effect changes to G.O.(Ms.) No.1730 RD&LA Department dated.24.7.74 accordingly

4. The Government after careful consideration accept the request of the special Commissioner of Town and Country Planning and effect Changes to the norms laid down in G.O.(Ms)No.1730,RD&LA Dept. dated.24.07.74 to the effect that units exclusively engaged in software development and Training be permitted to all land uses. Viz. residential (Primary and Mixed residential), Commercial, Public and Semi Public, Educational, industries (Controlled and General industries) except those lands that are earmarked for special and hazardous industries and agricultural land use in the Master Plan.

Urban Development-Installation of the Base-Transreceiver Station Towers in all the land use, zones in the Master Plan-Permission – orders – issued.

HOUSING AND URBAN DEVELOPMENT (UD4.2) DEPARTMENT

G.O. (Ms.) No.302 Dated: - 12.12.2002

READ:-

1. G.O.(Ms)No. 1730, Rural Development and Local Administration Department, dated 24.07.1974.

2. G.O.(Ms) No. 2, Information and Technology Dept. dated 01.04.2002.

3. Government Lr.No.237/TST/2002-2, Information Technology Dept., dated 09.05.2002.

4. From the Special Commissioner of Town and Country Planning Lr.Roc.No.13287/2002/BAI, dated 03.06.2002 and 17.07.2002.

5. Government Lr.No.237/IT/2002-7, Information Technology Department dated 18.09.2002.

ORDER:

In the Government Order second read above, the Information Technology Department had issued orders permitting any licenced telecom company to install Base Transreceiver Station Towers, equipment room and generator room on roof top or on the grounds of premises and building to belonging to Government on certain terms and conditions. Orders were also issued by the Government that exemption shall be given to such telecom companies from following the side set back rules of Chennai Metropolitan Development Authority/Director of Town and Country Planning for installation of Base Transreceiver station Towers and applicability of the said rules only to the construction of buildings.

2. Subsequently, in the Government letter third read above, the Information Technology Department has further clarified that the exemption given in G.O. (Ms.) No.2, dated 01.04.2002 will be applicable not only for the Base Transreceiver Station Towers to be installed on roof top or on the ground of Premises and buildings belonging to Government of Tamilnadu but also for the Base Trans receiver Station Towers to be installed on private land buildings.

3. In the letter fifth read above, the information Technology Department while issuing certain amendments to paras 4 and 5 of Government Order second read above has directed Municipal Administration and Water Supply Department and Rural Development Department to issue necessary orders exempting under Tamilnadu District Municipalities Building Rules and Multi stored and Public Buildings Rules 1973 under G.O.(Ms) No.22 Municipal Administration and Water Supply Department, dated 15.06.1991 and G.O.(Ms) No.22, Municipal Administration and Water Supply Department dated 30.01.1997 against restricting the higher of the Buildings/structures / Base Trans Receiver Station Towers within the Heritage Zone of the Heritage Towns and under G.O.(Ms) No.1730, Rural Development and Local Administration Department dated 24.07.1974 allowing the Base Trans Receiver Station Towers in all the land use Zones.

4. As regards the issue of allowing of Base Trans Receiver Station Towers in all the land use zones, the Special Commissioner of Town and Country Planning in his letter fourth read above has reported that as per the Government Order first read above only permissible uses specified in each use zone as per the Master Plan can be permitted. He has requested that since there is no provision at present in the Master Plan for permitting the Base Trans receiver Station Towers, a separate Government order for

Verified RealEstate™

permitting Base Trans Receiver Station Towers in all use zone in the master plan may be issued by the Government.

5. The Government after careful examination accept the proposal of the Special Commissioner of Town and Country Planning and accordingly direct that the installation of Base Transreceiver station Towers shall be permitted in all the land use zone in the master plan.

GOVERNMENT OF TAMIL NADU
ABSTRACT

Environment control – Control of pollution of Water sources – Location of industries within 1 Km from the embankments of rivers, streams, and dams etc, Imposition of restrictions – orders – issued.

ENVIRONMENT AND FOREST (EC – I) DEPARTMENT

G.O.Ms.No. 213
Dated the 30th March 1989
Read:-

1. G.O.Ms. No.1 Environment Control dated 06.02.1984
2. From the Member-Secretary, Tamil Nadu Pollution Control Board Lr.BMS (1)/15878/88, dated 23.08.1988.
3. From the Chairman, Tamil Nadu Pollution Control Board, Lr.BMS (1) /44365/88 dt 03.11.1988 and letter of even No. dated 30.12.1988.

&&&&&

ORDER:-

In the Government order first read above, the Government have ordered, among other things, that no industry causing serious water pollution should be permitted within one Kilometre from the embankments of rivers, streams, dams etc., and that the Tamil Nadu pollution Control Board should furnish a list of such industries to all Local Bodies. It has been suggested that it is necessary have a sharper definition for water sources so that ephemeral water collection like rain, water ponds, drains, sewerages (bio-degradable) etc. may be excluded from preview of the above order. The Chairman Tamil Nadu Pollution Control Board has stated that the scope of the Government order may be restricted to reservoirs, rivers and public drinking water sources. He has also stated that there should be complete ban on location of highly polluting industries within one kilometer of certain water sources.

2. The Government has carefully examined the above examined the above suggestions. The Government impose a total ban on the setting up of the highly polluting industries maintained in Annexure – I to this order within one kilometer from the embankments of the water sources mentioned in Annexure – II to this order.

Verified by PadiEstate™

3. The Government also direct that under any circumstances if any highly polluting industry is proposed to be set up with in one kilometer from the embankments of water sources other than those mentioned in Annexure – II to this order, the TamilNadu Pollution Control Board Should examine the case and obtain the approval of the Government for it.

4. The receipt of this order may be acknowledged.

தமிழ் நாடு அரசு – சுருக்கம்

சுற்றுச்சூழல் – நீர் ஆதாரங்களை பாதுகாத்தல் – 8.05.98 ஆம் நாளிட்ட சுற்றுச்சூழல் மற்றம் வனத்துறை அரசாணை எண்.127க்கு திருத்தம் வெளியிடப்படுகின்றன.

சுற்றுப்புறம் & வனத்(சுக 3)துறை

அரசாணை (1டி) நிலை எண்.223 நாள்.02.09.98.

பார்வை.

1. நாள்.30.08.89 ஆம் நாளிட்ட சுற்றுசூழல் & வனத்துறை, அரசாணை (நிலை) எண்.213.
2. நாள்.05.05.89 ஆம் நாளிட்ட சுற்றுசூழல் & வனத்துறை, அரசாணை (நிலை) எண்.127.

ஆணை.

நாள்.30.08.89 ஆம் நாளிட்ட சுற்றுசூழல் & வனத்துறை, அரசாணை (நிலை) எண்.213 இல் இன்ன பிறவற்றுடன் இவ்வாணையின் இணைப்பு 1 இல் கண்டுள்ள 14 வகையான தொழிற்சாலைகள் இவ்வாணையின் இணைப்பு 11 இல் கண்டுள்ள நீர் ஆதாரங்களிலிருந்து 1 கி.மீ. தூரத்திற்குள் நிறுவப்பட்டு அனுமதி அளித்தல் கூடாது என்று ஆணையிடப்பட்டது. பின்னர் 8.5.89 ஆம் நாளிட்ட சுற்றுச்சூழல் மற்றும் வனத்துறை அரசாணை (நிலை) எண்.127 இல் இன்ன பிறவற்றுடன் காவிரி மற்றும் அதன் உபநதிகள், பெண்ணையாறு, பாலாறு, வைகை மற்றும் தாமிரபரணி ஆகிய நதிகளிலிருந்து 5 கி.மீ. தூரத்திற்குள் நீரை அதிக அளவில் மாசுபடுத்தும் எந்த தொழிற்சாலையும் (சிவப்பு வகை) நிறுவப்பட அனுமதி அளித்தல் கூடாது என்று ஆணையிடப்பட்டது.

30.03.89 ஆம் நாளிட்ட அரசாணையின் இணைப்பு 1 இல் கண்டுள்ள குறிப்பாக 14 வகை தொழிற்சாலைகள் இந்த 8.5.98 ஆம் நாளிட்ட அரசாணையில் கண்டுள்ள முக்கிய நீர் ஆதாரங்களிலிருந்து 5 கி.மீ. தூரத்திற்குள் அமைக்க அனுமதித்தல் கூடாது என்று அரசு கருதுவதால் 8.05.98 ஆம் நாளிட்ட சுற்றுச்சூழல் மற்றம் வனத்துறை அரசாணை நிலை எண்.127–க்கு கீழ்க்கண்ட திருத்தத்தை அரசு இவண் வெளியிடுகிறது.

திருத்தம்

8.5.98 ஆம் நாளிட்ட சுற்றுப்புறம் மற்றும் வனத்துறை அரசாணை (நிலை) எண்.127 இல் பத்தி 5 ஆணைப்பத்தி 2 இல் கண்டுள்ள சொற்றொடொரான தமிழ்நாட்டில் முக்கிய நீர் ஆதாரங்களான காவிரி மற்றும் அதன் உபநதிகள், பெண்ணையாறு, பாலாறு, வைகை மற்றும் தாமிரபரணி ஆகிய நதிகளிலிருந்து 5 கி.மீ. தூரத்திற்குள் நீரை அதிக அளவில் மாசுபடுத்தும் எந்த தொழிற்சாலையும் (சிவப்பு வகை) நிறுவப்பட அனுமதி அளித்தல் கூடாது. இதற்குப் பதிலாக கீழ்க்கண்ட சொற்றொடொரைப் படிக்கவும்.

தமிழ்நாட்டில் முக்யி நீர் ஆதாரங்களான காவிரி மற்றும் அதன் உபநதிகள், பெண்ணையாறு, பாலாறு, வைகை மற்றும் தாமிரபரணி ஆகிய நதிகளிலிருந்து 5 கி.மீ. தூரத்திற்குள், 30.03.89 ஆம் நாளிட்ட சுற்றுச்சூழல் மற்றும் வனத்துறை அரசாணை (நிலை) எண்.213 இல் இணைப்பு 1 இல் கண்டுள்ள 14 வகையான தொழிற்சாலைகள் நிறுவப்பட அனுமதி அளித்தல் கூடாது.

ORDER:

In G.O.Ms.No.1951, L.A. dt.10th December 1960 the Government ordered the publication in the Fort St.George Gazette of the draft Madras Cottage Industries construction and establishment (Restrictions Limitation and conditions) Rules under the provise the clause (a) of section 92 of the Madras public Health Act, 1930 (Madras Act III ;of 1939) The Government have carefully considered the suggestions received. The draft rules as amplified with reference to the suggestions received are hereby confirmed. The appended notification will be published in the Fort St. George Gazette.

/By order of the Governor/

(SD) J.DEVA ANUGRAHAM
DEPUTY SECRETARY TO GOVERNMENT.

/True copy/

APPENDIX

NOTIFICATION

In exercise of the powers conferred by sub-section (10) of Section 128 read with the provise to clause (a) of Section 92 of the Madras Public Health Act, 1939 (Madras Act III of 1939), the Governor of Madras hereby makes the following rules, the same having been previously published; as required by sub-section (1) of section 130 of the said Act.

RULES

1. SHORT TITLE: These rules may be called the Madras Cottage Industries Construction and Establishment (Restrictions, Limitations and Conditions) Rules 1960.

2. DEFINITIONS: in these rules unless the contact otherwise required:-

(1) 'Act' Means the Madras Public Health Act, 1939 (Madras Act III of 1939).

(2) 'Cottage Industry' means such cottage industry as the Government may, from time to time, by notification under the provise to clause (a) of Section 92, specify:

(3) "Dwelling" means a dwelling house and includes a hut used or adopted to be used, wholly or principally for human habitation or in connection therewith.

(4) 'Electrical Installation" means any machinery or manufacturing plants driven by electrical power not exceeding three horse-power in the aggregate:

Verified RedEstate™

(5) 'Notified Area' means any locality, division, ward, street or portion of a street in the local area of an urban local authority notified in the prescribed manner by such local authority as being reserved for residential purpose under section 89:

(6) 'Schedule' means a schedule appended to these rules:

(7) 'Section' means a section of the Act:

(8) 'Site' means the land on which a dwelling stands and includes open yards and open spaces appurtenant to, or occupied and used in conjunction with, a dwelling.

3. GENERAL: The restrictions, limitations and conditions subject to which the local authority may permit the construction or establishment of any new factory, workshop or work place for the purpose of carrying on any cottage industry shall be those specified in the following rules.

4. EMPLOYMENT OF POWER OTHER THAN ELECTRIC POWER: No such instruction or establishment as is referred to in rule 3 shall be permitted in any dwelling or site in a notified area, if any installation other than electric installation is to be employed in any such construction or establishment.

5. PROHIBITION OR ELECTRIC INSTALLATION IN HUTS: No Electric installation shall be permitted in a site of the dwelling thereon is a hut.

6. SETTING A PART OF A ROOM FOR ELECTRIC INSTALLATION: No electric installation shall be permitted in a dwelling or in a site on which a dwelling is situate, unless the electric installation installed in a room or enclosure exclusively set apart for such installation and such installation conforms to these rules.

7. ROOM OR ENCLOSURE CONTAINING THE ELECTRIC INSTALLATION TO SATISFY CERTAIN CONDITIONS: A room or enclosure in which the electric installation is installed shall comply with the following requirements namely:-

a) In respect of any installation for the industry referred to in schedule A, the room or enclosure shall be structurally detached by not loss than five feet from any other dwelling.

b) In respect of any installation for the industry referred to in schedule A or Schedule B, the room of the enclosure if attached to dwelling shall not be directly nesessible from any part of such dwelling.

c) No part of the room or enclosure shall be used for residential purpose.

d) The room or enclosure shall have a minimum floor area of eighty square feet and a width of not less than eight feet. The height of all main walls shall be not be less than nine feet.

e) Walls of the room or enclosure shall be of brick or rubble masonry built in chunam or cement mortar of such non-inflammable materials as may be approved by the Executive.

f) Roofing shall be of concrete or such hard material as may be approved by the executive authority.

g) Roofing shall not be thatched or erected with mud or grass or leaves.

h) The room or enclosure shall have windows, ventilators or roof ventilators opening directly to fresh air. The total area of such windows, ventilators of roof ventilators shall not be less than one-fifth of the floor area of the room or enclosures.

i) There shall be atleast one door may which shall open into a vacant space or open verandah and the site of such door way shall not be less than three and a half feet in width and six feet in height.

Verified by PropEstate™

j) The basement shall not be less than one feet above the adjacent ground level.

k) In respect of any installation of the industry referred to in schedule A, where any heating process or use of fire is involved the room or enclosure shall have such chimneys or smoke scares as are in the opinion of the health officer adequate.

Provided that than Director of public Health any for persons to be recorded in writing, exempt any room or enclosure from the provisions of clauses (d), (h) and (i) subject to such conditions as he may think fit.

8. PERMISSIBLE NUMBER OF PERSONS TO BE EMPLOYED IN A ROOM OR ENCLOSURE: The number of persons who may be required or allowed to work at any one time in a room or enclosure shall not exceed four.

9. SPECIAL PROVISIONS REGARDING DHALL MILLING: The number of handgrinders that may be worked in a dhall mill at any one time of such dhall mill is situated in a dwelling shall not exceed four and the aggregate number of employees attending on each such grinder shall exceed not exceed four. The dhall mill shall be worked subject to such restrictions, limitations and conditions as may be imposed by the Health Officer, for abatement of nuisance, if any, due to dust arising out of the process of decorticating dhall.

10. HOURS OF WORKING: No machinery or manufacturing plant shall be worked or operated between the hours of 6 P.M. and 6.30 A.M.

11. PRIOR APPROVAL OF AN OFFICER OF THE HEALTH DEPARTMENT TO BE OBTAINED: No such construction or establishment as is referred to in rule 3 shall be permitted.

In any municipal area, except with the prior approval of the Municipal Health Officer or in the absence of the Municipal Health Officer, of the District Health Officer; and
In other areas except with the prior approval of the District health Officer.

12. PRECAUTIONS AGAINST FIRE: The permission granted by the local authority shall include such conditions as the executive authority may specify in this behalf in order to guard against the outbreak of any fire in the place concerned.

13. INSPECTION – The executive authority or any officer authorized by the executive authority in this behalf enter at all reasonable times into any place or premises in which a such construction or establishment as is referred to in rule 3 has been permitted and inspect the same.

14. CLEANLINESS: (1) Rubbish, filth or debris shall not be accumulated or kept in any part of the dwelling for more than twenty four hours and shall be disposed off in the matter approved by the Health officer. All filth and other decomposing matter shall be kept in covered receptacles.

= = = = = =

ORDER:-

In his letters read above the Director of Town and Country Planning has sent proposals for approval of Development Control Regulations in respect of Special Buildings, Multi-Storeyed Buildings, Group Developments and Layouts for being followed in the local planning areas of Coimbatore, Madurai, Tiruchirappalli, Salem, Tirunelveli, Vellore, Mamallapuram and like areas. The broad guidelines fall in line with the Development Regulations of Second Master Plan for Chennai Metropolitan Area, 2026 modifying the provisions as may be required for the planning areas like Coimbatore, Madurai, Tiruchirappalli, Salem, Tirunelveli, Vellore, Tiruppur, Erode, Thoothukudi and Mamallapuram areas and sub-urban areas of Kancheepuram and Tiruvallur. In the context of rapid urbanisation and developments occurring in the whole State, comprehensive guidelines for all developments are considered necessary to suit the present trend of development. The public will be greatly benefited with the guidelines. The comprehensive guidelines will also ensure uniformity and will help to avoid different technical interpretations at various levels and will be of great facilitator to the general public for expeditious issue of planning permission.

The Director of Town and Country Planning has requested to approve the suggested Development Control Regulations in the absence of regulations for developments such as Special Buildings, Multi-Storeyed Buildings, Group Developments and Layouts in the already approved Master Plan having zoning regulation but without any development regulations.

2. The Government, after careful consideration, approve the proposal of the Director of Town and Country Planning in para.1 above and approve the Development Control Regulations for Special Buildings, Multi-Storeyed Buildings, Group Developments and Layouts as in the annexure to this order for being followed in local planning areas covering Coimbatore, Madurai, Tiruchirappalli, Salem, Vellore, Tiruppur and Erode areas and entire sub-urban areas within the districts of Kancheepuram and Tiruvallur.

3. The Government direct that the provisions which are already incorporated in the Master Plan of Hill areas town and Master Plan for New Town Development Areas shall be protected and continued to be followed. Similarly provisions of Coastal Regulation Zone norms of the coastal towns shall not be disturbed and shall be continued. As regards use zone regulations, the regulation approved in the G.O 1st read above shall be followed.

4. The Government also direct that an Empowered Committee be and is constituted to look into the special cases where a clear and demonstrable hardship is

caused and issues for relaxation of planning parameters and any other related issues as follows:-

(1)	Secretary, Housing and Urban Department	- Chairman.
(2)	Secretary, Municipal Administration and Water Supply Department	- Member.
(3)	Member-Secretary, Chennai Metropolitan Development Authority	- Member.
(4)	Director of Town and Country Planning	- Member - Convenor.

The proposals pending prior to the Notification of the Regulations shall be disposed of in accordance with the planning parameters and rules prevailing before the issue of the Notification on uniform guidelines duly following transitory provisions.

5. In any of the aspect not covered by the provisions in the proposed Development Control Regulations, the matter shall be referred either to Empowered Committee or Government for a decision and clarification.

6. Accordingly the Government have decided to vary the Master Plan for the local planning areas of Erode, Vellore, Tiruvallur, Coimbatore, Madurai, Gummidipoondi, Kancheepuram, Salem, Chengalpattu, Tiruppur, Tiruchirappalli approved in the G.O.s 2nd, 4th, 5th, 7th to 10th and 12th, 15th read above respectively under the Tami Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) to provide for incorporation of Development Control Regulations in the respective Master Plan for the planning areas concerned as in the Notification appended to this order.

7. The Development Control Regulations for special buildings, Multi Storeyed buildings, Group developments and the layouts approved and annexed to this order shall be followed in the local planning areas of Mamallapuram, Tirunelveli and Tuticorin. These Development Control Regulations shall form part of the master plan to be approved for the above local planning areas.

8. The Director of Town and Country Planning is directed to pursue action accordingly.

9. The Works Manager Government Central Press, Chennai-600079 is directed to publish the Notification appended to this order in the next issue of the Tamil Nadu Government Gazette.

(By Order of the Governor)

Ashok Dongre,
Secretary to Government.

Verified RedIEstate ™

1. **Short title.** – These regulations may be called Development Control Regulations for Erode / Vellore / Tiruvellore /Coimbatore / Madurai / Gummudipoondi / Kancheepuram / Salem / Chengalpattu / Tiruppur / Tiruchirappalli Local Planning Area.

2. **Definition.** – "Act" means the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) as amended from time to time.

The words and expressions used in these regulations but not expressly defined herein shall have the meaning assigned to them in the Act and various rules applicable in the said area.

3. **Regulation for Special building.** - (1) "Special buildings" means -

(a) a residential or commercial buildings with more than two floors; or

(b) a residential building with more than four dwelling units; or

(c) a commercial building exceeding a floor area of 300 square metre:

Provided that any construction in the second floor with prior permission as an addition to an existing ground and first storeyed authorised ordinary residential building which is three years old shall not be construed as a "Special Building".

(2) The minimum width of the public road on which the site abuts or gains access shall be 9 metres.

Explanation.-

(i) The qualifying road width for permitting special building shall be available atleast for a reasonable stretch about 250 metres along the length of the road abutting the site and the stretch from a junction can be straight or a curve or zigzag or combination of the above. Over this length minor variation in road width at two ends may be considered provided width average outs to 9 metres.

Verified PropEstate™

To cite examples:-

(a) If the general road is of width less than 9 metres width, but only widens opposite to or nearer to the site is more than 9 metres, is not acceptable.

(b) If the road is generally of 9 metres width upto a considerable length on one side, but discontinues and narrows into a road of smaller width on the other side of the site in question and the plot owner is willing to leave enough space for continuity of 9 metres road in front of his site, this will have to be checked and decided on case-by-case. Reference in such cases may be made to Empowered Committee.

(c) If the general road width is less than 9 metres and the site owner merely agrees to leave enough space to have 9 metres in front of his site only, this is not acceptable.

(ii) Road width measurements for the above purpose shall be of the road as designed and laid and the existence of unauthorised encroachments, for which no patta has been given, will not normally affect adversely provided the shortage in width in the minimum stretch stated above does not exceed 10% of the minimum prescribed width. However permissibility or otherwise in such specific situations will be decided case-by-case. Preference in such cases may be made to Empowered Committee.

(3) Planning Parameters.- The extent of the site, plot coverage, FSI, set back etc. for the developments shall be regulated according to the Table below:-

THE TABLE.

Sl. No.	Description	Residential	Commercial	Institutional zone Educational, Public and Semi public	Industrial
1.	Minimum plot extent	220 sq m	300 sq.m.		---
2.	Minimum plot width/frontage	9m	9m		---
3.	Minimum road width	9m	9m	9m	9m.

Verified by PeoplEstate ™

4.	Maximum height of building	15m or G+3 floors or stilt + 4 floors	15m or G+3 (or) Stilt+4 floors	15m or G+3 (or) Stilt+4 floors	15m. Provided that water tank, chimneys, bunkers, silos etc. which are not intended to human habitation may be permitted subject to a ceiling of 30m. from the ground level.
5.	Maximum Floor Space Index (FSI)	1.5	1.5	1.5	1.00
6.	Maximum plot coverage	70%	65%	60%	50%
7.	Front set back	Min – 3m. Upto 18m–3m. 18m to 24m – 4.5m. More than 24m, NH & SH – 7m	Min – 3m. Upto 18m–3m 18m to 24m – 4.5m. More than 24m & NH & SH – 7m.	Min – 3m. Upto 18m–3m 18m to 24m – 4.5m. More than 24m & NH & SH – 7m.	Min – 3m. Upto 18m–3m 18m to 24m – 4.5m. More than 24m & NH & SH – 7m.
8.	Side set back	3m or 1/4th height whichever is higher	3m. or 1/4th height whichever is higher	3m. or 1/4th height whichever is higher	3m or 1/4th height whichever is hiher
9.	Rear set back	. 3m. or 1/4th height whichever is higher	3m. or 1/4th height whichever is higher	3m. or 1/4th height whichever is higher	3m. or 1/4th height whichever is higher
10.	Open Spare Reservation (OSR)	It shall be followed as per Schedule-I.			
11.	Parking space	As mentioned in Schedule-II will be followed.			

Explanations.- (1) Additional FSI of 20% will be permissible for stilt parking. (2) All those buildings which are otherwise classified into public and semi-public category qualifying for the definition of 'commerce' in section 2(10) and used for 'commercial use' as defined in section 2(11) of the Act, shall be eligible for FSI permissible for commercial use. This shall be decided by the technical committee of the directorate on case to case basis.

Verified by RealEstate™

(3) For public buildings such as theatres, kalyana mandapams, assembly halls, exhibition halls, hospitals, nursing homes, hotels, lodging houses, etc. set back all around shall not be less than 6 metres.

(4) The reservation of land for community recreational purposes such as parks or play ground required in these regulations shall be as given in Schedule-I.

(5) Information Technology buildings shall comply with all the provisions mentioned in Schedule-VII.

4. Group development.- (1) Group Development means accommodation for residential, commercial or institutional building in two or more blocks of buildings in a particular site irrespective of whether these structures are interconnected or not. Any inter link between the structures in terms of connecting corridors shall not be construed as making any two structures into one block. However, if these blocks are connected solidly atleast for one-third the width of any one block on the connecting side, then such block shall be construed as a single block.

(2) (a) The minimum width of the public road on which the site abuts or gains access shall be 9 metres.

Explanation.- The qualifying road width for permitting Group development shall be available for a reasonable stretch say about 250 metres along the length of the road abutting the site and the stretch from a junction can be straight or a curve or zigzag or combination of the above. Any deviation on road width shall be referred to Empowered Committee whose decision shall be final.

To cite examples.–

(i) If the road over its general length is of 9 metres width, but because of some kinks in front of the site the two ends show a minor variations, reasonable allowance for such variation may be given so that it averages out to 9 metres.

(ii) If the general road is of width less than 9 metres width, but only widens opposite to or nearer to the site is more than 9 metres, is not acceptable.

(iii) If the general road is of 9 metres width upto a considerable length on one side, but discontinues and narrows into a road of smaller width on the other

Verified by RealEstate™

side of the site in question and the plot owner is willing to leave enough space for continuity of 9 metres road in front of his site, this will have to be checked and decided on case-by-case and such cases may be referred to Empowered Committee.

(iv) If the general road width is less than 9 metres and the site owner merely agrees to leave enough space to have 9 metres in front of his site only, this is not acceptable.

(v) Road width measurements for the above purpose shall be of the road as designed and laid and the existence of unauthorised encroachments, for which no patta has been given, will not normally affect adversely provided the shortage in width in the minimum stretch stated above does not exceed 10% of the minimum prescribed width. However permissibility or otherwise (in exceptional cases) in such specific situations will be decided case-by-case and these may be referred to Empowered Committee.

(b) If the site does not directly abut a public road but gains access through a private exclusive passage or through a part of the plot which can be treated as a passage from a public road of minimum width as prescribed above, the minimum width of such passage shall be as follows:-

Sl. No.	Description	Minimum width
(1)	When it is intended to serve 8 dwelling or upto 600 square metres of commercial building and the length of the passage does not exceed 80 metres	3.6 metres
(2)	When it is intended to serve upto 10 dwellings or upto 2,400 square metres of commercial building and the length of the passage does not exceed 100 metres	4.8 metres
(3)	When it is intended to serve not more than 15 dwellings or upto 3000 square metres of commercial building and the length of passage does not exceed 120 metres	7.2 metres
(4)	When it is intended to serve more than 15 dwellings or more than 3000 square metres of commercial building	9.0 metres

Verified RealEstate™

(3) The extent of site, FSI, Set back etc. for Group development shall be regulated according to the Table below:-

THE TABLE.

Sl. No.	Description	General area	
(1)	(2)	(3)	
A	Minimum plot extent	500 square metres.	
B	Minimum plot width / frontage	12 metres.	
C	Maximum FSI	1.5	
D	**Minimum setbacks**		
	(i) Front setback	Based on road width (i) NH/SH – 7m. (ii) Other road upto 12 m – 3 m 12 m to 18 m – 4.5 m. more than 18 m – 6 m.	
	(ii) Side setback	G+2 or Stilt + 3 floors subject to a maximum of 12 m. 3.5 m on either side	G+3 or Stilt + 4 floors subject to a maximum of 15 m. 4.5 m on either side
	(iii) Rear setback	3.5 metres	4.5 metres
	(iv) Spacing between blocks	6 metres	

Note: (i) For public buildings such as theatres, kalyana mandapams, assembly halls, exhibition halls, hospitals, nursing homes, hotels, lodging houses, etc. setback all around shall not be less than 6 metres.

(ii) In case of hospital buildings an additional FSI of 0.25 is allowable over and above the normally permissible FSI.

(iii) Additional FSI of 20% shall be permissible if stilt parking is provided.

(iv) Buildings otherwise meant as public buildings but qualify the definition of 'commerce' in section 2(10) and 'commercial use' in section 2(11) of the Act shall be eligible for FSI meant for commercial use. This shall be decided by the technical committee of the directorate on case-by-case basis.

(v) In case of Information Technology buildings, further regulations as detailed in Schedule – VII shall prevail and complied with.

(vi) Cases involving exemptions, clarification etc. may be referred to Empowered Committee.

Verified Realstate ™

(4) Structures permissible in the minimum prescribed Front setback, side setback and rear setback are given in Schedule – III.

(5) The minimum width of corridor shall be as given below:-

Sl. No.	Building use or type	Minimum width of corridor
(i)	Residential buildings	1.0 metres
(ii)	Assembly buildings such as Auditoriums, Kalyanamandapams, cinema theatres, Religious buildings, temples, mosques or churches and other buildings of public assembly or conference	2.0 metres
(iii)	Institutional building such as:	
	a) Government offices	2.0 metres
	b) Hospitals	2.4 metres
	c) Educational buildings such as schools, colleges, research institutions	2.0 metres
	d) Commercial buildings such as private offices, nursing homes, lodges, etc.	2.0 metres
	e) All other buildings	1.5 metres

(6) Parking spaces shall be provided within the site conforming to the regulations given in Schedule – II.

(7) Special regulations for physically disabled shall be adhered to as given in the Schedule – IV.

(8) Rain water conservation given in Schedule – V.

(9) Solar energy capture provisions shall be provided where applicable as given below:

New buildings in the following categories shall be provided with the ancillary solar assisted solar heating system and it shall be shown in the plans for developments applied for planning permission:

a) Nursing homes / hospitals exceeding 500 square metres in the floor area;
b) Hotels and lodges exceeding 500 square metres in floor area;
c) Hostels exceeding 50 rooms; and
d) Kalyanamandapams exceeding 500 square metres in floor area.

Verified PedEstate

(10) The reservation of land for community recreational purposes such as park or play ground required in these regulations shall be as given in Schedule – I.

(11) Internal vehicular access way including passage if any within the site shall be a clear width of 7.2metre and such vehicular access shall be available for every building block in the site within a distance of 50 metres. Further, it shall be a clear open to sky and no projection of structure over it is permissible.

(12) If the building is constructed on stilts and the stilt floor is to be used for parking, the minimum clear height of the floor (between the lower floor and the bottom of the beam) shall not exceed 3.0 metres and it shall not be enclosed for use as garages; if it is enclosed it shall be counted for FSI and number of floors for the purpose of defining Group development / Multi-storeyed building.

(13) If a Group development contains more than one use and the allowability of the building space with reference to the abutting road width and exclusive passage width shall be decided based on the number of dwellings for a residential use and the equivalent floor area allowable for commercial and other uses.

(14) Every Group development exceeding 900 square metre in floor area shall be provided with electrical room in ground floor or open space at ground level within the premises to accommodate electrical transformer conforming to the Tamil Nadu Electricity Board standard and Fire Rescue Service standard as mentioned in Schedule – VIII.

(15) Vehicular ramp in set back spaces around building blocks may be permitted subject to the condition that the clearance of the proposed ramp from the property boundary/street alignment shall be minimum 1.5 metres and a clear motorable driveway of minimum 3.5 metres in width is available around the building block.

(16) The structures incidental to the main activities such as water closet/pump room, transformer room, transformer yard, electric room shall not be construed as transformer room, transformer yard, electric room shall not be construed as individual block for the purpose of these rules. However,

Verified RealEstate™

these structures may be permitted in the prescribed set back space provided that they do not fall in the drive way and its height does not exceed 4 metres provided further that transformer and electrical rooms floor area does not exceed 15 square metres and water closet and pump room per block does not exceed 6 square metres.

(17) In cases of residential developments exceeding 100 dwelling units in primary residential use zone, commercial and institutional uses not exceeding 10 per cent of the floor area of the building at lower habitable floor levels, may be allowed (not for any industrial use) as incidental uses required for the occupants of the remaining residential developments within the premises.

(18) In all such developments, sewage treatment plant shall be provided and maintained for the disposal of the sewage within the site itself;

(19) Any construction with roof cover it in the terrace floor for A.C. Plant/ structures shall be counted, as a floor and categorisation of type of building shall be done accordingly.

(20) In cases where the extent of the site where residential or predominantly residential developments proposed exceeds 10000 square metres (1 hectare), the developer shall reserve minimum ten per cent of the site area (excluding roads if any handed over to local body) and provide housing thereon for lower income groups with dwelling units not exceeding 45 square metres in floor area each, either within the site proposed for group development or in a location within a radius of 5 k.m. from the site under reference. The developer or promoter or owner shall sell these small dwellings only for this purpose. No conversion or amalgamation shall be permissible in these cases of lower income group dwellings.

(21) In residential / predominantly residential developments with dwelling units exceeding 20 in number, the design should include waste management infrastructure and atleast a closed non polluting storage provision for solid waste storage within the premises preferably with direct access from the abutting road shall be provided so that the local body can collect this stored waste from it.

Verified RedEstate

(22) In the interest of the public for better circulation in the area and also to ensure the proposed development does not block access to the properties around, in cases of large developments where link roads have to be provided for connectivity to the adjoining lands/areas, through the site applied for development, the Authority reserves the right to insist the applicant to set apart such road spaces within the site and the applicant shall hand over the same free of cost through a registered gift deed to the authority or Local body designated by it for declaring it as public road. In such cases set back from these roads to the buildings proposed shall be provided as prescribed in these regulations.

(23) The space set apart for formation of a new road proposal in Master Plan/Detailed Development Plan or road widening/street alignment shall be transferred to the relevant Authority or the Agency or the Local Body through a registered Gift Deed before actual issuance of planning permission. The exact mode of conveyance of the land shall be consistent with the relevant enactment and regulations.

(24) Basement Floor;-

(a) The height of basement floor shall not exceed 1.2 metres above ground level and the headroom shall be minimum 2.4 metres.

(b) No part of the basement shall be constructed in the minimum required set back spaces, required for the movement of fire fighting vehicles/equipments.

(c) In cases where second basement is proposed for parking and incidental uses, sufficient provision for lighting and ventilation and also for protection from fire to the satisfaction of Directorate of Fire and Rescue Services shall be made.

(d) During the construction of the basement floor, it shall be sole responsibility of the planning permission holder to ensure that the building / structure in the adjoining sites are not weakened / damaged.

(25) Display Board.- The details of the development for which planning permission issued, date of expiry of permit etc. shall be displayed in the format prescribed by the Authority on a board of size at least 60cm x 120cm.

Verified RedEstore™

5. Multi-storeyed Building.- "Multi-storeyed building" means a building exceeding 4 floors (including ground floor or if this ground floor is used for parking under stilts, stilt floor + 4 floors) whose height is 15 m or more.

(1) (a) Site Extent.- The minimum extent of site for construction of multi-storeyed building shall not be less than 1500 square metres.

(b) Road width.- The site shall either abut on a road not less than 18 metres in width or gain access from public road not less than 18 metres in width through a part of the site which can be treated as an exclusive passage of not less than 18 metres in width.

Provided further that multi-storeyed building may be permitted with limitations on maximum FSI and maximum height of the building on a site abutting or gaining access from a public road of minimum 12 metres / 15 metres in width, or gain access from public road not less than 12metres / 15metres in width through a part of the site which can be treated as an exclusive passage of not less than 12 m / 15 metres in width, subject to compliance of the planning parameters stated in the Table sub-regulation (2) below.

(c) Minimum road width of 12 metre or above shall be permissible with Multi-storeyed buildings without any further procedures. The height of Multi-storeyed buildings will be technically correlated with the width of the abutting road. Once the road width is established based on records, these areas may be permitted with Multi-storeyed buildings. Special consideration may be given to any specific recommendation to the contrary of above rule. No further resolutions or otherwise will be required. In case of doubts or clarification or any related issue Empowered Committee shall take a final decision.

Explanation.- Road width means whole extent of space within the boundaries of the road / street measured at right angles to the course of direction of such road / street. The qualifying road width for permitting multi-storeyed building shall be available atleast for a stretch of 500 metres along the length of the road abutting

Verified RedEstate™

the site and the stretch from a junction can be straight or a curve or zigzag or combination of the above.

To cite examples-

(a) If the road over its general length is of 18 metres width, but because of some kinks in front of the site one end is 17.8 metres and the other end is 18.2 metres is acceptable.

(b) If the general road is of width less than 18 metres width, but only widens opposite to or nearer to the site is more than 18 metres, is not acceptable.

(c) If the road is generally of 18 metres width upto a considerable length on one side, but discontinues and narrows into a road of smaller width on the other side of the site in question and the plot owner is willing to leave enough space for continuity of 18 metres road in front of his site, this will have to be checked and decided on case-by-case. This should be referred to Empowered Committee for appropriate decision.

(d) If the general road width is less than 18 metres and the site owner merely agrees to leave enough space to have 18 metres in front of his site only, this is not acceptable.

(2) The extent of the site, FSI, set back etc., for Multi-storeyed Building shall be regulated according to the Table below:-

Sl. No.	Description	Category I(a)	Cateogry I(b)	Category II	Category III	
A.	Minimum plot extent	1200 sq.m.	1200sq.m.	1500 sq.m.	2500 sq.m.	
B.	Minimum Plot width/frontage	25 m	25 m	25 m	40 m	
C.	Minimum road width	12 m	15 m	18 m		
D.	Maximum FSI	1.5	1.75	2.50	2.25	2.00
E.	Maximum coverage	30%	30%	30%	Above 30% upto 40%	Above 40% upto 50%

Verified RealEstate™

F.	Maximum height above Ground Level	G+6 or Stilt + 7 floors subject to a max. 24m.	G+8 Stilt + 9 floors subject to a max. 30m	60 metre where the width of the abutting road is minimum 18 metre, and exceeding 60 metre where the width of abutting road is minimum 30.5 metres, subject to such conditions as may be necessary
		Height of the building above ground level		Minimum required setback space from the property boundary
G.	Minimum set back all around	Above 15 m upto 30 m		7m
		Above 30 m		For every increase in height of 6m or part thereof above 30 m, minimum extent of setback space to be left additionally shall be one metre.
H.	Spacing between block in case of group developments	Height of the building above ground level		Minimum required spacing between blocks
		Above 15 m upto 30 m		7 m
		Above 30 m.		For every increase in height of 6m or part thereof above 30 m, space to be left additionally shall be one metre.

Note: (i) The space specified above shall be kept open to sky and free from any erection / projection (such as sunshade / balcony) of any building other than a fence or compound wall provided that these open yards may be used for the provision of access ways to the building's parking facilities.

(ii) A watchman or caretaker booth or Kiosk not exceeding 2.5m x 2.5m. in size at each gate and not exceeding 3 metre in height, or power/transformer room not exceeding 4 metre in height shall be permitted in the set backspace at ground level after leaving 7 metres clear set back from the main structure. Provided that the height restriction shall not apply for an open transformer.

(iii) Gate pillars without or with arches with a minimum headroom clearance of 5.50 metre atleast to a width of 3.5 metre. may be permitted in the set back space after leaving 7 metres clear set back from the main structure.

(iv) In the cases where street alignment has been prescribed, the front open space shall be left from the street alignment.

(v) In cases of hospital buildings an additional Floor Space Index of 0.25 is allowable over and above the normally permissible FSI.

Verified by RealtyStrata

(vi) The Floor space index for Information Technology development shall be allowed at 1.5 times of the FSI ordinarily permissible for respective use of that zone provided site extent is not less than 2000 sq.m. This benefit will not be available for primary residential use zone.

Explanations.- (1) Parking and Parking facilities.- For the use of the occupants and of persons visiting the premises for the purposes of profession, trade, business, recreation or any other activity parking spaces and parking facilities shall be provided within the site to the satisfaction of the Authority and conforming to the standards specified in Schedule-II.

(2) Vehicular access within the site.- Internal Vehicular Access way including passage, if any, within the site, shall have a clear width of 7.2 metre and such vehicular access shall be available for every building block in the site. Further, it shall be a clear width of open to sky and no projection in structure over it is permissible.

(3) Corridor width.- The corridor serving as access for units in the development in whichever floor they may be situated shall not be less than the standards prescribed in the Table below:-

THE TABLE.

Sl. No.	Building use or type	Minimum width of corridor
(i)	Residential buildings	1.0 metres
(ii)	Assembly buildings such as Auditoriums, Kalyanamandapams, cinema theatres, Religious buildings, temples, mosques or churches and other buildings of public assembly or conference	2.0 metres
(iii)	Institutional building such as:	
	a) Government offices	2.0 metres
	b) Hospitals	2.4 metres
	c) Educational buildings such as schools, colleges, research institutions	2.0 metres
	d) Commercial buildings such as private offices, nursing homes, lodges, etc.	2.0 metres
	e) All other buildings	1.5 metres

(4) Basement Floor.-

(a) The height of basement floor shall not exceed 1.2 metres above ground level and the headroom shall be minimum 2.4 metres.

(b) No part of the basement shall be constructed in the minimum required set back spaces required for the movement of snorkel.

(c) In cases where second basement is proposed for parking and incidental uses, sufficient provision for lighting and ventilation and also for protection from fire to the satisfaction of Directorate of Fire and Rescue Services shall be made.

(d) During the construction of the basement floor, it shall be sole responsibility of the planning permission holder to ensure that the building / structure in the adjoining sites are not weakened/ damaged.

(5) The reservation of land for community recreational purposes such as park or play ground required in these regulations shall be as given in Schedule – I.

(6) Conformance to National Building Code of India:-

(a) In so far as the determination of sufficiency of all aspects of structural designs, building services, plumbing, fire protections, construction practice and safety are concerned the specifications, standards and code of practices recommended in the National Building Code of India shall be fully conformed to and any breach thereof shall be deemed to be a breach of the requirements under these regulations.

(b) Every multi-storeyed development erected shall be provided with,-

(i) lifts as prescribed in National Building Code;

(ii) a stand-by electric generator of adequate capacity for running lift and water pump, and a room to accommodate the generator;

(iii) an electrical room of not less than 6 metres by 4.0 metres in area with a minimum head room of 2.75 metres to accommodate electric transformer in the ground floor; and the space for installation of transformers shall conform to the regulation given in Schedule-VIII; and

Verified PeolEstate™

(iv) at least one metre room of size 2.4 metres by 2.4 metres for every 10 consumers or 3 floors whichever is less. The metre room shall be provided in the ground floor.

(7) Fire safety, detection and extinguishing systems.- (a) All building in their design and construction shall be such as to contribute to and ensure individually and collectively and the safety of life from fire, smoke, fumes and also panic arising from these or similar other causes.

(b) In building of such size, arrangement or occupancy that a fire may not itself provide adequate warning to occupants, automatic fire detecting and alarming facilities shall be provided where necessary to warn occupants or the existence of fires, so that they may escape, or to facilitate the orderly conduct of fire exit drills.

(c) Fire protecting and extinguishing system shall conform to accepted standards and shall be installed in accordance with good practice as recommended in the National Building Code of India, (amended from time to time) and to the satisfaction of the Director of Fire and Rescue Services by obtaining a no objection certificate from him.

(8) In cases of residential developments exceeding 50 dwelling units in primary residential use zone, commercial and institutional uses not exceeding 10 per cent of the floor area of the building at lower habitable floor levels, may be allowed (not for any industrial use) as incidental uses required for the occupants of the remaining residential developments within the premises.

(9) The design and plans of the building shall be made and signed by a qualified Civil or Structural Engineer and an Architect who should possess the qualification referred to in the Architects Act, 1972 (Central Act 20 of 1972), so as to become a member of the profession of Architects under the provisions of the said Act. The qualified Engineer or Structural Engineer should also be Class I licensed Surveyor registered with Corporation / Local body concerned.

(10) Display Board.- The details of the developments for which planning permission issued, date of expiry of permit etc. shall be displayed in the format prescribed by the Authority on a board of size at least 60cm x 120cm.

Verified RealEstate™

(11) In all the development sewage treatment plant shall be provided and maintained for the disposal of the sewage with design clearance from Pollution Control Board. For smaller development, as per direction of planning authority septic tank with up-flow filters shall be provided and maintained for the disposal of the sewage within the site itself.

(12) In cases where the extent of the site where residential or predominantly residential developments proposed exceeds 10000 square metre (1 hectare), the developer shall reserve minimum ten per cent of the site area (excluding roads if any handed over to local body) and provide housing thereon for lower income groups with dwelling units not exceeding 45 square metre in floor area each, either within the site proposed for MSB development or in a location within a radius of 5 kilometre from the site under reference. The developer or promoter or owner shall sell these small dwellings only for this purpose. No conversion or amalgamation shall be permissible in these cases of lower income group dwellings.

(13) In residential/predominantly residential developments with dwelling units exceeding 20 in number, the design should include waste management infrastructure with segregation at source and atleast a closed non polluting storage provision for solid waste storage within the premises preferably with direct access from the abutting road shall be provided so that the local body can collect this stored waste from it.

(14) In the interest of the public for better circulation in the area and also to ensure that the proposed development does not block access to the properties around, in cases of large developments where link roads have to be provided for connectivity to the adjoining lands areas, through the site applied for development, the relevant Authority reserves the right to insist the applicant to set apart such road spaces within the site and the applicant shall hand over the same free of cost through a registered gift deed to the authority or Local body designated by it for declaring it as public road. In such cases set back from these roads to the buildings proposed shall be provided as prescribed in these regulations.

(15) The space set apart for formation of a new road as per Master Plan or Detailed Development Plan or road widening / street alignment shall be

Verified RealEstate™

transferred to the respective Authority or the Agency or the Local Body through a registered Gift Deed before actual issuance of planning permission. The exact mode of conveyance of the land shall be consistent with the relevant enactment and regulations.

(16) Rain water conservation shall be provided as given in Schedule – V.

(17) Solar energy capture provisions as prescribed below:-

New buildings in the following categories shall be provided with the ancillary solar assisted solar heating system and it shall be shown in the plans for developments applied for planning permission:-

a) Nursing homes / hospitals exceeding 500 square metres in the floor area;
b) Hotels and lodges exceeding 500 square metres in floor area;
c) Hostels exceeding 50 rooms; and
d) Kalyanamandapams exceeding 500 square metres in floor area.

(18) Civil Aviation height and activity restrictions shall be adhered to. In cases where helipads are proposed at terrace of commercial / industrial multi-storeyed buildings, clearance of civil aviation department shall be produced.

(19) Special regulations for physically disabled shall be adhered to as in Schedule – IV.

(20) Scrutiny of the plan.- The plan shall be scrutinised as per rule 15 of the Tamil Nadu Multi-storeyed and Public Building Rules, 1973.

6. Premium FSI

Premium FSI over and above the normally allowable FSI shall be allowed, in any case not exceeding 0.5 for special buildings and group developments and not exceeding 1.0 for multi-storeyed buildings in specific areas which may be notified, on collection of at the rates as may be prescribed with the approval of the Government. The amount collected shall be kept in an appropriate account for utilising it for infrastructure development in that area as may be decided by the Government.

7. Transferable Development Rights.- (1) In certain circumstances, the development potential of the whole or a part of the plot/site may be separated

Verified RedEstate™

from the land itself and may be made available to the land owner in the form of Transfer of Development Rights excepting in the case of existing or retention users, or any compulsory reservation of space for public or recreational use or Economically Weaker Section / social housing etc., in the cases of sub-divisions/ layouts / special buildings / group developments / multi-storeyed buildings or such other developments prescribed in the development regulations.

(2) Transfer of Development Rights shall apply to cases, where a private land is required for-

(i) any road widening / any road formation as proposed in the Master Plan / New Town Development Plan or Detailed Development Plan,

(ii) any traffic and transport infrastructure development such as bus stops/ stands and related transport infrastructure;

(iii) any urban infrastructure development such as water supply, sewerage, drainage, electricity, education, health, notified by the State Government department or Government agency or local body;

(3) These rights may be made available and be subject to the regulations as given by Government provided that in cases of slum (including pavement dwellers) rehabilitation schemes on private lands executed by a private developer/ society / NGO, the award of Transfer of Development Rights for Floor Space Index (FSI) may be considered subject to such guidelines and conditions as may be decided by the Government.

8. Proximity to quarries and crushers.- (1) No subdivision or layout shall be laid out or building the residential, commercial, industrial or institutional or any structure for occupation shall be constructed within 300 metres from an existing live quarry. (If a quarry is claimed as abandoned, then a certificate from the local body or the licensing authority concerned to that effect shall be produced when necessary).

(2) No subdivision or layout shall be laid out or residential or commercial or institutional building shall be constructed within the radius of 500metres from an existing crusher.

(3) No crusher is permissible within a distance of 500 metre from an existing residential area and vice-versa.

Verified RealEstate

9. **Layout and Subdivisions.-**

(1) **Layouts.-** The laying out of land for building purposes shall be carried out only in accordance with the provisions specified below:-

(a) The minimum width of the public street / road which provide access to the proposed site for layout development shall be minimum of 9 metres. It should be a clear public access with a proper tar road being maintained by respective local body.

(b) The width of roads in the layout shall conform to the minimum requirements given in the table below and shall be in conformity with the development plan if any published under section 26 of the Act and the Detailed Development Plan published under section 27 of the Act for the area except in group housing.

THE TABLE.

Description	Minimum width	Remarks
1	2	3
A. Road (a) When the length of road not exceeding 120 metres	7.0 metres	All streets and roads shall become public. The owner / developer shall form and hand over the road to the local body.
(b) Roads of length more than 120 metres but less than 200 metres.	9.0 metres	All streets and roads shall become public. The owner / developer shall form and hand over the road to the local body.
(c) Roads of length more than 200 metres but less than 500 metres.	12.0 metres	All streets and roads shall become public. The owner / developer shall form and hand over the road to the local body.
(d) Roads of length more than 500 metres but less than 750 metres	18.0 metres	All streets and roads shall become public. The owner / developer shall form and hand over the road to the local body.
(e) Roads of length more than 750 metres but less than 1000 metres	24.0 metres	All streets and roads shall become public. The owner / developer shall form and hand over the road to the local body.
(f) Roads of length more than 1000 metres	30.0 metres	All streets and roads shall become public. The owner / developer shall form and hand over the road to the local body.

Verified by RealEstate™

The main access (principal road) which goes on along the alignment of the length of the road cannot be dismembered citing the side roads.

For the purpose of calculating the length of road in the above table the side roads joining with the principal road will not be taken into account.

(c) In case of demonstrable hardship or relaxation of any provisions the issue should be referred to Empowered Committee.

(2) (a) Splay.- A splay at the intersection of two or more streets / roads shall be provided as below:-

Width of road	Splay to be left
Road width up to 10 metres	1.5 metres x 1.5 metres
Road width above 10 metres	3.0 metres x 3.0 metres

(b) Building line.- Building line shall be provided as follows:-

Road width	Building line
Below 9 metres	1.5 metres
9m	3.0 m
12 m	3.0 m
15 m	4.5 m
18 m	4.5 m
24 m	6.0 m
30 m	6.0 m

(c) Roads for industrial developments:-

Description	Minimum width of road	Remarks
(1)	(2)	(3)
(a) The length of road upto 150 metres	9.0 metres	The road may be private or public.
(b) The length of road 150 metres to 200 metres	12 metres	The road shall become public
(c) The length of road 200 metres to 250 metres	15 metres	The road shall become public
(d) The length of road 250 metres to 500 metres	18 metres	The road shall become public
e) The length of road more than 500 metres	24 metres	The road shall become public

Note:

(i) All layout applications should be accompanied with the legal opinion regarding ownership and with other documents, details required for scrutiny.

Verified eRealEstate™

(ii) All roads shall be connected to a public road of minimum width of minimum 9 metres.

(iii) The width of roads in the layout area covered by a Development Plan shall confirm to the alignment and width of roads as contained in the respective Development Plans.

(iv) No plot in a layout shall be subdivided or utilised for any other purpose except with prior approval of the Authority who shall consult the Director.

(v) While determining the length of roads,-

(a) The possibility of its future extension beyond the layout area shall also be taken into consideration; and

(b) Space for expansion of an existing road may be provided wherever it is considered necessary.

(vi) When the layout site abuts a National Highway and State Highway or Bye Pass Road a service road of width upto 7.0 metres along with a green strip upto 3.0 metres in width shall be provided.

(vii) The procedure for approval of layouts will be as per the G.O.Ms.No.134, Municipal Administration and Water Supply Department, dated 20.9.2002 and G.O.Ms.No.71, Rural Development (C2) Department, dated 16.6.2003.

(viii) The conditions annexed to the order while according technical approval of the layout shall be binding on the developer / local body / planning authority as the case may be.

(ix) Any development of layouts without obtaining specific approval under these regulations will be construed unauthorised development. In such unauthorised development Appropriate Authorities may initiate necessary action as per sections 56 and 57 of the Act. Appropriate Authorities for this purpose may be any of the Executive Authorities of local bodies, member secretary of the composite local planning authorities or Regional Deputy Director / Joint Director of the Town and Country Planning Department. These authorities can exercise concurrent and parallel authorities under their respective jurisdiction.

(d) **Community and recreational open spaces.-** (i) Reservation of land for community and recreational purposes in a layout or subdivision for residential,

Verified RealEstate™

industrial or combination of such uses shall be reserved and kept open to sky and be devoid of any building shall be as follows:-

Extent of layout	Reservation
For the first 2500 square metres	Nil
More than 2500 square metres	10% of the area shall be reserved and this space shall be maintained as communal and recreational open space to the satisfaction of the authority such as parks, play grounds, community play space etc. and this should be handed over to the local body and a minimum of 1% shall be reserved for local shops apart from this in major layout more than 10 acres of site 4 to 5% of area shall be reserved for public purpose such as community buildings viz., educational, commercial, community facilities in accordance with the norms given below.

(ii) In cases where the extent of the residential layout exceeds 10,000 square metres (1 hectare), ten percent of layout area (excluding roads) shall be developed as Economically Weaker Section plots and the owner or developer or promoter shall sell these plots only for this purpose. No conversion or amalgamation is permissible in these cases of Economically Weaker Section plots.

(iii) The cost of laying improvements to the system in respect of road, water supply, sewerage, drainage or electric power supply that may be required as assessed by the competent authority shall be provided by the applicant at his cost.

(iv) All other social, educational, commercial, infrastructure may be suggested as per the norms of National Building Code.

(3) (i) Reservation of space for the following additional common facilities should be made:-

(a) Recessed bus-bays with bus shelters along side the road;
(b) Coffee stall/ milk booth;
(c) Off-street parking; and
(d) Toilet

(ii) The space set apart for roads and the area reserved for community and recreational purposes as mentioned above shall be registered and

transferred to the Authority or Agency or the local body designated by the Authority through a registered deed before the approval of the layout. The exact mode of conveyance should be consistent with the relevant enactments and regulations. Any exemptions or waiver on this space could be decided by the Government only.

(iii) The building and use of land shall confirm to the conditions that may be imposed while sanctioning the layout.

(iv) The Planning Permission for the layout of roads, subdivisions and amalgamation of plots for building purposes shall be accorded after duly getting the prior approval of the Director or from a person authorised by the Director. The terms and conditions and the manner of development may be stipulated by the Director or from the person authorised by the Director, therefore shall be complied with and shall form part of the conditions for issue of planning permissions.

(v) The 10% reservation shall not be put into any other use or considered for de-reservation.

(vi) Scheme road concessions

(vii) Public purpose concessions

(4) No deviations to above regulations shall be permissible. Any concessions or relaxation or interpretation etc. required on layout parameters, the same shall be referred to Empowered Committee. Committee may consider the relevant facts on multi-access to ease traffic flows and decide for approval of layout. Other relevant parameters may also be examined by committee with due justification to arrive at a considered decision.

(5) Sub-division and amalgamation of plots / sites.- The sub-division and amalgamation of plots shall be carried out when no new roads are introduced and the sites of subdivision abut an existing public road:

Verified RealEstate™

Provided that the sub-division of sites will be approved if the site satisfies the requirements specified below and other planning parameters contained in regulation 9 (1).

Description	Minimum width	Remarks
Passage:		
The length of existing or proposed passage is less than 50 metres	3.00 metres	Passage may be private

10. Empowered Committee.- Specific cases of demonstrable hardship shall be referred to Empowered Committee under the Chairmanship of Secretary, Housing and Urban Development with Secretary, Municipal Administration and Water Supply, Member Secretary, Chennai Metropolitan Development Authority as members and Director of Town and Country Planning as Convener of this committee. This Empowered Committee may relax any of the planning parameters prescribed in these regulations on due consideration to merit on case to case basis. The Empowered Committee will also be the appellate authority as per section 79 of the Act. The Government may give directions on individual cases to be referred to Empowered Committee on specific issues.

11. Transitory provisions.- All applications for development including multi-storeyed building, pending prior to the issue of these development control regulations shall be disposed of in accordance with the planning parameters and rules prevailing before the issue of these regulations.

Verified @ RealEstate™

Schedule – I

Open Space Reservation

(1) The open space reservation of land for community recreational purposes such as park / play ground shall be as given below at ground level in a shape and location abutting a public road:

	Extent of site	Reservation
(a)	For 2500 square metre	Nil
(b)	Above 2500 square metre	10% of the area subject to a minimum dimension of 10 metres.

(2) The site so reserved shall be exclusive of the back spaces and spacing between blocks, and shall be free from any construction / structure.

(3) Existing development is defined as one where the extent of ground area covered by structures already existing (prior to application for planning permission) is 25% and above of the total site area.

(4) Open Space Reservation (OSR) should be earmarked only on the area abutting public road. Only under unavoidable circumstances these OSR, which may be permitted within the site abutting internal circulation road provided that road also to be handed over to local body.

(5) In the specific cases where a clearly demonstrable hardship is caused, the Empowered committee may relax various conditions on the OSR mentioned above.

(6) Payment of cost in lieu of OSR is generally not permissible, however for lesser extent this may be considered by Empowered Committee on case to case basis.

(7) OSR should be earmarked at one place only. In case of major development, Empowered Committee may consider splitting of OSR at more than one places on case to case basis.

Verified by PeelEstate™

Schedule - II

Parking Standards

Sl. No.	Building use	No. of Parking Spaces	
(1)	(2)	(3)	
1.	**Residential** For building with dwelling unit or units of floor area exceeding 75 square metres each	One car space for 75 square metres of floor area or part thereof excluding the first 75 square metres in other words	
		Dwelling area	**No. of cars.**
		Upto 150 square metres	1 car space
		above 150 square metres but below 225 square metres	2 car space
		above 225 square metres but below 300 square metres	3 car space
		Two wheeler parking - One two wheeler parking space for every dwelling unit with floor area of 40-75 square metres. The dimension of two wheeler parking lot shall be minimum1.5 metres x 2 metres with a driveway of minimum 1.5 metres.	
		Note :- In such cases where the number of car parking space required does not exceed 3 in number, separate driveway need not be insisted.	
2.	**Commercial**	(i) Floor area upto 50 square metres – Nil	
	(a) Shop and (b) Shopping centre below 100 square metre - 1 car space.	(ii) Floor area above 50 square metre but (iii) For every additional 50 square metres or part thereof exceeding 100 square metres - 1 car space.	
	(c) Office and firm (including public and Semi public offices)	One car space for every 100 square metres of floor area or part thereof.	
	(d) Restaurants	One car space for every 100 square metres of floor area or part thereof.	
	(e) Hotels and Lodges	1. In starred and major hotels with more than 50 rooms one space for every 4 guest rooms 2. In unstarred and other hotels - One space for every10 guest rooms.	
	(f) Assembly Halls, Cinema and Public Halls including Community Centres.	One space for every 20 square metres of auditorium area	
	(g) Kalyanamandapams	One space for every 20 square metres of marriage hall area.	
	3. Warehouse and Wholesale stores	One lorry space for every 500 square metres of plot area or less.	
	4. Educational Institutions	1. Floor area less than100 square metres	Nil
		2. Floor area above 100 square metres but less than 1000 square metres	One car space for every 200 square metres of floor area or part thereof.
		3. For every additional 100 square metres of Floor Area or part thereof over 1000 square metres	One car space
		Note : Atleast 25% of the total parking space shall be provided in the part of the site abutting the road for parking / stopping of vehicles.	
	5. Hospitals and Nursing Home	One space for every 15 beds of part thereof. One extra	

		area for every 100 square metres of non-bed space in the Hospitals and Nursing Homes.			
	6. Industries	i) Floor Area upto 100 square metres			Nil
		ii) Floor Area upto 500 square metres			One lorry space
		iii) Floor area exceeding 500 square metres			One lorry space for every 500 square metres of total floor every 500 square metres of total floor area or part thereof.
	7. Other uses Communications Centre etc.)	As may be specified by the Authority.			
	PART – II				
	Dimension :	The dimension of parking stall shall be 5.0m x 2.5m with a minimum which width of driveway of 3.5m for one way movement and 7.2m width for two way movement. In the case of ware house and godowns and industries the dimension of parking stall shall be 10m x 3.75m with a minimum width of driveway of 3.75m. The number of car spaces required will be calculated on 75% of the total floor area of the building.			
2.	i) Radius	Minimum inside radius of lane 4.5 metres			
	ii) Gradient	1. Preferred gradient 4% (1 in 25)			
		2. Absolute maximum gradient 5% (1 in 20)			
3.	Head Room	In those parts of a building (above or below ground floor level) used or intended to be used for the parking of wheeled vehicles, the minimum clear height to such part of the building shall be not less than 2.4 metres. For lorry parking the minimum head room shall be 3.5 metres.			
4.	Conditions :	1.	The area of each stall shall be flat and free from kerbs and other encumbrances.		
		2.	The angled parking, where a stall is adjacent to a large element such as a wall, minimum stall width shall be 2.7 metres for parallel parking, where cars cannot be parked by reversing, minimum stall length shall be 7.2 metres.		
		3.	**Type of Parking**	**Stall size Minimum**	**Aisle width**
		(i)	Parallel parking	2.5 x 6.0m Rectangular	3.5metre
			30 degree	2.5 x 5.0m Rectangular	3.5metre
			45 degree	2.5 x 5.0m Rectangular	3.5 metre
			60 degree	2.5 x 5.0m Rectangular	3.5 metre
			90 degree	2.5 x 5.0m Rectangular	6.0 metre
			4. The width of aisles and ramps shall be free from kerbs and other encumbrances.		
			5. Adequate blending of ramp grades at floor levels shall be provided. This can be satisfactorily achieved by the provision of straight slope 3.0 metres to 3.6 metres long at half the grade of the ramps.		
			6. The surface of long spiral ramps shall be super elevated to facilitate movement of vehicles or other adopted.		

			7. The slope of a curved ramp shall be that of the centerline of its path.	
	PART – III			
	Multi Level Parking :	1.	No. of storeys permissible	
		2.	Gradient and ramps	- 1 in 10 generally - 1 in 8 minimum
		3.	Clear height between floors	- 2.10 metres minimum
		4.	Parking stall dimension	- 2.5 metres x 5.0 metres
		5.	Inside radius of curve	- 7 metres minimum
		6.	Width of traffic lane, ramps and entrance	- 7.5 metres minimum
		7.	Gradient of slopping floors	- Not steeper than 1 in 20
		8.	Loading standards	- 400 kg / sq.m. maximum
		9.	Ramps, if two way, shall be separated.	

Verified RealEstate™

Schedule - III

Structures permissible in the minimum prescribed Front setback, side setback and rear setback

(1) Unless or otherwise specifically provided for elsewhere in these regulations, no structure shall be constructed within the minimum prescribed set back spaces except the following:-

(a) In cases of non-multi-storyed buildings (including ordinary buildings)-

A. Unsupported sunshade, wardrobes, balconies, and other projections from the main walls, stated below so long as such structures do not fall within minimum prescribed set-back spaces more than what is prescribed below:-

(i)	Sun-shades	0.60 metres
(ii)	Non continuous wardrobes or built-in cub boards above ground floor	0.60 metres
(iii)	open non-continuous balconies (above ground floor)	1.20 metres
(iv)	open service verandah to kitchen (above ground floor)	1.20 metres
(v)	Architectural projections above ground floor	1.00 metres
(vi)	Staircase open landing projections (not affecting driveway)	1.00 metres
(vii)	Cantilevered portico so long as it does not fall within 1.5 metre from the street alignment or boundary of the site whichever is closer.	

The items (iii) to (vi) above shall be permitted in the setback spaces provided a minimum clearance of 0.5 metres for an ordinary building and 1.50 metres for a special building/ group development and for any other non-multi-storeyed building from the property boundary or street alignment whichever closer is made available;

Provided further that if non-continuous projecting structures stated above in the set backs exceed 50% of the side/length of the building, then they shall be taken as forming part of the main building, and shall not be allowed in the minimum prescribed setback spaces.

B. Motor room of area not exceeding 2 square metre each and height not exceeding 1.8 metres, without affecting parking and driveway requirements.

Verified @ RealEstate™

(b) In case of ordinary buildings,

Open single or spiral staircase or open double flight staircase so long as such structure do not fall within 0.50 metre from the side boundary or 1 metre from the rear or front boundary of the site or street alignment.

In case of Residential buildings in the rear set back, structures like lavatory, lumber room, garbage etc. not intended for human habitation and servant quarters are permissible provided it does not occupy more than one third of the plot width, 6 metres from rear boundary and 4 metres in height from ground level.

(c) A compound wall of height not exceeding 2.0 metres.

(d) Watchman booth not exceeding 2.5 metres x 2.5 metres in size at each gate and height not exceeding 3 metres

(e) Gate pillars without or with arches with a minimum headroom clearance of 5.50 metres atleast to a width of 3.5 metres

(f) Meter rooms for meter boxes/ electrical panels along the boundary wall or external walls of the building with the projections not exceeding 0.60 metre from the abutting walls and the open transformer without affecting parking and drive way, subject to the safety measures stipulated by Tamil Nadu Electricity Board.

Explanations.- (1) Any wardrobe or staircase projection stated above is countable for coverage and FSI computation.

(2) In order to minimise traffic conflicts on to the abutting roads, the number of vehicular entry/exits to site shall be kept minimum sand it shall not exceed 2 numbers (i.e. one entry / one exit); Provided that an additional gate for every 50 metres frontage may be allowed in large sites if the frontage exceeds 50 metres.

Verified by PadEstate™

Schedule - IV

Special regulations for physically disabled shall be adhered to as follows:-

In order to provide barrier free environment in the buildings and premises used by public the following shall be provided for persons with disabilities. (It does not apply to residential developments)

(1) Site planning:

Every building should have atleast one access to main entrance/exit to the disabled which shall be indicated by proper signage. This entrance shall be approached through a ramp together with stepped entry. The ramp should have a landing in front of the doorway.

(2) Parking:

(i) Surface parking for atleast two car spaces shall be provided near entrance for the physically handicapped persons with maximum travel distance of 30 metres from building entrance.

(ii) The width of parking bay shall be minimum 3.6 metres.

(iii) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.

(3) Building requirements:

(i) For approach to the plinth level, and in other levels where ramps with gradients are necessary or desired they shall conform to the following requirements:-

(a) Ramps slope shall not be steeper than 1 in 12;

(b) Its length shall not exceed 9 metres between landings and its width shall be minimum 1.5 metres with handrails on either side;

(c) Its surface shall be non slippery; and

(d) Minimum size of landing shall be 1 metre x 2 metres

(ii) Among the lifts provided within the premises atleast one lift shall have the facility to accommodate the wheel chair size 80cm x 150cm.

(iii) The doors and doorways shall be provided with adequate width for free movement of the disabled persons and it shall not be less than 90cm.

Verified @ RealEstate™

(iv) Stairs shall have the handrail facilities as prescribed in the National Building Code.

(v) Minimum one special water closet in a set of toilet shall be provided for the use of handicapped as specified in National Building Code with essential provision of washbasin near the entrance for the handicapped.

Verified RealEstate ™

Schedule – V

Rain water conservation

Water conservation.- (1) Effective measures shall be taken within each premises for conservation of rainwater and rainwater-harvesting structures atleast to the following standards shall be provided; the same shall be shown in the plan applied for planning permission.

(a) Buildings of height upto ground + 1 floor:-

Percolation pits of 30 centimetres diameter and 3 metres depth may be made and filled with broken bricks (or pebbles) for 2.85 metres and the top covered with perforated Reinforced Concrete Cement (R.C.C.) slab. These percolation pits may be made at intervals of 3 metres centre to center along the plinth boundary. The rain water collected in the open terrace may be collected through a 150 millimetres Poly Vinyl Chloride Pipe laid on the ground and may be allowed to fall in the percolation pits or into a open well through a seepage filter of 60cm x 60cm. (filter media broken bricks) provided before the open well which will improve the ground water level. A dwarf wall of 7.5 centimetres height is built across the entry and exit gates to retain water and allow it to percolate within.

(b) Special buildings, Group developments, Multi-storyed buildings, Industrial and Institutional buildings:-

There shall be a pebble bed of 1 metre width and 1.5 metres depth all around the building and filled with rounded pebbles of 5 centimetres to 7.5 centimetres size. The concrete paving around the building has to be slopped at about 1 in 20 towards the pebble bed, so that rain water from the terrace and side open spaces flow over this pavement and spread into the pebble bed around. Dwarf walls in masonry of 7.5 centimetres, height shall be constructed at the entrance and exit gates to retard rainwater collected into the compound from draining out to the road.

Or

(c) Any one of the methods shown in the sketches annexed may also be adopted depending on to the conditions and type of development.

Verified by RealEstate™

(2) Additional regulations for all buildings:

(a) In the ground floor, floor level of water closets shall be atleast 0.9 metre above the road level to ensure free flow.

(b) All centrally air conditioned buildings shall have their own wastewater reclamation plant and use reclaimed wastewater for cooling purposes.

(c) A separate sump shall be constructed for storing portable water supplied by the local body, the volume of sump not exceeding 1,000 litres per dwelling. This sump shall be independent of other tanks, which may be constructed for storing water obtained from other sources.

Verified RealEstate™

Schedule – VI

Spaces excluded from Floor Space Index and coverage computation.

1. The following shall not be counted towards FSI and plot coverage computation:-

   (1). Areas covered by stair-case rooms and lift rooms and passages thereto above the top most storey, architectural features, chimneys, elevated tanks (provided its height below the tank from the floor does not exceed 1.5 metres) and water closet (area not exceeding 10 square metres).

   (2) Staircase and lift rooms and passage thereto in the stilt parking floor.

   (3) Lift wells in all the floors.

   (4) Area of fire escape staircase and cantilever fire escape passages.

   (5) Area of the basement floor/floors used for parking.

   (6) Area of the stilt parking floor provided its clear height (between lower floor and the bottom of the roof beam) does not exceed 3.0 metre and it is open on sides, and used for parking.

   (7) Area of structures exclusively for, accommodating machineries for water treatment plant and effluent treatment plant proposed with clearance from Tamil Nadu Pollution Control Board.

   (8) Areas covered by service ducts, and garbage shaft.

   (9) Area of Balcony/Service verandah to an extent of 5 percent of each dwelling unit area in case of residential buildings and 5 percent of room area in the case of hotels and lodges.

   (10) Porches / Canopies / porticos.

   (11) Service floor with height not exceeding 1.5 metres.

   (12) The following services and incidental structures necessary to the principal use subject to a maximum of 10 percent of the total floor area:-

      (a) Area of one office room not exceeding 15 square metres for co-operative housing society or apartment/ building owners association in each block.

      (b) Servant's / driver's bath room and water closet (not exceeding 20 square metres) for each block in cases of special building, group

Verified RealEstate ™

development and multi-storeyed building at ground floor/ stilt parking floor.

(c) Gymnasium of 150 square metres in floor area.

(d) Area covered by -

(i) Metre room in ground floor or parking floor;

(ii) Air-conditioning plant room in basement or ground floor;

(iii) Electrical room (conforming to Schedule – VIII) in ground floor or stilt parking floor;

(iv) Watchmen or caretaker booth / room in ground floor/ stilt parking floor;

(v) Pump room in ground floor or stilt parking floor;

(vi) Generator room in basement floor or ground floor or stilt floor;

(vii) Lumber room in basement floor or ground floor;

(viii) Air Handling Units in all the floors;

(ix) Electrical / switch gear rooms in all the floors.

(e) Area of one room in ground floor of residential and commercial multi-storeyed building, special buildings, group developments for separate

Verified RealEstate™

Schedule – VII

Additional FSI benefits for Information Technology developments

The development of land and building for the purpose of development of Information Technology park, software and its associated, computer technology, bio-informatic units shall be certified by the appropriate authority designated by the Government for the purpose, to avail the concession stated below.

(1) Areas.- The proposed Information Technology development is permissible in the local body area, subject to the provision of adequate water supply and sewage disposal arrangement to the satisfaction of the authority.

(2) Activities.- Manufacture of hardware, development of software and its associated computer – communication technology applications, bio-informatic units including offices, conference halls and projection theatres connected therewith, only shall be permitted. No showrooms, other offices, residential uses and activities of similar nature shall be permitted. Provided that incidental activities such as staff canteen, staff recreational area, guest accommodation, watchmen quarters and the like not exceeding 10% of the total floor area shall be permitted. Provided further that within above ceiling of 10%, each of the above incidental activities should not exceed 5% of the total floor area.

(3) Road width.- The proposed development shall either abut on a public road of not less than 12 metres in case of special building and 18 metres in case of multi-storeyed building in width or gain access from a passage of not less than 12 metres or 18 metres width which connects to a public road of not less than 12 metres or 18 metres in respective special or multi-storeyed building.

(4) Site extent.- The site extent shall not be less than 1500 square metres.

(5) Height.- (a) For non-multi-storeyed buildings, it shall in conformity with the requirements prescribed in the regulations.

(b) For multi-storeyed buildings, maximum permissible height shall be 60 metres where the width of the abutting road is minimum 18 metres, and exceeding 60 metres where the width of abutting road is minimum 30.5 metres, subject to such conditions as may be necessary.

Verified RedEstate™

(6) Floor Space Index.- Maximum Floor Space Index allowable is 1.5 times of the Floor Spaces Index ordinarily permissible.

(7) Car parking standards.- The covered car parking space will be allowed upto ground + 3 floors above ground level and the same shall not be included in the floor space index/ plot coverage.

(8) Other parameters.- Except for the above said specific provisions, the developments shall conform to these rules in respect of all other parameters.

Verified RealEstate™

Schedule – VIII

Tamil Nadu Electricity Board and Fire and Rescue Service standards

(1) Electrical rooms in Special building, Group development and Multi-storeyed building developments shall conform to the following:-

(a) Tamil Nadu Electricity Board standards.-

i) Indoor space required within the premises for installing floor mounted Distribution Transformer and associated switchgear.

a) An electrical room for accommodating the transformers and associated switchgears shall be provided at the ground floor, either within the built up space of the multi-storeyed buildings or outside the building and within the premises of the multi-storeyed buildings nearer the main entrance of the building. The associated switchgear shall be separated from the transformer bays by a fire-resisting wall with a fire resistance of not less than 4(four) hours.

b) The width of the approach road to the above said electrical room shall not be less than 3.0 metres.

c) The electrical room with RCC roof shall have clear floor area 6m. x 4m. with a vertical clearance of 2.75m.

d) Three sides of this room shall be covered with brick walls. The fourth side, towards the approach road shall be covered with M.S. Rolling Grill Shutter of width not less than 3 metre with locking facility.

e) The electrical room shall be fitted with 2 Nos. exhaust fans in the wall facing the approach road, one on either side of the shutter.

f) The electrical room shall have raised cement flooring with cable duct of 450-mm. width and 750 mm. depth, all around inside the room and close to the exterior wall shutters. The flooring shall slope towards the cable duct. The cable duct shall be covered with RCC slabs of thickness not less than 75mm (3 inches). The covered slabs shall flush with the cement flooring. The radius of curvature of the

Verified by RealEstate™

cable ducts at the turnings inside the electrical room shall not be less than one metre.

The open space within the premises for installation.

A clear space of 10m. x 4m. or 5m. x 5m. open to the sky and having an approach road of width not less than 3 metres, upto the public road shall be provided within the consumer premises, preferably at the main entrance.

(b) Directorate of Fire and Rescue Services standards:

(i) No transformer shall be located below the first basement or above the ground floor

(ii) A sub station or switch station with apparatus having more than 2000 litres oil shall not be allowed in the case of indoor transformer.

(iii) The indoor transformer should preferably be housed in a fireproof room with walls and doors sufficient fire rating.

The room in the ground floor of the basement housing the transformer shall have a free access to the outside.

There shall be a curb or a dwarf wall around the transformer so that oil spills if any, is contained within the curb. There shall also be a suitable drain with a 'flame-arrester'.

If in the basement, the transformers shall be adequately protected against fire by a high velocity water spray or a CO_2 flooder of suitable capacity, depending upon the size of the transformer.

The switchgears, if any shall be housed in a separate room with suitable fire resistance walls.

The transformers shall be located only in the periphery of the basement or ground floor, observing suitable clearances.

DCP or CO_2 portable fire extinguishers of a minimum capacity of 10kg. shall be kept near the doorway housing the transformer.

All indoor transformers shall be subjected to periodic inspection and shall be replaced in good time so that there is no fire risk.

The room shall be well ventilated so that the transformer remains cool.

The room shall have emergency and automatic lighting with independent power supply".
