PROFORMA

Name of the Office : District Town and Country Planning Office, Tiruchirappalli

Name of the LPA : Tiruchirappalli

I. Proposal

1. Letter number and date of Joint Director in which proposals submitted to DTCP	:	Letter number: 246/2011/TD-3, Date: 09.01.2024
2. Letter number and date of DTCP in which proposals submitted to Government	:	Letter number:30302/2005/MP/TCP-2, Date: 09.01.2024

II. Notification:

3. The G.O. details of notification under Section 10(1)	:	G.O.Ms.No.240, H&UD (UD-4) Department, dated 24.09.2013
4. The G.O. details of notification under Section 10(6)	:	G.O.Ms.No.88, H&UD (UD-4) Department, dated 30.06.2021

III. CONSTITUTION

5. The G.O.details in which Tiruchirappalli authority Members was constituted u/s 11(3) of the Act	:	G.O.Ms.No.100, H&UD (UD-4) Department, dated 14.08.2023

IV. CONSENT

6. The G.O.details in which the Government accorded consent under Section 24	:	

V. SUBMISSION

7. Notification in form No. I in the Tamil Nadu Government Gazette Under Section 26.	:	
8. Notification in form No. I in District Gazette under Section 26(1).	:	
9. Letter No and date in which Director of Town and Country Planning has given advice on	:	

Verified RedEstate™

Verified RealEstate™

O&S under Section 26(2).

10. Resolution No and date in which the Tiruchirappalli LPA approved the Draft Master plan :

VI. APPROVAL

11. Submission of master plan to Government for final approval Under section 28. :

12. The G.O. details in which Government accorded its Approval under section 28. :

VII. PUBLICATION DETAILS OF APPROVAL

13. The Tamil Nadu Government Gazette Under section 30. :

MEMBER SECRETARY / JOINT DIRECTOR (FAC),
TIRUCHIRAPPALLI LOCAL PLANNING AUTHORITY,
TIRUCHIRAPPALLI.

TABLE OF CONTENTS

1. INTRODUCTION 1

1.1 Purpose of Master Plan 1

1.2 Need for the Master Plan 2

1.3 Master Plan for Tiruchirappalli LPA 3

1.4 GIS based Master Plan 4

1.5 Preparation of the Draft Master Plan 2021-2041 9

1.6 Methodology 9

1.6.1 Exisitng Land use map 10

1.6.2 Inception Report 13

1.6.3 Vision Formulation 15

1.6.4 Data Collection 15

1.6.5 Study of previous planning initiatives 15

1.6.6 Issues, Potentials, Projected requirements & Draft Proposals 15

1.7 Vision Statement 16

2. PROFILE OF TIRUCHIRAPPALLI 19

2.1 Location & Regional Setting 19

2.2 Transport Network and Connectivity 25

2.2.1 Road Connectivity 25

2.2.2 Rail Connectivity 26

2.2.3 Air Connectivity 26

2.2.4 Sea Port 27

2.2.5 Freight movement In and Around Trichy LPA 27

2.3 History of the Region 28

Verified by RealEstate™

2.3.1 History of Tiruchirappalli Region 28
2.3.2 History of Tiruchirapalli LPA 38

3. DEMOGRAPHY 46
3.1 Population Distribution 46
3.2 Growth Rate 51
3.2.1 Average Growth Rate Ranking of Villages 53
3.3 Population Density 58
3.4 Sex Ratio 61
3.5 Schedule Caste and Schedule Tribes Population 61
3.6 Literacy Rate 62
3.7 Population Projection 62
3.7.1 Population Projection Methods 62
3.7.2 Population Projection using various methods 65
3.7.3 Population Projection of LPA 69

4. PHYSICAL FEATURES 72
4.1 Geography 72
4.2 Topography 72
4.3 Climate and Rainfall 74
4.4 Lineaments 76
4.5 Geology 76
4.5.1 Geological Landforms 76
4.6 Geomorphology 79
4.6.1 Drainage 79
4.6.2 Soil Type 79

Verified PedEstate™

5. ECONOMY 83

5.1 General Economic Profile 83

5.1.1 Work Participation Rate and Occupational Structure 83

5.1.2 GDDP 89

5.2 Agriculture and Allied Activities 89

5.3 Industries 94

5.3.1 Existing Industrial Base 94

5.3.2 MSME Profile 95

5.3.3 Service Sector 97

5.4 Trade and Commerce 100

5.4.1 Export Performance 100

5.5 Employment projection 104

6. HERITAGE & TOURISM 106

6.1 Heritage & Cultural Tourism 108

6.1.1 Well known Spots 108

6.1.2 Lesser-known Spots 113

6.1.3 Temples under ASI 118

6.2 Eco-Tourism and Educational Tourism 123

6.2.1 Mukkombu (upper anaicut) 123

6.2.2 Butterfly Park 124

6.2.3 Anna Science Planetarium 125

6.2.4 Government Museum 126

6.3 Important Festivals 130

6.4 Tourism handling capacity 130

Verified RedEstate™

7. MOBILITY 137

7.1 Access and connectivity 137

7.1.1 Introduction 137

7.1.2 Railway Connectivity 137

7.1.3 Bus Connectivity 140

7.1.4 Air connectivity- 141

7.1.5 Air Funnel Zone 142

7.2 Traffic & Roads Network 143

7.2.1 Existing Road Network 143

7.2.2 Freight movement 149

7.2.3 Air freight movement 151

7.2.4 Traffic analysis 152

7.2.5 Design Service volume 152

7.2.6 Classified Volume Count 154

7.3 Road Safety 162

7.3.1 Accident Pattern 162

7.4 SUMMARY 162

8. PHYSICAL INFRASTRUCTURE 165

8.1 Water supply 165

8.1.1 Source and Quantity 165

8.1.2 Infrastructure for Water Supply 165

8.1.3 Projected Requirement 169

8.2 Sewerage and sanitation 170

8.2.1 Sewerage generation and Treatment 170

8.2.2 Sanitation 171

8.2.3 Existing Gap in Sewage Treatment 171

Verified RealEstate™

8.2.4 Projected Requirement 174
8.3 Solid waste management 175
8.3.1 Solid waste Generation 175
8.3.2 Composition of Solid Waste 177
8.3.3 Treatment Facilities 177
8.3.4 Projected Requirement 178
8.4 Storm water drainage 178
8.4.1 Existing Situation 178
8.5 Electricity 180
8.5.1 Projected Requirement 180
8.6 Summary 182

9. SOCIAL INFRASTRUCTURE 184
9.1 Health 184
9.2 Education 187
9.3 Socio-Cultural Infrastructures 191
9.3.1 Library 191
9.3.2 Community Halls 191
9.4 Police, Safety Management Infrastructure 191
9.5 Open Spaces 193
9.5.1 Parks 194
9.5.2 Play grounds 195
9.5.3 OSR Spaces 197
9.6 Gap Analysis 198
9.6.1 Health care 198
9.6.2 Education 201
9.6.3 Colleges 206

Verified RedEstate™

9.6.4 Other civic amenities 209

10. HOUSING 216

10.1 Number of households in the district 216

10.2 Existing housing conditions 217

10.2.1 Housing condition 217

10.2.2 Ownership status 218

10.2.3 Average household size 219

10.2.4 Percentage of households with household sizes 219

10.3 Slums 220

10.3.1 Number of slums with households 220

10.3.2 Srirangam Zone 223

10.3.3 Ariyamangalam Zone 227

10.3.4 Ponmalai Zone 230

10.3.5 Abhishekapuram Zone 234

10.3.6 Population & Household projection 2041 238

11. ENVIRONMENT 242

11.1 Surface Water 244

11.1.1 Existing Water Network: Topography 244

11.1.2 Existing Water Network: River 248

11.1.3 Existing Water Network: Irrigation Canal 248

11.1.4 Existing Water Network: Lakes and watersheds 249

11.1.5 Current Status - Surface Water Bodies in LPA 249

11.2 Groundwater 253

11.2.1 Ground Water Resource Estimate 253

11.2.2 FIRKA in LPA 262

Verified RealEstate™

11.2.3 Ground Water Quality 263

11.3 Forest and Biodiversity 265

11.3.1 Kariyamanickam and Kiliyanallur Reserve Forest 265

11.3.2 Butterfly Park 266

11.4 Disaster Management 266

11.4.1 Seismology 266

11.4.2 Covid -19 267

11.4.3 Cyclone and Floods 267

11.5 Pollution 284

11.5.1 Concetration of Enterprises based on Pollution Control Board Catergory 284

11.5.2 Water Pollution 286

12. EXISTING LAND USE 293

12.1 Evaluation of Existing Master Plan 2011 293

12.2 Evaluation of Implementation of Master Plan 2011 Proposals 300

12.3 Existing Landuse (2021) of Proposed LPA 2041 303

12.4 Land Use, Land Cover (Land use and Land cover) and Land suitability 320

12.4.1 Land Suitability analysis 323

12.5 Land development trend 324

13. POTENTIALS AND NEEDS 332

13.1 Economy 332

13.1.1 Potential 332

13.1.2 Needs 332

13.2 Tourism 333

13.2.1 Potentials 333

INTRODUCTION

Verified RealEstate™

1. INTRODUCTION

1.1 Purpose of Master Plan

The Tamil Nadu Town and Country Planning Act, 1971, an Act to provide for planning the development and use of rural and urban land in the State of Tamil Nadu, states the Master Plan may provide for any or all of the following matters:

- The manner in which the land in the planning area shall be used;
- The allotment or reservation of land for residential, commercial, industrial and agricultural purposes and for parks, play-fields and open spaces;
- The allotment and reservation of land for public buildings, institutions and for civic amenities;
- The making of provision for national highways, arterial roads, ring roads, major streets, lines of communication including railways, airports and canals;
- The traffic and transportation pattern and traffic circulation pattern;
- The major road and street improvements;
- The areas reserved for future development, expansion and for new housing;
- The provision for the improvement of areas of bad layout or obsolete development and slum areas and for relocation of population;
- The amenities, services and utilities;
- The provision for detailed development of specific areas for housing, shopping, industries and civic amenities and educational and cultural facilities;
- The control of architectural features, elevation and frontage of buildings and structures;
- The provision for regulating the zone, the location, height, number of storeys and size of buildings and other structures, the size of the yards and other open spaces and the use of buildings, structures and land;

Verified RealEstate™

- The stages by which the Master Plan shall be carried out; and such other matters as may be prescribed.

The URDPFI 2015 guideline describes Master Plan (Development Plan) in the following manner:

- The objective of the development plan is to provide further necessary details and intended actions in the form of strategies and physical proposals for various policies given in the perspective plan and regional plan depending upon the economic and social needs and aspiration of the people, available resources and priorities.
- Proposals of a development plan should be definite, supported by an implementation strategy and evaluation criteria.
- The time frames of these plans are generally valid over a period of 20-30 years and should be planned in phases of 5 years, for periodic reviews.

In addition to these, the Master Plan is also meant to identify areas required to be preserved, conserved and development of areas of ecological value, natural scenery and landscape together with preservation of features, structures or places of historical, architectural and scientific interest and environmental value.

1.2 Need for the Master Plan

Trichy is one of the major Tier II cities of Tamil Nadu which is the third most urbanised state in the country of India, with 48.45 per cent of its population living in urban areas as per Census 2011. Trichy is the fourth largest city as well as the fourth largest urban agglomeration of the state with a population of 9,15, 569 (Census 2011) and has been experiencing rapid growth at the rate of 16.50% (2011-2021) after Chennai, Coimbatore and Hosur.

Trichy being approximately the geographical centre of Tamil Nadu had made it a major node of mobility across the state and for the very reason was the first Headquarters of the South Indian Railway Company in 1874 during the British rule in

India. It was internationally known for its unique variety of cheroot, known as the Trichinopoly Cigar as well as unique vegetable tanned leather produced in its tanneries to cater to the British Army. The Cauvery Delta begins 16 kilometres (9.9 mi) West of the city where the Kaveri river splits into two, forming the island of Srirangam which is world famous for its Sri Ranganathaswamy temple which is one of the 50 sites of India in the UNESCO tentative list since 2014. With its recorded history dating back to 3rd Century, being a central node of mobility and mechanical engineering during the British Raj and a major centre for heavy industries since 1960s along with the existence of large acreage of water bodies in the form of rivers, streams and lakes makes it important to guide the development of this growing urban settlement to responsibly co-exist with the natural and cultural fabric.

The size and complexity of urban areas in India have been growing in the past decade at a rapid pace and are deeming them unmanageable. The need for a mechanism or a road map to plan inclusively, to regulate and control the growth and development of urban areas has become all the more necessary now, due to the impact of development on the environment and its cumulative impact on the earth. The Town and Country Planning Act, 1971, provides for preparation and implementation of Master Plans for urban areas, to ameliorate the situation in urban areas and make them a place for safe, healthy and sustainable development.

1.3 Master Plan for Tiruchirappalli LPA

In exercising of the power conferred under section 10 (I) of the Tamil Nadu Town and Country Planning Act 1971, the Government had published the intention of declaring Tiruchirappalli Local Planning Area in G.O. Ms. No 936 RD & LA dated 5.04.1974 (Annexure A) and the notification had been confirmed under section 10 (4) in G.O.Ms.No 1669 RD & LA dated 16.07.1974 (Annexure B)

Taking into consideration of the urban development, the Government in G.O.Ms.No. 1414 Housing and Urban Development Dated 25.10.1980 (Annexure C)

had published the intention to include additional area within Tiruchirappalli Local Planning Area. At the same time, the Government had decided to declare Navalpattu area as New Town Development Area and hence in G.O.Ms.No. 1415 Housing and Urban Development Area dated 25.10.1980 (Annexure D), the Government had published the intention to exclude a few areas from the already notified Tiruchirappalli Local Planning Areas. In exercising power conferred under the section 10 (I) (c) of the Act, in G.O.Ms.No.259 Housing and Urban Development Department dated 15.04.1981 (Annexure E) the Government had declared a few areas to be a site for the New Town Development Area which had been confirmed in G.O.Ms.No 1044 Housing and Urban Development Department dated 24.11.1982 (Annexure F).

1.4 GIS based Master Plan

According to the G.O.(Ms).No.23 dated 29.01.2013, Tiruchirapalli falls under the area of 6950 sqkm which was already covered by Planning Authorities but needed expansion due to rapid development. A need was identified for fresh field surveys for the preparation of existing land use map and subsequent master plan as case may be, using modern techniques like GIS, Remote Sensing and using external resources in order to reduce the time consumed. The task was entrusted to Bharathidasan University as mentioned in the Annexure L. An addition of 315.27 sq.km to the existing extent of planning area of 489.28 sq.km (including Tiruchy LPA & Navalpattu NTDA) was proposed, making the total area to be covered under the project to 804.55 sq.km.

Considering the list of villages notified under section 10 (1) (b) of the Act in G.O.(Ms).240 Housing and Urban Development Dated 24.09.2013 (Annexure I) and certain spelling corrections and rescinding of existing NTDA and notifying it under the Tiruchirappalli Local Planning Area in G.O.(Ms).No.88 - 10(6) - Housing and Urban Development Dated 30.06.2021 (Annexure J) which are necessary to have a contiguous planning area, the list of local bodies which constitute "Tiruchirappalli Local Planning Area" is given as follows:

1.5 Preparation of the Draft Master Plan 2021-2041

The Directorate of Town & Country Planning (DTCP), Government of Tamil Nadu (GoTN) had taken up the task of preparation of the GIS based Master Plan for Tiruchirappalli LPA along with other Cities in the State. The Supplementary Guidelines for "Scheme for Special Assistance to States for Capital Investment 2023-2024"- Part III (Urban Planning Reforms with 8 Reforms) (Annexure K) was received from the Ministry of Finance- Department of Expenditure- Government of India, dated 19.06.2023, with special focus on Reform 7: Strengthening natural ecosystems of urban areas through urban planning- Milestone (iii) Creation of Urban Forestry & Reform 8: Integrating essential components in Master Plans to be prepared by DTCP.

Based on the Reform 8, States needed to amend their Cities' Master plan/ development Plan through notifications and need to integrate the essential planning components of Transportation Network/ Mobility Plan, Blue and Green infrastructure, Economic Planning and Land use Plan. The DTCP, Trichy had appointed The Care School of Architecture, Tiruchirappalli as a Review committee to advice on the means to incorporate the said Reforms 7 & 8 in the Master Plan. CARE School of Architecture's Tiruchirappalli role was later changed to Consultant to make the necessary integrations in the Master Plan of Tiruchirapalli vide an Interim Order File No.246/ 2011/ TD3 as shown in the Annexure M

1.6 Methodology

The following was the methodology followed for the preparation of the Master Plan of Tiruchirappalli. The methodology comprises preparing baseline information on population characteristics and its socio-economic attributes, revising, proposing land utilization details in order to cater to the requirement of the projected future population growth, density, migration and employment.

Verified © PadEstate™

1.6.1 Exisitng Land use map

The Existing Land Use Map for Trichy LPA was prepared by the DTCP using high resolution satellite images acquired from National Remote Sensing Agency (NRSC). The village maps with survey numbers (from the Survey and Land Records department) were used for preparing the cadastral framework. Differential Global Positioning System (DGPS) surveys were carried out for collecting Ground Control Points (GCPs) for georeferencing of the scanned paper maps. The survey boundaries were digitized as polygon features in the GIS database, along with the name of the village and the survey number. High resolution satellite images were acquired from the National Remote Sensing Centre & DTCP had prepared a preliminary land use map from the satellite images. Verification of land use map by ground truth verification was later carried out by DTCP. Preparation of Base map – The Digital Terrain Model (DTM of SRTM) has been used to prepare the terrain and contours. The physical base map will show the topography, rivers, streams and tanks, in the LPA area. List of information available and data sources available with Tiruchirapalli Local Planning Area has been mentioned in Table 2.

Following features have been captured from the mosaic image.

- Administrative Features
- District, CD Blocks and Village Boundaries
- Village Codes & Names
- Inhibited and Un-inhabited Villages
- Physical Features
- Roads – National Highway, State Highway, Other District Road
- Railways – Broad Gauge, Meter Gauge
- Natural Features
- Water Bodies – Rivers etc.
- Soil
- Forest
- Geology and Geomorphology

Verified by PedEstore

There are different sources that have been used for the identification of natural resources as listed below:

- Cadastral Maps
- Topographical sheets
- Other relevant department (like PWD, Disaster Management and Irrigation & Development)

Land Resource Inventories: Building land resource inventory entails a comprehensive collection of information and data related to land use and land cover. The enlisted information in the inventories is collated from different sources, and they are arranged in a systematic form.

The purpose of preparing land resource inventories is to formalize the method of land capability and land suitability classification for appropriate allocation of land uses in the region. The key features included in the inventories will be extracted as per the requirement of features in the land capability and land suitability classification.

1.6.2 Inception Report

The inception report stage involves preliminary analysis of the LPA as a whole based on available secondary data and preliminary stakeholder interactions. The Inception Report provides a contextual background, project need and scope, aims and objectives of the project, the approach and methodology to be undertaken and the project team and timeline; describes the LPA by providing a demographic profile of the LPA based largely on secondary data made available through the Census; presents the land profile of the LPA based on the Existing Land Use Map 2021, economic details at the municipal, block and taluk and district level as available; discusses road network, connectivity, physical and social infrastructure status; and a brief about other prevailing sectors linked to planning, such as housing, infrastructure, environment, etc. The stakeholders engagement

Verified by RealEstate™

has been carried out which involves public meetings/conference during draft development, highlighting the key issues and get stakeholder inputs which are to be addressed.

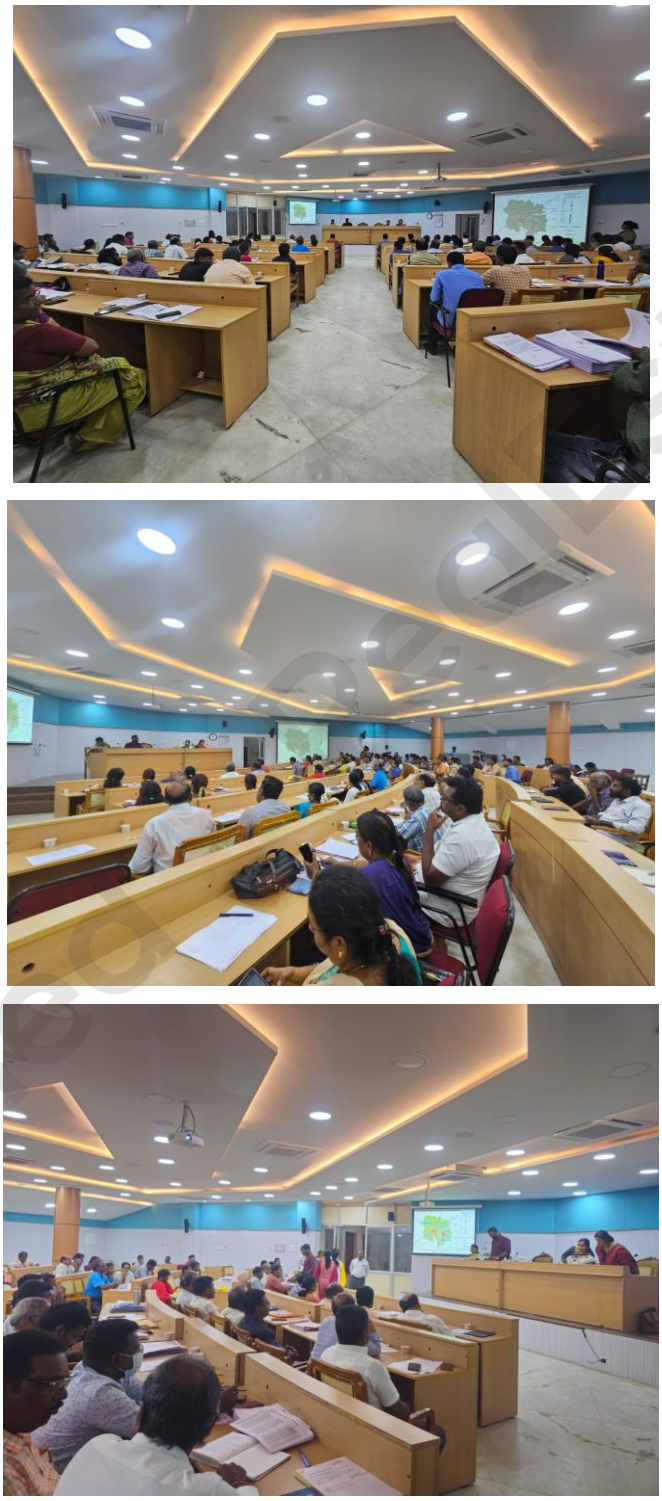

Figure 1-1 Stake holder Meeting

Verified Realstate™

1.6.3 Vision Formulation

Based on the innate strengths and potentials of the region and after discussions with the Line Departments and keeping in view of the future development path of Trichy, the Vision Trichy 2041 was formulated by the DTCP. Further additions to the Vision statement were suggested by CARE SOA in line with the Supplementary Reforms 7 & 8 of "Scheme for Special Assistance to States for Capital Investment 2023-2024".

1.6.4 Data Collection

Primary data collection: A mapping exercise of various places of cultural, historical and architectural character in the Heritage town of Srirangam was undertaken.

Secondary Data Collection: Secondary data was requested and obtained from around 18 government departments with the support of Trichy DTCP, since many data sets were very old. Data from various other sources of secondary data were collected, for example, CMP, Disaster Management Plan of Trichy 2022, Vision Trichy 2022 etc.

1.6.5 Study of previous planning initiatives

It involves the review of the previous planning initiatives that has been undertaken by different authorities for the project area. It has been done to assess the constraints and shortcomings associated with the previous plans.

1.6.6 Issues, Potentials, Projected requirements & Draft Proposals

Based on the analyzed data, the various discussions with the local community, a set of issues and potentials were identified. The current requirements were cross verified with various standards like URDPFI, Service Level Benchmarks, Environmental Parameters, etc. and the proposals were prepared accordingly.

Verified RealEstate™

1.7 Vision Statement

The vision for Tiruchirappalli is "CHIRA – 2041". CHIRA stands for Culture Heritage Industries River restoration and Agriculture. Chira is taken since Tiruchirappalli is named after, "Thiru" means "Mr.", Palli means "City" and "Chira"/ "Chinna"/ "Ssila" means "rock" or "small".

Based on the studies of the existing conditions and considering the growth opportunities and potential of the site, the following vision statement was arrived at:

"The Trichy masterplan articulates the vision for the city's growth and development driven by its immense cultural & heritage value, lucrative industrial opportunities and sustainable agriculture, thereby strengthening the economy of the city without degrading river resources"

The Vision of this Master Plan is then translated in goals and their broad objectives. The goals and objectives are given as the following:

- Protect and preserve the natural and cultural assets

  Improve the green and sustainable scores of the city

  Enhance the experience of cultural assets

  Encourage a more compact and form based future growth poles of Tiruchirappalli preventing land degradation, and pressure on services with proper regulation and framework development

- Farmers Friendly

  Encourage value-add innovation in the primary sector

  Improve the infrastructure network services of Tiruchirappalli

  To protect water systems in the region

Verified PedEstate TM

- Affordable Housing and Educational city

  Provide for a variety of housing options for different income groups

  Maximize the potential of Educational Institutes

  Increase the Quality of Life for every resident

- Strengthen tourism and industries as a central economic focus

  Improve regional and city mobility

  Strengthen the non-motorized roads in heritage areas of Tiruchirappalli

PROFILE OF TIRUCHIRAPPALLI

VerifiedRealEstate™

2. PROFILE OF TIRUCHIRAPPALLI

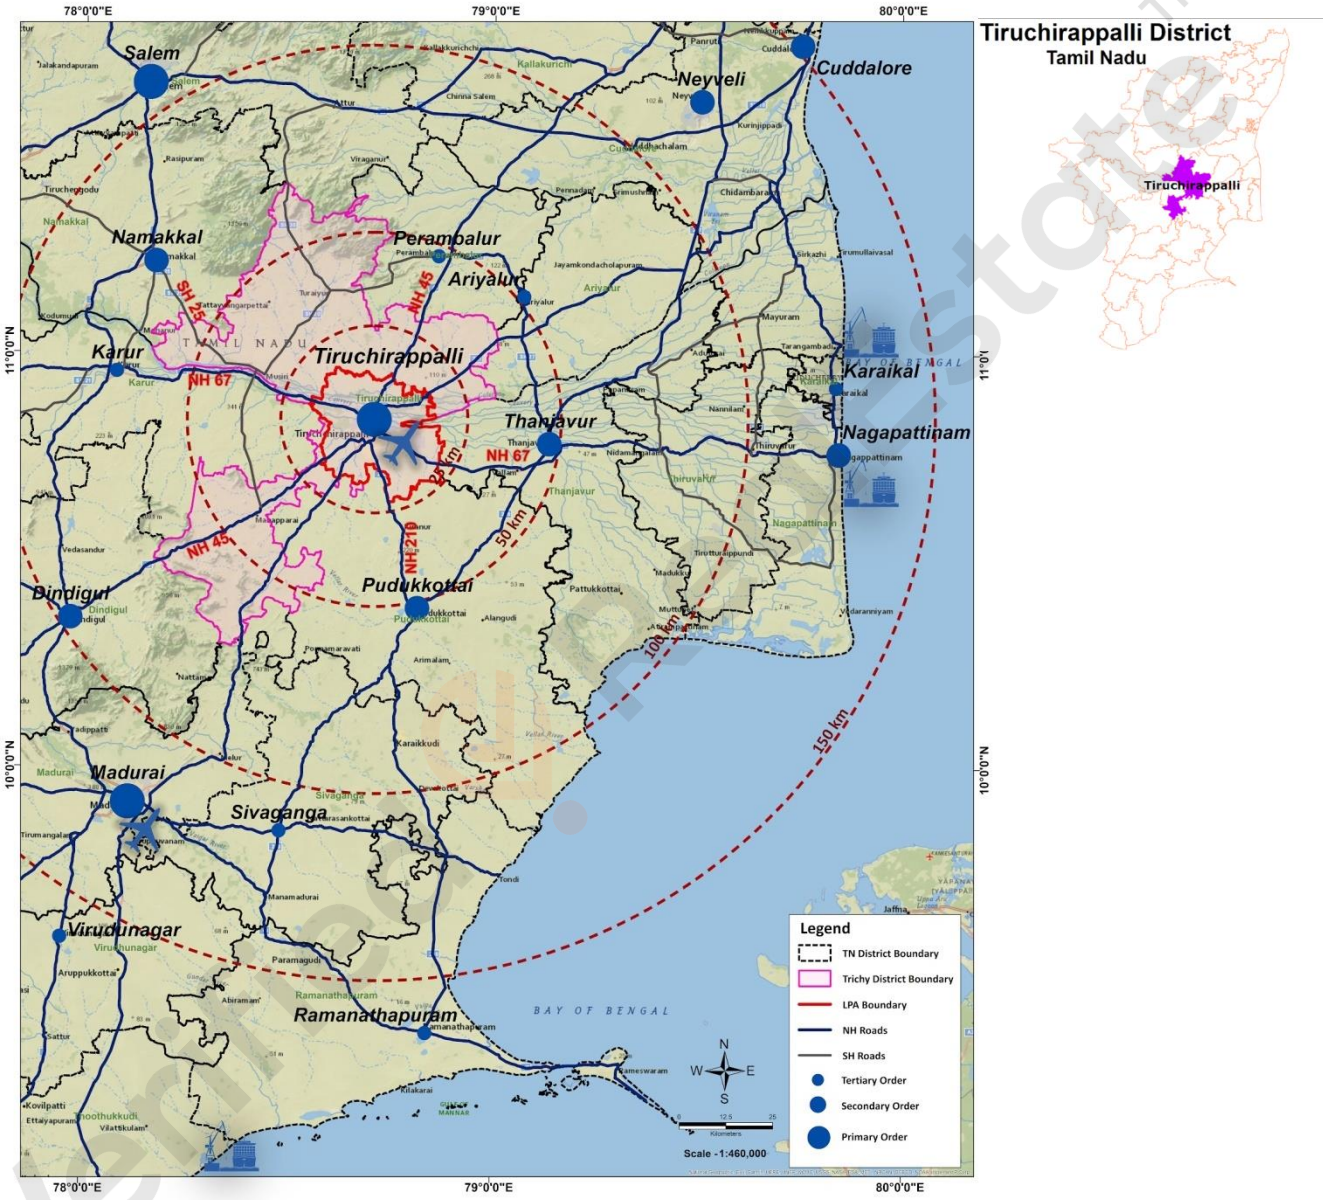

2.1 Location & Regional Setting

Tiruchirappalli City is the 4th largest City of Tamil Nadu State and the District Headquarters of Tiruchirappalli District comprising eleven Taluks and 14 Community Development Blocks. Trichy, Tiruchy, Trichinopoly are a few other names by which this City and district are known. The district has an area of 4,404 square kilometers and a population of 2,722,290 with 1,013 females for every 1,000 males as per census 2011. Geographically located between Latitude 10°00' & 11° 30' North and Longitude 77°45' & 78° 50' East, Trichy LPA is approximately at the geographical center of the district and the state and its strategic location makes it a major intra state transportation node. Trichy is located at an altitude of 78 m above sea level. It is bounded in the North by Salem district, in the Northwest by Namakkal district, in the Northeast by Perambalur district and Ariyalur district, in the East by Thanjavur District, in the Southeast by Pudukkottai district, in the South by Madurai district and Sivagangai district, in the Southwest by Dindigul district and, in the West by Karur district as shown in Fig:2.1. It is located within 150 km from the primary order Cities Madurai & Salem. GIS Mapping of Trichy LPA, based on ward/ block maps authenticated by the DTCP, GoTN estimates the area of the Corporation to be 166.58 sq.km in 2021.

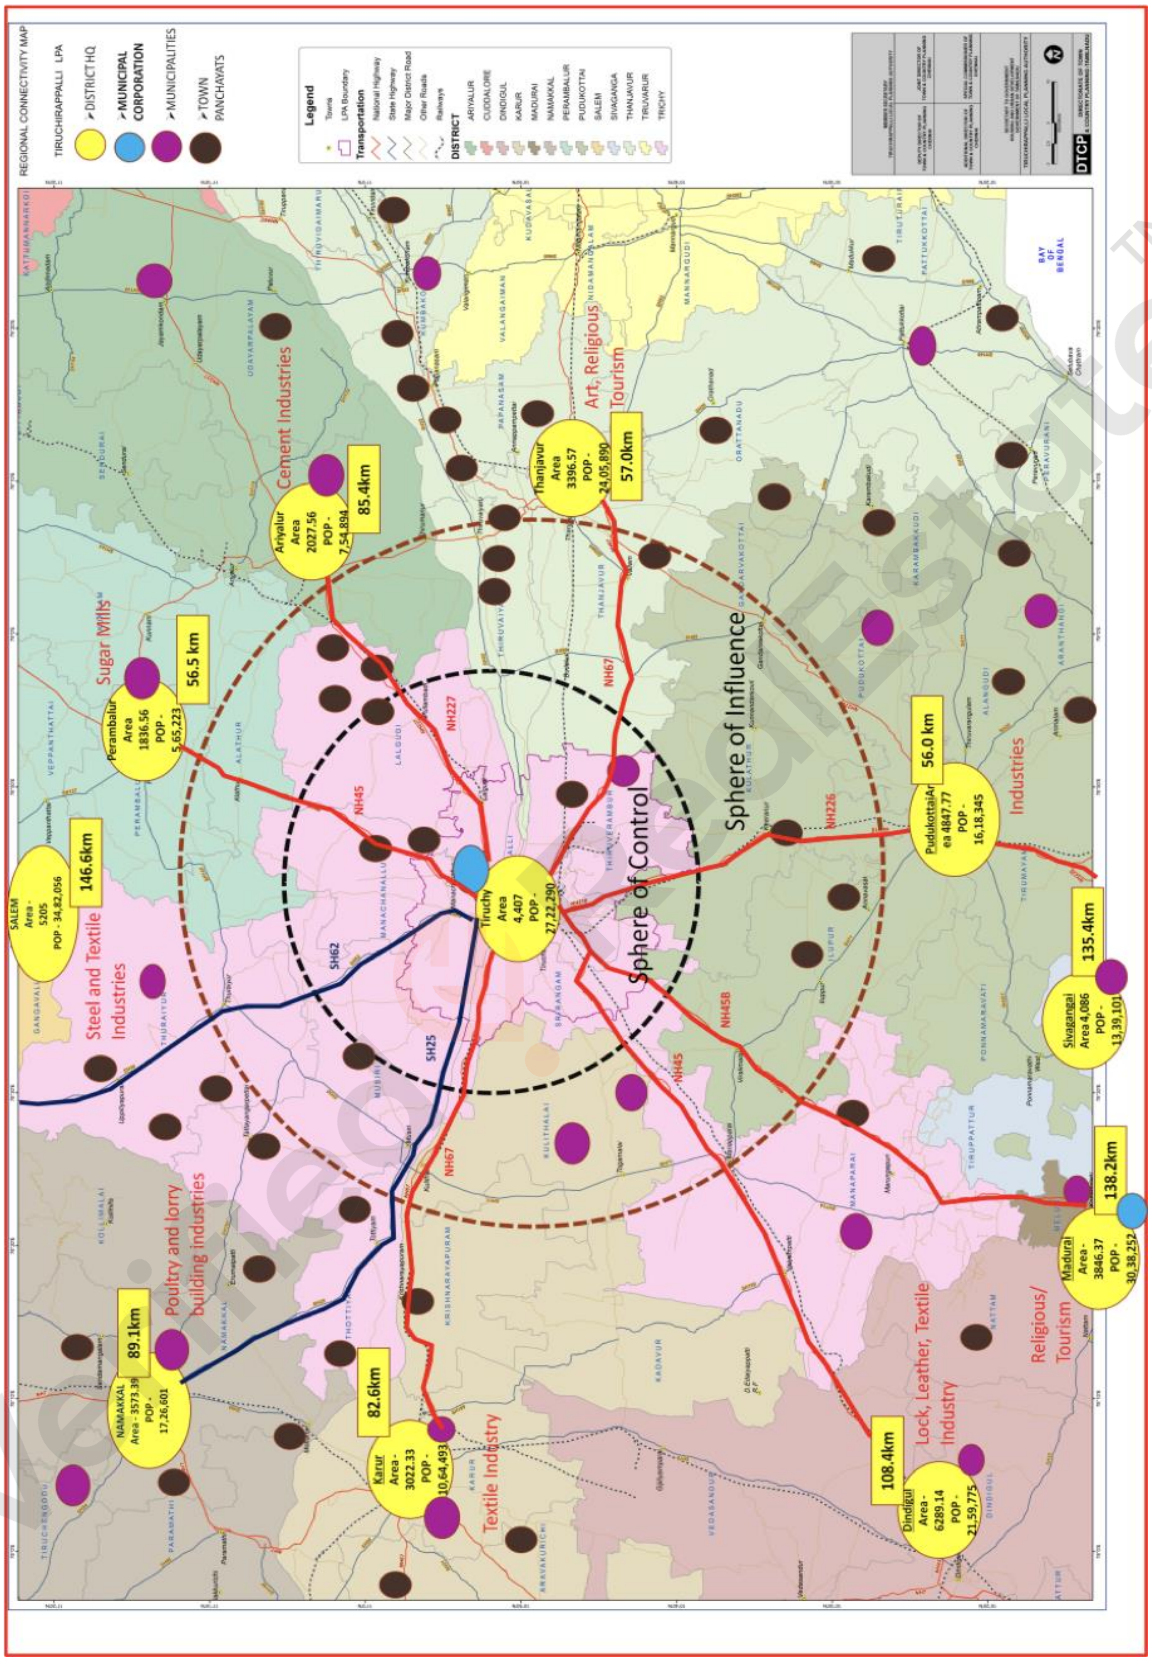

Trichy LPA, which includes Trichy Corporation, 2 Municipalities, 4 Town Panchayats and 103 revenue villages falling under 4 different Taluks Srirangam, Thiruverumbur, Lalgudi and Manachanallur, has a population of 14.3 lakhs as per Census 2011 and covers an estimated area of 804.55 sq.km based on GIS mapping and cross verified with the Survey and Land Revenue Records. There are 6 census towns among the 103 villages forming the LPA. The Municipalities, Town Panchayats, and revenue villages including the census towns are referred to as the 'Rest of LPA' in this document. Trichy LPA occupies just 18.3% of the District by area but houses 53%

Verified by PeoEstate™

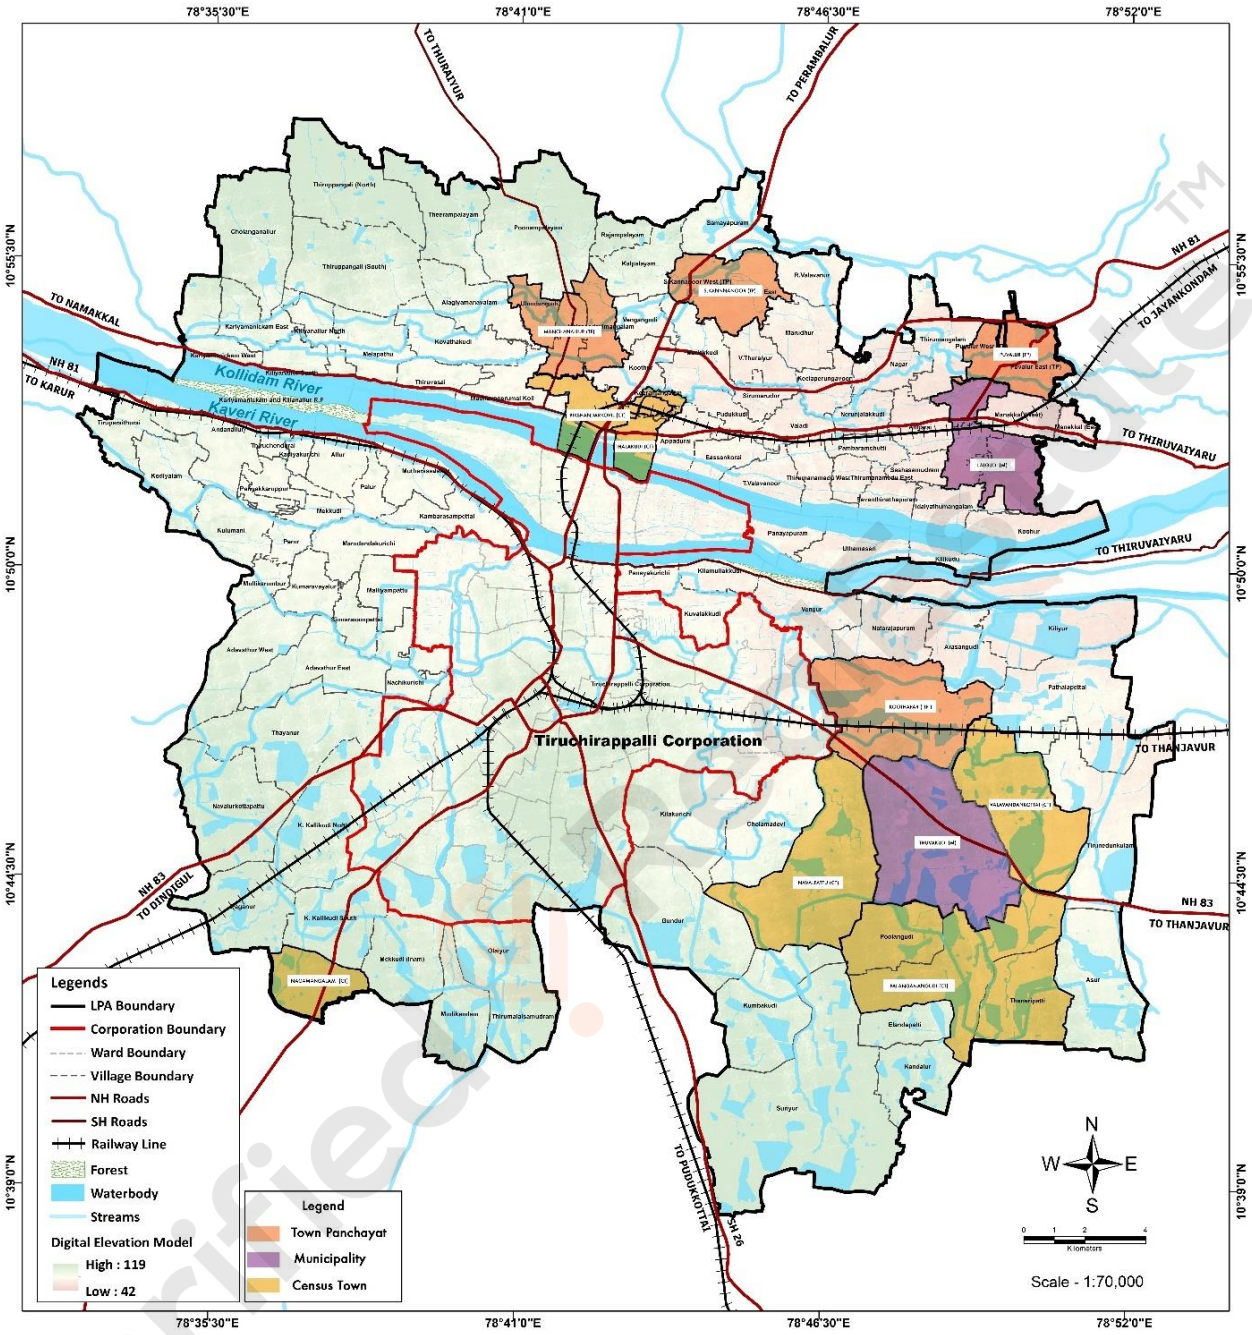

of the district's total population. The administrative boundary of the LPA showing the Tiruchirappalli Corporation, Municipalities, Town Panchayats, Census Towns and the remaining revenue villages and the 49 survey wards of Trichy Corporation is illustrated in Map 2.3.

2.2 Transport Network and Connectivity

Trichy Corporation is situated at a distance of 140 km from Salem in the North, 56 km from Perambalur in the Northeast and 75 km from Ariyalur in the Northeast, 57 km from Thanjavur in the East, 56 km from Pudukottai in the Southeast, 131 km from Madurai and 136 km from Sivagangai district in the South, 105 km from Dindigul in the Southwest, 83km from Karur in the West and 88 km from Namakkal in the Northwest. River Kaveri runs across the LPA from West to East for approximately 34 km.

2.2.1 Road Connectivity

The LPA is situated at about 330 km South-west of Chennai and 131 km North of Madurai City along Madurai–Chennai (NH-38). The major road networks in this region are given in the Table 2.1

Sl.No	Road	Connectivity
1	SH 62	North West-Towards Thuraiyur
2	NH 81	West- Towards Karur
3	NH 83	South West- Towards Dindigul
4	SH 26/ NH 336	South- Towards Pudukottai
5	NH 83	East- Towards Tanjore
6	NH 81	East- Towards Jayamkondan
7	Samayapuram toll NH-45/NH-38	North West- Towards Chennai
8	NH 38	South West- Towards Madurai

Table 2-1 Major Road Network

Verified by RealEstate™

The semi-ring road project proposed by the NHAI in 2006 linking the 5 National Highways passing through the City to decongest it is in the final leg of implementation after a few years of impasse with the work having begun in 2019 to link the Trichy- Karur NH at Jeeyapuram and Trichy- Madurai Highway at Panchappur.

2.2.2 Rail Connectivity

The City Railway Junction is located in the heart of the City. Tiruchirappalli junction is a major junction on the rail route connecting North and South of India for the trains passing towards Southeast, West, and North connecting major cities in Tamil Nadu and other states. There are frequent trains connecting the Headquarters Chennai and other major cities in Tamil Nadu passing through Trichy. Passenger trains also carry a significant number of passengers from nearby towns. There are 14 stations within Tiruchirapalli Local Planning Area.

Five rail lines branch separately from Trichy Junction:

- Towards north for Viluppuram Junction via Virudhachalam Junction
- Towards east for Viluppuram Junction via Thanjavur Junction
- Towards south-east for Karaikkudi Junction
- Towards south for Trivandrum Central via Dindigul Junction
- Towards west for Coimbatore Junction via Karur Junction

2.2.3 Air Connectivity

Tiruchirappalli International Airport (TRZ) spread over an area of 702.02 acres (284.10 ha), is located on National Highway 336, about 5 km (3.1 mi) South of the city centre. The airport handled by Airports Authority of India is served by two Indian and four foreign carriers providing direct connectivity to four domestic destinations, Bangalore, Chennai, Hyderabad, Vijayawada and ten international destinations, Kuala Lumpur, Singapore, Ho Chi Minh City, Colombo, Muscat,

Sharjah, Dubai, Abu Dabi, Doha & Kuwait. The airport is ISO 9001:2008 quality certified and was declared as an international airport in October 2012.

2.2.4 Sea Port

The nearest Port to Trichy is located at Karaikal an all-weather deep water port developed in an area of 611 acres and commissioned in April 2009. Since commencement of operations, the port has handled diverse cargo such as Coal, Iron-Ore, Limestone, Clinker, Sugar, Sand, Cement, Fertilizers, Project Cargo, Agro Commodities, Liquid Cargo and Containers. Karaikal Port caters to the northern hinterland of Tamil Nadu with multimodal connectivity. It is the only port located centrally between Chennai and Tuticorin at a distance of 300 km on either side. The port is capable of handling Dry Bulk, General Cargo (Break Bulk) and Liquid Cargo with overall cargo handling capacity of 21.5 MTPA.

The nearest international seaport, the V.O.Chidambaranar (VOC) port is located at Thoothukudi. It is one of the 13 major ports in India and is the third largest container terminal in India with a cargo handling capacity of 38.04 MTPA (2022-2023). The port is strategically located at the south-eastern tip of India. It is located about 280 km from Trichy, providing access to the Indian Ocean shipping route. They have two, large container handling terminals with state-of-the-art technology. It is an artificial deep harbour. There is a huge potential for goods transport from Trichy to the southern Thoothukudi port.

2.2.5 Freight movement In and Around Trichy LPA

Trichy being a heavy industry capital and one of the nodes of the proposed defence corridor of India and with other very important industrial cities like Coimbatore, Erode, Karur, Tiruppur all situated to the West, it is envisaged that Trichy will see an increase in freight movement from West to its East towards Karaikal Port. The cargo handling profile of the port signifies that the agricultural base and the industrial base of the central region of Tamil Nadu is contributing to the imports and exports and with increase in its volume over time, it will be

Verified RealEstate™

imperative to have the necessary infrastructure for cargo and logistics in tandem with appropriate road network in place for seamless connectivity in and out of the Trichy LPA.

2.3 History of the Region

Tiruchirappalli is believed to be of great antiquity and has been ruled by the Early Cholas, Early Pandyas, Pallavas, Medieval Cholas, Later Cholas, Later Pandyas, Delhi Sultanate, Malabar Sultanate, Vijayanagar Empire, Nayak Dynasty, the Carnatic state and the British at different times. The archaeologically important town of Uraiyur which served as the capital of the Early Cholas is a suburb of Tiruchirappalli. The timeline of the development of the Region is shown in the image below.

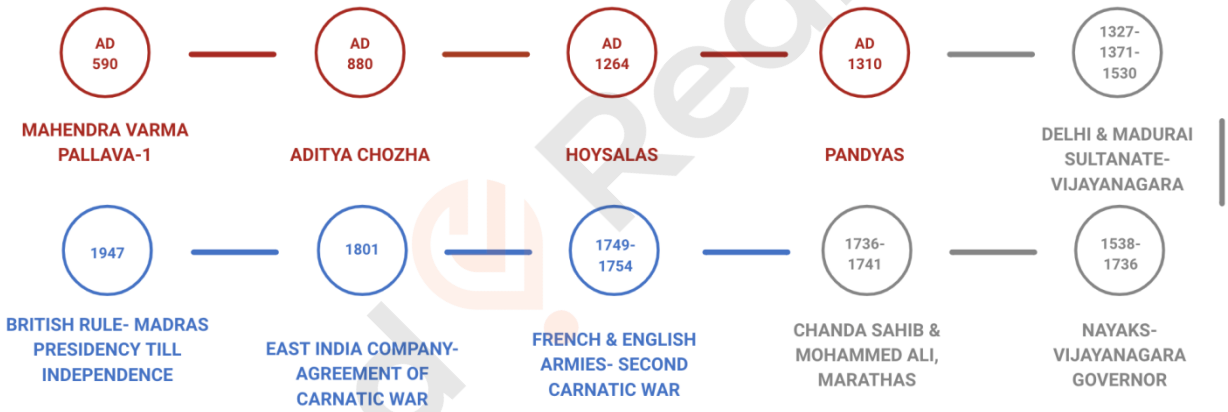

Figure 2-1Time Line

The influence of each rule has left its imprint on the cultural fabric of Trichy and its surroundings making it a City of cosmopolitan nature.

2.3.1 History of Tiruchirappalli Region

Tiruchirapalli is one of the oldest inhabited cities in Tamil Nadu. Situated on the banks of River Cauvery, Tiruchirappalli was the citadel of the Early Cholas. It is mentioned by Ptolemy in the 2nd century BC. Uraiyur, which served as the capital of the Early Cholas from the 3rd century BC to the 3rd century AD is a suburb of present-day Tiruchirapalli. The oldest human-built dam, Kallanai, was built by Karikala Cholan across the Kaveri River about 10 miles (16 km) from Uraiyur. Uraiyur

was known as 'Kozhiyur' during the Sangam period during which it became a great business center. The excavations conducted here reveal the antiquity and cultural pride of this town. Excavations reveal the trade relationship between Woraiyur and Rome.

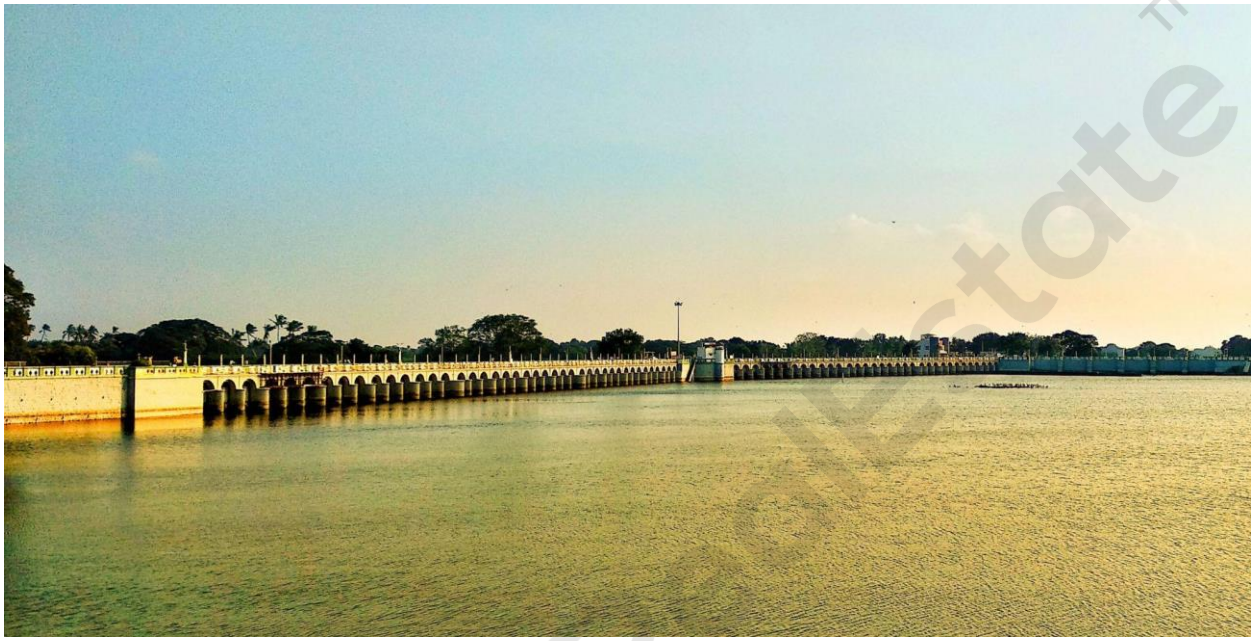

Figure 2-2 (100AD) Kallanai Dam built by King Karikalan.

The medieval history of Tiruchirapalli begins with the reign of the Pallava king Mahendravarman-I who ruled over South India in the 6th century AD. Mahendravarman laid the foundation of the Rockfort which is regarded as the cultural symbol of the city and is one of the oldest surviving monuments in Tamil Nadu. In the second half of the 9th century, Tiruchirappalli was reconquered by the Medieval Chola king Vijayalaya Chola who re-established Chola suzerainty over the region. Tiruchirappalli served as a regional stronghold and provincial capital of the Medieval Cholas under whom it reached the zenith of its glory. When the Chola Empire began to decline, Tiruchirapalli was conquered by the Pandyas who ruled from 1216 to 1311

.

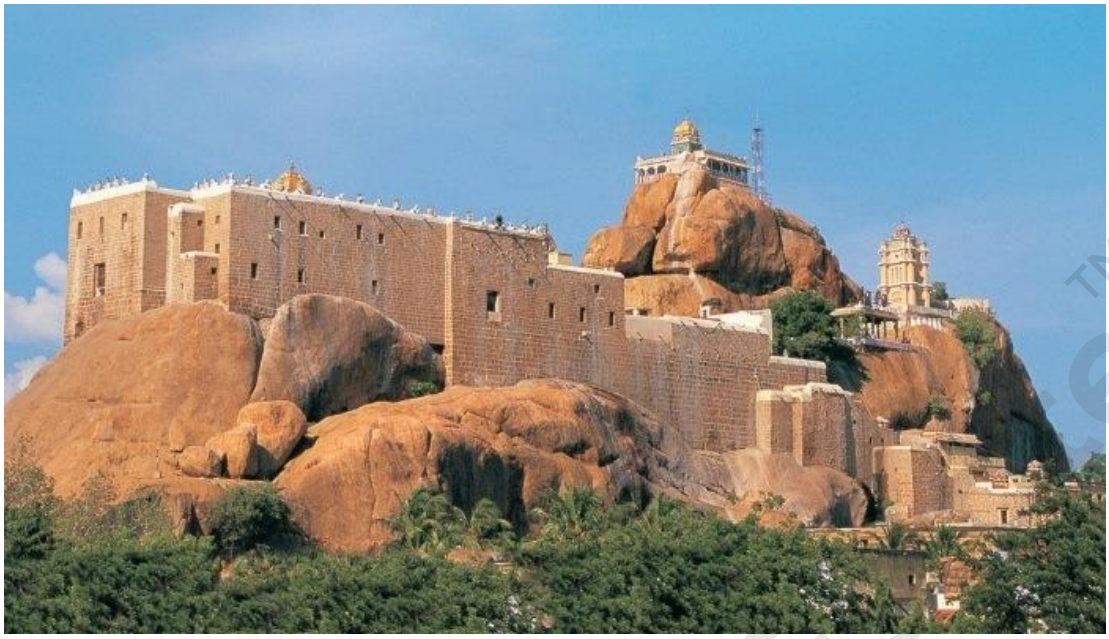

Figure 2-3 Rockfort Temple

Figure 2-4 Srirangam Temple

Srirangam was taken by Jatavarman Sundara Pandyan I in 1260 though there are Hoysala inscriptions in Tiruchirappalli district until the year 1296. In 1264 CE, Jatavarman Sundara Pandyan I fought and defeated the Hoysala King Vira Someshwara as attested by his inscription at the Sri Ranganatha Swamy Temple in Srirangam. There are also Pandya inscriptions from the reign of Maravarman Kulasekharal, Jatavarman Sundara Pandya II and Maravarman Kulasekhara II.

Malik Kafur defeated Vira Pandya at Kannanur and the victorious armies of the Sultanate are believed to have plundered and ravaged the kingdom and the temple of Srirangam was ransacked. The Delhi Sultanate managed to establish complete sovereignty over the Pandyan kingdom by 1327. The idol of Ranganathaswamy was moved to safety via Madurai, and through the Western Ghats to Travancore and finally moved to Tirupathi. The province of Ma'bar was created and ruled by viceroys appointed by Delhi. In 1335, the then viceroy, Jalaluddin Ahsan Khan declared his independence and founded the Madurai Sultanate. The early sultans had to deal with frequent incursions by Hoysala rulers. The attacks ended with the death of the Hoysala king Veera Ballala III at Tiruchirappalli in 1343.

The Muslim rule was later put to an end by the Vijayanagar prince Kampanna Udaiyar in 1371. Following the reconquest, the dilapidated Ranganathaswamy temple at Srirangam was restored to its former glory. The Vijayanagar Empire ruled the region from 1378 till the 1530s. Its rule was characterized by the revival of Hinduism and reconstruction of temples and monuments destroyed by the Muslim rulers. The province of Madurai was created and ruled by a viceroy or Nayak appointed by the Vijayanagar kings. When the Vijayanagar Empire began to decline in the early 1500s, the Nayaks began to assert their independence. The first independent Madura Nayak king was Viswanatha Nayak who ruled from 1538 to 1563. The Tiruchi range comprised five major paalayams: Udayarpalayam, Ariyalur, Marungapuri, Thuraiyur and Cuddalore. They constructed new mandapams at several temples, including the Srirangam Sri Ranganathaswamy Temple, and the Rock Fort. In 1616, Muttu Virappa Nayak moved the capital from Madurai to

Tiruchirappalli. In the 1623 civil war in the Vijayanagar Empire, Muttu Virappa Nayak supported Jagga Raya, a claimant to the throne against Yachama a rival claimant. In the battle fought at Toppur near Tiruchi, Jagga Raya was defeated and killed while Muttu Virappa Nayak was captured. In Muttu Virappa's absence, his son Thirumalai Nayak was crowned king. Thirumalai Nayak moved the seat of government back to Madurai in 1634. In 1665, his son Chokkanatha Nayak moved the capital once again to Tiruchirappalli. Chokkanatha Nayak partially dismantled the Thirumalai Nayak Mahal in Madurai in order to construct a new palace, now known as Rani Mangammal Mahal in Tiruchirappalli.

Figure 2-5 'Mosque of Nuthur, Trichinopoly' from Illustrated London News (c1875)

(Source : Antique wood engraved print)

Figure 2-6 Rani Mangammal Palace is now the Tiruchirappalli Government Museum

Chokkanatha died in 1685 and was succeeded by his wife Rani Mangammal, who is considered to be the greatest of the Nayak rulers. Mangammal was succeeded by her grandson Vijaya Ranga Chokkanatha during whose reign the kingdom went into irreversible decline. Vijaya Ranga died in 1731 and was succeeded by his wife Meenakshi, the last of the Nayak rulers. The Carnatic general Chanda Sahib invaded Tiruchi for the first time in 1734 when Meenakshi was the Nayak ruler. In 1736, Chanda Sahib returned to Tiruchi and in violation of the 1734 treaty, proceeded to make himself master of the kingdom & was given the title "Nawab of Tiruchirappalli" and ruled the state from 1736 till 1741, when he was defeated and captured by the Marathas and taken prisoner who later escaped in 1749. The Maratha general Murari Rao ruled Tiruchirappalli from 1741 to 1743, when the Nizam of Hyderabad invaded Tiruchirappalli and bribed Murari Rao to hand over the city. In 1749, Anwaruddin Mohammed Khan, the Nawab of Carnatic died, and Chanda Sahib took over the government after driving out the principal claimant Muhammed Ali Khan Wallajah from Arcot. Muhammed Ali Khan Wallajah sought refuge in the fortress of Tiruchirappalli which Chanda Sahib besieged with the help of the French East India Company provoking the British East India Company to come to the rescue of the exiled Nawab. The British allied with the Marathas and sent three armies, which after some initial setbacks, successfully forced Chanda Sahib and the French to come to terms with them. This long standing conflict is considered the Carnatic War 2. Chanda Sahib surrendered to the Marathas but was treacherously beheaded. Muhammed Ali Khan Wallajah was enthroned with British assistance and he agreed to pay a regular tribute to them.

Suspecting the Carnatic ruler, Umdat Ul-Umra of having given clandestine support to Tipu Sultan during the Anglo-Mysore Wars, the British East India Company took over the kingdom in 1801 and reduced the Nawab to the status of a titular ruler. The district of Trichinopoly was created and Tiruchi city was made its capital. A cantonment of the Madras Regiment was set up in Tiruchirappalli.

Verified © RealEstate™

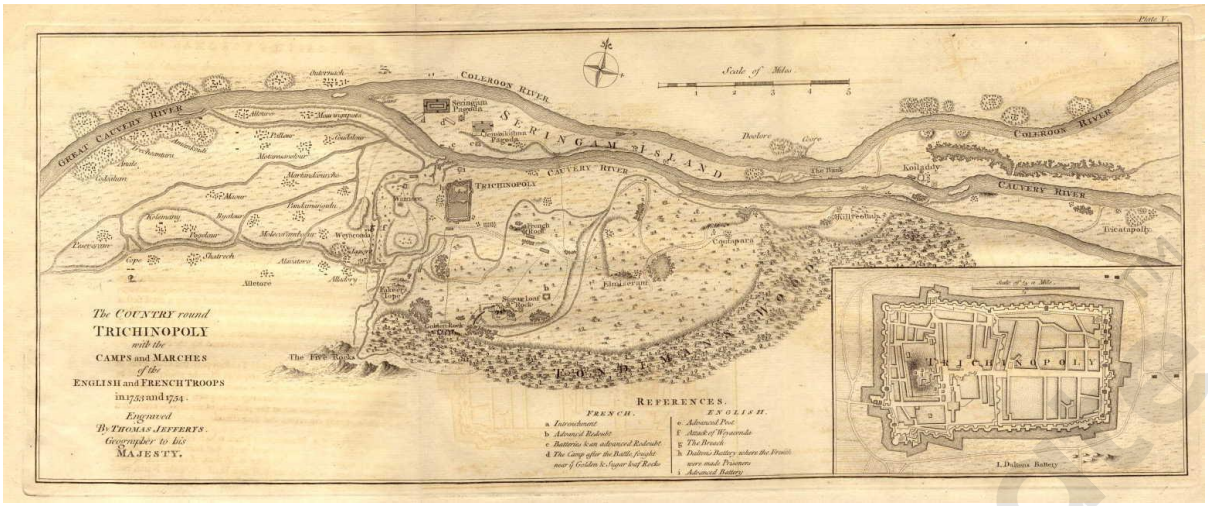

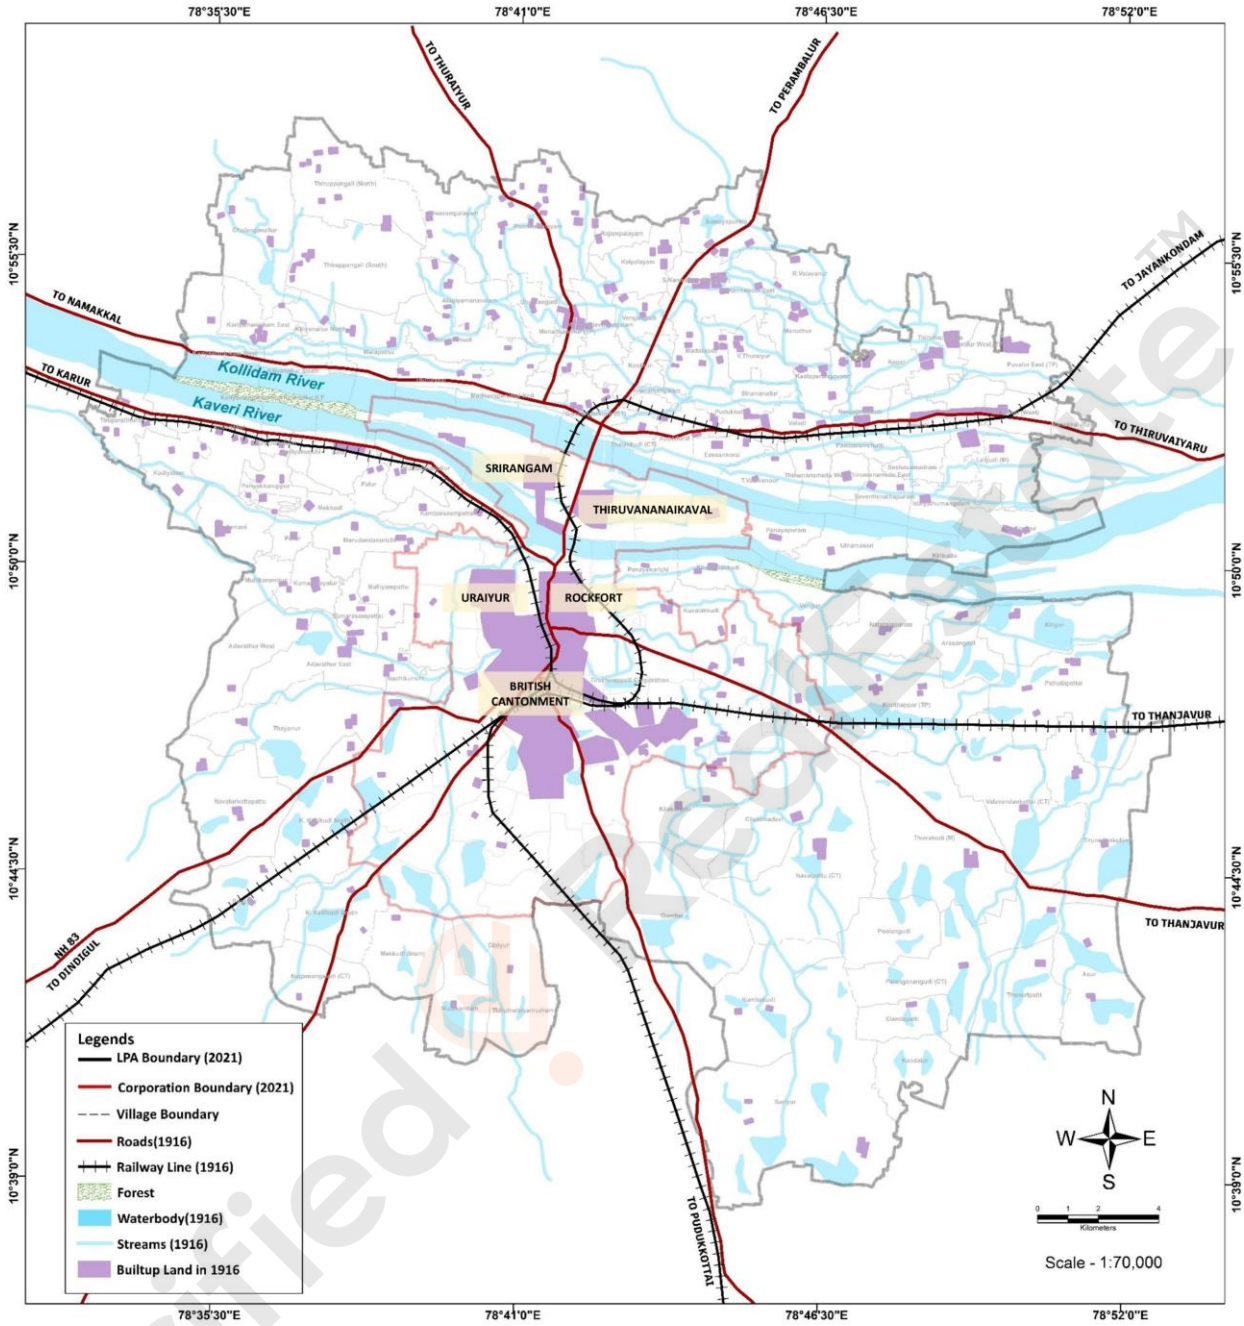

Figure 2-7 Map of the encampments of the French and British army near Trichinopoly, 1753-4. Second Carnatic War (1749-54).

During the Company Raj and later the British Raj, Tiruchirappalli emerged as one of the most important cities in India. The first Indian census conducted in 1871 returned a population of 76,530 for Tiruchirappalli making it the second largest city in the Madras Presidency, next only to the capital city of Madras. During the 19th century, Tiruchirappalli was famous throughout the British Empire for its unique variety of cheroot, known as the Trichinopoly cigar. The Great Southern Railway Company was established in 1853 with its headquarters at Tiruchirappalli. In 1859, the company constructed its first railway line connecting Tiruchirappalli and Nagapattinam. The company was merged with the Carnatic Railway Company in 1874 to form the South Indian Railway Company. The South Indian Railway Company moved one of its principal workshops from Nagapattinam to Tiruchirappalli, establishing the Golden Rock Railway Workshop in 1928.

Tiruchirappalli played an important part in the Indian Independence Movement. Many of its leaders such as V. V. S. Aiyar, P. Rathinavelu Thevar and T. S. S. Rajan hailed from Tiruchi. Tiruchi played an active role in the 1928 South Indian Railway Strike which lasted over three months. There were also strikes and non-violent protests during the Quit India Movement.

Post independence, the City though was growing in population, fell behind other Cities like Salem & Coimbatore in terms of economic growth. The city underwent extensive economic development in the 1960s with the commissioning of Bharat Heavy Electricals Limited. In the late 1970s, the then Chief Minister of Tamil Nadu, M. G. Ramachandran planned to move the administrative headquarters of the state to Trichy but the move was later shelved by successive governments.

The history of the region can be referred to in detail from the works of F. R. Hemingway (1907) "Madras District Gazetteers: Trichinopoly" and Aiyangar, S. Krishnaswami (1921) "South India and her Muhammadan invaders", Oxford University Press.

2.3.2 History of Tiruchirapalli LPA

The municipality of Trichinopoly was created in 1866 as per the Town Improvements Act of 1865 followed by the municipality of Srirangam in 1871 and Golden Rock in 1972. The three municipalities were merged in 1994 to form the Tiruchirappalli municipal corporation with 60 census wards according to census 2011. In 2011 6 more villages were added to the corporation namely Tiruverumbur, Ellakudi, Agaram, Alattur, Pappankurichi and Keelakalkanarkottai to form the present day corporation with 65 Census wards and an area of 166.58 sq.km. The Corporation Ward Map used for preparing the Master Plan 2041 is shown in Map 2.9. which shows the Census wards present in the Census 2011. As of 2023, the Trichy Corporation is divided into 5 zones namely Srirangam, Ariyamangalam, Thiruverumbur, Goldenrock and Abhishekapuram and the wards which fall in each zone is shown. The ward correlation for the Old and New Wards is shown in the Table 2.2. The other Urban administrative bodies forming the Trichy LPA and their

details are provided in the following section.

Thuvakudi municipality was elevated from selected major Panchayat to 3rd grade Municipality from 10.7.2004 in accordance with the G.O M.S.No.277 MAWS dt: 5.7.2004 for up gradation . Now it is functioning as a 2nd grade Municipality from 9.8.2010 onwards. This municipality is functioning in two divisions as Thuvakudi and Thuvakudi Malai. Lalgudi Town located in Tiruchirappalli District functioning as Selection Grade Town Panchayat was upgraded to Second Grade Municipality as per G.O.No.117 Municipal Administration and Water Supply Department dated 17/12/2021. Sirudaiyur, Abishekapuram Lalgudi and Mummudi Cholamangalam are part of Lalgudi Municipality.

Koothappar is a First Grade Town Panchayat which is located in Trichirappalli Taluk, Tiruchirappalli District and Tamil Nadu. Koothappar town Panchayat is located on Trichy-Tanjore Main Road at a distance of 3 Km to the North. The Town Panchayat was upgraded as First Grade Town Panchayat in the year of 1984. Krishnasamudram including Semmankulam villages are part of Koothappar Town Panchayat. Eight wards are separated by BHEL Institution.

Mannachanallur Town Panchayat was established as Panchayat vide G.O.No.419, Dated : 15.02.1889 of Chennai Sthal Sthabanam and Municipal Administration, after that it was upgraded as Town Panchayat vide G.O.No.1258, Dated : 07.06.1944. Now, it is functioning as Selection Grade Town Panchayat vide upgrading vide Ni.Mu.No.167716/1979, Dated : 21.10.1970 of Chennai Municipal Administration and Panchayat Dept. The Town Panchayat is a Union of 3 villages Ulunthangudi, Manachanallur & Melaseedevimangalam. Puvalur Town Panchayat is a Union of Puvalur East & West villages and is located to the North East of Lalgudi Municipality.

S.Kannanur Town Panchayat is located in the Mannachanallur Taluk. The Extent of the Town is 4.5 Sq.Km. It consists of 9 hamlets and two Revenue villages S.Kannanur West & S.Kannanur East. It is a glorious Pillgrim centre with Samayapuram Arulmigu Mariamman Kovil, Ananthavalli Bojeeswarar Temple and Arulmigu Ujjaini Om

Verified RealEstate™

Kaliamman temple located in this Town Panchayat. It is one of the important Pilgrim Centres in the State.

Figure 2-8 Samayapuram in Kannur TP

Figure 2-9 BHEL in Koothappar TP

The river Cauvery flows in the middle of the city segregating Srirangam town as an island sandwiched between River Cauvery and Coleroon. Owing to the religious importance of Srirangam this part of the town recently experiences massive vertical development. Beyond Kollidam on the Northern side, Bikshandarkovil is developing as an urban node with hectic residential and commercial developments up to Samayapuram and beyond. On the eastern side of the City along Thanjavur Road, Bharat Heavy Electricals Limited is located and the developments from Bharat Heavy Electricals Limited area merge with the developments emanating from Tiruchirappalli Corporation. On the southern side, traverses Pudukottai road where Airport, Navalpattu, I.T Park area are located apart from the Housing colony developed under Tamil Nadu Urban Development Project. All these developments created land scarcity in this area and resulted in gloom in the land market. Taking advantage of this trend, a lot of unauthorized developments have sprung up in the area. On the western side Vayalur road became a crucial plank and experienced a lot of residential development mostly unauthorized up to Vayalur. Navalpattu New Town Development Area where major industrial and institutional developments such as Bharat Heavy Electricals Limited, Ordnance factory, HAPP, National Institute of Technology, SIDCO Industrial Estate etc., came up triggered a spurt of urban Development in and around this

area. Considering the ongoing Developments in and around Tiruchirappalli Corporation, it is essential to revisit the delineation of the planning area and to establish an effective mechanism with specific powers to enforce, regulate and develop the city as envisaged in the development plans. In order to have comprehensive planning, it is necessary to delineate the development area afresh.

3. DEMOGRAPHY

3.1 Population Distribution

Tiruchirappalli Local Planning Area has a total population of 14.33 lakhs as per 2011 census. Tiruchirappalli Urban area, which includes Corporation of Tiruchirappalli, Thuvakudi and Lalgudi Municipalities and 4 Town Panchayats contributes 73.56% of the total population in Tiruchirappalli Local Planning Area.

The population of Tiruchirappalli Local Planning area in 2001 was 12.38 lakhs, which has grown to 14.33 lakhs in 2011 at a decadal growth rate of 16.28%, with an area of 804.55 sq.km. The population of the Tiruchirappalli Corporation constitutes 63.88% of the population of the Tiruchirappalli Local Planning Area. The density of population of the Tiruchirappalli Corporation is 55 persons per hectare (pph). The areas with high growth rate, which varies from 48-73%, are Srirangam, Thiruverambur, Navalpattu, Manachannallur and Lalgudi. The extraordinary growth rate of Srirangam is due to spiritual importance of the area. The growth rates of the outgrowth areas exceed that of the other areas in Tiruchirappalli.

3.2 Growth Rate

The compound annual growth rate of Tiruchirappalli Local Planning Area 2001-2011 is 1.52%, 1.33% for urban area and 2.08% for rural area. The growth rate is higher in rural areas due to the increase in urbanization and new project developments. The Average Compound Annual Growth Rate (CAGR) for 1971 to 2011 is observed based on Census data. Also, the CAGR for the last decade (2001 – 2011) is also observed based on Census data.

S. No	Year	Urban		Rural		Total Population	Growth Rate of LPA %
		Population	Growth Rate %	Population	Growth Rate %		
1	1961	427208	-	172532	-	599740	-
2	1971	553342	30%	206424	20%	759766	27%
3	1981	685264	24%	228409	11%	913673	20%
4	1991	820699	20%	279168	22%	1099867	20%
5	2001	923947	13%	308601	11%	1232548	12%
6	2011	1054194	14%	378973	23%	1433167	16%

Table 3-3 Growth Rate (Census)

The table shows rural areas growth rate increasing more than the urban in the last decade. From the observations made from the previous years, the growth rates of the peri-urban areas are more than the urban areas. Development in LPA urban areas is saturating, and the development is decentralized.

This can be ascribed partly to the location of 6 census towns within the LPA. Census towns by definition, according to the Census 2001 of India are villages with i) more than 5000 population, ii) more than 75% of its population involved in non agricultural activities as their primary occupation and iii) a density of population of at least 400 persons per sq. km. The 2011 census featured a remarkable increase in the number of census towns, which nearly tripled between 2001 and 2011, from 1,362 to 3,894. This increase contributed to nearly a third (29.5 percent) of the total

Verified © RealEstate™

increase in the urban population during this period. Only part of this evolution can be attributed to the gradual urbanization of settlements in the vicinity or larger towns. Instead, the majority of census towns appear as small "market towns," providing trade and other local services to a growing rural market (Mukhopadhyay, et.al., 2016). Some Census town developments seem to have been triggered due to investment in infrastructure in the vicinity.

Based on the above observations, the 6 census towns that are part of the Trichy LPA can be categorized as shown in the following table-

Sl.No	Name	Type of Census Town
1	Navalpattu CT	Development induced (NTDA)
2	Vazhavanthankottai CT	Development induced (NTDA)
3	Palangangudi CT	Development induced (NTDA)
4	Pichandarkovil CT	Market Town
5	Thalakudi	Market Town
6	Nagamangalam	Development induced (Slum Housing Board)

Table 3-4 Type of Census Towns

The population of these towns and their population density can be found in Table-3-4. It is interesting to observe that 3 Census Towns are located in the old NTDA area and are in close proximity of the Town Panchayats Thuvakudi and Koothappar showing that they together form an urban agglomeration. The Census Towns Pichandar Kovil and Talakudi are located at the junction of NH 38 from Chennai to the North and SH 25 to the West and SHU to the East, thereby becoming an important Market town for the nearby villages. It is also worth observing that these towns are in close proximity to Manachanallur Town Panchayat. Nagamangalam Census Town has been seeing a lot of investment in infrastructure projects including housing in the past decade.

3.3 Population Density

The population density of Tiruchirappalli Local Planning Area is 1,781 persons per sq.km, which is higher than the Tamil Nadu state average of 880 persons per sq.km, an important reason being the presence of Tiruchirappalli city as one of the highest urbanized cities of Tamil Nadu state offering employment and business opportunities.

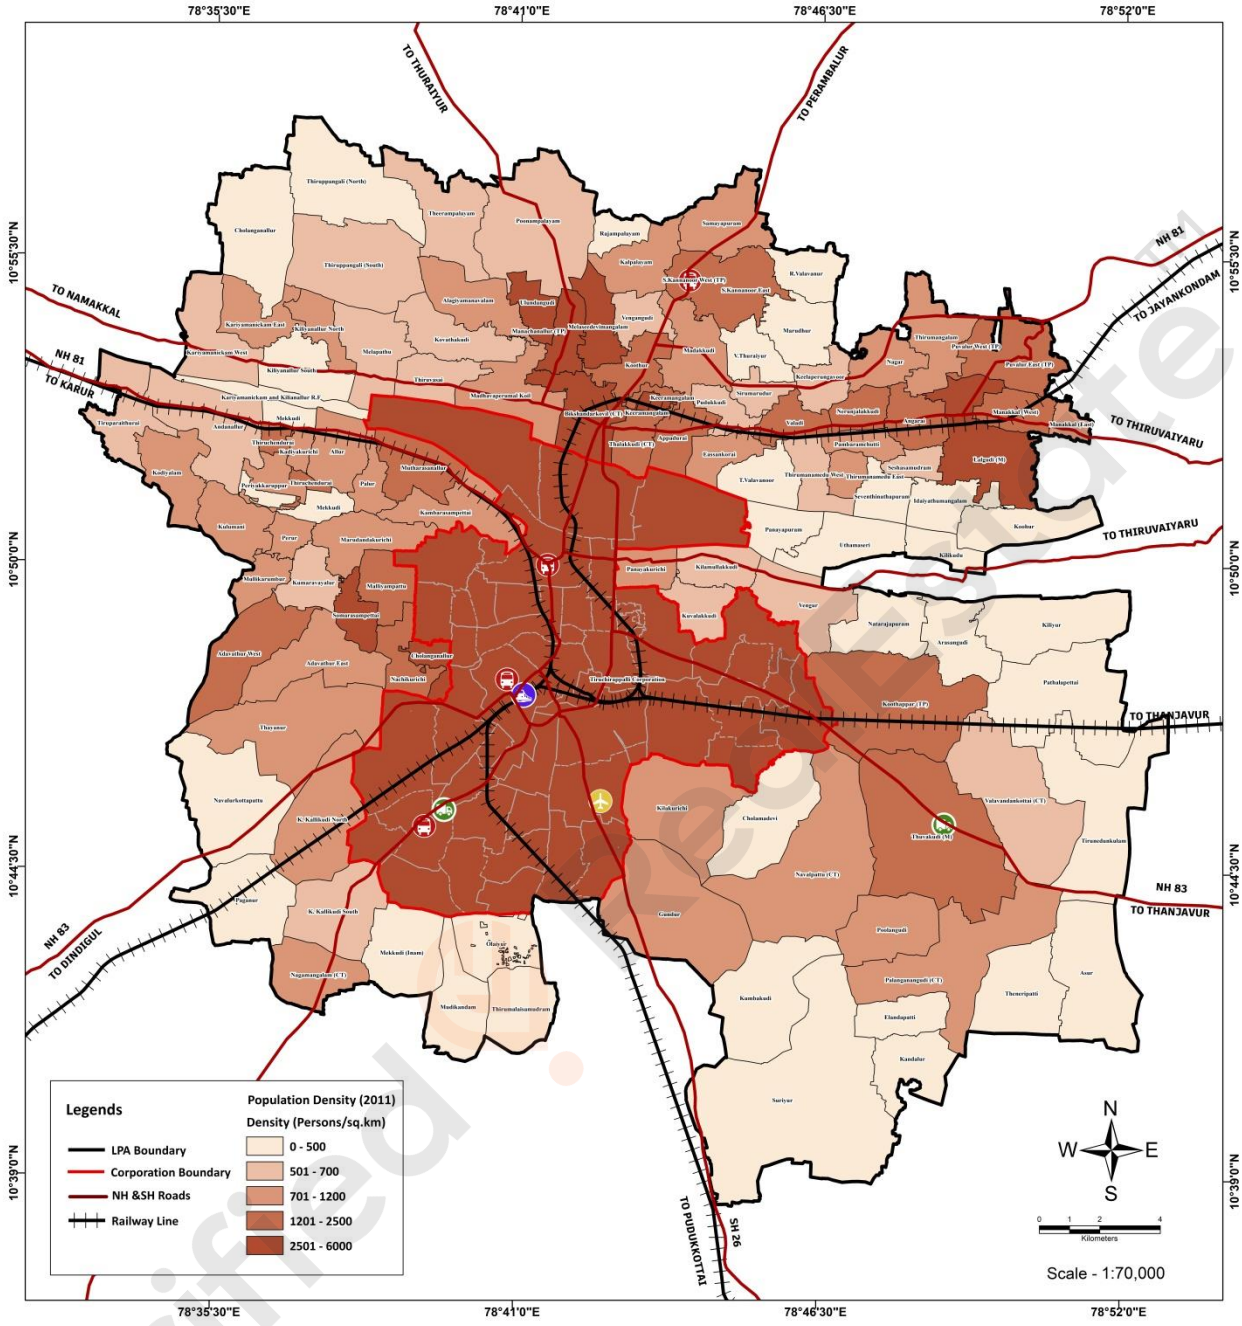

Sl. No	Administration	Population 2011	Area (Sq.km)	Density 2011 (persons per Sq.km)
1	Tiruchirappalli Corporation	9,15,569	167.23	5475

3.4 Sex Ratio

The sex ratio of the Tiruchirappalli Local Planning Area is 1013, which is higher than the average of Tamil Nadu state which is 996 as well as the other districts nearby the study region.

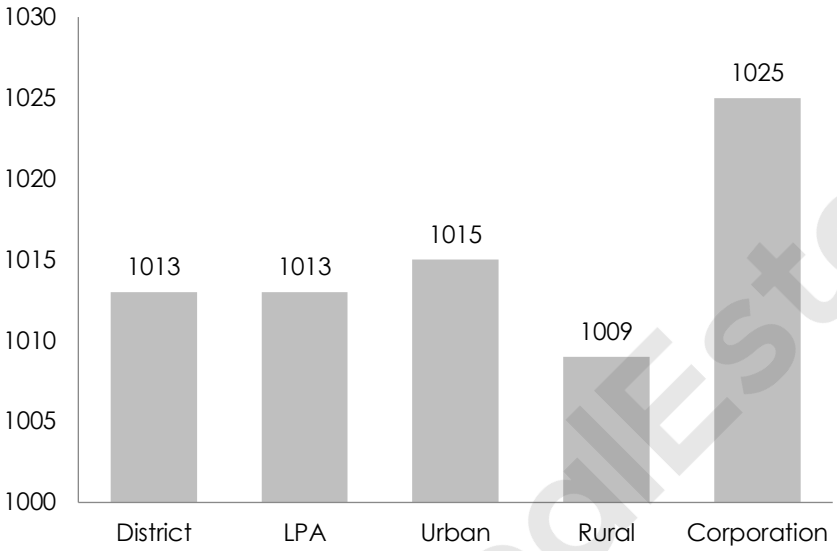

Figure 3-1 Sex Ratio (Census 2011)

3.5 Schedule Caste and Schedule Tribes Population

Out of the total population of Tiruchirappalli Local Planning Area, nearly 14.71% belong to Scheduled Caste category while only 0.31% of population belongs to Schedule Tribe category.

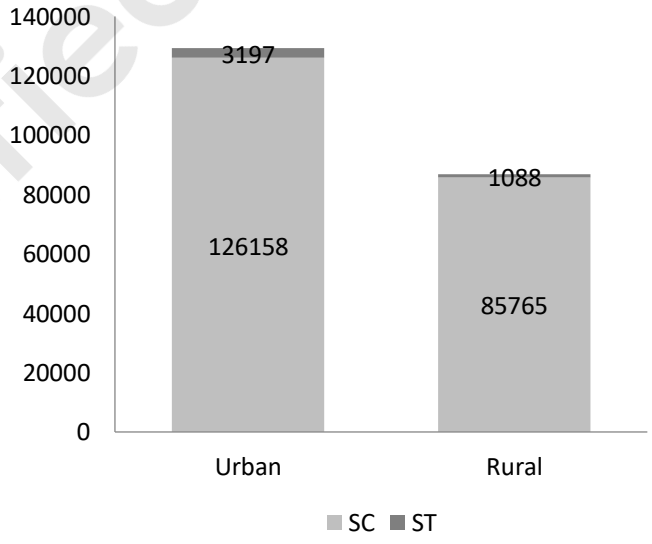

Figure 3-2 SC & ST Population

Verified RealEstate™

3.6 Literacy Rate

Development is a dynamic process, and it requires educated, skilled, and competent people. Literacy plays important role in providing skilled work force as well as literate consumer demands more for better lifestyle. Literacy rate refers to the number of literate populations to the total.

Area	Literacy		
	Total	Male	Female
Tiruchirappalli Corporation	82.78%	85.63%	80.00%
LPA	80.74%	84.47%	77.06%
District	83.23%	89.772%	76.87%

Table 3-10 Literacy Rate (Census 2011)

The literacy rate of Tiruchirappalli Local Planning Area is 80.74% which is nearly equal to the than the district rate of 83.23%. The female literacy rate of Tiruchirappalli Local Planning Area is 77.06% which is higher than the female literacy rate of the district.

Female literacy is lower than the male literacy both in Urban and Rural areas. Considering that females are more than males according to the sex ratio and comparing it with the literacy rate, it shows that women education has to be improved. Literacy rate is increasing at a good pace.

3.7 Population Projection

Population projection is the future projection of past data. Using historical data, it helps predict a city's future expansion and offers a baseline for estimating the amount of land and infrastructure needed. Projections of the population's size aid in assessing the demand for services across various demographic groups.

3.7.1 Population Projection Methods

There are several techniques for projecting population growth, including

geometrical increase, exponential, incremental increase, decreasing growth rate, graphic, and geometric progression methods. Depending on the purpose and characteristics of the region being projected, several techniques are employed. In the Tiruchirappalli LPA, the following techniques have been used to project the population through 2041:

- Arithmetical Progression method
- Incremental Increase method
- Geometrical Increase method

For projecting future population, Tiruchirappalli LPA has been classified into four types based on the nature of Urban and Rural local bodies. They are as follows,

- Tiruchirappalli Corporation
- Municipality
- Town Panchayat
- Rest of LPA

3.7.1.1 Arithmetic Progression Method

The underlying premise of this approach is that population growth is steady. Using historical census data, this method determines the average population growth per ten years. The population of the upcoming ten years is calculated by adding this increase to the current population.

dP/dt = C i.e., rate of change of population with respect to time is constant.

Population after nth decade will be Pn= P + n.C

Where, Pn is the population after n decade and P is present population.

Verified RealEstate™

3.7.1.2 Incremental Increase Method

This approach is a variation on the arithmetical increase method, works well for average-sized towns in typical circumstances where the pace of growth is observed to be growing. When using this method, future population calculations take the rise in increment into account.

Population after nth decade is Pn = P+ n.X + {n (n+1)/2}. Y

Where, Pn = Population after nth decade

X = Average increase and Y = Incremental increase

3.7.1.3 Geometrical Increasse Method

This approach makes the assumption that population growth will not change over the next ten years. The projected population increase is calculated using the geometric mean increase. Given that this approach produces better results, it should only be used for newly developed industrial towns that will exist for a few decades.

Pn = P (1+ IG/100) n

Where, Pn = Population at the end of nth decade

IG = geometric mean (%)

P = Present population

n = No. of decades

Table 3-15 Population Projection – Rest of LPA

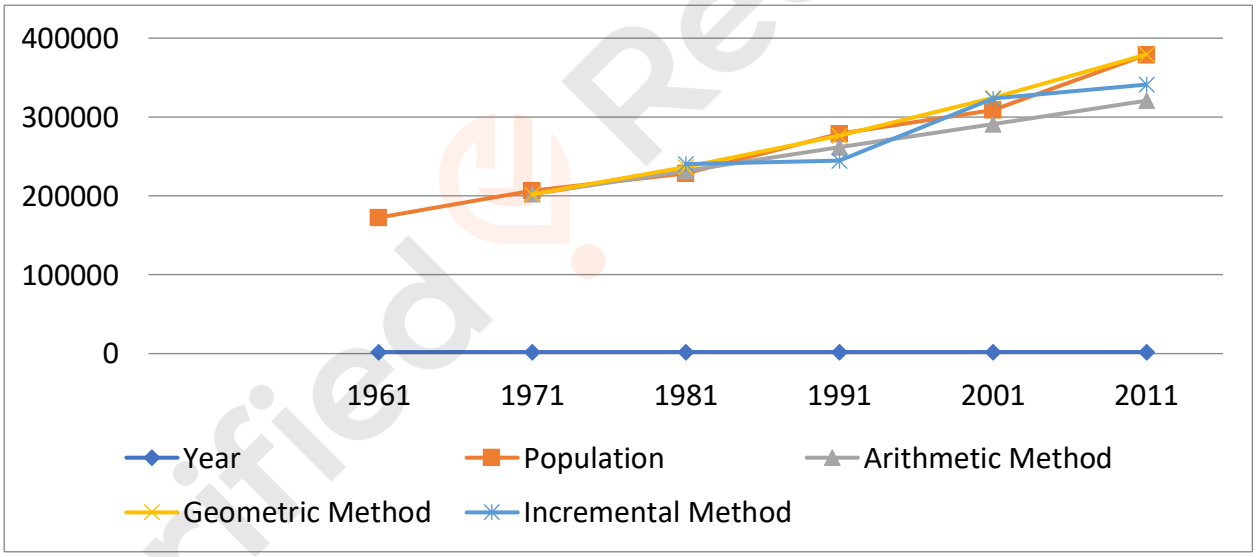

Figure 3-7 Population Projection – Rest of LPA

3.7.3 Population Projection of LPA

Population projection for the Tiruchirappalli Local Planning Area, carried out based on comparing three methods of projection namely Arithmatic, Geometrical and incremental methods. Then the values of the three methods are compared with

the projected scenario for 2011 then the low margin method is taken into the consideration while projecting the population.

Geometric projection gives the values closest to the actual values. Therefore, Geometric projections are taken for future projections except Thuvakudi municipality. Since the growth rate of Thuvakudi is high, incremental increase method values closest to the actual value. Thus Thuvakudi Municipality population is projected by Incremental increase method and rest of LPA population is projected by Geometric method.

Description	2011	2021	2031	2041
Tiruchirappalli Corporation (Geometric Method)	915569	1089019	1295327	1540720

PHYSICAL FEATURES

VerifiedRedEstate™

4. PHYSICAL FEATURES

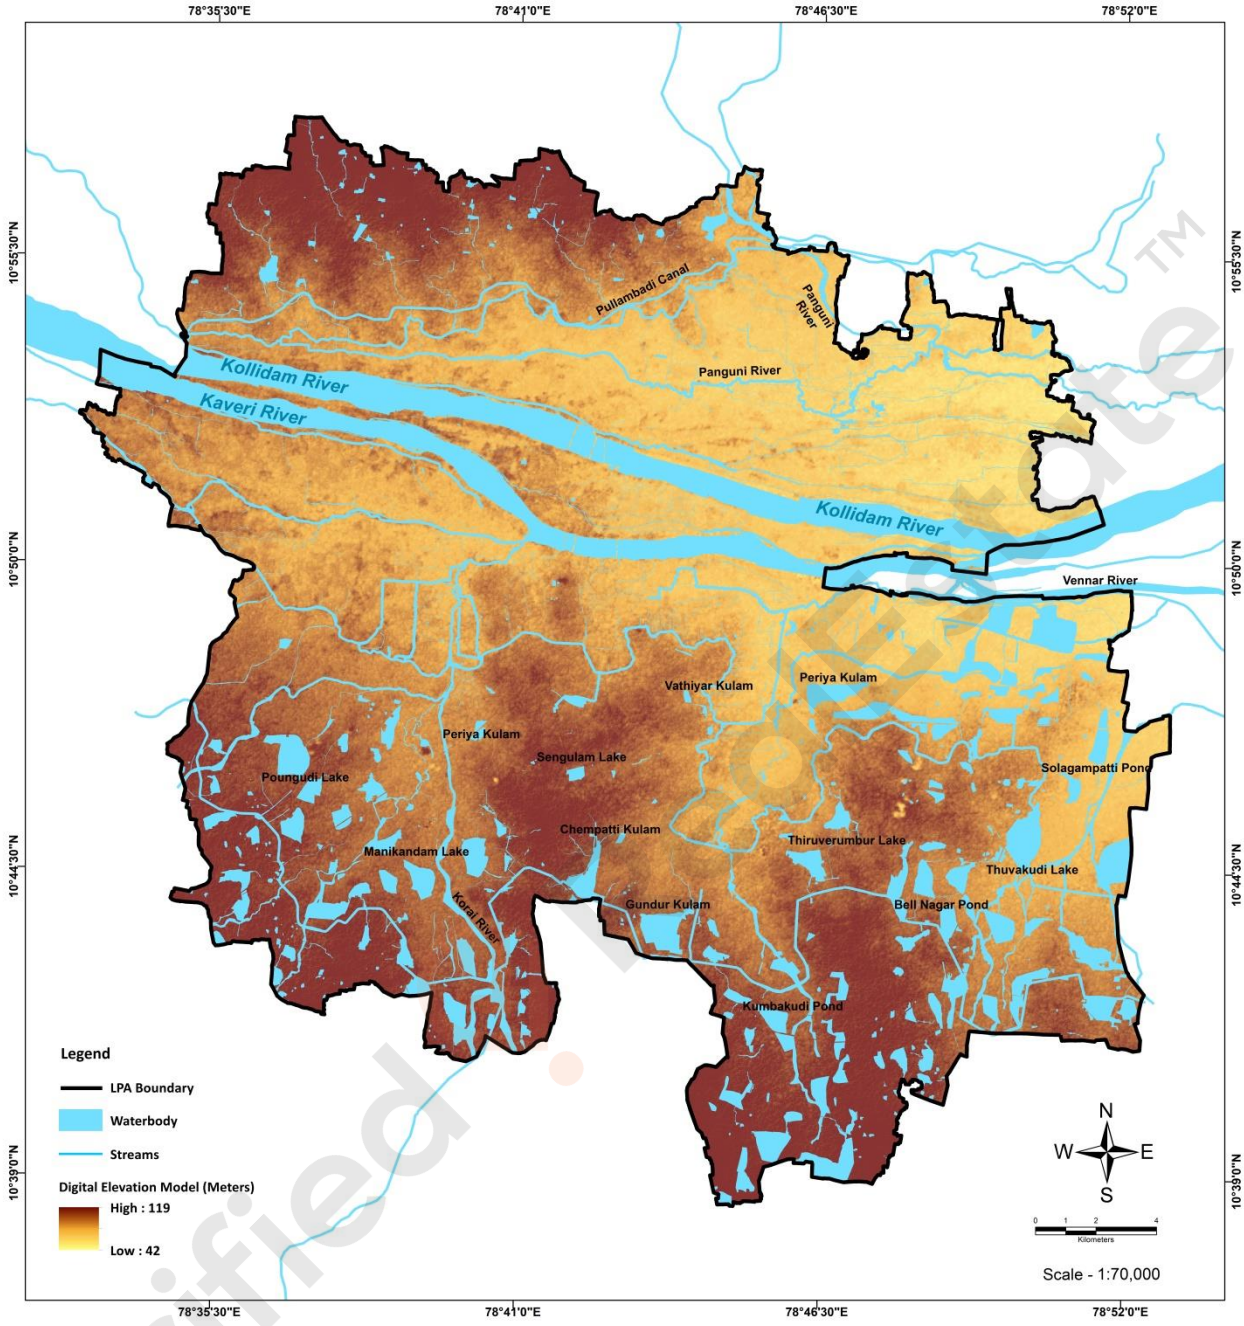

4.1 Geography

The Geographical area of Tiruchirappalli district is 4, 40,383 hectares (4403.83 sq.km) accounting for 3.38 percent of geographical area of Tamil Nadu State.It is situated almost at the geographic central point of the state Tamil Nadu.For administrative purpose, this district has been bifurcated into 8 Taluks, 14 Blocks and 41 Firkas. The city is located at a latitude of 10.8050°N and longitude of 78.6856°E. Tiruchirappalli spread over an area of 146.7 square kilometres bordered on the north by Salem District, on the northeast by Perambalur District, on the east by Thanjavur District, on the southeast by Pudukkottai District, on the south by Sivaganga and Madurai districts, on the southwest by Dindigul District, on the west by Karur District, and on the northwest by Namakkal District.

4.2 Topography

The terrain of trichy is almost flat with few isolated hill rocks one of the highest of which is Rockfort. The average elevation of the district is indicated as 289 feet (88m) approx. and also poses a few stranded mounds mounting higher up to the surface. The city is situated at the head of the Cauvery Delta which commences 16kilometres (9.9 mi) west of Tiruchirappalli where the Cauvery River branches into two streams forming the island of Srirangam. A belt of cretaceous rock known as the Trichinopoly Group lies to the north of the city. It commences from the banks of the Kaveri River and extends northwards gradually thinning before joining another belt of cretaceous rock known as the Ariyalur Group. Both the northern and southern corners of the Trichinopoly Group rests on a layer of gneiss.

Verified RedEstore™

Map 4-1 LPA Digital Elevation Model

4.3 Climate and Rainfall

The district experiences tropical savanna climate with no major change in temperature in summer and winter climates. It also experiences monsoon seasons. Thiruchirapalli is extremely hot during daytime in the summer months from March to May and is rendered by cold winds that blow in the evenings from south east. It is sultry during September and October but cool from November to February. Fog and mists are very rare occurrences and the district receives major share of its rainfall from North East monsoon. Northeastern monsoon occurs during November – December during which it receives intermittent rainfall of 722.6 mm. The maximum temperature goes up to 37.2ºC and minimum temperature down to 20.6ºC. Usually mornings are more humid than afternoons. The relative humidity varies between 50 and 85% in the mornings while in the afternoon it varies between 70 and 92%.

4.4 Lineaments

The prominent lineaments trend in E-SW, NNE-SSW, NW-SE and E-W directions. Some of these fracture zones persist to depths and may form potential aquifers in the area. Productive joints have been encountered down to a depth of about 100 m bgl in the wells drilled for rural water supply by the Ground Water Department and Tamil Nadu water Supply and Drainage Board. The yield of these wells at the time of drilling and development ranged from less than 1 to 10 lps. The depth of drilling in the district through outsourcing for drought proofing work was in the range of 92 to 200 m bgl. The wells encountered three to five fracture zones with two fracture zones down to 50 m and two fracture zones in the depth range of 100 – 150 m and one fracture zone deeper than 150 m.The yield of these wells varied from <1 to 9 lps.

4.5 Geology

Tiruchirappalli district is broadly classified into hard rock and sedimentary formations. It exposes crystalline rocks of Archaean and Proterozoic age, Upper Gondwana Formations, sedimentary rocks of Mesozoic age, Miocene and Quaternary sediments. In the LPA the regions such as Trichy, Samayapuram, Thottiyam, Thuraiyur and parts of Lalgudi taluks are covered by hard rocks of granite, gneisses and charnockite, Whereas some parts of lalgudi taluks are covered by sedimentary formations such as Gondwana, Cretaceous and Quaternary. The Quaternary formation stretches mainly along the river courses of Cauvery and Coleroon. They are composed of fluvial deposits which are medium to coarse grained sediments and finer flood plain deposits. The alluvium overlies the Archaen formation which is mainly occurs in the tracts of Lalgudi taluks of LPA.

4.5.1 Geological Landforms

Charkonite: Ground water occurs under water table conditions. The intensity of weathering, joints or fractures is much less compared to gneiss formations. These are not good water yielding zones except in regions of fractures and joints. The occurrence of kankar materials hinders water yielding capacity.

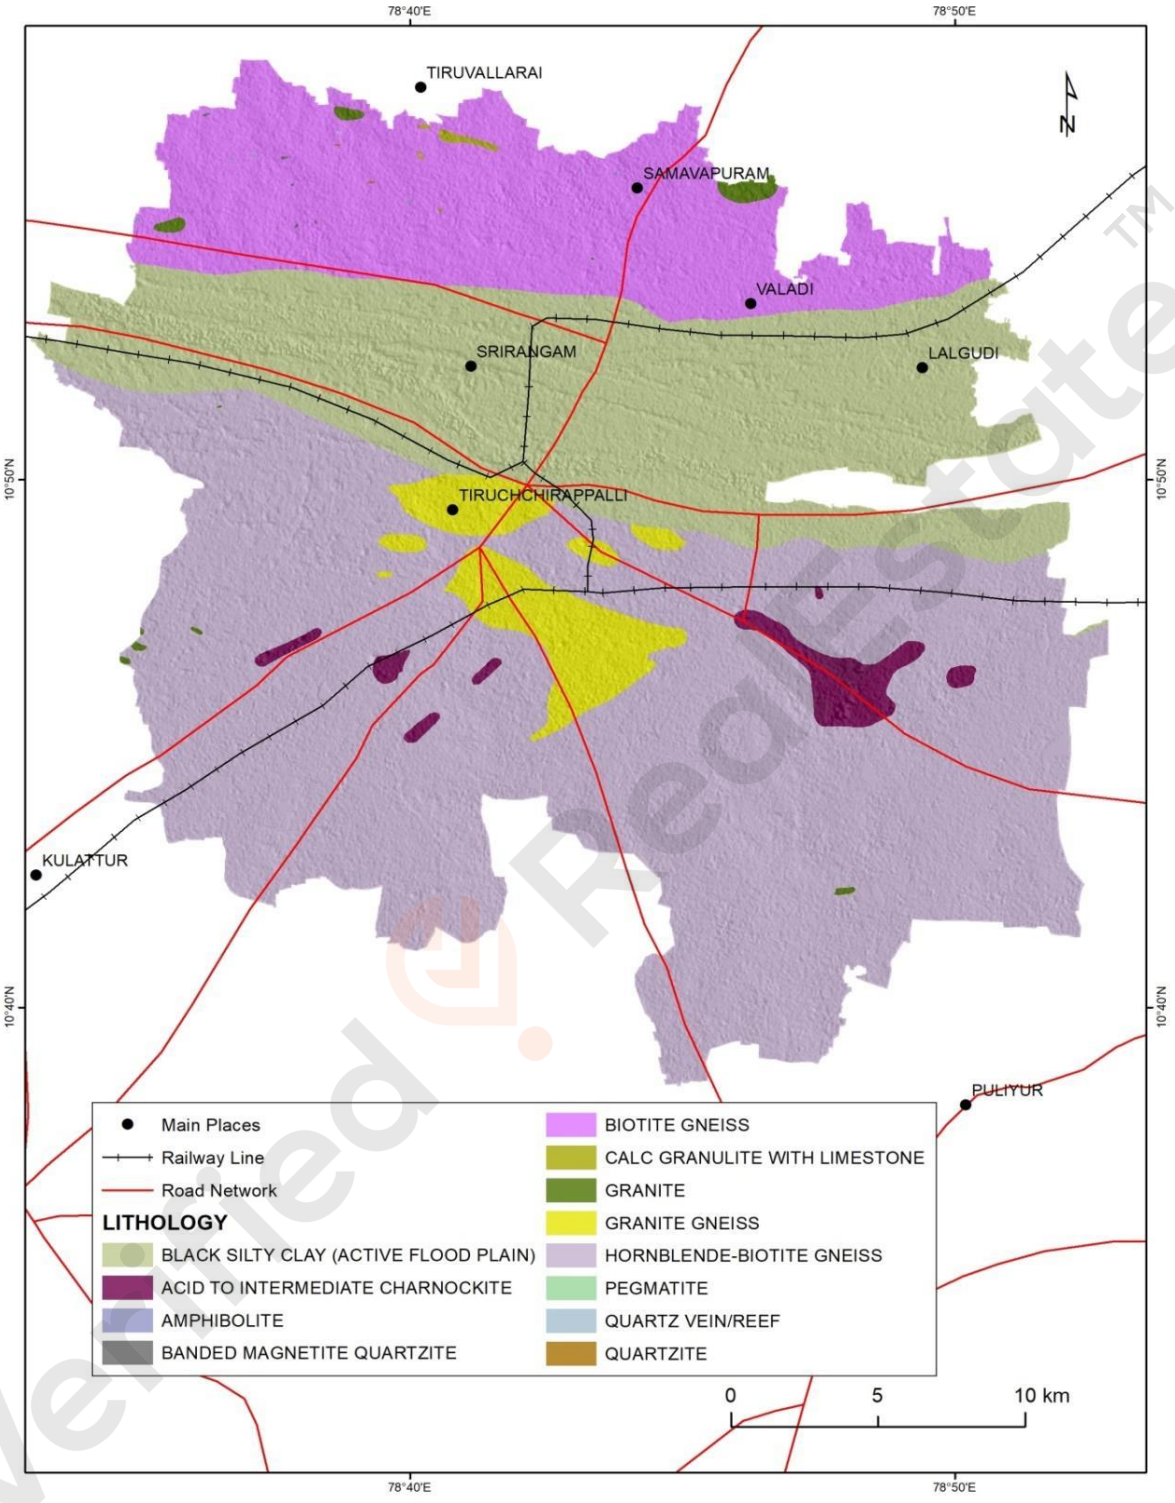

Gneiss: Groundwater occurs under water table in weathered, joint and fractures formation. The pore space developed in the weathered mantle acts as shallow

Verified RealEstate

granular aquifers and forms the potential water bearing and yielding zones. Water table is very shallow in river; canal and tank irrigated regions whereas it is somewhat deeper in other regions. Both the northern and southern corners of the Thiruchirappalli rest on a layer of gneiss.

Sedimentary: A belt of cretaceous rock lies to the north of the city. It commences from the banks of the Kaveri River and extends northwards gradually thinning before joining another belt of cretaceous rock. Only limited quantity of groundwater can be extracted from these formations through dug wells and bore wells. The alluvial formations are noticed on either side of the Cauvery and Coleroon river. They consist of mainly sand, gravels, clays and sandy clay. The maximum thickness of alluvium is 30.0 m and the average thickness of the aquifer is approximately 15.0 m. These formations are porous and permeable which are good water bearing zones. The sedimentary deposits like lime stone, gypsum, fire clay, steatite, kankar, soap stone and phosphatide nodules are occurring in Dalmiapuram and Pullambadi region in the LPA.

Verified RealEstate™

Map 4-2 LPA Geology Map

4.6 Geomorphology

Most of the LPA region falls under the piedmont plain and the district constitutes the remnants of Eastern Ghats and rises to the height of 100 meter above MSL. From these hills, the land slopes gently toward east and forms a vast stretch of plain country. There are numerous small residual hillocks dotting the countryside, the most prominent one of which is the Rock Fort hill in Tiruchirappalli town. The alluvial plains are confined to the northern bank of Cauvery River and the Valley fill deposits are seen mainly in the northern part adjoining the hillocks in Uppiliapuram and Thuraiyur blocks. Buried Pediments have been identified in almost all blocks of LPA except Manikandam. Pediments, both shallow and deep, constitute the most prominent geomorphic unit in the region and are evenly distributed. Very small patches of Quarry and Mine Dump are found near Thiruverambur in the region.

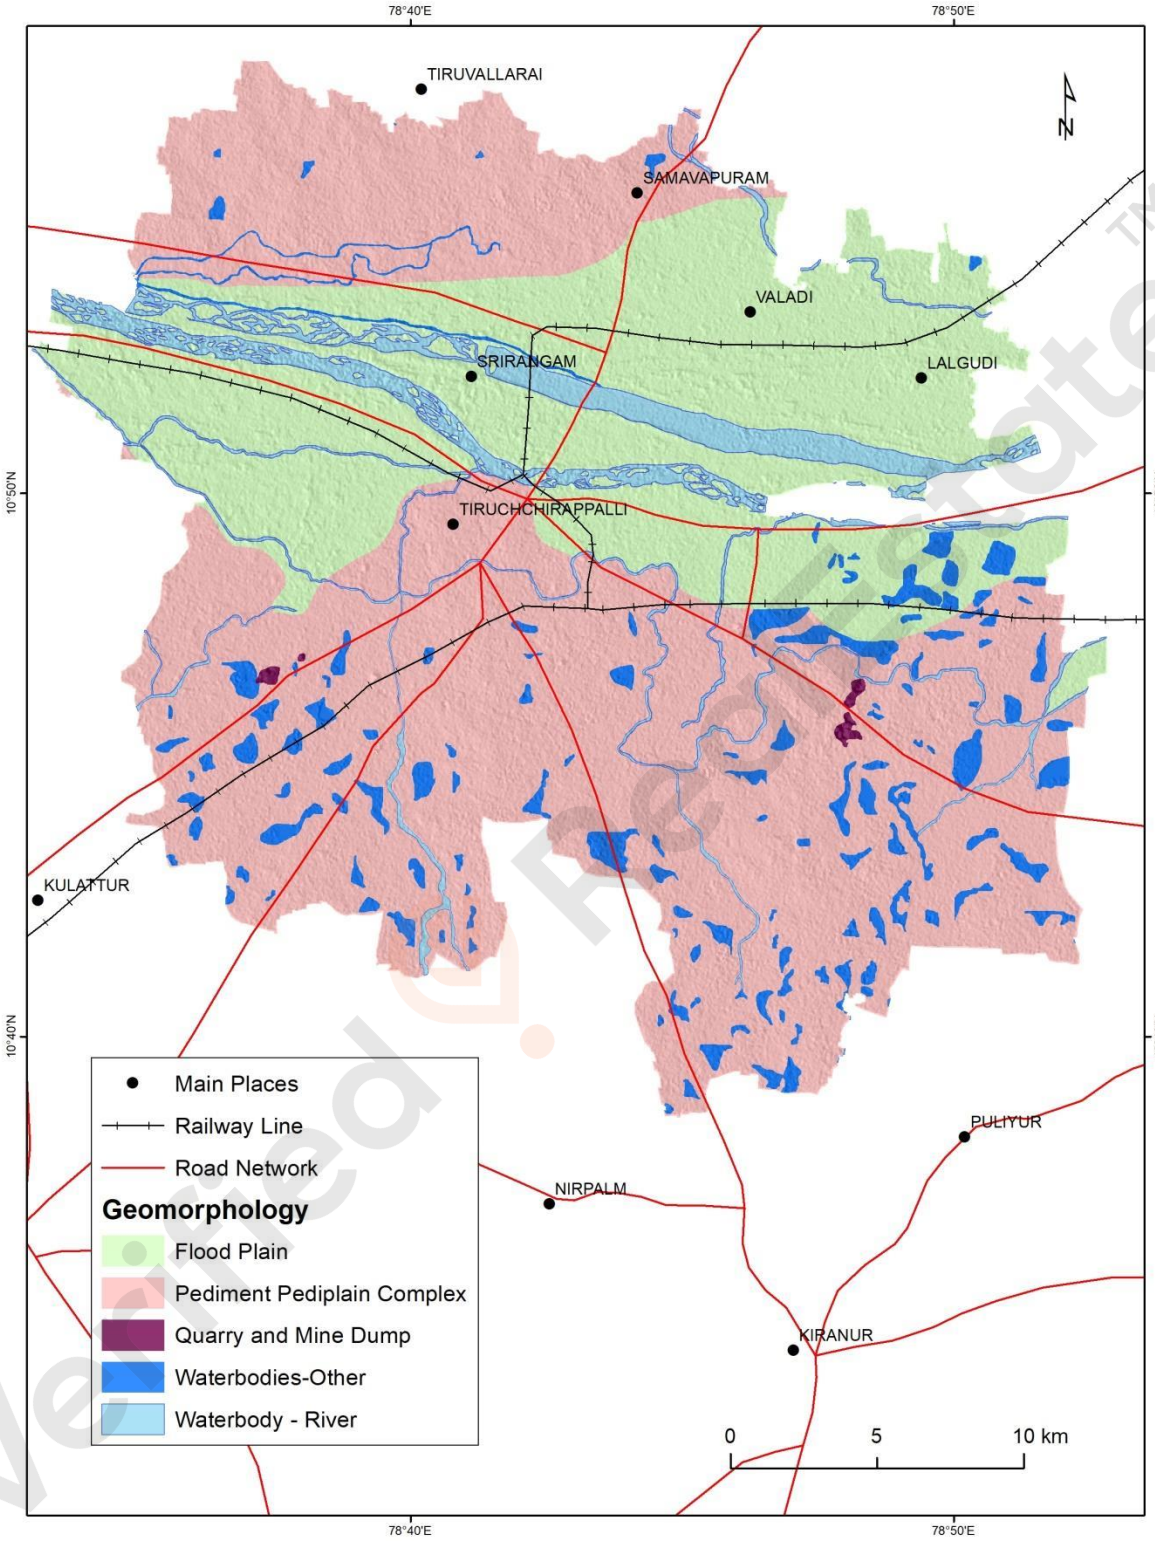

4.6.1 Drainage

The upper and lower portions of the LPA have the highest elevation marking up to 119 meters and lowest elevations as 42 falling in the central regions of the LPA. The places such as Srirangam, Samayapuram, Valadi, lalgudi fall under mid elevated areas. The master slope of the region is towards the East. Kaveri is the major, and the only perennial river which is the southern branch and the northern branch of Cauvery, known as 'Coleroon' is mainly flood-carried. The prominent tributaries of the district are Ayyar and Uppar in the north and Koraiyar in the south. Most of the rivers are structurally controlled and forms the dendritic drainage pattern.

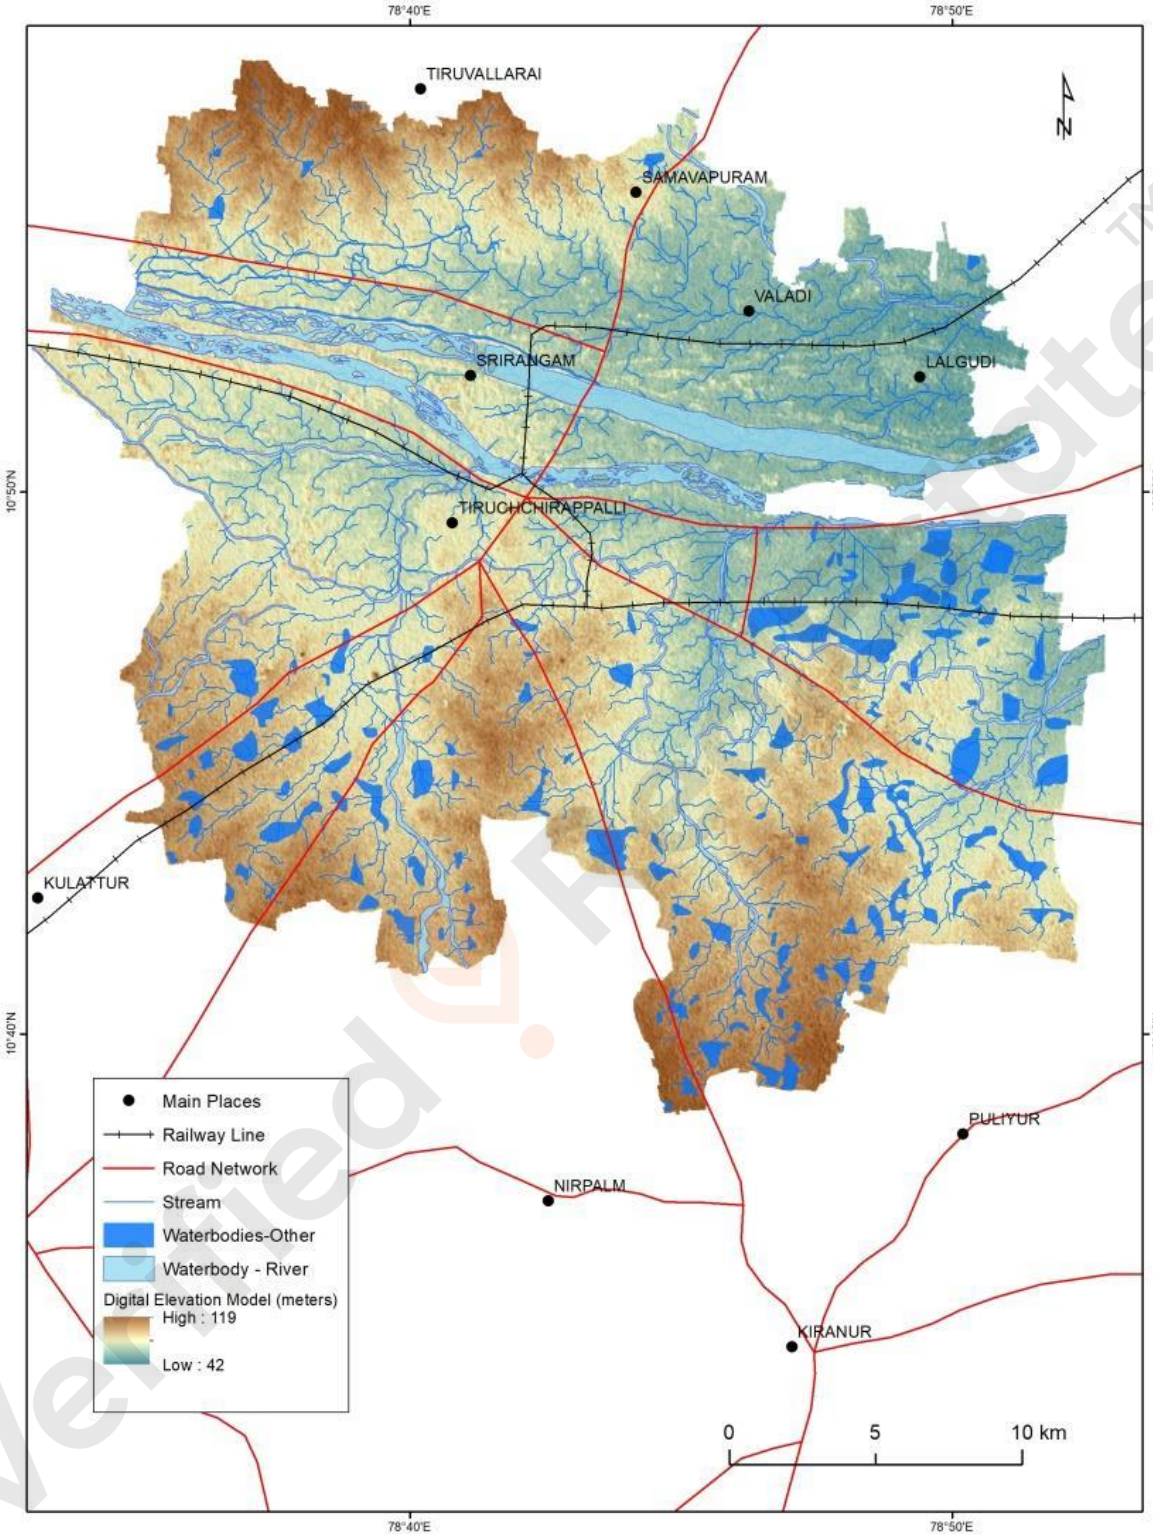

4.6.2 Soil Type

The major soil types in the LPA consist of black cotton soils, red sandy to loamy soils and alluvial soils. Alluvial soils of considerable thickness occur in the central and eastern parts particularly in Tiruchchirappalli and Lalgudi taluk and Thuraiyur has red loamy soil.

ECONOMY

Verified RegEstate™

5. ECONOMY

5.1 General Economic Profile

The total workers population of Tiruchirappalli Local Planning area is 38.44% of the total population, whereas the tertiary sector worker population is 4.46 lakhs and that of secondary is 0.14 lakhs based on the census 2011. Industries are spread over the Tiruchirappalli Local Planning area whereas services and institutions are concentrated in the Tiruchirappalli Corporation area.

5.1.1 Work Participation Rate and Occupational Structure

DISTRIBUTION OF WORKFORCE FOR TIRUCHIRAPPALLI LPA			
TIRUCHIRAPPALLI URBAN		**TIRUCHIRAPPALLI RURAL**	
Urban Population	10,54,194	**Rural Population**	3,78,973
WFPR	36.07%	**WFPR**	45.04%
Total Worker	3,80,278	**Total Worker**	1,70,693
Distribution of Worker		**Distribution of Worker**	
Primary Sector (%)	4.75%	**Primary Sector (%)**	42.84%
Secondary Sector (%)	2.41%	**Secondary Sector (%)**	2.79%
Tertiary Sector (%)	92.84%	**Tertiary Sector (%)**	54.46%
Total Population of Primary Workers	18,058	**Total Population of Primary Workers**	72,978
Total Population of Secondary workers	9,175	**Total Population of Secondary workers**	4,760
Total Population of Tertiary workers	3,53,045	**Total Population of Tertiary' workers**	92,955

Table 5-1 Distribution of Workface 2011

Verified RealEstate™

Ground truthing has to be done to find the present workforce participation, since conclusions made through analysis based on the data from Census 2011 may be misleading due to the huge time span between the data collection period and the present. The same applies for the data based on WFPR. Studies have to be conducted to identify the reason behind this phenomenon of low WFPR in the urban areas in addition to very less Female WFPR in 2011.

The workforce participation rate found in the Tiruchirappalli Local Planning Area-Rural area is around 45.04% whereas that of Tiruchirappalli Local Planning Area-Urban area is 36.07%. In the Tiruchirappalli Local Planning Area region, of the total main workers, about 17.32% are engaged in primary sector and related activities whereas the remaining 82.68% are engaged in secondary and tertiary sector (non-primary sector).

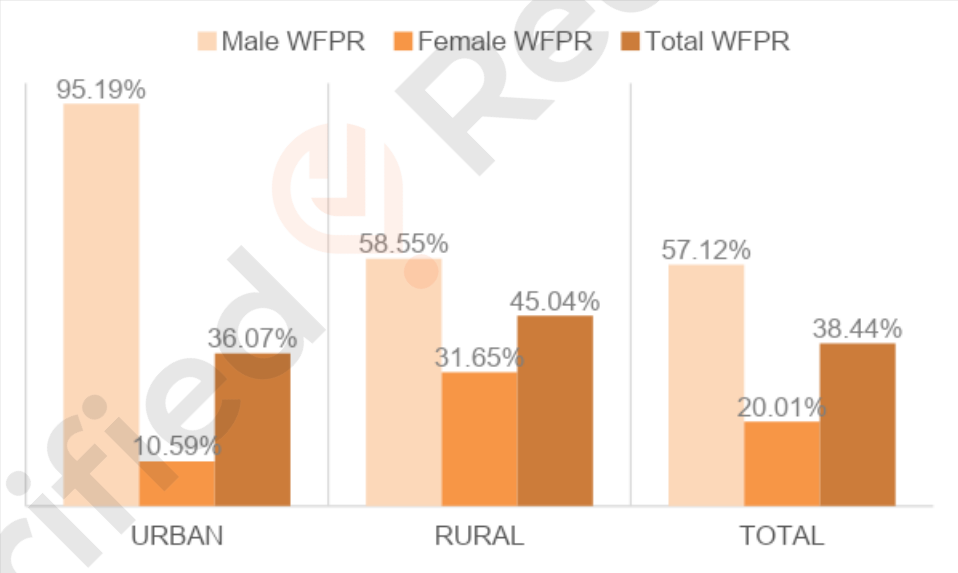

Figure 5-1 Workforce Participation – Male and Female (Census 2011)

The workforce participation rates (WFPR) in the LPA region reveals a stark gender disparity, with the female WFPR at a concerning 20.01% compared to the notably higher 57.12% for males. Notably, urban areas exhibit a striking imbalance, with a significantly higher male WFPR of 95.19% compared to the lower 58.55% in rural areas. Only 10.59% of women are engaged in urban employment, indicating a substantial rural-urban divide in female workforce participation.

Verified RealEstate™

However, the Economic Survey of 2022-23 challenges the conventional narrative of low female labor force participation in India. It suggests that the actual participation rate may be underestimated due to measurement issues, such as broad categorizations that may misclassify productive work as domestic duties. The survey emphasizes the need for reforms in survey design and content to accurately capture the true extent of women's contribution to the economy. The potential role of Self-Help Groups (SHGs) in harnessing female labor force participation is highlighted, with SHGs comprising 88% of all women. The survey underscores three critical measurement issues: overly broad categories, reliance on a single question for categorization, and a narrow approach to defining productive work, all of which may contribute to the observed discrepancies in WFPR.

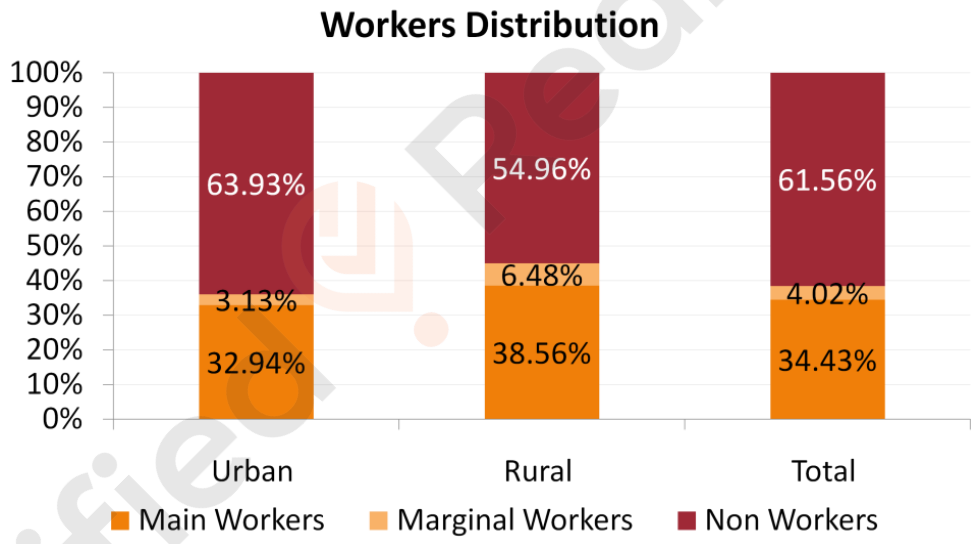

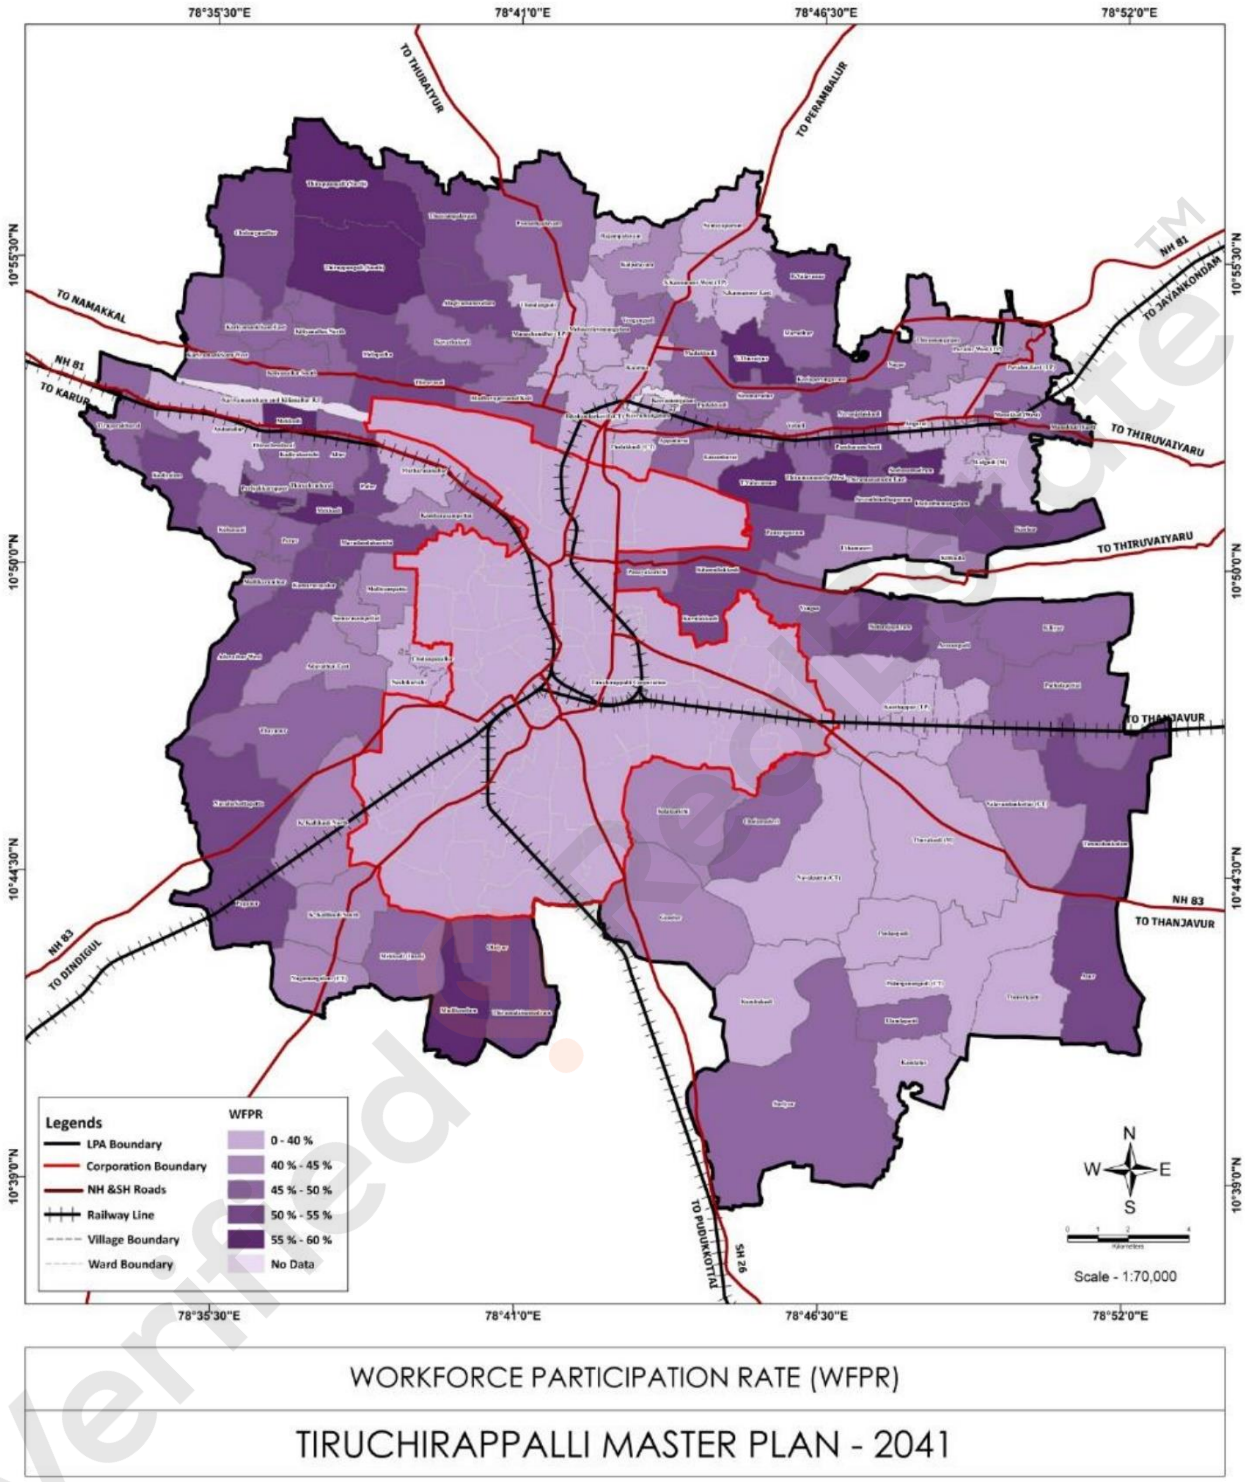

Figure 5-2 Worker's Distribution (Census 2011)

Non-workers are more than the workers. Main workers are the most among workers in both urban and rural areas. Urban areas have highest percentage of non-workers. Occupational structure refers to the aggregate distribution of occupations according to skill level and economic function. It is adopted based on various factors like structure of economy (the relative weight of different industries), technology and administrative responsibility, labor market, etc.

5.1.2 GDDP

Tiruchirappalli is one of the more industrialized districts of the state and contributes to 4.6% of the states GDP. The district has a flourishing boiler industry, with mineral products and beverage production contributing to the economy as well.

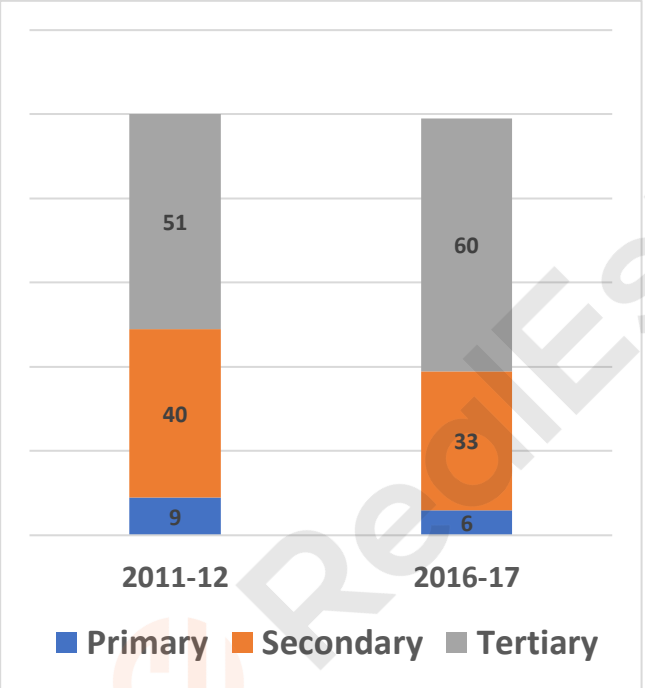

Figure 5-3 GDDP sectoral composition

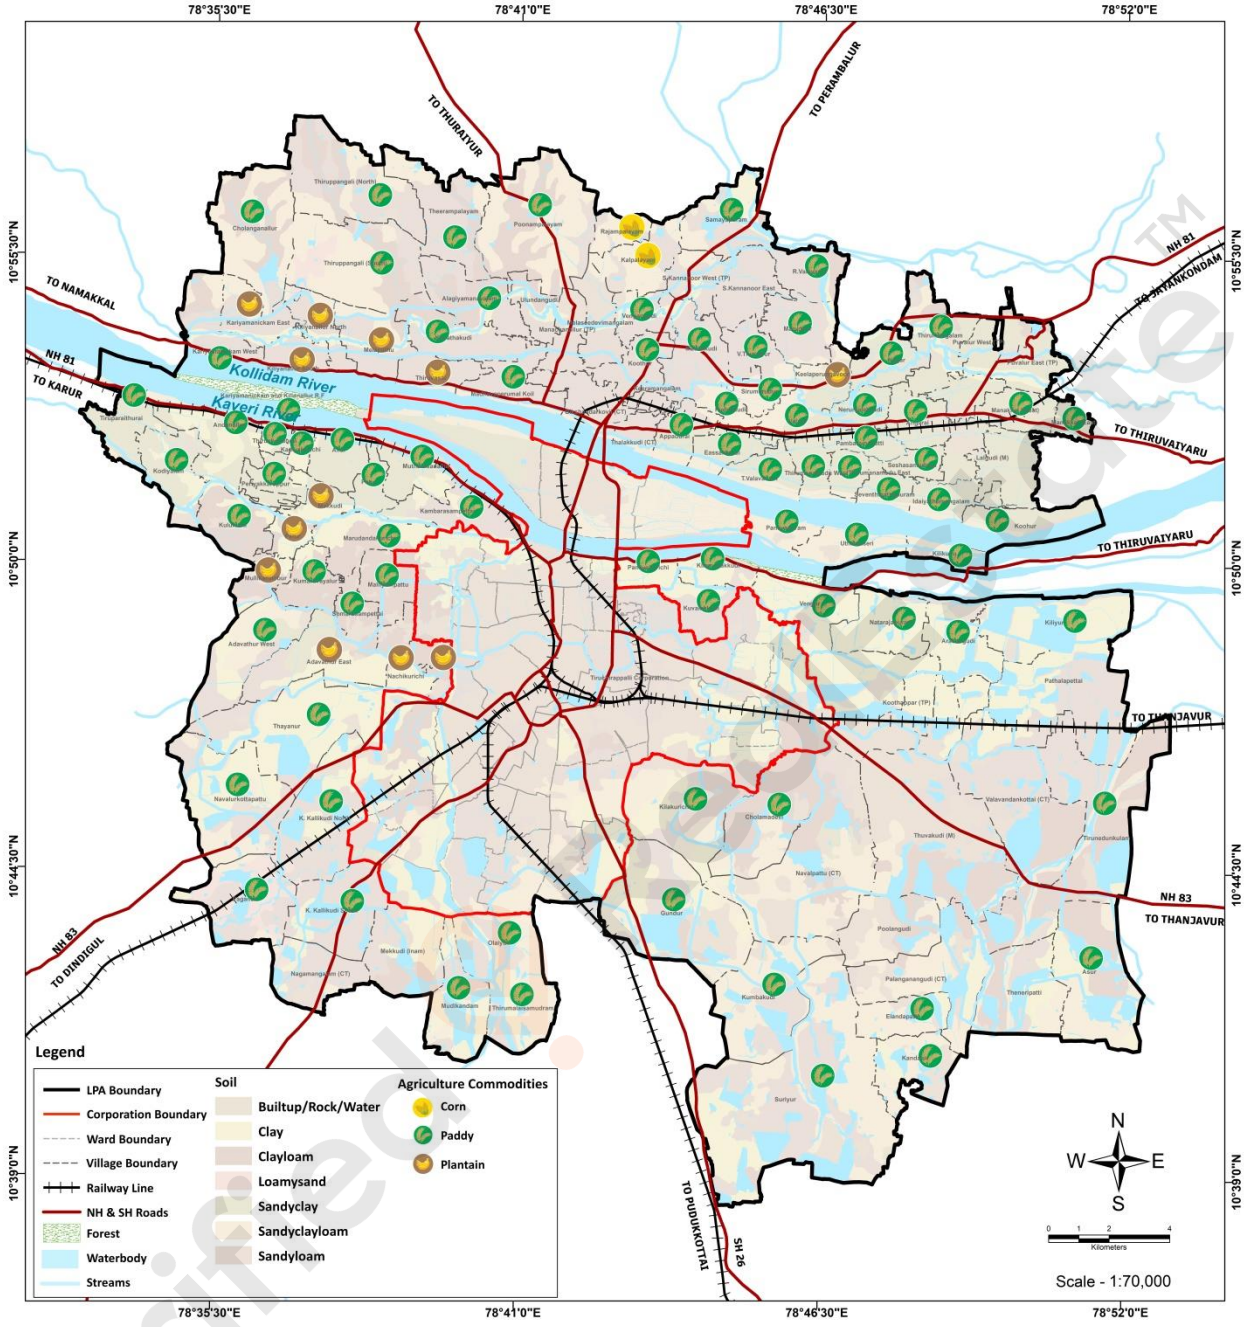

(Source: District Skill Development Plan)

The economy of the district is dominated by the service and Industrial sectors, which accounted for about 93% of the district output in 2016-17. The district has grown at a compounded annual growth rate of 11% largely driven by the services sector, which grew at an average of 12% per annum across the same period of time. The share of the agriculture sector in the district output decreased by 3 percentage over the same period.

5.2 Agriculture and Allied Activities

The livestock sub-sector is a major contributor to agriculture GVA. Agriculture in the district is dominated by cultivation, livestock and fishing. Some of the major commodities cultivated include: Rice, Sugarcane, Banana, Groundnut, Cotton.

5.3 Industries

Recent growth in the manufacturing sector (13% between 2011-12 and 2016-17) has enabled a growth of the Industrial sector at 11% per annum over the same period. The sector is dominated by the Manufacturing and Construction sectors - they account for almost 98% of the output. Metal processing, non-metallic mineral products, beverages and auto components are some of the key Industries in the district.

5.3.1 Existing Industrial Base

Tiruchirappalli is a major energy engineering manufacturing hub in the state. Industrialisation in the district received a boost with the establishment of a manufacturing unit in Tiruchirappalli in 1964 by Bharat Heavy Electricals Limited (BHEL), the largest engineering manufacturing company in the country and a maharatna central public sector enterprise (CPSE).

The major industries within the planning areas are Golden Rock Railway workshop, Bharat Heavy Electricals Limited (BHEL), Small Arms Project, Heavy Alloy Penetration Plant and Steel Rolling Mill are developed very near to the planning area which had been included in Navalpattu New Town Area. In addition to that, Industrial estates of Thuvakudi, Thiruverambur and Mathur are catalyst over the planning area. In addition to that, few major industries have also been developed within the planning area in different pockets. Further, Tanneries are developed in both Kottapattu and Thayanur villages.

TREC-STEP

Tiruchirappalli Regional Engineering College-Science and Technology Entrepreneurs Park (TREC-STEP) was promoted in 1986 by Government of India, Government of Tamil Nadu and Financial Institutions. It was established to promote knowledge-based technology and innovative ventures by nurturing the spirit of enterprise among the aspiring youth. It provides incubation services through its facilities and venture capital sourcing. It is recognized as a Scientific and Industrial Research Organization by the department of science and technology (DST), Government of India.

5.3.2.1 ELCOT – IT PARK (SEZ)

As part of promoting Information Technology Parks (IT Park) and Special Economic Zones (SEZ) in Tier II cities, Electronics Corporation of Tamil Nadu (ELCOT) had established in December 2000 an IT Park and SEZ at Navalpattu near the airport in Tiruchirappalli with an outlay of Rs 60 crore. It constitutes an SEZ. The IT Park consists of 147.61 acres out of which 123.23 acres of SEZ and 24.28 acres of Non SEZ.

5.3.2.2 Spatial Distribution

The Spatial distribution of MSMEs and key industries of the LPA are illustrated in Map 5-7 and 5-8. It is observed that the growth is along the major transport Corridors with more manufacturing industries emerging in the East along the route connecting to Tanjavur. Whereas Service Industries are observed to be equally distributed along major urban centres, more density is observed along West towards Dindigul.

2	**25**	**Manufacture of fabricated metal products, except machinery and equipment**	1396
3	**13**	**Manufacture of textiles**	656
4	**14**	**Manufacture of wearing apparel**	678

Table 5-5 Distribution of Manufacturing MSMEs with NIC 2- Digit Code

5.3.3 Service Sector

Major Research Institutes in the LPA that has significantly contributed to the economic development are as follows. These are often allied to the industrial or agricultural activity of the LPA.

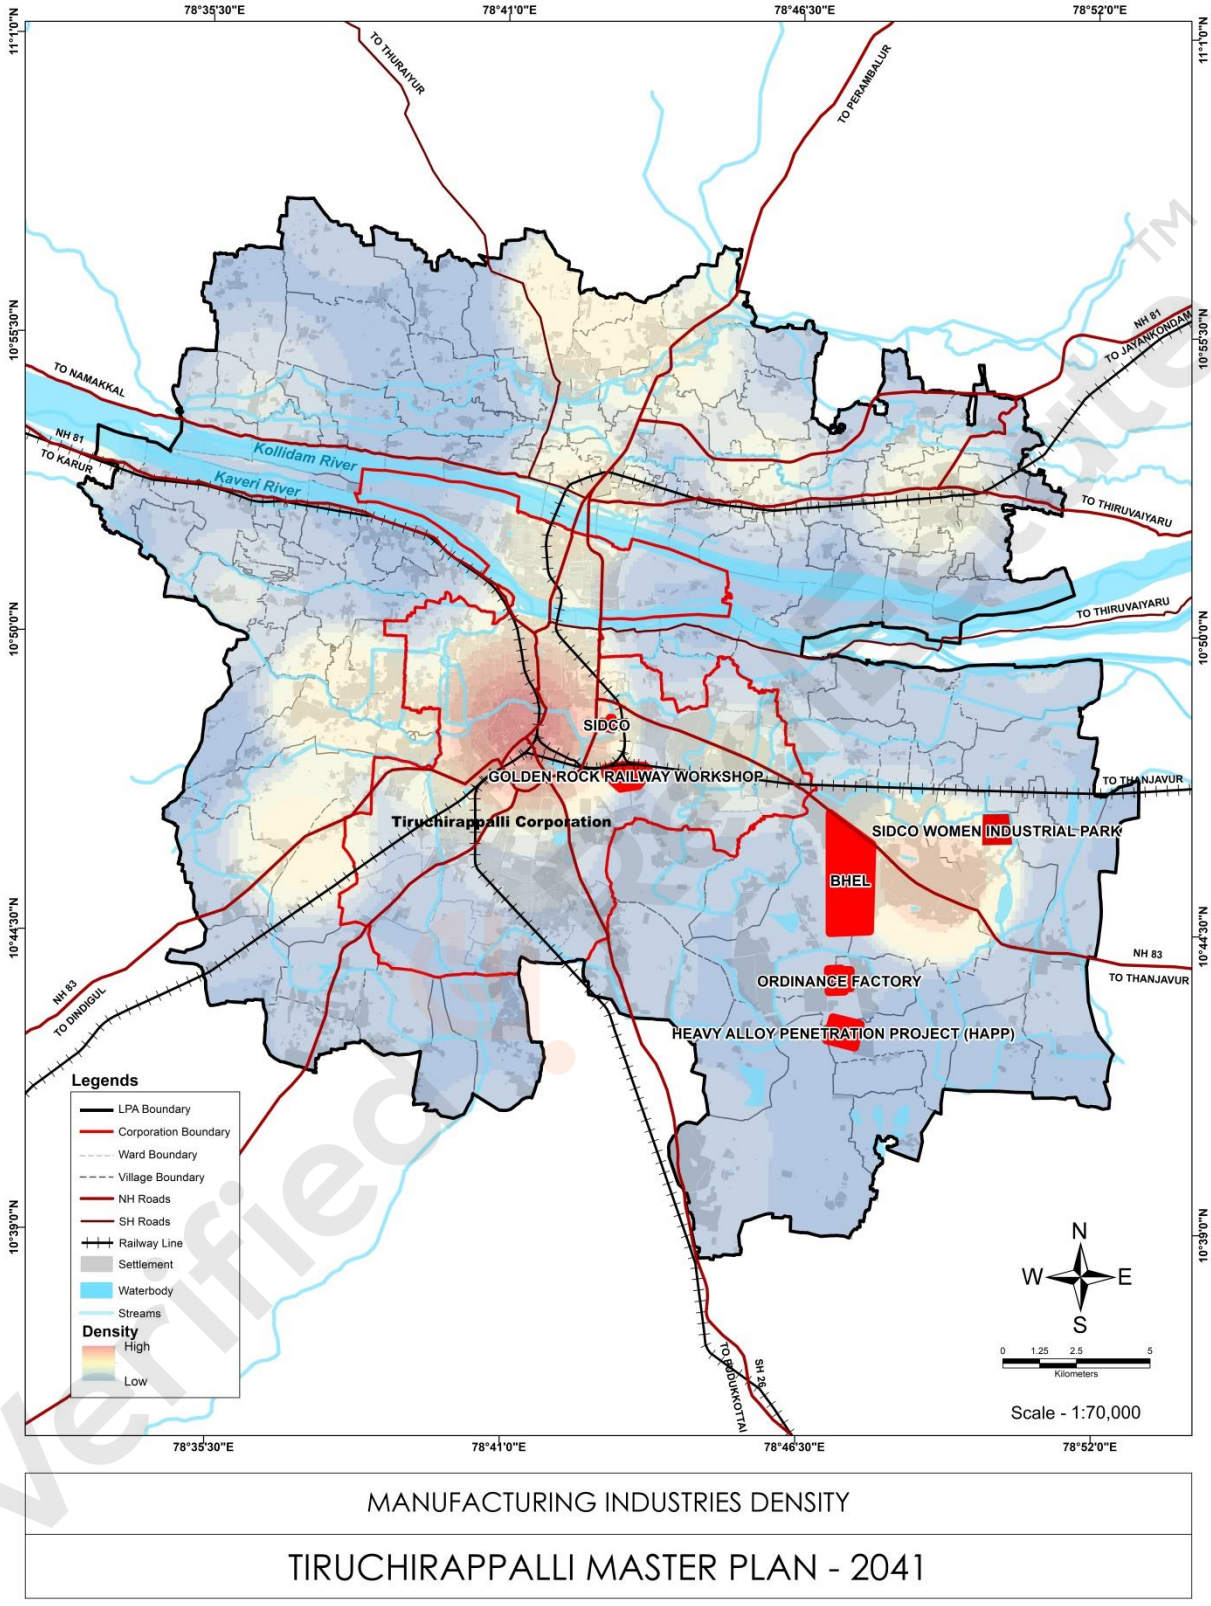

Welding Research Institute (WRI)

The WRI is well equipped with state-of-the-art facilities to serve the requirements of industries in the field of welding and allied areas. The major activities include research and development, training, testing, calibration, inspection, consultancy services and technology transfer. It is authorised by Indian Boiler Board (IBR) for training and certification of welders.

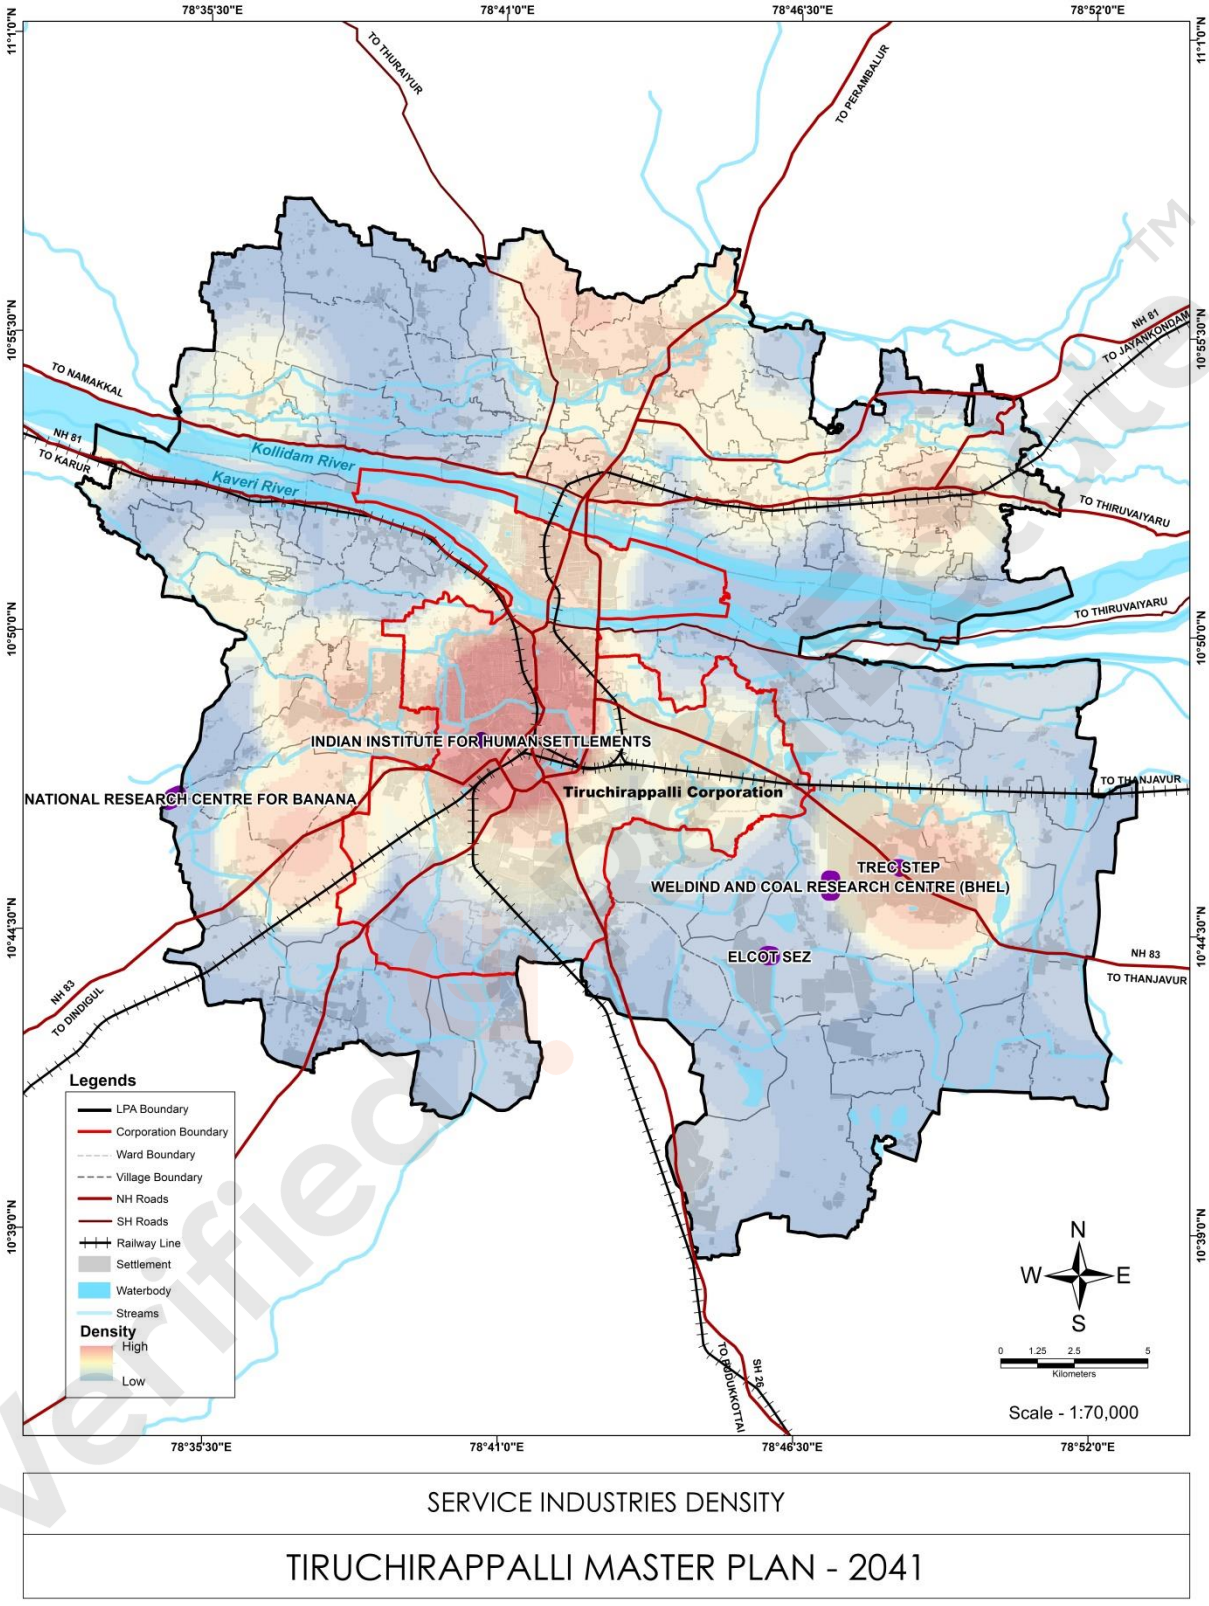

National Research Centre for Banana (NRCB)

The National Research Centre for Banana (NRCB) was established on 23-08-1993 by Indian Council for Agricultural Research (ICAR). Its main aim is to increase the production and productivity of banana and plantains through research. It has well equipped facilities for tissue culture, biotechnology, soil science, nutrient management and post harvest technology research.

5.4 Trade and Commerce

5.4.1 Export Performance

Tiruchirappalli was a popular export hub throughout the British empire for its unique variety of cheroot known as the Trichinopoly Cigar. It was manufactured from tobacco grown near the present day Woraiyur in Tiruchirappalli. At its peak, over 12 million cigars were manufactured and exported annually during the Victorian era. Tanned hides and skins were also exported from Tiruchirappalli to the UK. The details of exports from Tiruchirappalli Air Cargo are given in Table 5-6.

SL	EXPORT COMMODITY	VALUE (RS CRORE)	VALUE (US $ MILLION)

Major Commercial Spaces

Some prominent commercial areas in Trichy included:

- Chinthamani Supermarket Area
- Teppakulam Area
- Thillai Nagar
- Main Guard Gate
- Sankaran Pillai Street
- M.G. Road (Malligai Ganthi Road)
- Raja Colony
- Rockfort Area

The above-mentioned spaces are known for its vibrant marketplaces and various shops catering to local needs. Thillai Nagar is one of the main commercial areas in Trichy, known for its numerous shops, restaurants, and business establishments. The vicinity around the Rockfort Temple also has commercial activities, with shops and markets catering to both tourists and locals. The Daily Markets withing the Corporation are illustrated in Map 5-9.

Table 5-8 Employment Projection of 2041

The employment projection gives the total number of employment to be created for the year 2041. From the total population 65% of the population is considered as the eligible workers population. The employment projection is calculated based on the existing workers population and workforce participation rate. The difference in workforce participation rate of the years 2001, 2011 and the eligible workers population is considered to calculate the employment projection. The projected population is 2344855. The eligible workers are 1524156. With the workforce participation rate of 67.47%, the total employment to be generated is 477377.

HERITAGE & TOURISM

Verified RegEstate™

6. HERITAGE & TOURISM

Travel and tourism sector holds strategic importance in the Indian economy. It provides several socio-economic benefits such as employment, income and foreign exchange earnings and also plays a part in the development or expansion of other industries such as agriculture, construction, handicrafts, etc. Given the potential of tourism as a vehicle for job creation, growth and development, tourism has been recognized as an engine for economic growth.

Trichy as a Tourist destination has a wide variety of products and experiences to offer which has not been tapped to its full potential due to inadequate tourism infrastructure and services at many destinations and attractions. But the City has managed to pick up after the dip in tourism caused by the Pandemic since 2020.

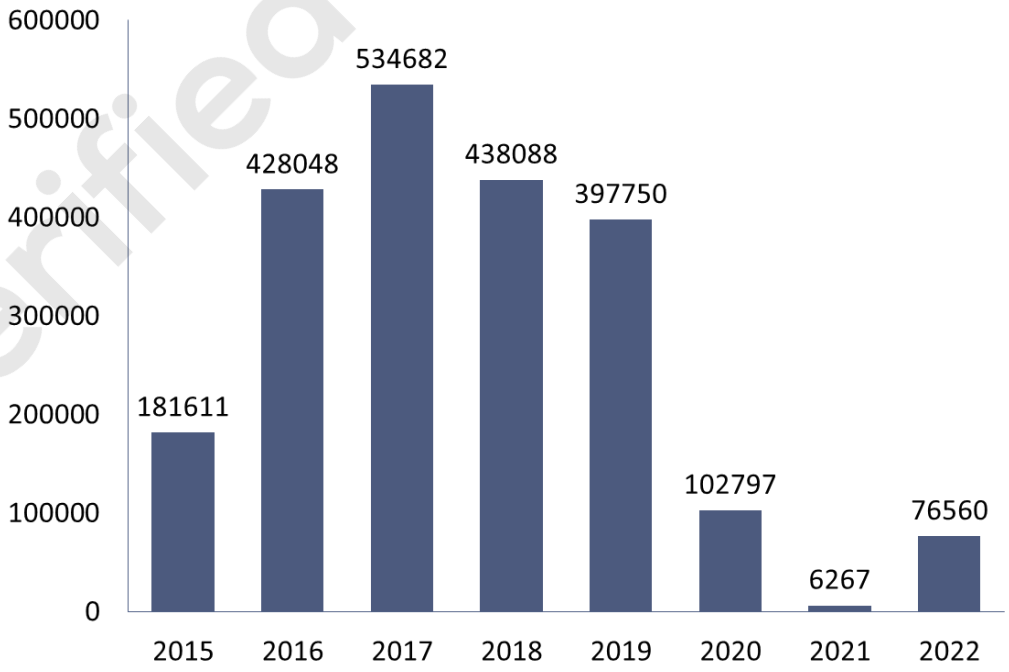

Figure 6-1 International tourist Trend of Trichy

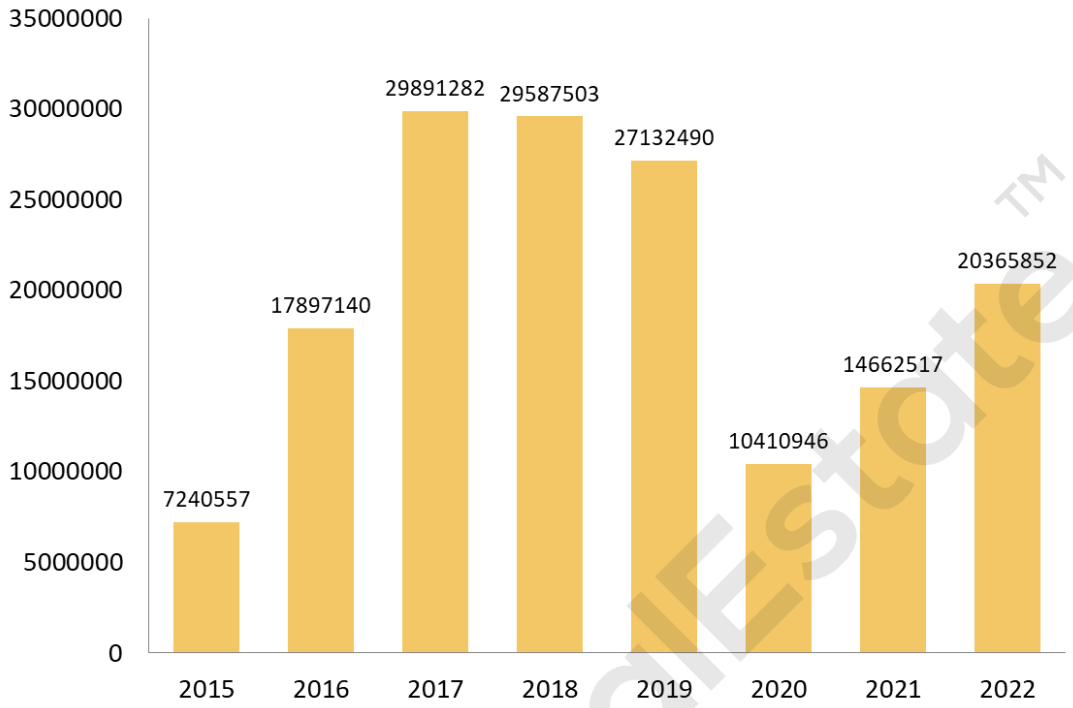

Figure 6-2 National tourist Trend of Trichy

Source: Tamil Nadu Tourism Development Corporation

Based on the revamped Swadesh Darshan Scheme 2022 of the Ministry of Tourism, the focus is to develop sustainable and responsible tourist destinations following a tourist & destination centric approach.The Scheme will encourage the development of benchmarks and standards for generic and theme-specific development of tourism destinations and the States will follow the benchmarks and standards while planning and developing the projects.From the list of major themes identified for tourism, provided in the scheme, Trichy has a great potential under Culture and Heritage, Eco-Tourism, Wellness Tourism and Rural Tourism.

Domestic tourism holds substantial promise for the growth of tourism in the country especially in the Tier II and Tier III cities, which can significantly contribute to the Indian economy. Trichy has a potential for educational tourism focusing especially on children from its hinterlands.

6.1 Heritage & Cultural Tourism

Heritage and culture serve as bridges that unite communities and societies, fostering mutual respect, empathy, and appreciation for differences. They encourage dialogue, collaboration, and the exchange of ideas, promoting cultural diversity and enriching societal fabric. Embracing and celebrating cultural diversity fosters tolerance and inclusivity, contributing to a more harmonious and interconnected global community. Moreover, heritage and cultural practices often carry profound wisdom and insights into sustainable living, ethical principles, and communal harmony, offering valuable lessons that can guide contemporary societies towards a more balanced and respectful coexistence with each other.

Trichy, is renowned for its rich heritage and vibrant cultural tapestry. The city's heritage is deeply rooted in history, boasting a diverse blend of architectural marvels, religious significance, and cultural traditions that span several centuries.

6.1.1 Well known Spots

6.1.1.1 Rockfort Temple

Trichy's most iconic landmark is the Rock Fort Temple, perched atop a massive 275 ft. tall rock formation, showcasing a fusion of Hindu and Jain architectural styles as well as providing a panorama of the whole City from its top. It is reached by a step flight of 437 steps cut into the rock. Halfway up is the Sri Thayumanaswamy Temple, dedicated to Lord Shiva. It has a 100 pillared hall, and a Vimana. There are inscriptions in these temples that date back to 3rd century B.C and it houses shrines dedicated to Lord Ganesha and Lord Shiva.

A visitor's experience is a sum total of his experience during his travel, stay and return from the destination. The Scheme follows an integrated approach for development of destinations, which will not only provide core tourism products but also ancillary requirements such as connectivity, performing arts infrastructure, public health, hygiene and safety and other such requirements, which impact tourists.

6.1.1.2 Srirangam Ranganathaswamy Temple

Sri Ranganathaswamy temple of the Srirangam island is the foremost of the eight self-manifested shrines (Swayam Vyakata Kshetras) of Lord Vishnu, established in 156 acres of land. It is also considered the first, foremost and the most important of the 108 main Vishnu temples. This temple is also known as Thiruvaranga Tirupati, Periyakoil, Bhoologa Vaikundam and Bhogamandabam. The enclosures are guarded by thick and huge rampart walls. There are 21 magnificent and huge Gopurams. This houses various and

marvelous sculptures, Mandapams, Gopurams, vimanas, inscriptions, temple tanks, wells, granaries and chariot. The outer tiers of the Srirangam temple complex is where the settlements of traditional architecture are seen and many more temples, vedic schools, madams and mandapams are also found.

Figure 6-4 Srirangam Ranganathaswamy Temple

6.1.1.3 Jambukeswara Temple, Thiruvanaikkaval

The Jambukeswarar Temple, also known as the Tiruvanaikoil or Tiruvanaikal, is a very old temple dedicated to Lord Siva on the Eastern side of the Srirangam island. The historic accounts are related to the early Chola ruler, Kochengannan, who is said to have ruled during the early centuries of the Common Era (CE). The Thiruvanaikkaval temple is one of the five Panchambootha temples in the country and represents water.

Figure 6-5 Jambukeswara Temple, Thiruvanaikkaval

6.1.1.4 Samayapuram Temple

Samayapurathu Mariamman Temple is one of the most famous Amman temples in India. The Amman in this temple resembles the great Goddess Chamundeshwari at Mysore. The Main tower (Raja Kopuram) is adorned with gold plates. People from all over the world visit this temple in large numbers, especially Sri Lanka, Malaysia and Singapore. The temple is located in S. Kannanoor Town Panchayat. This temple holds the second place in earning high revenue for the department of HR&CE in Tamilnadu.

6.1.1.5 Gneelivaneswarar Temple, Thiruppanjili

This temple is dedicated to lord shiva and he in this temple is called as Gneelivaneswarar.Shiva is in the form Suyambu linga (suyambu means it's not made by anyone). There is a separate Yama temple outside the main temple within the compound. Every year during the Tamil months of Purattasi (Kanya) and Panguni(meena) the rays of sun will directly fall on the Swayambu Shiva

linga.

6.1.1.6 Lady of Lourdes Church, Main Guard Gate

The Roman Catholic Basilica is devoted to Our Lady of Lourdes.The Church was constructed in the year 1895 in the Gallo-Catholic design. Massive walls, round pillars and topped arches are typical of the normal style of architecture. The church is a fine example of the blend of Europe and Indian sensibilities within the framework of Gothic architecture. Elements like the altar, spire, Rose windows, pinnacles, chimney bell, vaulted roofs and statues (5 statues of Great saints in the middle of the tower) are fascinating.

Figure 6-6 Lady of Lourdes Church, Main Guard Gate

6.1.1.7St.Mary's Cathedral Church, Melapudur

St. Mary's Cathedral, popularly known as "Mother of Good Health" in vernacular "Arogia Matha" which is around 170 years old and a very famous religious site. It is famous for its architectural style combining elements of the Gothic and Romanesque styles to create a visually striking building.

Figure 6-7 St.Mary's Cathedral Church, Melapudur

6.1.1.8 Nadirshah Dargha

The tomb of Muslim Sufi saint Babbayya Nadir Shah stands in the Nadir Shah Dargah mosque complex which dates back to the 14th century at Tharanallur.

Figure 6-8 Nadirshah Dargha

The dargah complex consists of various structures, including the main shrine, prayer hall, and tomb. The architecture of the Dargah is a blend of Islamic and Dravidian style, showcasing beautiful carvings and beautiful domes. Annual festival, which commemorates the death anniversary of Sultan Saiyad Babayya Nathar Shah.During this time, believers from all over Tamil Nadu gather at the dargah to participate in religious rituals, qawwalis (Sufi devotional music) and seek spiritual solace.

6.1.2 Lesser-known Spots

6.1.2.1 Kaattu Azhagiya Singaperumal Temple, Srirangam

The temple dates back to the period prior to Srirangam. Lord Narasimhar is Swayambu (Self Manifested) here and blessing in His Sitting Posture facing west towards Srirangam with Goddess Lakshmi Devi on His Left thigh.The Sri Ranganathaswamy comes to this Mandapam in a palanquin [Pallakku] on the day of Vijayadasami. Here 'Thiruvaaradhanam', 'Amudhupadigal' are offered to Namperumal. Following this, he goes for "Paar Vettai" in his golden horse chariot. After the 'Thiruvaaradhanam' is offered to the Vanni Tree in the temple, the 'Vettai Utsavam' begins. The mandapam, thus is of immense importance. This temple houses Mandapams, Tulsi maadams and paintings.

Verified RedEstate™

6.1.2.2 Kamalavalli Nachiyar Temple, Uraiyur

This temple is dedicated to lord Azhagiya Manavala Perumal and Kamalavalli Thayar appear in the wedded standing posture who faces the direction of Ranganathar (Sri Rangam). This eighth century temple is built by the chola dynasty by the king Nandha cholan. This dravidian style temple houses statues of lord vishnu, lot of paintings (of Nammalvar) and inscriptions. Annual festivals like Navarathri, Karthigai- Thirupanazhvar Thiruvizha are celebrated. Kamalavalli nachiyar temple is also famous for its Mangalasasana by Thirumangaiyalwar. It is also the birthplace of Thirupaanalwar an important Vaishnavite seer.

6.1.2.3 Vekkali Amman Temple, Uraiyur

Dedicated to godess vekkali amman (Form of godess Kali), this temple has a very important impact in the history of woraiyur settlement. The Cholas revered the Goddess Vekkali Amman before leaving for the battleground. The sanctum has no roof and the legend goes that the Goddess told her devotee not to build a roof until every people get one. The temple is at its best during the Chithirai festival, Navarathri and Thai Velli when the Goddess's idol is decorated with jewelry and a series of pujas are arranged.

6.1.2.4 Subramaniya Swamy Temple, Kumaravayaloor

The temple dating back to the 9th century was built by a Chola King and is dedicated to Lord Muruga. Important festival celebrated here are Thai poosam, Karthigai festival & Panguni Uthiram.

6.1.2.5 Uthamar Kovil, Bhikshandarkovil

Sri Purushothaman Perumal Temple also known as Uthamar, is dedicated to the Hindu god Vishnu, Shiva and Brahma. The temple is one of the few historical temples in India where the images of Hindu trinity, Vishnu, Shiva and Brahma are housed in the same premises and are collectively known as Mum

Verified RealEstate™

murthigal. This stalam is also known as Kadamba (means mixture of things) kshetram. The renowned temple is considered to have been constructed by the Medieval Cholas (the greatest South Indian empire) of the late 8th century AD, with subsequent contributions from the rulers of Vijyanagara Empire and Nayaks from Madurai Nayak dynasty. The annual festival of the temple is celebrated during the Tamil month of Kartigai (November / December).

6.1.2.6 Aanchaneya Swamy Temple, Kallukuzhi

The idol of Anjaneya Swamy is believed to be 100 years old. This temple was found during the British period while construction of railway junction.

6.1.2.7 Melur Ayyanar Temple

Srirangam Melur Ayyanar Temple is a famous Hindu temple dedicated to Lord Ayyanar (kadaipillai Ayyanar), who is believed to be an incarnation of Lord Shiva. It is one of the most revered temples in the region and is visited by thousands of devotees every year. This temple has a huge effigy of elephants and horses' statues before Kadai pillai Ayyanar built by karikalan. One of the most popular festivals celebrated here is the Aadi Perukku, celebrated in July or August and shiva rathri (February - March). During this festival, devotees gather to offer prayers to the river Cauvery, considered sacred by the locals. The temple's intricate carvings and stunning architecture are a testament to the skill and craftsmanship of the local artisans and are a treat for history and art enthusiasts.

Verified RealEstate™

Figure 6-9 Aadi perukku festival celebrated at Amma Mandapam

6.1.2.8 Dharukavaneswara Temple, Thirupparaithurai

This temple is dedicated to lord Shiva and godess parvathy, built before 900 years during chola rule. In ancient times, this region was been densely covered with "Parai" trees and generally, the names of temples that are located on river banks end with "Thurai"; it gets the name paraithurai. There are 83 stone inscriptions in this temple which date back to the periods of Paranthaka Chola-I, Rajakesari Varman, Sundarapandiyan and Krishnadeva Maharayar. The famous festival is during tamil month of purattasi (August - September) on 18th day when the sunlight directly falls on the Shiva idol (lingam) in the sanctum which is called the surya pooja (Its the autumn equinox in India) and other festival is the Aippasi (September - October) on the 1st day when the Goddess parvathy goes on a Thiruveedhi Ula (procession) and takes a dip in river Cauvery.

6.1.2.9 Ayyappan Temple, Melur, Srirangam

It's a temple dedicated to lord Ayappan which was built during 1970. It has a large meditation hall where devotees can sit for meditation and a vast greenery. Another unique feature of this temple is that numerous little stones

have been collected from holy rivers and holy sites all over the world and have been placed on many small platforms with the names of the rivers and places.

6.1.2.10 Maatrurai Varadeeswarar Temple, Thiruengoimalai

This temple is dedicated to lord Shiva.The temple is on the north banks of river Kollidam. During 6th to 7th Century this place was called as Pachilachiramam, latter as Thiruchiraman, which was corrupted to the present name of Thiruvasi. From the inscriptions in the temple, It is believed that the original temple existed before 7th Century. Later renovated by Hoysalas, Chozhas and Pandyas. This place was called as "Pachil Kootrathu Achiramam during period and the same changed as Pachilachiramam. Special poojas are conducted on 11 days brahmotsavam in the month Vaikasi (May – June) ,Thai Poosam in the month Thai (January – February) and Maha Shivaratri in the month Masi (February – March).

6.1.2.11 Akkaraipatti Sai Baba Temple

Located in Samayapuram village, this temple, the temple complex has four sub-shrines of Lord Ganesha, a 5 foot tall Shiva Linga is located in the shrine's basement, which is mostly used for meditation and yoga; other deities and the walls of the temple are embellished with the mural paintings of the deities

6.1.3.1 Kudaivarai Kovil, Malaikottai, Trichy

The temple was built by Nayaks during their reign between 14th and 15th century. The Trichy hill fort is the only temple dedicated to the gods of Tamil Nadu, which has six religions (Saivism, Kanapathiyam, Kelamaram, Selaram, Saktam, Vaishnav) as deities. It is a double sanctum sanctorum temple. One belongs to Shiva and the other to Thirumal. There is currently no idol in the sanctum sanctorum of Lord Shiva. Pillaiyar can be seen here standing with four arms in Kudaivari. temples. Then Lord Muruga can be seen with two Vidyadharas above and two servants below and various other interesting sculptures and art works. Another sanctum sanctorum houses the idol of Thirumal. Sculptures and pillars all resemble Pallava art. It is surprising that there is not a single inscription of the Pallavas in the lower Kudaivari, while there are many inscriptions in upper Kudaivarai.

ancient east facing temple with entrance in the south-east corner. There is no Rajagopuram.

Figure 6-13 Agatheeswara Temple, Perungudi

6.1.3.5 Sri Kailayamudaiyar Temple, Cholamadevi

Temple dedicated to Lord Shiva located at Cholamadevi Village in Trichy District of Tamilnadu. It was built by Rajaraja Chola I, who also built the internationally famous Big Temple of Tanjore. It dates to the 11th century (1065 A.D) and is a treasure house of historic information. The Temple is located amidst the lush green paddy fields and on the northern banks of the Uyyakondan channel. This temple consist of Mandapams (Arthamandapam and Mahamandapam), sculptures (Lingam, Nandhi , Dhurga , Lord Vishnu and Brahma) and inscription

6.1.3.6 Shivan Temple, Pazhur

This temple dedicated to Lord Shiva (Vishwanathar) located at Pazhur

Village . The temple is also called as Navagraha Temple or Navagraha Sthalam in this region. This temple was built by a Pandian Emperor. The fish sign in the wall denoting that the temple was built by Pandian Emperor. Another mystery in this temple is, the main god is Lord Shiva but the temple was built by Sri Vaishnavas who worship only lord Vishnu. And idols of Lord Ganesha, Dhakshinamoorthi, Surya,Bhairava and saneeshwara are found. Navagraha idols were installed in 1932 CE, as per the instructions from Kanchi Maha Swamigal.

6.1.3.7 Temple, Tiruverumbur

Erumbeeswarar Temple in Thiruverumbur, Tamil Nadu, India, is a Hindu temple dedicated to the deity Shiva. Built on a 60-foot (18 m) tall hill, it is accessible via a flight of steps. The temple's main shrines and its two prakarams (outer courtyards) are on top of the hill, while a hall and the temple tank are located at the foothills. Shiva is believed to have transformed himself into an ant hill and tilted his head at this place to enable ants to climb up and worship him. Erumbeeswarar is revered in the canonical 7th-century Tamil Saiva work the Tevaram, written by Tamil saint poets known as nayanmars and classified as Paadal Petra Sthalam.The temple is one in a series built by Aditya Chola (871-907 CE) along the banks of river Cauvery, to commemorate his victory in the Tirupurambiyam Battle. It has several inscriptions from the Chola Empire dating back to the 10th century.[1] The temple has been declared a protected monument by the Archaeological Survey of India. The annual Brahmotsavam (prime festival) is attended by thousands of devotees from far and near.[3] Every full moon, tens of thousands of pilgrim's worship Erumbeeswarar by circumambulating the hill barefoot in a practice called girivalam.

Thayar Purapaadu (every Friday)

Vasanthothsava Karthikai Tirupanazhwar Festival (10 days)

Vaikunta Ekadashi

Aadi perukku is a cultural festival of the Tamils where they take a dip in the river Kaveri on the 18th day of Aadi month. Amma mandapam and other bathing ghats see thhousands of people throng them during the ritual day.

6.4 Tourism handling capacity

There has been an increase in the tourist trends to Tiruchirappalli from 2016 to 2019. Disregarding the COVID situation, the tourist flow would have rapidly increased double fold. International tourists are also increasing. This indicates that the provision of adequate tourism infrastructure will develop the city and evolve as a generator of economy. The present number of hotels in Tiruchirappalli is 151.There are 20 guides, out of which 11 are approved by the department of tourism, 3 by

ministry of tourism and 6 are unapproved guides.

In addition, the floating population who commute from the districts to the Tiruchirappalli Local Planning Area each day is expected to be 3.00 lakhs by 2041 against around 2.00 lakhs at present based on the Airport Authority of India by geometric projection, the additional infrastructure needs to be provided to meet the basic needs with respect to tourism.

The total number of visitors for all kinds of festivals throughout the year in Thiruchirapalli LPA is 38,03,000 (approx.) which is divided as 3721000 (approx.) visitors attending temple events and 82000 attending secular events. 98% percentage visitors attend temple events throughout the year. The number of one day visitors for both the events combined contributes to 439088 persons and their distribution towards the respective festival places in the LPA is shown in the pie chart below. The number of rated hotels with their rooms they can serve to tourists per day is around 16,974(approx.). The maximum average number of tourist that arrives per day during festivals throughout year is around 20,908 (approx.) out of which 3026(approx.) tourists could not be served which contributes to 20 percentage of average maximum tourists. The percentage people served in each category of rated hotels is also represented in pie charts with respective per day analysis and month-based analysis. Map 6-2 marks public toilets which count to 403 in Thiruchirapalli Corporation which could be increased in order to serve the peak crowds during festival seasons.

MOBILITY

Verified RealEstate™

7. MOBILITY

7.1 Access and connectivity

7.1.1 Introduction

Trichy is located at convenient distance from significant cities in South India. An extensive and well-developed road network connects the Tiruchirappalli with other prominent cities like Bangalore (345 kms), Madurai (142 kms), Chennai (320 kms), Ooty (302 kms), Thanjavur (50 KM) and Rameshwaram (250 KM).

Trichy has daily non-stop flights from Chennai, Bengaluru and Hyderabad, all major hubs that is connected well with all other cities in India. It is also connected well internationally with daily non-stop flights to Singapore, Malaysia, UAE and Sri Lanka.

It has also very good train connectivity with trains to Chennai and other metro cities throughout the day.

7.1.2 Railway Connectivity

The Great Southern of India Railway Company was established in 1853 with its headquarters in England. In 1859, the company constructed its first railway line connecting Tiruchirappalli and Nagapattinam. The company merged with the Carnatic Railway Company in 1874 to form the South railway company with Tiruchirappalli as its headquarters. The city retained the position until 1908 when the company's headquarters was transferred to Madras. Tiruchirappalli junction is a major junction on the rail route connecting North and South. The city Railway Junction located in the heart of city. It is the important junction point between the train passing towards southeast, west, and north connecting major cities in Tamil Nadu and Other states.

Passenger trains also carry a significant number of passengers from nearby towns. There are frequent trains connecting the Headquarters Chennai and other major cities in Tamil Nadu. There are 14 stations within Tiruchirapalli Local Planning Area.

Verified RealEstate ™

7.1.2.1Trains connectivity

There are 20 railway stations in LPA. The direction of the railway lines is from Northeast to Ariyalur, Northwest to Karur, South East to Tanjore and South west to Madurai.

Tiruchirappalli Junction is the main station with the maximum footfall of 1,92,93,541 passenger annual (inwards and Outwards). The central region is getting more passengers than the outside regions due to the presence of Rockfort, Sri Rangam Temple.

Table 7-1 Passengers Flow Annually - Passenger Footfall (Inward & Outward)

Verified RedEstate™

The passenger flow is seeming to be increasing other than the situation of COVID 2019. As of now 140 passenger trains run per day. Average number of people per train is 453. This increase in passengers should be exploited to extend for the benefit of the environment and reduce congestion.

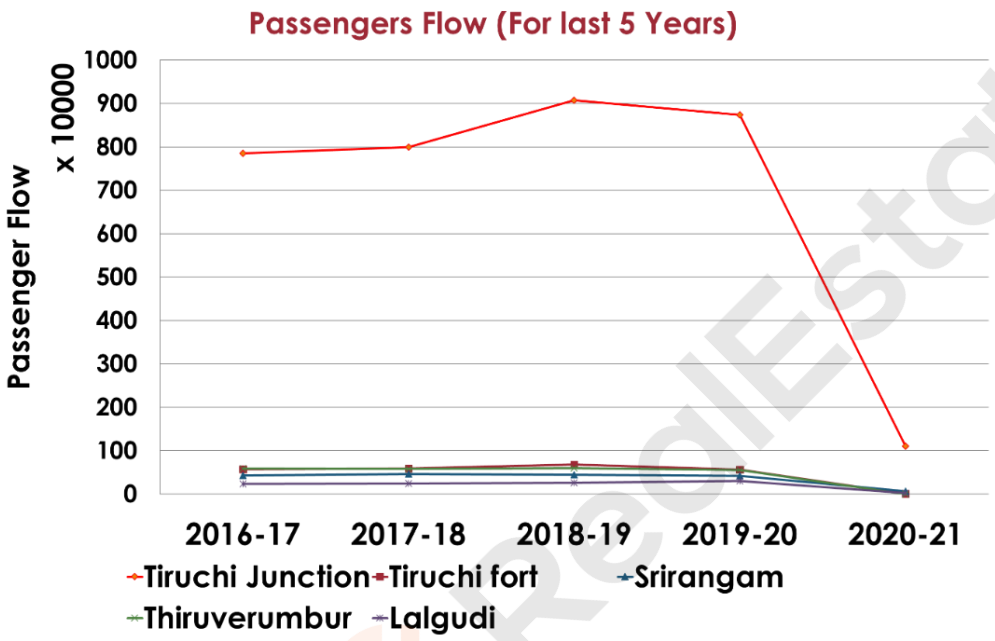

Figure 7-1 Passenger foot fall with respect to Location in the LPA

7.1.2.2Major trains routes and their frequency

The station of the city is named as TIRUCHCHIRAPALI and its station code is 'TPJ'. The station is well-connected to a number of Indian cities. Some of the major routes include to the places of Pune Junction, Bangalore Cy Junction, and Howrah Junction. There are 4 weekly trains connecting Pune Jn to Tiruchirappalli, 1 weekly train connecting Bangalore City Junction to Tiruchirappalli, and 4 weekly trains connecting Howrah Junction to Tiruchirappalli.

Some of the popular trains traveling to Tiruchirappalli are Rockfort Express (16178) to Chennai operating 7 times a week, Bangalore Express (06572) to Bangalore operating 7 times a week, and Chennai Express (16854) to Chennai operating 7 times a week.

Verified RegiEstate™

7.1.3 Bus Connectivity

LPA has well connected bus routes around Tiruchirappalli. For improved connection and frequency, there are both private and government bus services and also minibus services. The Bus Stands in LPA are:

- Central Bus Stand
- Chathiram Bus Stand
- Lalgudi Bus Stand
- Thuvakudi Bus Stand
- Thiruverumbur Bus Stand

It was observed that while TNSTC caters to regional transit needs of the city as well as intra-city bus transport needs in Tiruchirappalli along with private bus operators. Within the city, transit needs are also provided through intermediate public transport like private auto rickshaws. There has been a steady increase of IPT registrations in Tiruchirappalli over the years, barring the recent downward trend, attributed largely to the Covid-19 pandemic. The presence of these vehicles has led to the chaotic situation on the roads. Also, in the absence of any stands, these vehicles are parked on the roads, reducing the effective carriageway available for the movement of traffic, especially at terminal ends and near activity centers like regional bus stands, railway stations, recreational centers, government offices and major cross junction.

The city currently has a fleet of 587 buses (147 private buses and 440 TNSTC city buses) for a population of 14,64,422; which as per the urban fleet specification of 50 buses per lakh population falls short by 145 buses.

Passenger count at both the Central Bus Stand and the Chatram Bus Stand shows that the Chatram Bus Stand (New Bus Stand) caters to about 1,01,846 passengers per day, which is nearly twice the number of passengers catered to by the Central

Verified RealEstate™

Bus Stand. The most preferred access and egress modes at the both the terminals by walk with a share of 28 %. The next preferred mode is either local bus or by Integrated public transport with 25 % and 27 % share respectively.
(Source – CMF 2022).

7.1.3.1 Private Bus operations

Private bus operators serve an important role in fulfilling the upper echelon of the society which prefers luxury and a speedy journey, although SETC has air-conditioned and sleeper bus fleets, they are no match to the imported and latest bus fleets offered by the private parties, which are used by people for overnight journeys to Chennai or other major city like Bengaluru or Kochi.

There are about 147 private buses in the LPA area, which are mainly single bus operators. The city buses are permitted to operate on maximum route lengths of 30 km and on an average the city buses run 200-250 km per day. The city buses report an average occupancy of 55% throughout the day. The minimum fare per km of city buses in Trichy city for the year 2022 is Rs. 5.00.

7.1.4 Air connectivity-

Located on the Pudukottai-Trichy National Highway 336 the airport is well connected with frequent City buses to the major bus and railway terminals of the city like Central Bus Stand, Chatram Bus Stand, Srirangam and Trichy Junction. In addition to these exclusive buses were introduced to originate inside the airport premise destined to Thanjavur, Central Bus Stand and Karur.

The airport handled by Airports Authority of India is served by two Indian and four foreign carriers providing direct connectivity to five domestic and nine international destinations.

Table 7-3 Height restrictions for building

7.2 Traffic & Roads Network

7.2.1 Existing Road Network

The Trichy Local Planning Area (TLPA) is well connected by railway, road, air, and waterways. The Planning area is served by several major road highways like NH-45, 45B, 67, 210 and the state highways No 24 & 25 connects Tiruchirappalli city with other important urban centers of the State. The arteries are the Dindugal road, Madurai Road, Karur-Thanjavur Road, Pudukottai road, Salem and Chidambaram Road. The other important road is the bye-pass connecting Chennai Road with Madurai Road and the Kumbakonam road along the southern bank of the river Cauvery.

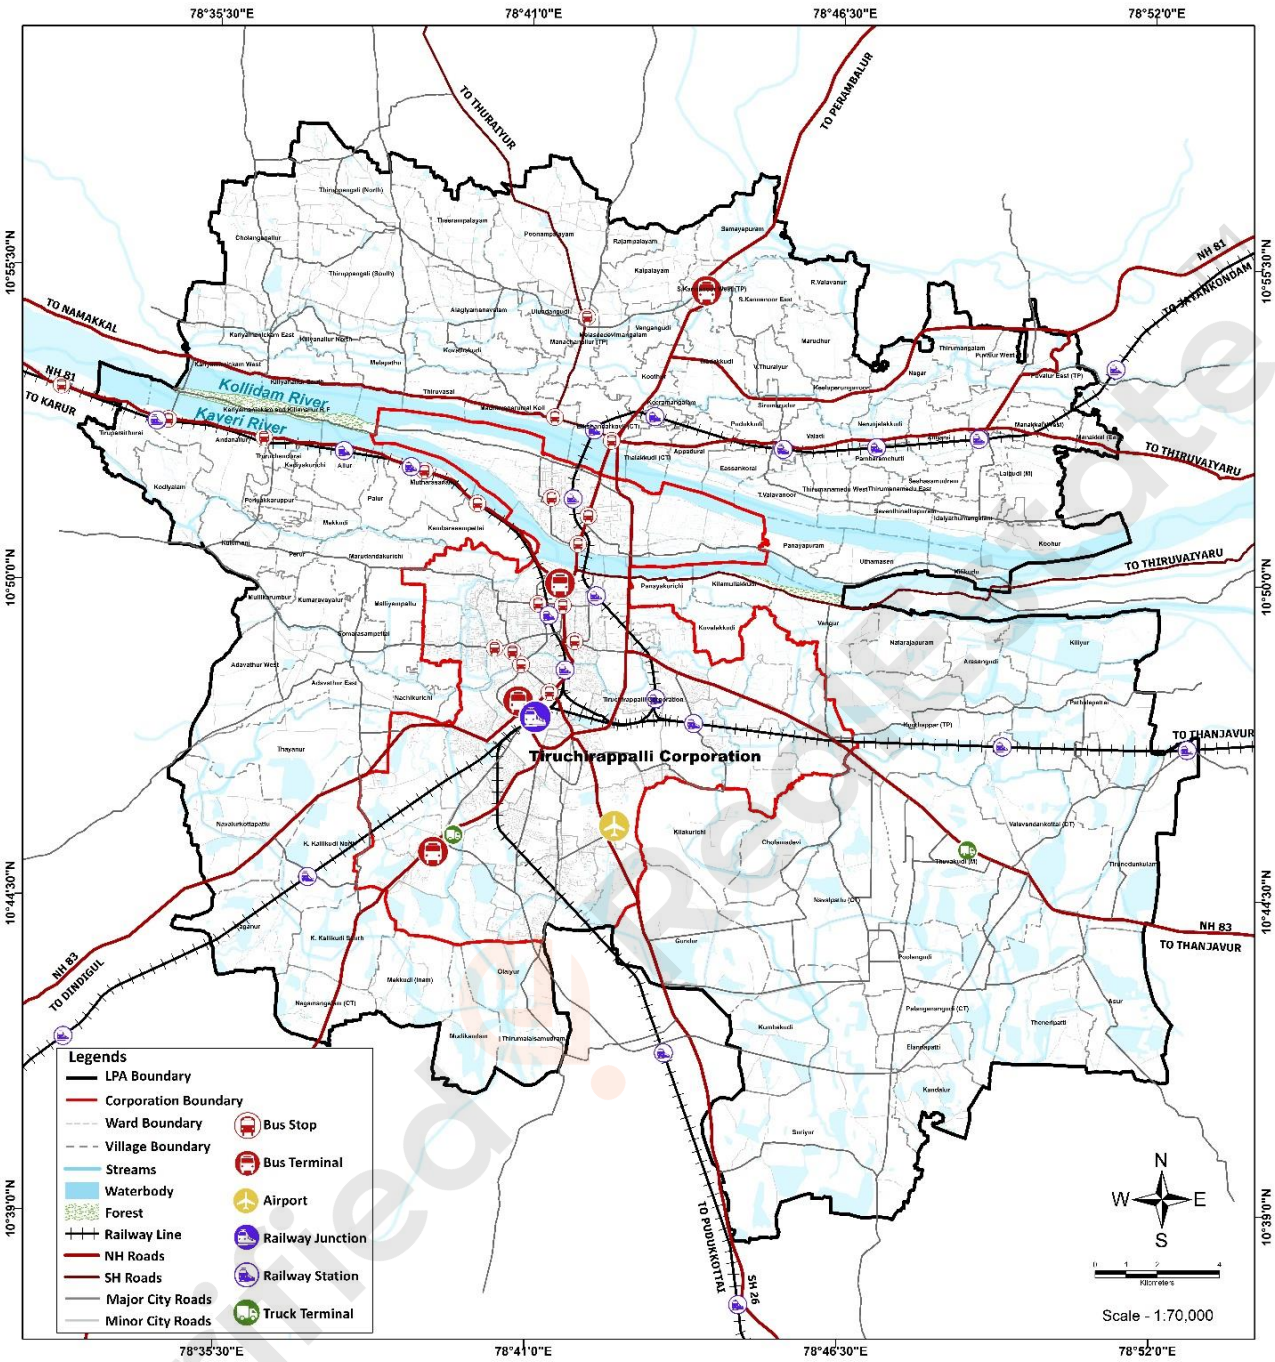

Verified RealEstate™

Map 7-1 Building height restrictions by radius

The road network in the city is well established and connects major urban centers in the state. Regional roads comprise National Highways (NH), State Highways (SH), Major District Road (MDR) and Other District Roads (ODR). Five National Highways NH 45, NH 45B, NH 210, NH 67 and NH 226, State Highway roads connecting Tiruchirappalli with other towns like Thanjavur, Pudukkottai, Madurai, Chennai, Dindigul and Karur and Major District Roads connecting Thuraiyur, Ariyalur and Kumbakonam pass through Tiruchirappalli City.

EXISTING TRANSPORTATION

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 7-2 Existing transportation network and important hubs.

7.2.1.1 Hierarchy of Roads

EXISTING ROADS HIERARCHY

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 7-3 Existing Roads Hierarchy

.

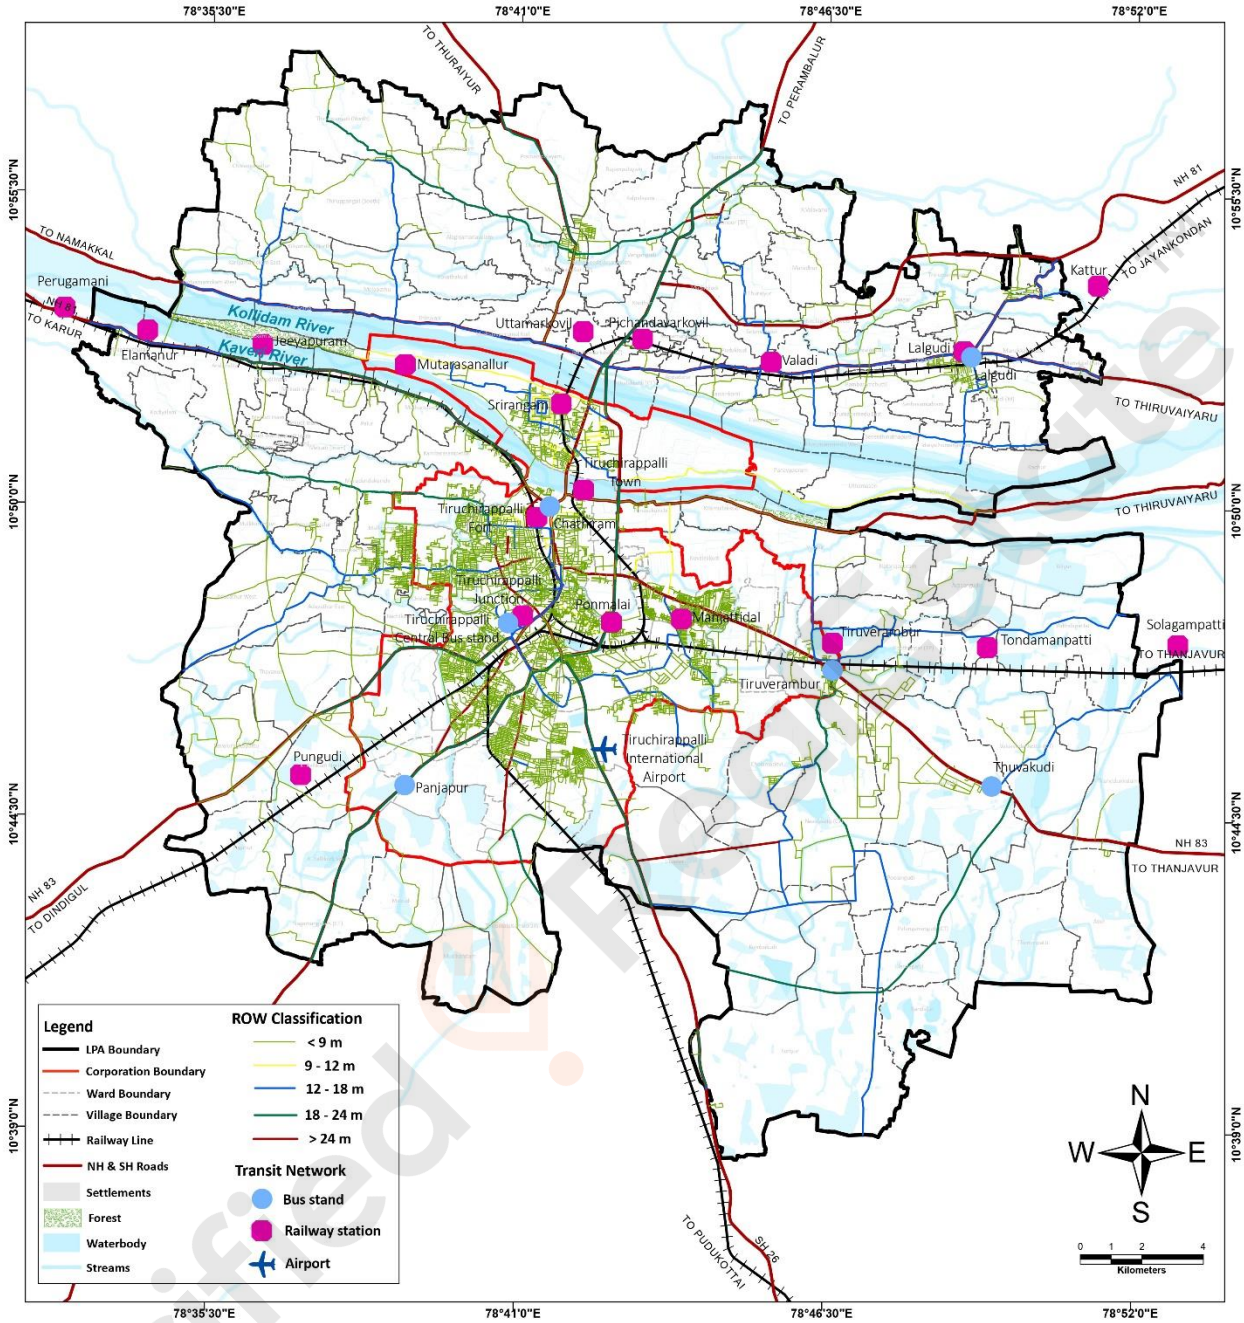

Arterial Roads- The primary roads which facilitate traffic movement to the external areas of the LPA

Sub Arterial Roads – The major roads that carry a large volume of traffic to important urban nodes within the planning area.
Collector Roads - The major collector roads which channel traffic from the local roads to the arterial roads. Local Roads - The local roads that provide direct access to the properties in Trichy LPA.

7.2.1.2 Right of Way (RoW)

The Right of Way of every surveyed road was measured and it is observed that 38% of the roads have Right of Way less than 9 m followed by 32% having Right of way of 15-20 m.

Verified RedEstate™

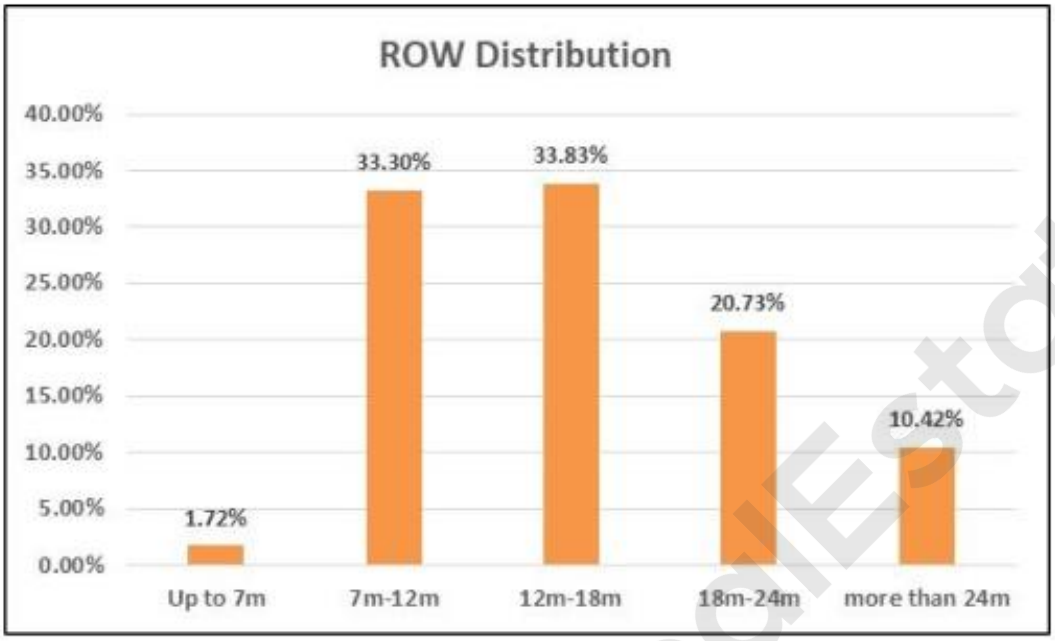

RIGHT OF WAY CLASSIFICATION WITH TRANSIT NETWORK

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 7-4 Right of way classification

Road survey inventory- Roads about 76%, were two lane roads, while 58% of the roads fell under undivided category of roads.

Out of the surveyed network of roads, about 35% of the roads have RoW lesser than 12 m followed by 32% having RoW of 15-20 m. 31% of the city's road network

does not possess footpaths. Proper road marking was not seen in 85% of the roads.

Figure 7-2 Right of Way distribution of roads

7.2.2 Freight movement

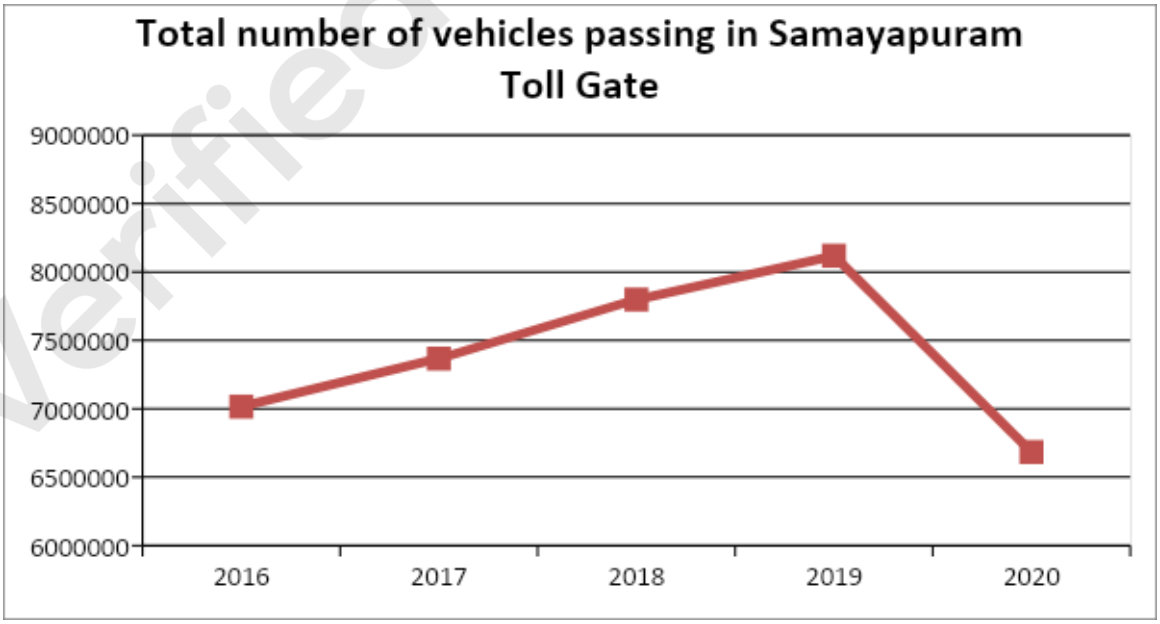

Figure 7-3 Graph of vehicular count

The movement of freight into and outside the city has been increasing day by day. On analyzing the traffic movement of Samayapuram Toll gate through the years, we can confirm that the vehicle movement has increased. The composition of the traffic is also studied and analyzed below.

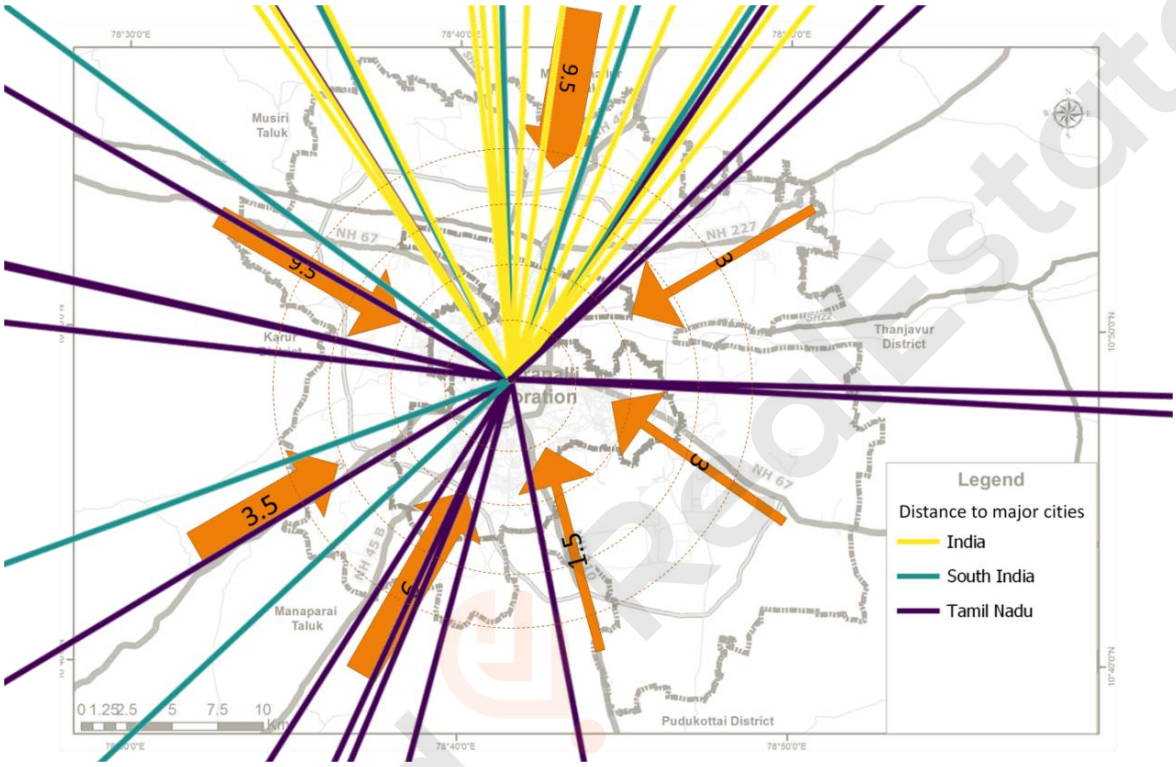

Figure 7-4 Direction of cities and their freight movement factors

The north (towards Chennai) and the west (towards Karur) directions have the highest number of links to Tiruchirappalli which we can assume to have the highest number of truck movement. With the help of those factors, the Samayapuram is extrapolated below.

Verified RealEstate ™

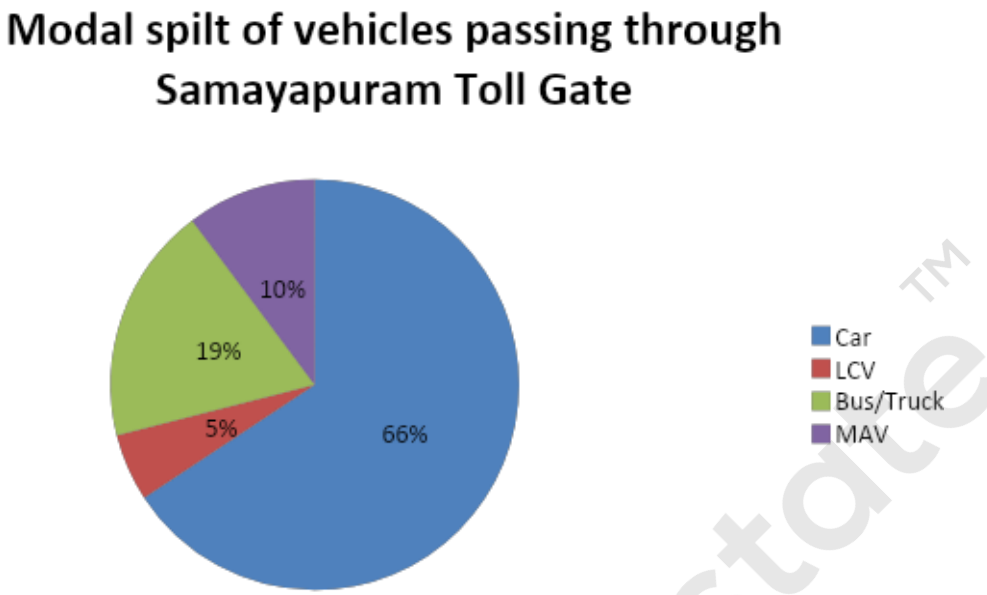

Figure 7-5 Modal split of vehicles passing through Samayapuram Toll gate

7.2.3 Air freight movement

The presence of Tiruchirappalli International Airport is a big advantage for the connectivity of passengers and freight, as Trichy can leverage its central geographical location with respect to the state, as a major connecting hub for central and southern parts of Tamil Nadu.

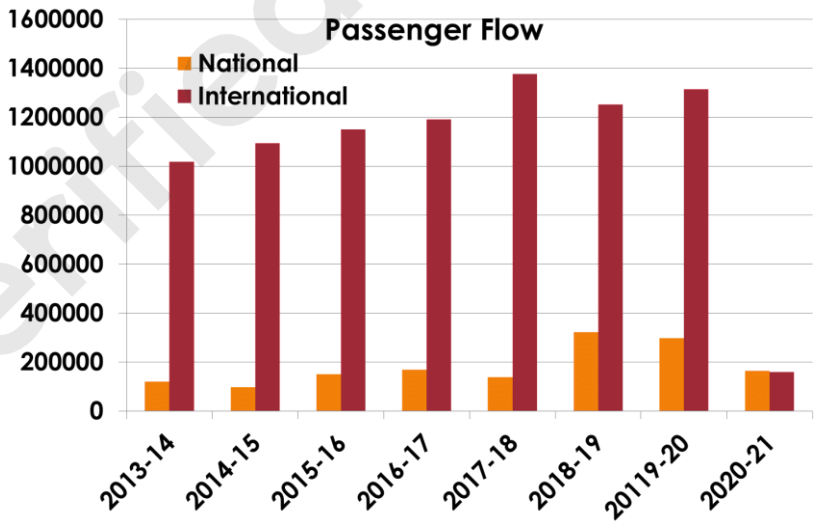

Figure 7-6 Air passenger flow annual figures.

The below two graphs indicate that both passenger and freight movement is observed to be increasing at an average of 0.7% growth rate (before Covid pandemic). International Passenger flow is more than the National Passenger flow.

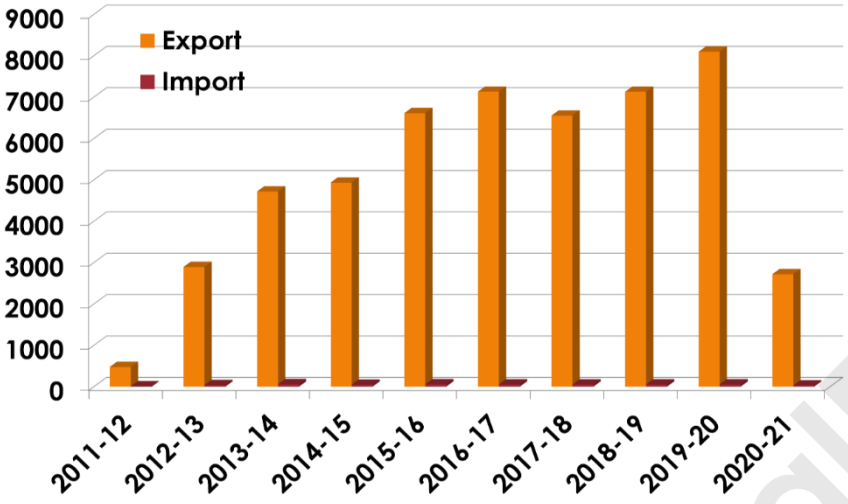

Figure 7-7 International Cargo Movement (Metric Tonnes)

Export is more than the import, which is a good indication for the city's GDP

7.2.4 Traffic analysis

To understand the existing traffic volumes within the city and to understand the vehicular volumes between the study area and outside, the surveys conducted and the analysis thereof has been presented in the following sections

The average daily traffic entering the city is 14,964. The average daily traffic leaving the city is 14,802. (As of 2022- CMF report)

7.2.5 Design Service volume

Considering the need for smooth traffic flow, it is not advisable to design the road cross-sections for traffic volumes equal to the maximum capacity, in which the speeds are rather low and freedom to maneuver within the traffic stream is very much restricted. Besides, even a small increase in traffic at that traffic volume

would lead to a forced flow situation and breakdowns within the traffic stream.

Type of carriageway	Total design service volumes for different categories of urban roads (PCU Per hour)		
	Arterial	Sub-Arterial	Collector
2 Lane (One way)	2400	1900	1400
2 Lane (Two way)	1500	1200	900
3 Lane (One way)	3600	2900	2200
4 Lane Undivided (Two way)	3000	2400	1800
4 Lane divided (Two way)	3600	2900	--
6 Lane Undivided (Two way)	4800	3800	--
6 Lane divided (Two way)	5400	4300	--
8 Lane divided (Two way)	7200	--	--

Table 7-4 Recommended design service volume

The recommended volume of traffic by Indian Road Congress IRC is around 0.70 times the maximum capacity and this is taken as the "design services volume" for the purpose of adopting design values.

7.2.5.1 Volume count ratio

The V/C is one of the most used indices for the assessment of traffic conditions in urban areas. V is the total number of vehicles passing a given point in one hour and C is the maximum number of cars that can pass the same point at a reasonable traffic condition.

Verified @ RealEstate TM

DESCRIPTION	V/C	LOS
Free flow conditions with unimpeded maneuverability.	0.00 to 0.60	A
Reasonably unimpeded operations with slightly restricted maneuverability. Stopped delays are not bothersome.	0.61 to 0.70	B
Stable operations with somewhat more restrictions in making mid-block lane changes than LOS B.	0.71 to 0.80	C
Approaching unstable operations.	0.81 to 0.90	D
Operations with significant intersection approach delays and low average speeds.	0.91 to 1.00	E
Intersection congestion, high delay and adverse signal progressions.	Greater than 1.00	F

Table 7-5 V/C in correlation to Level of Service

A v/c ratio less than 0.85 generally implies that adequate capacity is available and vehicles are not expected to experience significant queues and delays. As the v/c ratio approaches 1.0, traffic flow may become unstable, and delay & queuing conditions may occur. Once the demand exceeds the capacity v/c ratio greater than 1.0), traffic flow is unstable and excessive delay and queuing is expected.

7.2.6 Classified Volume Count

To understand the existing traffic volumes within the city and to understand the vehicular volumes between the study area and outside, the surveys conducted

and the analysis thereof has been presented in the following sections.

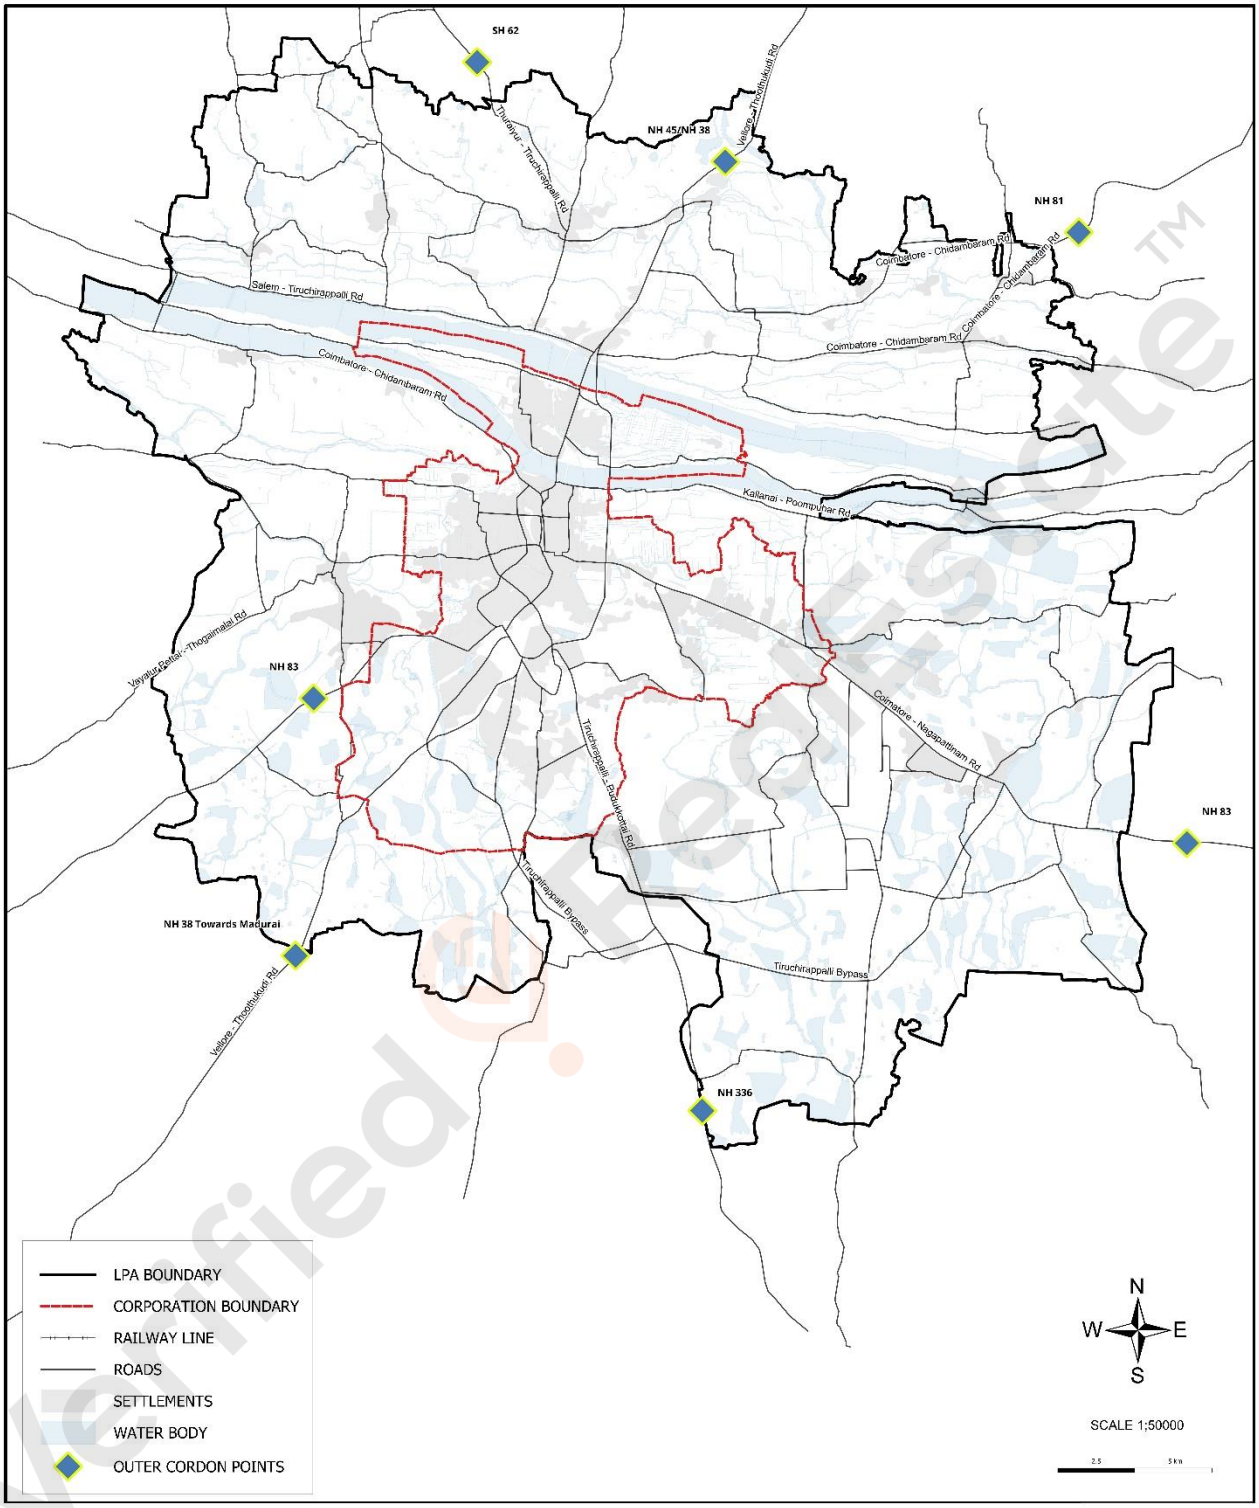

7.2.6.1 Outer Cordon

Outer Cordon volume counts were carried out at 8 cordon locations. The daily traffic (24hr) at the cordon locations ranges from 17000 vehicles to 50000 vehicles. As most of the traffic destined for Tiruchirappalli from Chennai enters the city from the Samayapuram via NH 38, wherein new developments are also coming up, almost 70127 PCUs were observed in a day and 5610 PCU traffic was observed during the peak hour.

Passenger vehicles have higher composition compared to goods and slow-moving vehicles at all the locations. Least Volume of traffic was observed in NH 81 (West) during peak hour with 1429 PCUs whereas a maximum number of goods vehicles, about of 51% of Good Vehicles are plying on NH 81(East). Private vehicles account for 61% of the total traffic in all cordon locations.

Share of two wheelers is the highest in all locations, varying between 27% and 50%. Share of Goods vehicles is about 25%.

7.3 Road Safety

7.3.1 Accident Pattern

As per the data of road accidents collected for the past 5 years, total no of accidents in the city in the year 2015 is 399 of which fatal accidents constitute 111 (i.e., 27%). The accidents in Tiruchirappalli are seen to be on a decline considering the last 5-year data. The average annual growth rate is at -9.14% whereas fatal accidents are increasing at a rate of 8.78%. The trend of motor vehicle accidents in Tiruchirappalli LPA from 2017 onwards is presented in the table below.

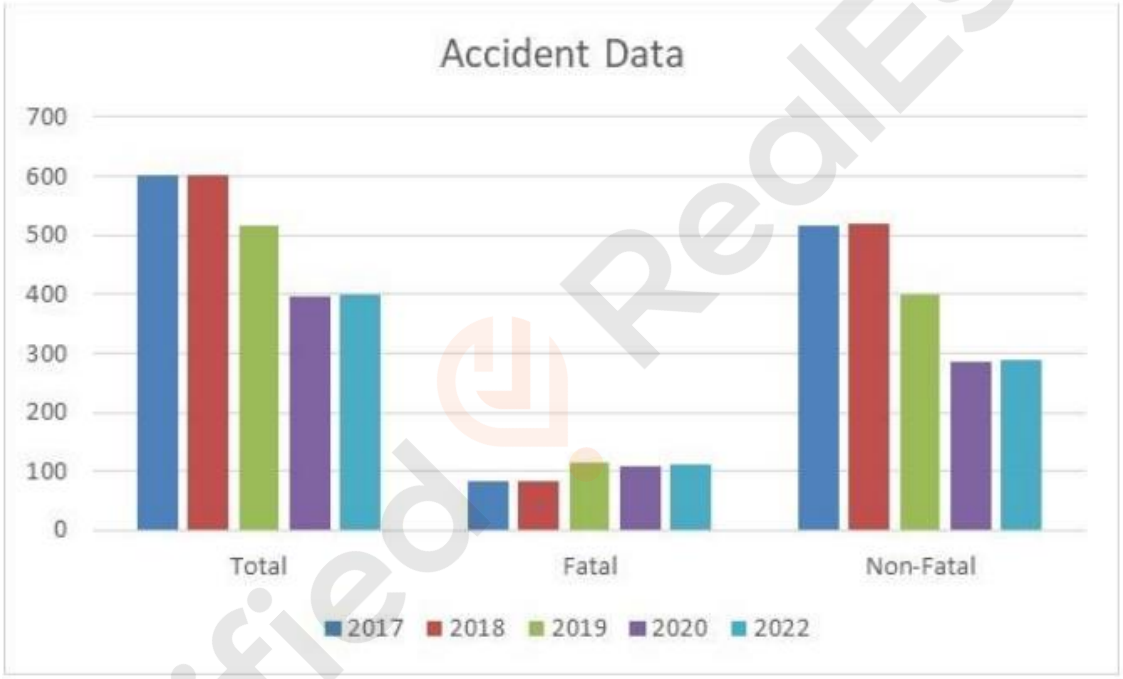

Figure 7-8 Accidental trends in the city

7.4 SUMMARY

Trichy, like many growing cities, may experience traffic congestion, especially in central areas and key transportation hubs. The congestion can be attributed to factors such as population growth, increasing vehicle ownership, and limited road infrastructure. Addressing these challenges is crucial for creating a more efficient and sustainable urban transportation system.

Verified RealEstate™

This could include the introduction of smart traffic management systems, the expansion of public transportation services, and infrastructure development projects to ease congestion. Future plans may focus on sustainable mobility solutions and improving the overall transportation ecosystem.

Public transportation is a crucial aspect of urban mobility, the availability, reliability, and accessibility of public transport play a significant role in addressing traffic congestion.

Verified RealEstate™

PHYSICAL INFRASTRUCTURE

VerifiedRealEstate™

8. PHYSICAL INFRASTRUCTURE

The degree of physical infrastructure availability, accessibility, and quality greatly influences the quality of life in each region. The development of physical infrastructure is a key factor in economic growth. To maintain good urban health and lead productive lives, efficient solid waste collection and disposal, sewage, and water supply systems are necessary. The population's fast growth necessitates the expansion of physical infrastructure. Below is a summary of the current situation and future needs in Tiruchirappalli LPA.

8.1 Water supply

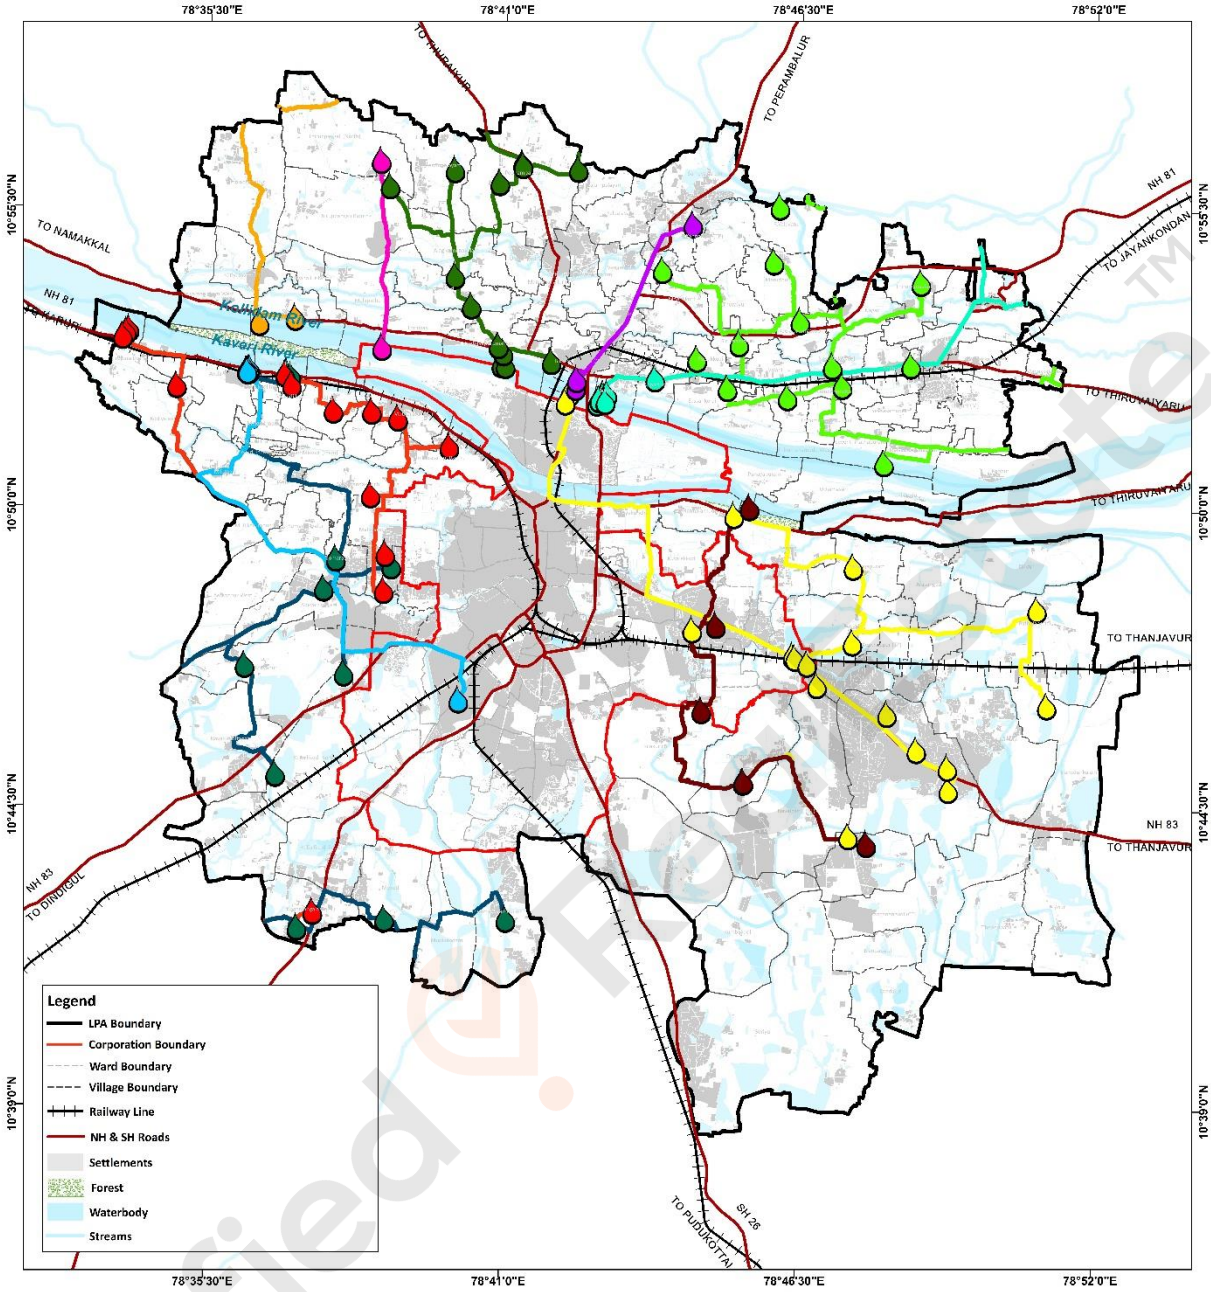

8.1.1 Source and Quantity

Tiruchirappalli's main source of water supply is from Cauvery and Kollidam rivers. Other sources are reservoirs, collector wells and bore wells. Water supply in LPA is provided by various bodies ranging from urban local bodies, panchayats and TWAD. CWSS network serves most of the area falling under LPA boundary

8.1.2 Infrastructure for Water Supply

Tiruchirappalli LPA is receiving water supply through a combined water supply scheme (CWSS). Tiruchirappalli corporation has 146 OHTs with storage capacity of 70.64 MLD and the Municipalities has about 11 OHTs with a storage capacity of 5.49 MLD, Town Panchayat has about 11 OHTs with a storage capacity of 7.75 MLD, and the rest of LPA has about 96 OHTs with storage capacity of 30 MLD The location of OHT facilities within the LPA is mapped. In the corporation area, the existing storage facilities with a total capacity of 70.6 MLD are inadequate at present.

Table 8-1 Old Sources of water

8.1.2.1 Existing demand and Supply

The Tamil Nadu Drainage and Water Supply Board recommend a per capita water supply of 135 litres per capita per day for municipalities with an underground sewerage system, 90 litres per capita per day for Town Panchayat with an underground sewerage system, and 55 litres per capita per day for Villages.

The existing per capita supply in Tiruchirappalli Corporation is 135 lpcd. The existing per capita in municipalities, town panchayats and villages are 84, 82 and 54 lpcd respectively. As per the TWAD norms the per capita supply for Corporation, Municipality, Town Panchayat and Villages are 135 lpcd, 90 lpcd and 55 lpcd. As per this norm, the existing gap in water supply for Tiruchirappalli Corporation and Villages is found to be 8 MLD. The existing water sources need to be augmented and water bodies need to rejuvenate to fulfil the existing demand in the water supply.

Verified RealEstate™

S.No	Description	Tiruchirappalli corporation	Municipality	Town Panchayat	Villages
1	Existing Population	1089019	70839	91851	436324
2	Coverage of water supply connections	53%	32%	57%	93%
3	Per capita supply (TWAD Board Norms)	135	90	70	55
4	Total quantity required in MLD	147	6	6	24
5	Existing per capita supply in LPCD	135	84	82	54
6	Total quantity supplied in MLD	142	5.49	6.23	21
7	Existing demand in MLD	5	-	-	3

Table 8-2 Existing demand and supply

8.1.3 Projected Requirement

The estimated water supply demand for the projected Population of 2041 is shown in Table 5.7. As per TWAD Board norms, Tiruchirappalli LPA will require 264 MLD water by the year 2041 to support the 2344855 population without accounting for losses in transmission and distribution. Tiruchirappalli LPA has an available water quantity of about 115MLD, the remaining 149 MLD needs to be augmented. As per Table 8.4, Villages need 3 MLD of additional water supply in 2041.

Verified RedEstate

Name of Village/Town	Projected Population 2041	Per capita Supply (TWAD Board norms)	Total quantity required in 2041 (MLD)	Quantity Available
Tiruchirappalli Corporation	1540720	135	208	71
Municipality	89513	135	12	6
Town Panchayat	134324	90	12	8
Rest of LPA	580298	55	32	30
Total	2344855	-	264	115

Table 8-3 Projected water requirement

As per norms the Municipalities and Town Panchayats require 90 and 70 lpcd, but considering the population growth, 135 lpcd is taken for Municipalities and 90 lpcd is taken for Town Panchayats for the year 2041. The area required to meet the storage gap of 149 MLD is 2.8 Hectares.

8.2 Sewerage and sanitation

The Underground Sewage System covers the Tiruchirappalli Corporation and 2 Town Panchayats. The corporation is covered by UGSS through old schemes. The ongoing scheme is split into two phases. The first phase has an STP capacity of 37MLD.

8.2.1 Sewerage generation and Treatment

The total sewage generated from Tiruchirappalli Corporation, Municipalities, Town Panchayat and Villages is presently estimated at 118 MLD, 5 MLD, 5 MLD and 19 MLD. 71% of the Tiruchirappalli Corporation area is covered with sewer network. 54% of Manachanallur and S.Kannanoor Town Panchayat area is covered with sewer network.

Verified@RealEstate TM

8.2.2 Sanitation

LPA	Total No.of Households	Households having Latrine facility within premises	Households not having Latrine facility within premises
Total	3,63,064	69.28%	30.72%
Urban	2,66,962	79.33%	20.67%
Rural	96,102	41.36%	58.64%

Table 8-4 Sanitation

Rural areas are lacking houses with latrine facilities. 58.64% of the households live in houses with no latrine facility. Urban areas have 79.33% of households having latrine facility within premises. Rural and Urban areas can improve these lacking facilities with the help of Swachh Bharat Mission and other schemes.

8.2.3 Existing Gap in Sewage Treatment

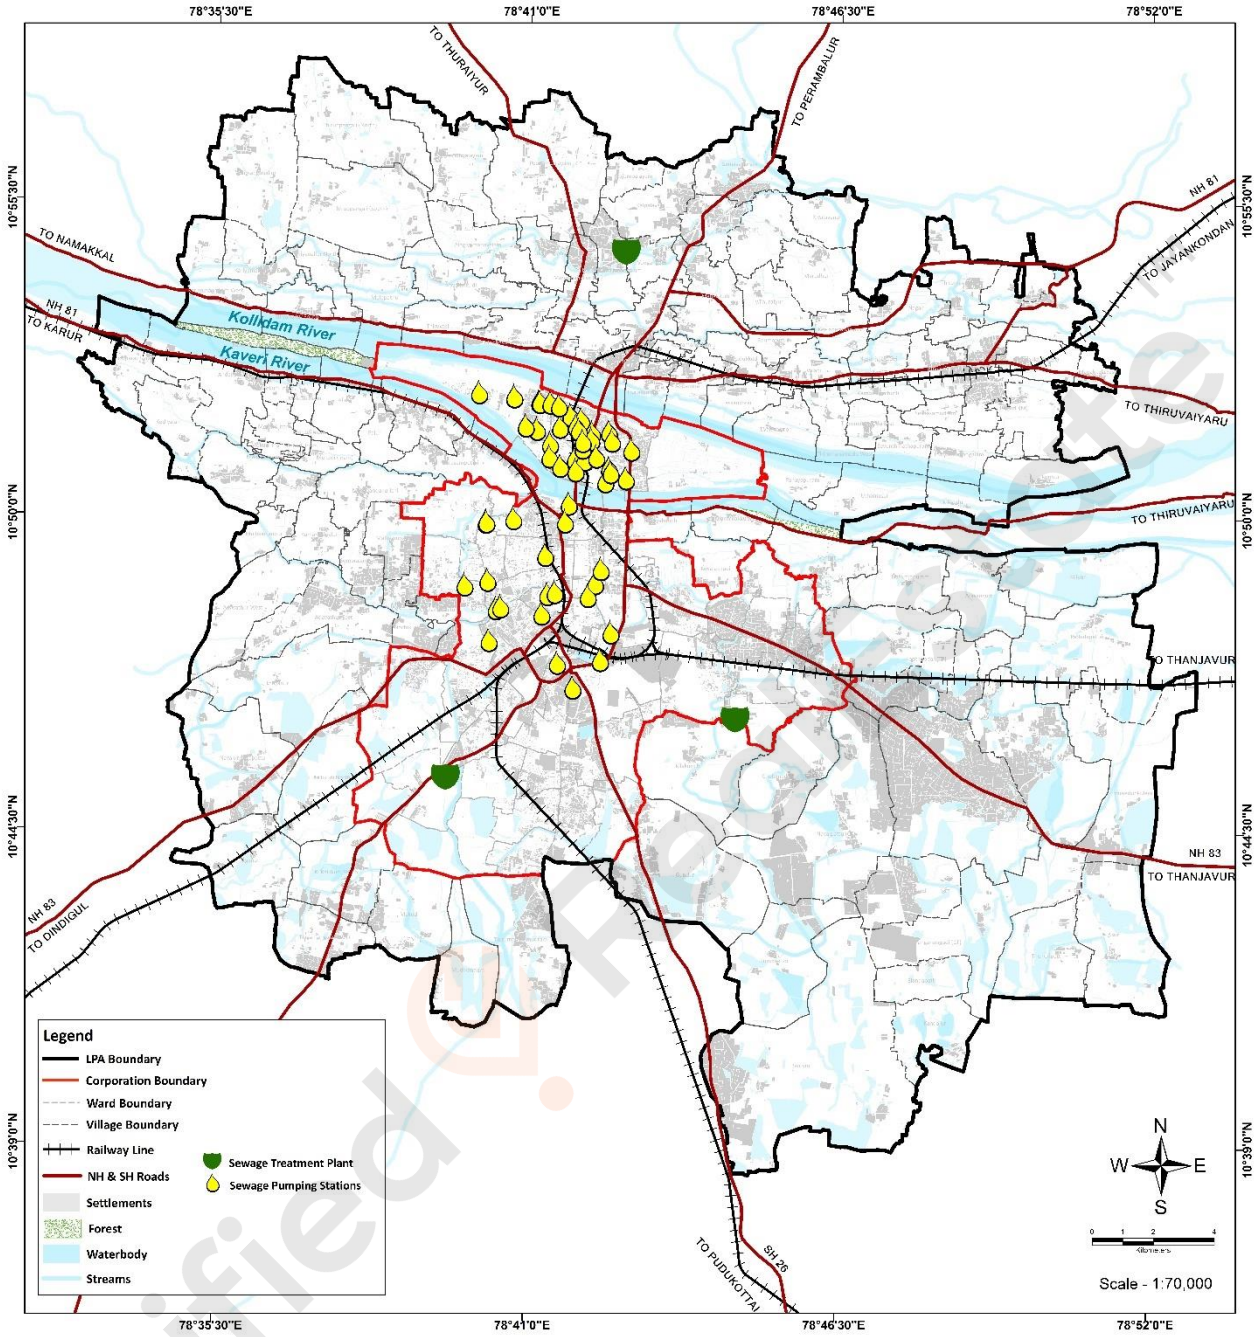

Presently, Tiruchirappalli Corporation generates about 118 MLD of sewage (estimated at 80 % of the water supply). Tiruchirappalli Corporation area has Sewage Treatment Plants with a total capacity of 95.64MLD of which 58.64 MLD is running and 37MLD is on-going. The existing STP is inadequate to treat the present sewage in Tiruchirappalli Corporation. STP capacity of 22.4 MLD is required. Manachanallur and S.Kannanoor Town Panchayat has one STP of 6.4 MLD capacity which is adequate in the existing scenario. At the Village level, there are no treatment facilities so Decentralized Wastewater Treatment Systems can be proposed.

Verified RealEstate

Description	Coverage of Sewage Network	Existing Sewage Generated (MLD)	No.of STPs	Total Installed Capacity of STPs (MLD)	Present Gap (MLD)
Tiruchirappalli Corporation	71%	118	2	95.64	22.4
Municipality	-	5	-	-	5
Town Panchayat	54%	5	1	6.4	1.5 (Excess)
Rest of LPA	-	19	-	-	-

STPs AND SEWAGE PUMPING STATIONS

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 8-3 STPs and Sewage Pumping Stations

8.2.4 Projected Requirement

Description	Projected Sewage Generated (MLD)	Existing Capacity of STPs (MLD)	Additional capacity required (MLD)
Tiruchirappalli Corporation	166	95.64	71
Municipality	6	-	6
Town Panchayat	7.5	6.41	1.1
Rest of LPA	25.5	No STP	DEWATS can be proposed

Table 8-6 Projected requirement of Sewage

The Projected Sewage generation by 2041 is achieved from the projected water supply (80% of the total supply). By 2041 Tiruchirappalli Corporation will generate 166 MLD of sewage but the existing STP has only a capacity of 95.64 MLD. Additional STP is required to treat 71 MLD of excess sewage in 2041. Town Panchayat will generate an estimate of about 7.5 MLD of Sewage. The existing STP is not sufficient till 2041. Additional STP is required to treat 1.1 MLD of excess sewage in 2041. At the Village level, currently, there are no treatment plants. Decentralized Wastewater Treatment Systems (DEWATS) can be proposed in Villages. As per URDPFI, an average of 0.25 hectares is taken as the area required per MLD. To treat 71 MLD of additional sewage generated in 2041, 18 ha of land is required in Tiruchirappalli Corporation. For Manachanallur and S.Kannanoor Town Panchayat, the existing STP is inadequate for treating the sewage generated in 2041. Additional 1.1 MLD to be treated and it requires 0.3 ha area. As per the handbook on Decentralized Wastewater treatment module by the National Institute of Urban Affairs, Delhi the area required for treating 1cubic.metre of wastewater is 60.5 sq.m.so to treat 25500 Cubic meters of wastewater collected in Villages 150 ha of land is required in the Villages.

Verified by RegiEstate™

8.3 Solid waste management

Solid Waste management is an essential service that relates directly to public health and the environment. ULB is responsible for creating, operating, and maintaining infrastructure for the collection, storage, segregation, transportation, processing, and disposal of municipal solid wastes. Poor solid waste management has direct implications on the environmental health of the region and has a significant bearing on the quality of life of citizens. Tiruchirappalli Corporation is looking after the waste management within its jurisdiction, while the rest of the area, Town Panchayat and different Gram Panchayat's local body is responsible for waste management in their respective jurisdictions.

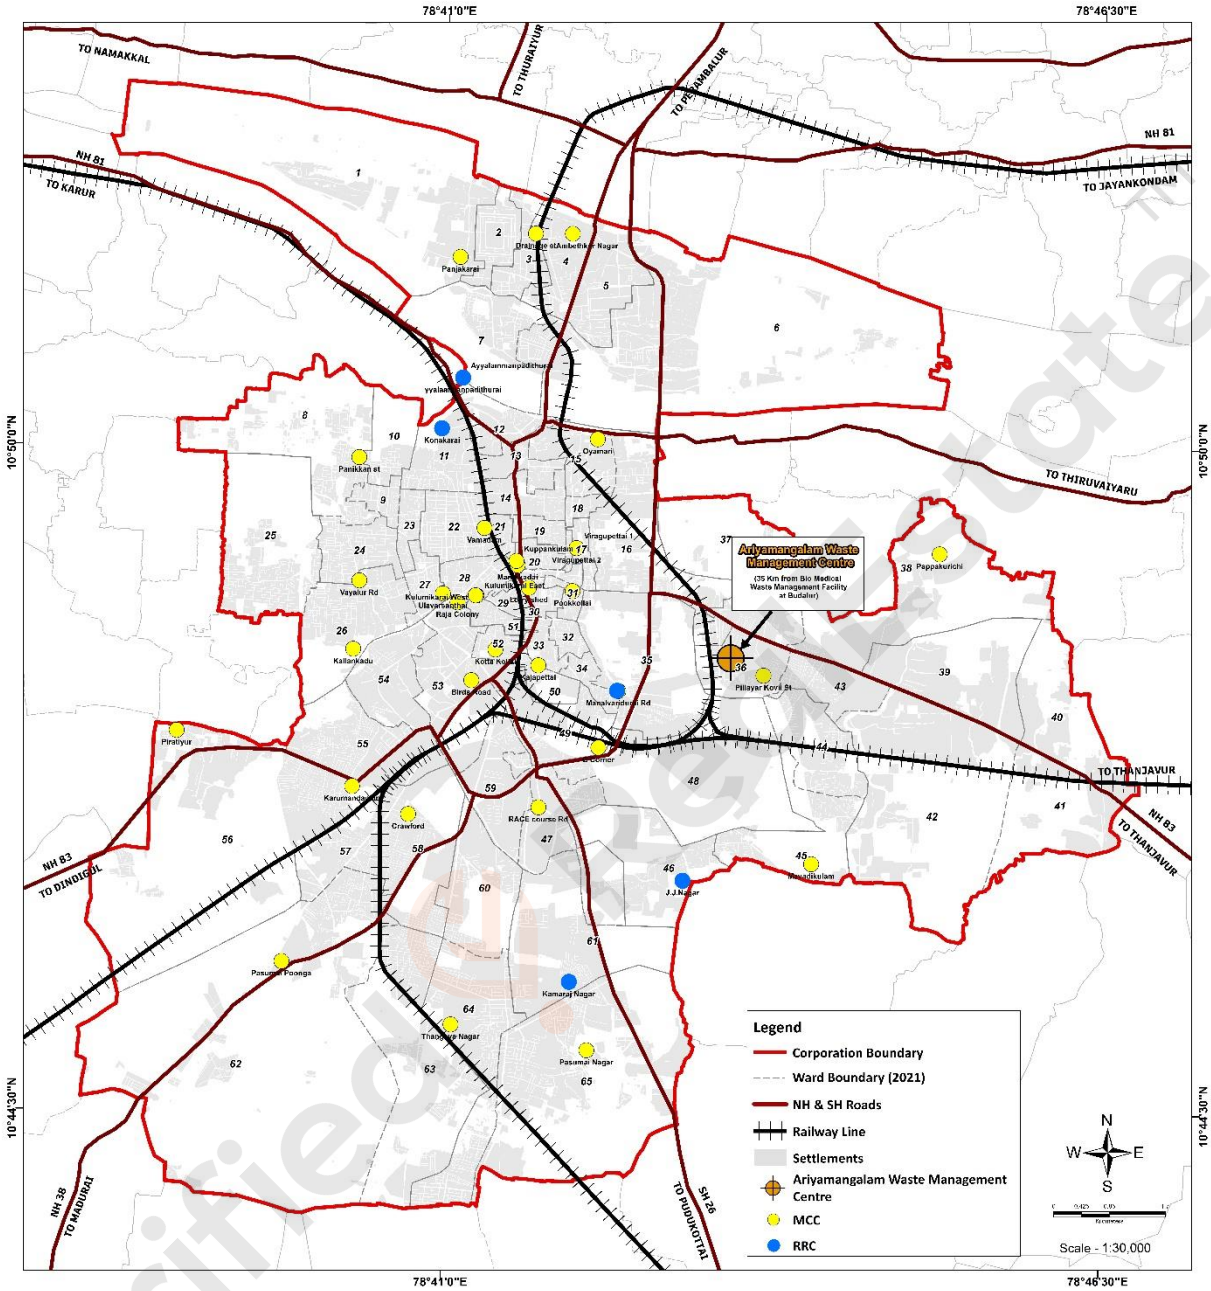

8.3.1 Solid waste Generation

Tiruchirappalli LPA generates about 588 TPD of Solid waste. Currently, urban area of Tiruchirappalli LPA average garbage generated per person per day is 400g. So, the estimated quantity of Waste Generated per day in the Urban Area is 500TPD.

S. No.	Description	Population 2021	NEERI Standarsd (0.2-0.6kg per person)	Quantity of waste generated (TPD)
1	**Tiruchirappalli Corporation**	1089019	0.4	436
2	**Municipality**	70839	0.4	28
3	**Town Panchayat**	911851	0.4	37
4	**Rest of LPA**	436496	0.2	87

SOLID WASTE TREATMENT FACILITIES

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 8-4 Solid waste Management – MCC & RRC

8.3.2 Composition of Solid Waste

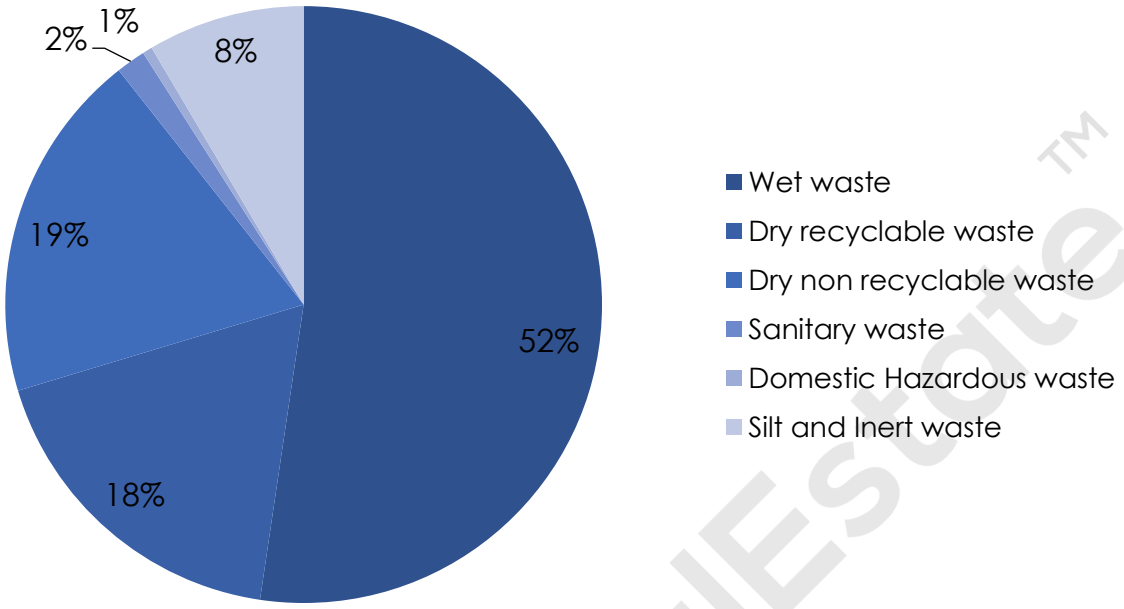

Figure 8-1 Composition of Solid waste in Tiruchirappalli Corporation

Solid Waste in Tiruchirappalli LPA comprises 52.34% Wet waste, 18% Dry Recyclable waste, 19.02% of Dry Non-recyclable waste, 1.6% of Sanitation waste, 0.53% of Domestic Hazardous waste and 8.51% of Silt & Inert waste.

8.3.3 Treatment Facilities

Tiruchirappalli Corporation and Thuvakudi Municipality are treating solid waste by composting. Tiruchirappalli has 175 TPD capacity MCC and 26 TPD capacity biomethane. Apart from this 5 RRC is installed. The remaining waste has been dumped in the ariyamangalam landfill site which is 47 acres. Now this landfill site is being cleared to accommodate solar panel installation. The thuvakudi Municipality has 7 TPD capacity MCC and the Lalgudi Municipality has landfill site. Town Panchayats have landfill site and the village has 4.5 TPD capacity of MCC and the remaining waste are dumped in landfill sites. Recycle and reuse concept needs to be implemented to minimize waste generation.

Verified RealEstate™

8.3.4 Projected Requirement

Description	Population 2041	NEERI Standards (0.2-0.6kg per person)	Projected Quantity of waste generated (TPD)	Existing Capacity of Compost yard (TPD)	Additional Capacity Required in 2041
Tiruchirappalli Corporation	1540720	0.4	616	201	415
Municipality	89513	0.4	36	7	29
Town Panchayat	134324	0.4	54	-	54
Rest of LPA	580298	0.2	116	4.4	112

Table 8-8 Projected solid waste generation 2041 – Tiruchirappalli LPA

Based on the per capita generation of solid waste it is estimated that by 2041 about 822 TPD of solid waste will be generated in Tiruchirappalli LPA. As per NEERI Standards, the existing composting landfill site is not sufficient to store Solid Waste generated so there is need for additional Compost yards in the Corporation area. With respect to composition of solid waste, MCC and Bio methane centers for capacity of 218 TPD for Wet waste, Incinerator for capacity of175 TPD for dry non-recyclable waste, sanitary waste and domestic hazardous waste.

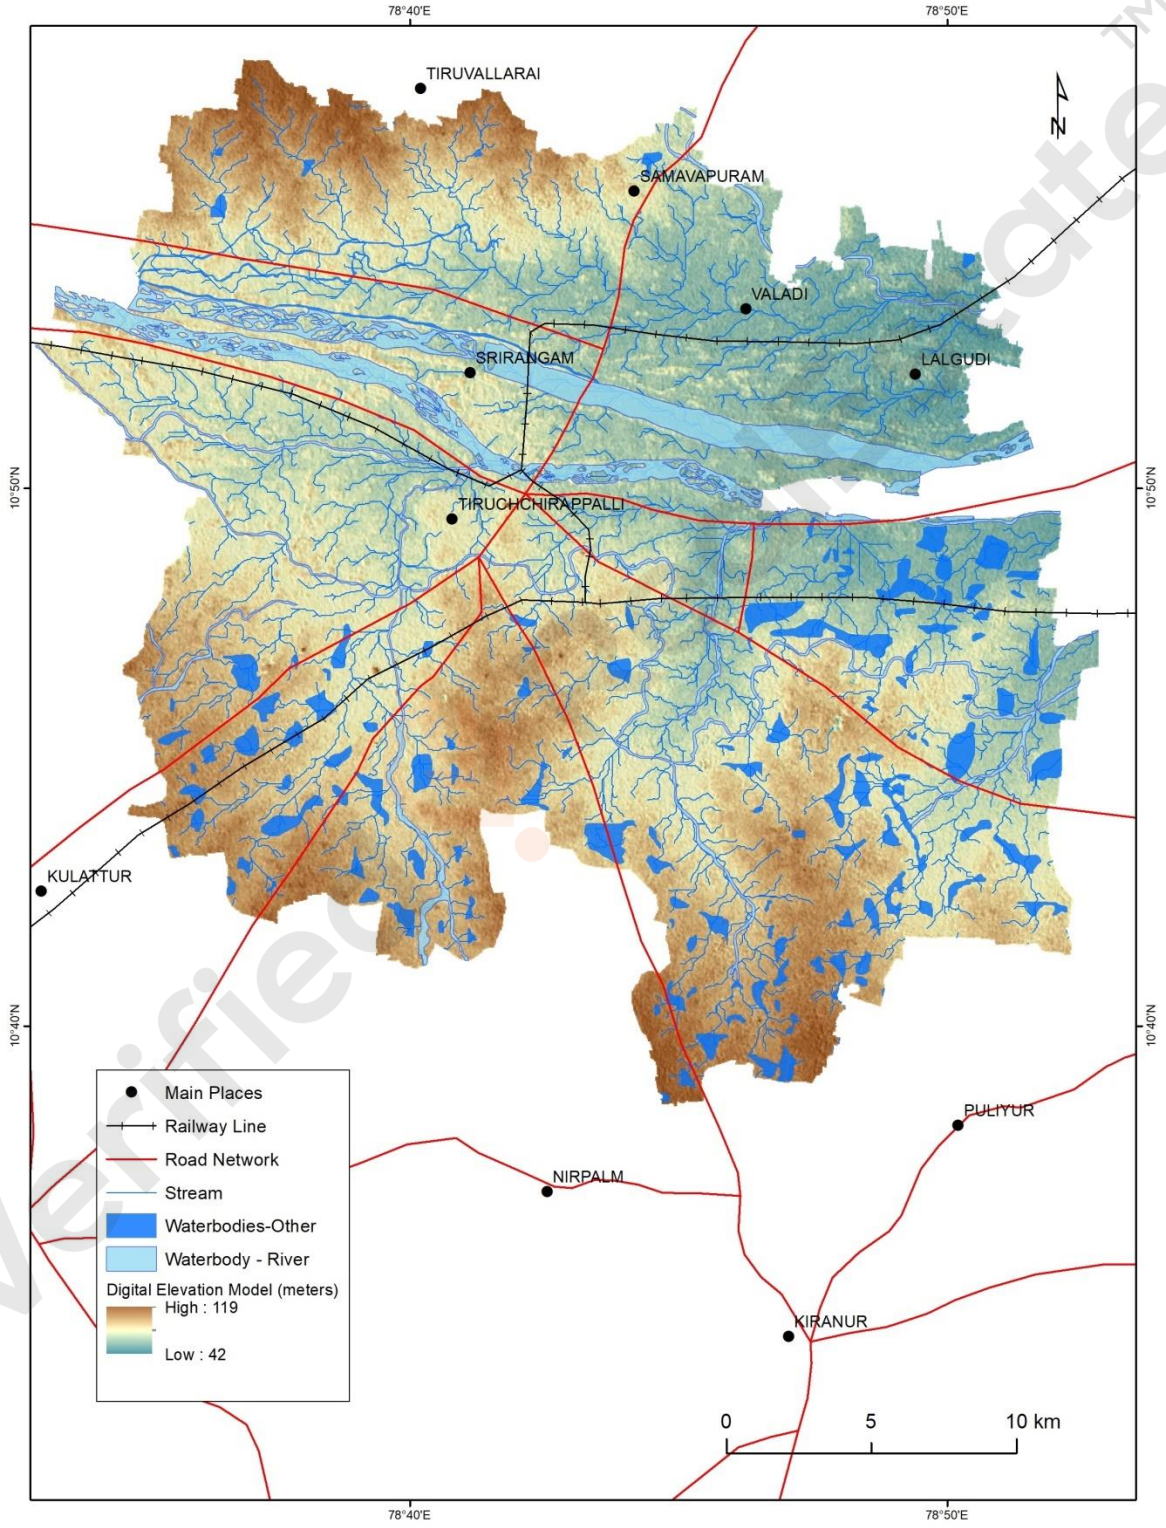

8.4 Storm water drainage

8.4.1 Existing Situation

The existing drainage condition of Tiruchirappalli consists of the natural river and manmade drainage systems (stormwater drains). Tiruchirappali LPA has 2 rivers namely.River Cauvery and River Kollidam The Corporation area has a stormwater drain for a length of 747.13 km which is 52.24% of the total length of

Verified by PeglEstate

the road. As Tiruchirappalli is prone to flooding the Storm Water drain needs to be implemented for the entire road length to protect the town from flooding. The uncovered areas need to be covered. Only 4.6% of the rest of LPA is covered with storm water drain.

Map 8-5 Drainage

8.5 Electricity

Based on the estimated requirements of power supply as per the National Electricity Policy published in 2005, the recommended consumption is 2.74 kWh per capita per day. The per capita demand for electricity includes domestic, commercial, industrial, and other requirements. Tiruchirappalli LPA has 24 substations, 2 with 230/33-11 KV capacity and remaining with 110/33-11 KV capacity.

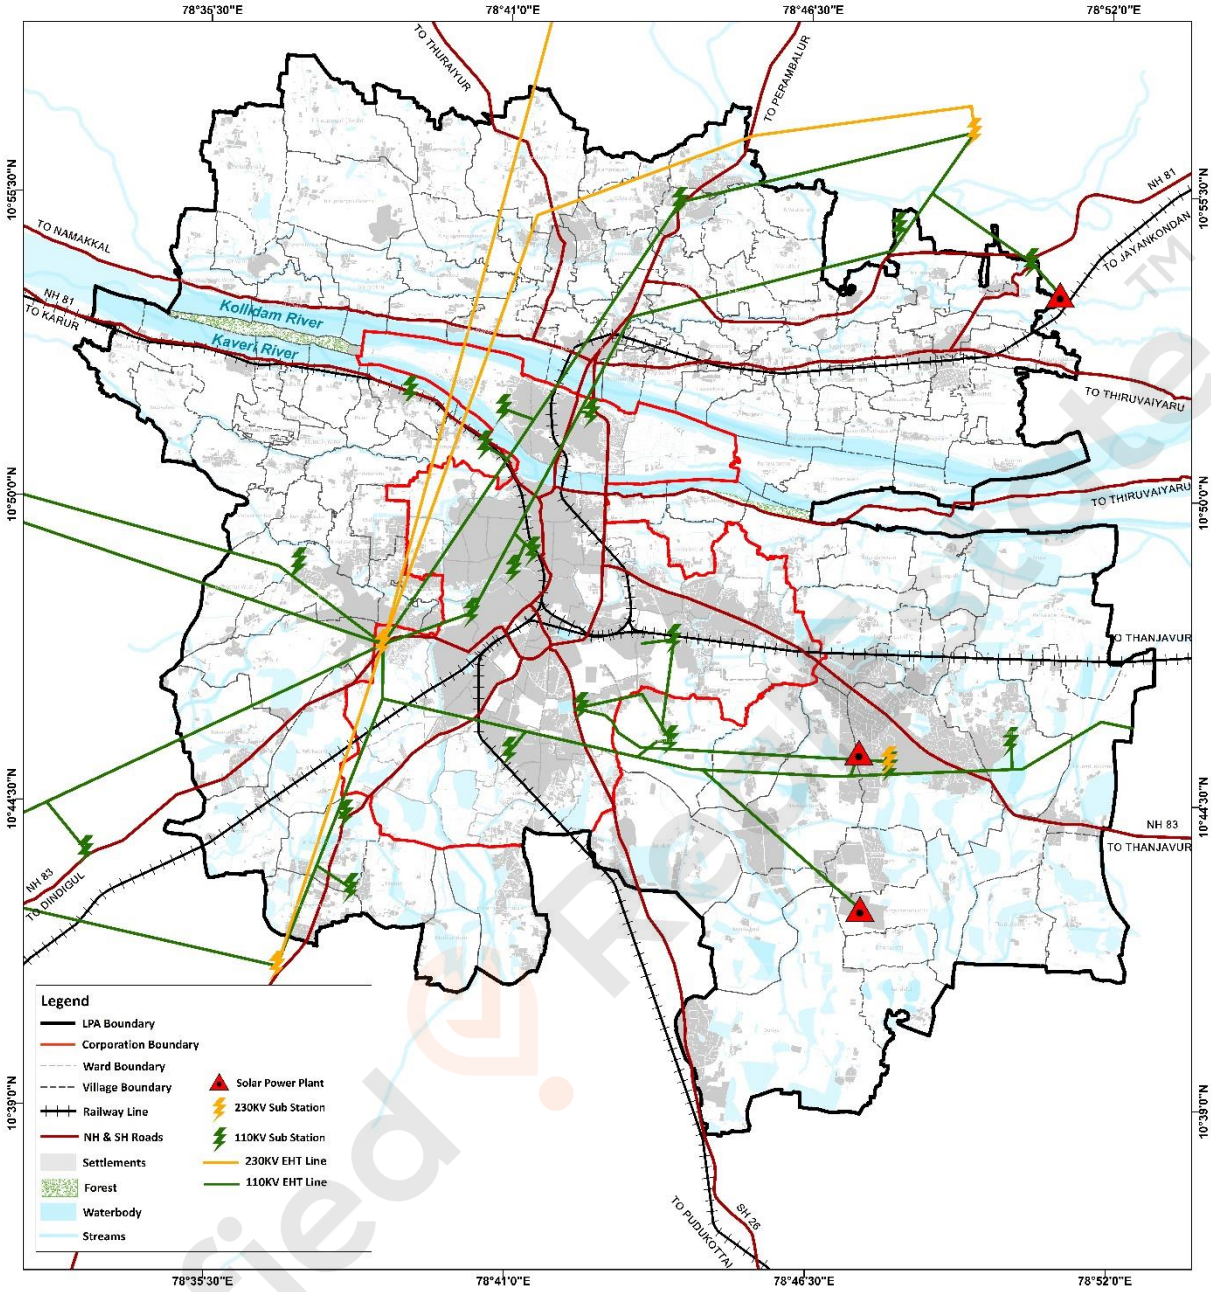

8.5.1 Projected Requirement

S. No.	Description	
1	Population 2011	1433167
2	Projected Population 2041	2344855
3	Additional Population	911688
4	No.of Substations existing	24
5	Existing Capacity of substation	1061MV
6	Power supply requirement for projected population 2041	1759MV
7	Gap	698MV
8	No.of Substation of capacity (110/33-11kv) required for 2041	32
9	Land area required for power infrastructure for 2041 in ha	1.8

Table 8-9 Substation requirement 2041 – Tiruchirappalli LPA

As per URDPI guidelines, for every 15000 Population, a substation of 11 KV is required.. In 2041 the population of LPA will be 2344855. To serve an additional population of 911688, 32 substations of 11-33 KV capacity each are proposed.

ELECTRICITY INFRASTRUCTURE

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 8-6 Electrical Infrastructure

8.6 SUMMARY

Tiruchirappalli's main source of water supply is from Cauvery and Kollidam rivers. Other sources are reservoirs, collector wells and bore wells. Water supply in LPA is provided by various bodies ranging from urban local bodies, panchayats and TWAD. CWSS network serves most of the area falling under LPA boundary.
By 2041, the additional water requirement will be 90 MLD. The additional requirement for water is to be met by augmenting the existing water resources.

Water supply and its storage capacity gap are high in corporation area compared to rest of the LPA. UGSS covers corporation and two Town panchayat but Municipalities and other TPs to be covered. The storm water drains cover only the corporation area whereas only 4.6% of the rest of LPA is covered. The natural drains can be utilised to meet the storm water drainage. In solid waste management - landfill is one of the means of disposal which will be cleared and hence MCC, Biomethane, incinerator process to be installed to meet the current and future requirement.

SOCIAL INFRASTRUCTURE

VerifiedRealEstate™

9. SOCIAL INFRASTRUCTURE

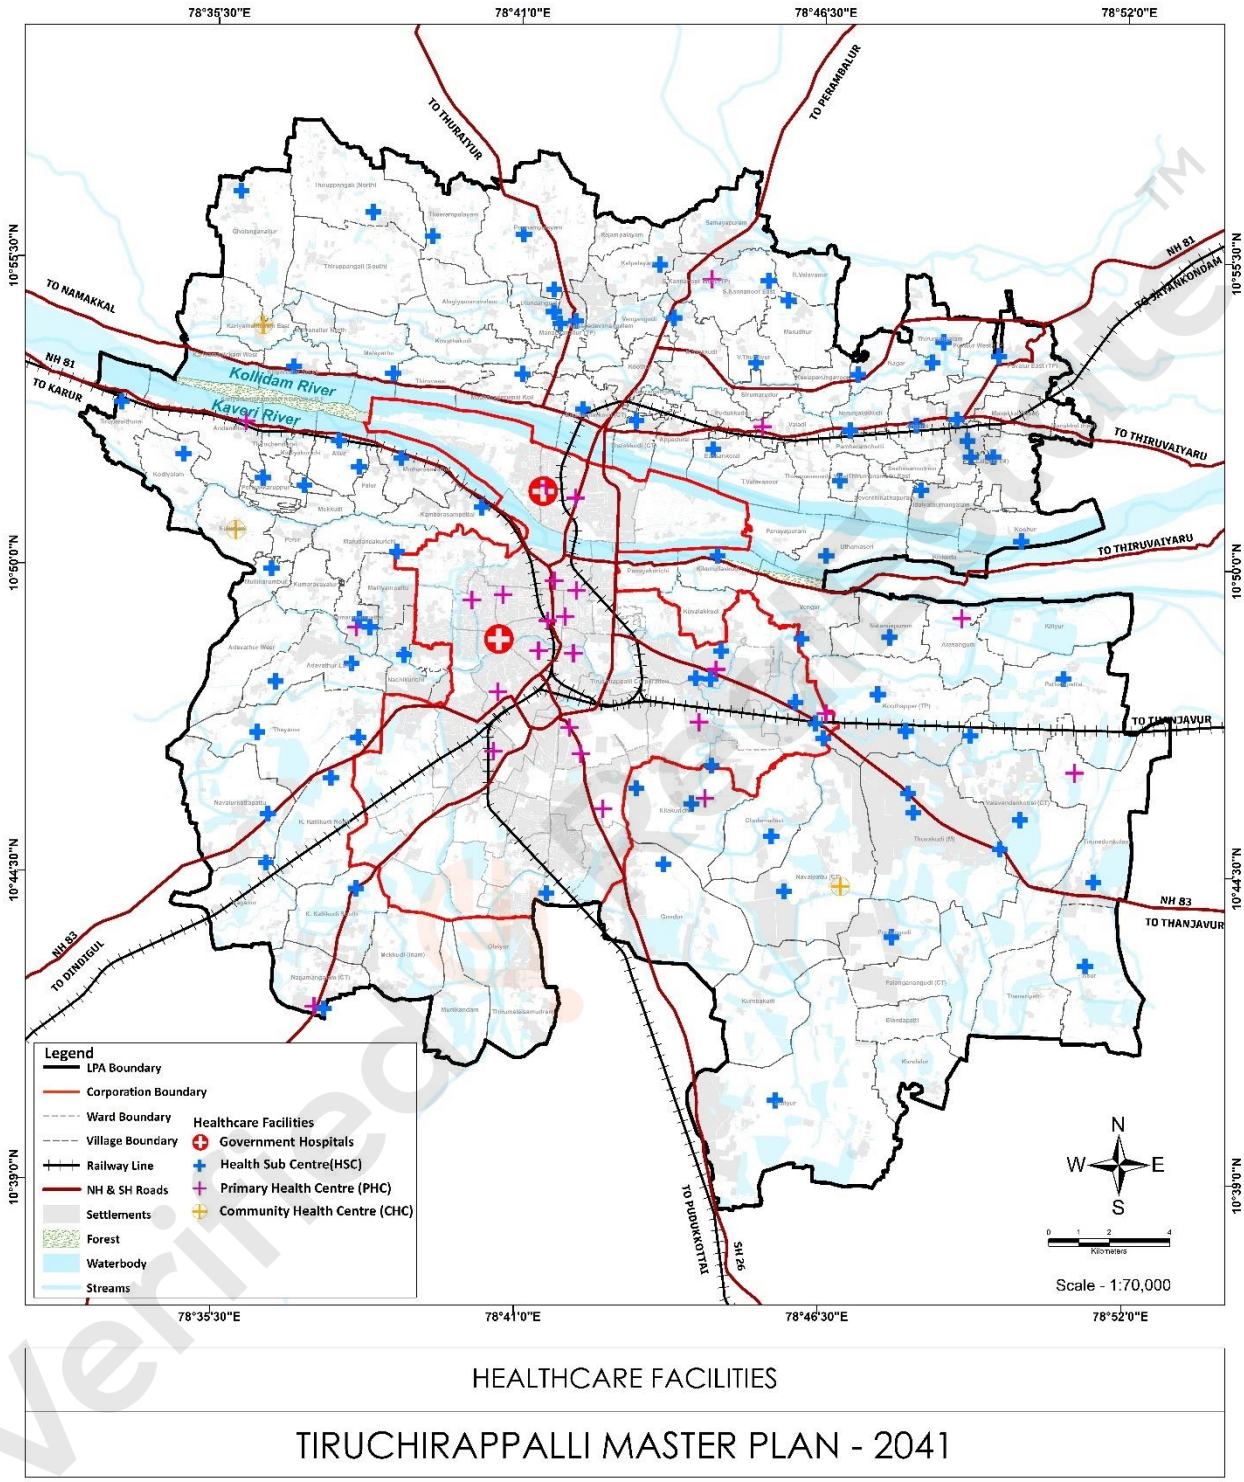

Social infrastructure in urban planning refers to the physical and organizational structures that support and enhance social interactions, community well-being, and overall quality of life within a city or urban area. Unlike traditional infrastructure, such as roads and utilities, social infrastructure focuses on urban life's human and social aspects. It encompasses facilities, spaces, and services that foster community engagement, social cohesion, and cultural development. Key components of social infrastructure in Trichy include:

9.1 Health

Year	Health Facility	Corporation	Municipality	Town Panchayat	Villages
2021	**Population**	**10,89019**	**70,839**	**91,851**	**4,36,496**

HEALTHCARE FACILITIES

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 9-1 Healthcare Facilities

The number of health facilities present within the Tiruchirappalli Master plan area are:

One Government Medical College.

One Government Hospital (Puthur)

91 – Health Sub Centre (HSC).

15 – Urban Primary Health Centre (UPHC).

3 – Primary Health Centre (PHC) (6 beds average)

One ESI Hospital.

One Railway Hospital.

98 – Private Clinic, Nursing Home, Speciality Hospital and Multi-speciality Hospitals are available in addition and 24 small private dispensaries have been around the corporation zone

Verified RealEstate™

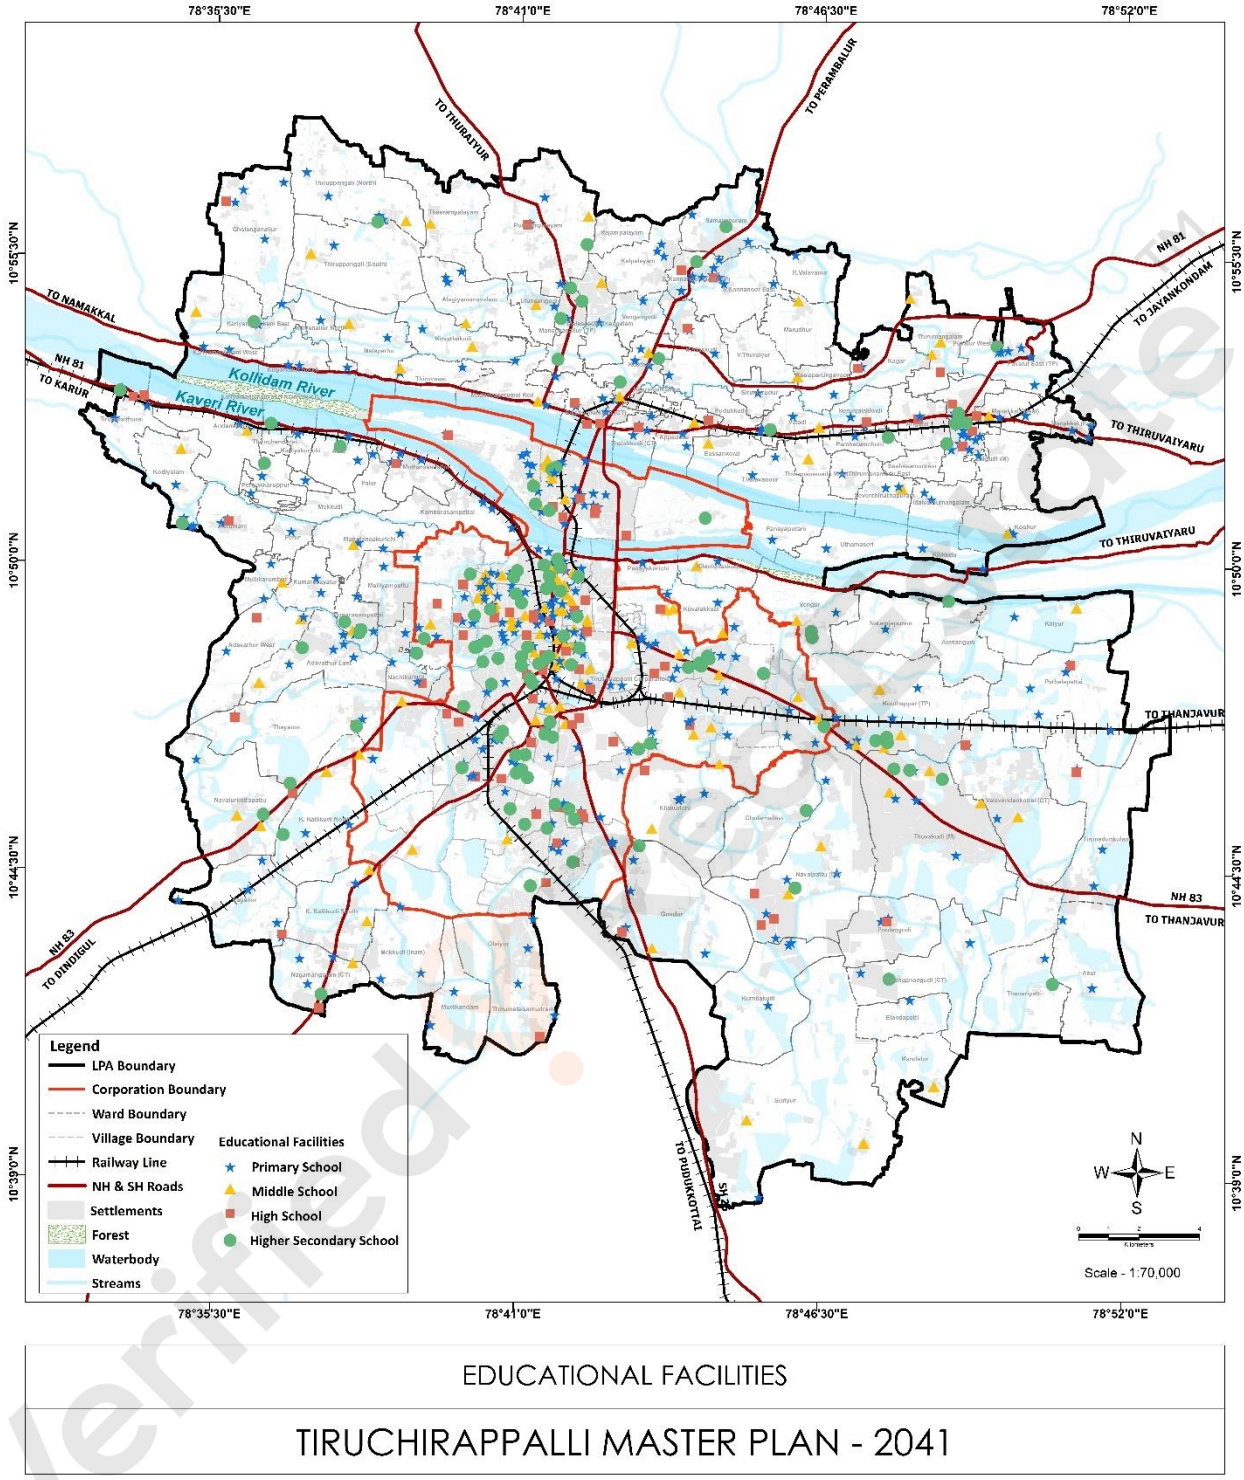

9.2 Education

Educational facilities that contribute to the intellectual and social development of residents. Schools serve as focal points for learning, community engagement, and cultural exchange The right to education is one of the essential liberties. Everyone should have access to education in order to enhance the area as a whole. The first step should be to establish the infrastructure needed for 100% education. The following lists the number of schools and colleges needed to serve the anticipated population in 2041.

Year	Educational Facility	Corporation	Municipality	Town Panchayat	Villages
2021	Population	**1089019**	**70839**	**91,851**	**4,36,496**

Map 9-3 Higher Education Facilities

9.3 Socio-Cultural Infrastructures

Socio-cultural infrastructure, therefore, encompasses a diverse array of elements that collectively define and shape the cultural identity and social dynamics of a community or society

9.3.1 Library

Library: Institutions that offer access to information, educational resources, and community programs. Libraries play a crucial role in promoting literacy, lifelong learning, and cultural enrichment. This type of infrastructure must be present very often for a range of every 15000 people. (URDPFI Guidelines)

9.3.2 Community Halls

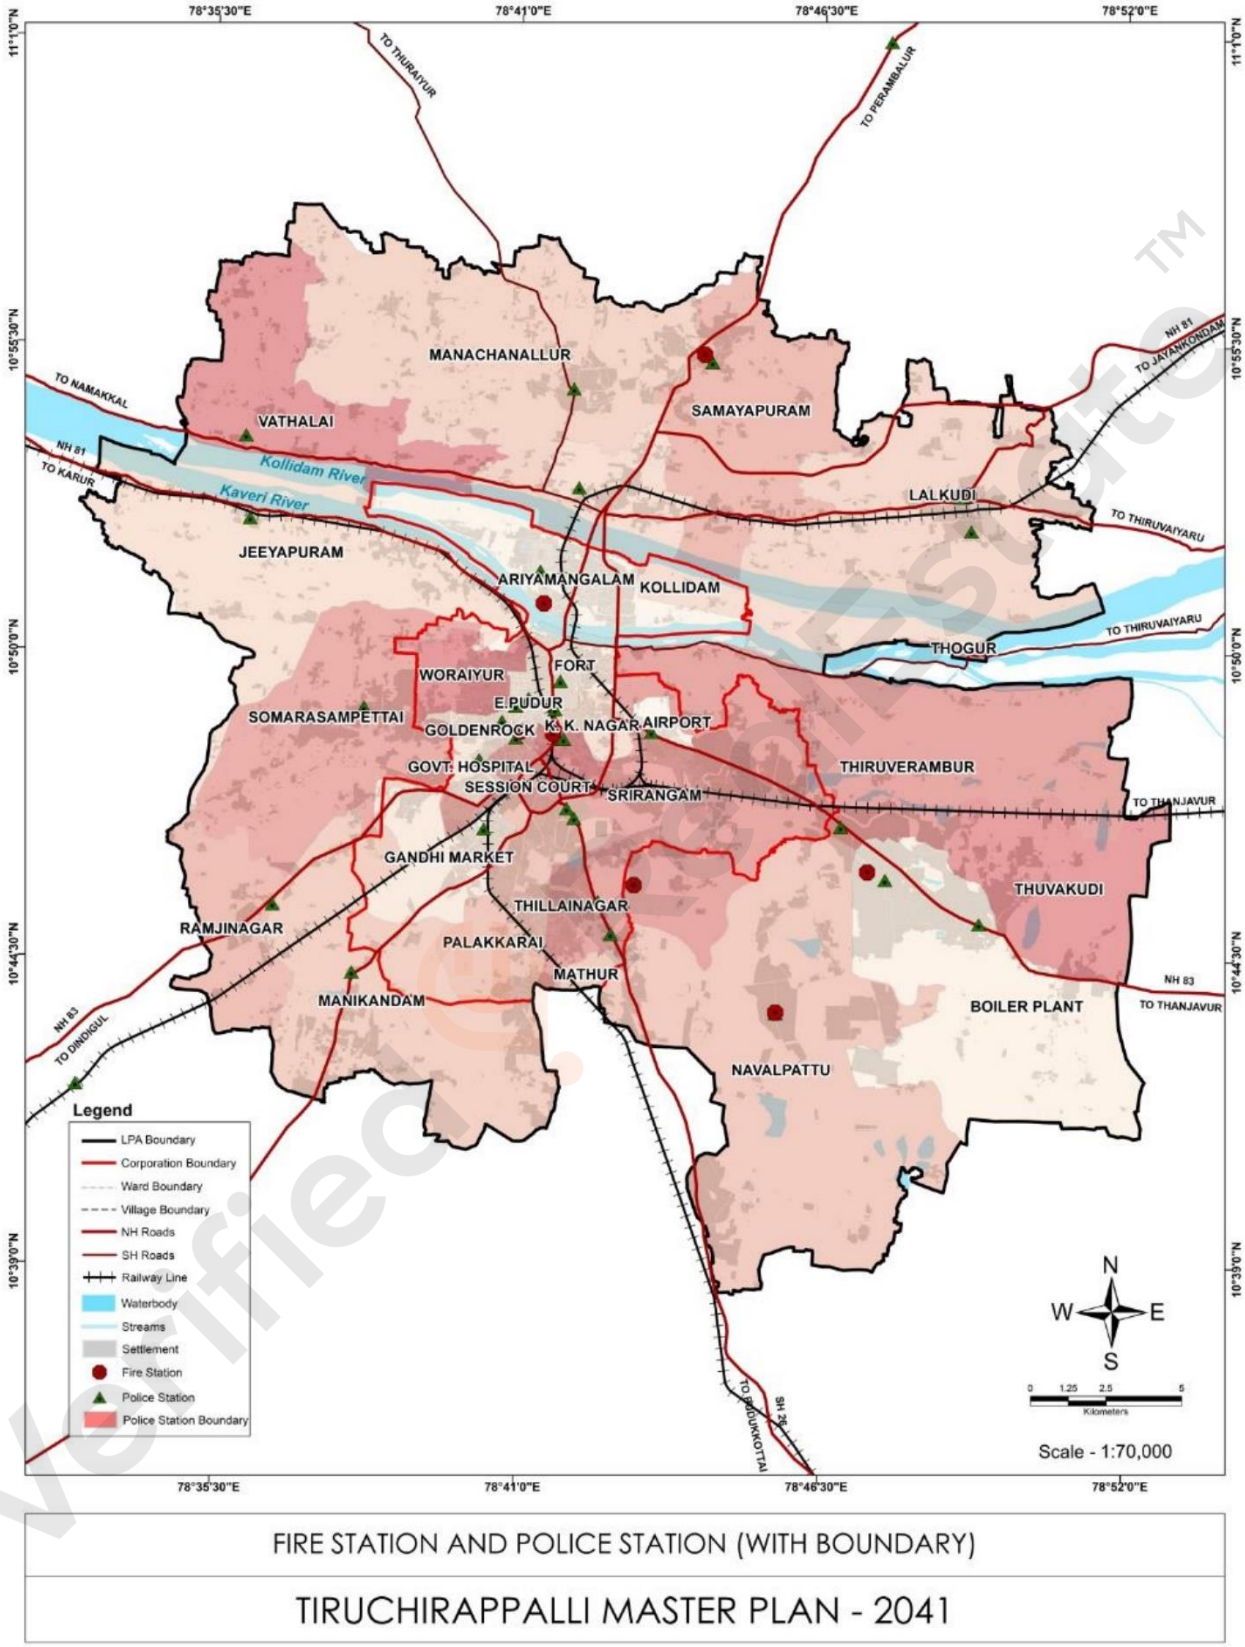

Community halls are essential components of social infrastructure in urban planning, serving as versatile spaces that foster community engagement and cohesion. These facilities are designed to accommodate a variety of activities and events that contribute to the overall well-being of residents. This type of infrastructure must be present very often for a range of every 15000 people. (URDPFI Guidelines)

9.4 Police, Safety Management Infrastructure

Fire Stations: By reacting to crises including fires, accidents, and other calamities, fire stations play a crucial role in guaranteeing the protection of populations. These stations' firefighters are prepared to tackle a wide range of scenarios and offer prompt aid in times of need. The fire stations should be present for every 2 lakh population as per URDPFI Guidelines.

Police Stations: Acting as centers of community safety and law enforcement, they manage crises, conduct investigations, maintain a visible presence that discourages crime, and interact with the community to foster confidence.

Verified RealEstate ™

9.5 Open Spaces

Recreational spaces are designated areas or facilities designed to provide opportunities for leisure, physical activity, and social interaction. These spaces play a crucial role in enhancing the quality of life for individuals and communities by offering outlets for relaxation, exercise, and community engagement.

Organized Green Spaces refer to intentionally planned and structured green areas, such as parks, botanical gardens, sports facilities or landscaped public spaces. These areas are deliberately designed for recreational, aesthetic, and environmental purposes. They may include walking paths, seating areas, and well-maintained greenery, providing a pleasant environment for relaxation and community engagement. Additional **common open spaces** include plain areas' tree cover, flood plains, and other undeveloped terrain.

The proposals include research centres, education community clubs along with upslilling centres for for workforce education. Along with these more women focused education centres should be encouraged along this region because of the striking growth rate of the college.

9.6.3.3College GAP analysis 2041

Along the villages there is a deficit for college structure by 2041 as per the growing population. There is also a deficit of management and medical colleges along the Town Panchayat and rest of villages categories that needs to be addressed in the

Verified RealEstate

mid term proposal with the area required.

HOUSING

Verified RealEstate™

10. HOUSING

10.1 Number of households in the district

Housing is the important sector for understanding the development scenario of the city .This chapter briefly discuss about the housing supply and demand , slums , housing shortage and housing projection

	Total number of houses	Vacant houses	Occupied
District Tiruchirappalli [Total]	8,75,727	64,890	8,10,837
District Tiruchirappalli [Rural]	4,52,707	40,501	4,12,206
District Tiruchirappalli [Urban]	4,23,020	24,389	3,98,631
District Tiruchirappalli M.corp[Urban]	2,59,301	11,414	2,47,887

Table 10-1 Number of households in the district

(Census 2011)

The total number of housing units in the district is 8,75,727 out of which only 8,10,837 is occupied . Vacant houses are more in rural areas than urban areas. 51.69% of the houses are in rural areas of the district.

Verified RealEstate™

10.2 Existing housing conditions

10.2.1 Housing condition

LPA	Total number of households	Total	Good	Livable	Dilapidated
Total	3,63,064	100%	77%	22%	1%
Urban	2,66,962	100%	79%	20%	1%
Rural	96,102	100%	72%	26%	2%

Table 10-2 Existing housing conditions

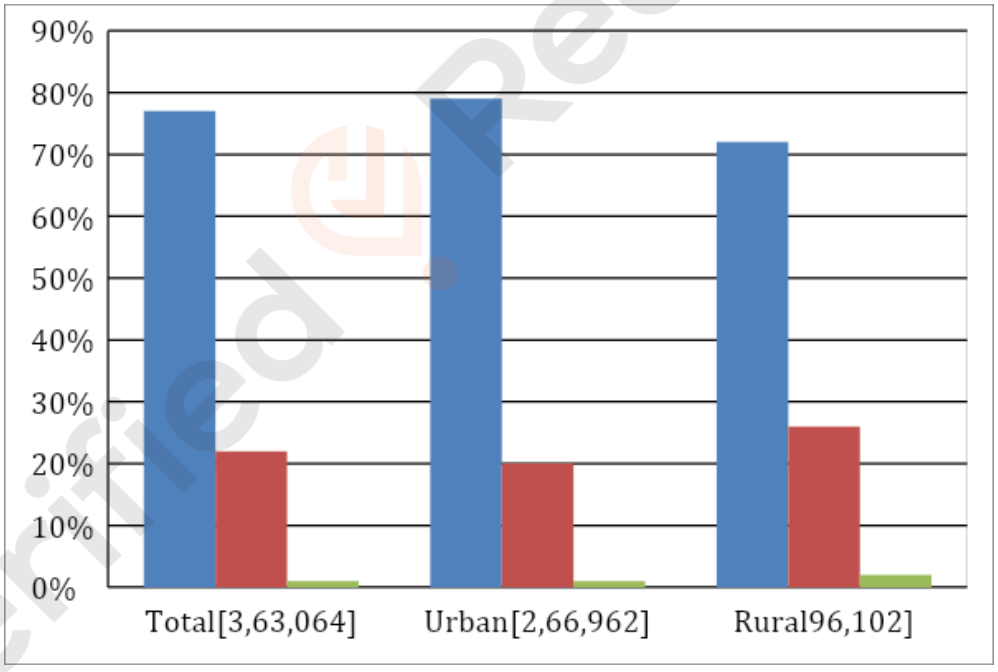

Figure 10-1 Existing Housing Conditions

(Census 2011)

Out of total households in the LPA region , 77% are in good condition , 22% are livable and 1% are dilapidated . Similarly in urban areas 1% and rural areas 2% are dilapidated . The condition of these dilapidated houses needs to be improved. These dilapidated houses are not considered in housing supply.

Verified RealEstate™

10.2.2 Ownership status

LPA	Total number of households	Owned	Rented	Anyothers
Total	3,63,064	56%	42%	2%
Urban	2,66,962	47%	51%	2%
Rural	96,102	79%	19%	2%

Table 10-3 Ownership status

(Census 2011)

The LPA region has a population with owned houses more than the rented houses by 14%. Rented houses are more in urban areas with 51%. Rural areas have 79% of owned houses.

Rented houses help induce compact working population housing and the peri urban areas are unaffordable to those populations due to high commute costs.

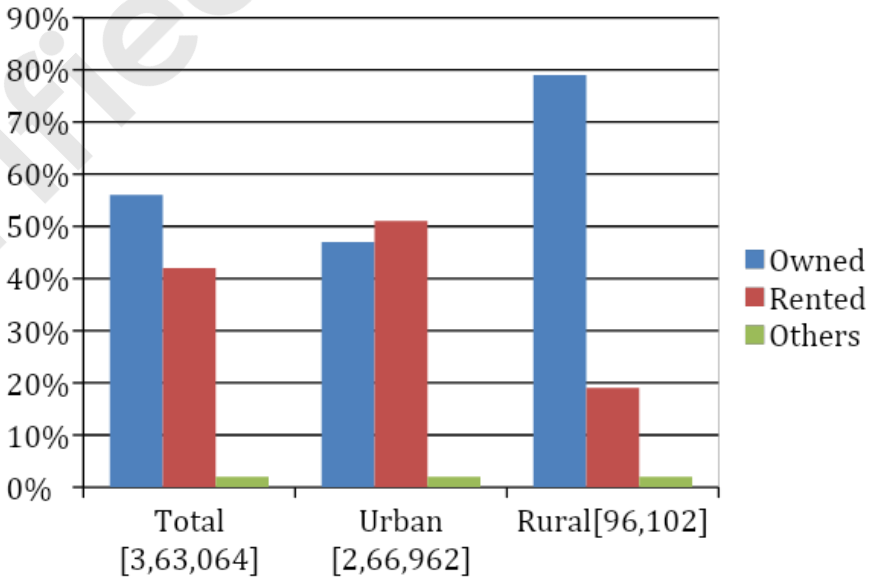

Figure 10-2 Ownership status

Verified RealEstate™

10.2.3 Average household size

LPA	Household	Population	Average Household size
Total	3,63,064	14,33,167	3.947
Urban	2,66,962	10,54,194	3.949
Rural	96,102	3,78,973	3.943

Table 10-4 Average household size (Census 2011)

10.2.4 Percentage of households with household sizes

LPA	Household	1	2	3	4	5	6-8	9+
Total	3,63,064	5%	13%	20%	32%	17%	12%	1%
Urban	2,66,962	4%	13%	21%	32%	17%	11%	1%
Rural	96,102	6%	13%	18%	29%	18%	13%	1%

Table 10-5 Percentage of households with household size

The average household size for Tiruchirapalli Tamil Nadu is 3.89, District is 3.85 and LPA is 3.95. The household size is higher in LPA than the district. The rural household size is 3.943 is slightly lower than the urban areas 3.949

The above table shows the number of households with size 4 are minimum . Households with size 3 are the second highest. In rural areas, the size varies more than the urban areas.

Verified RealEstate™

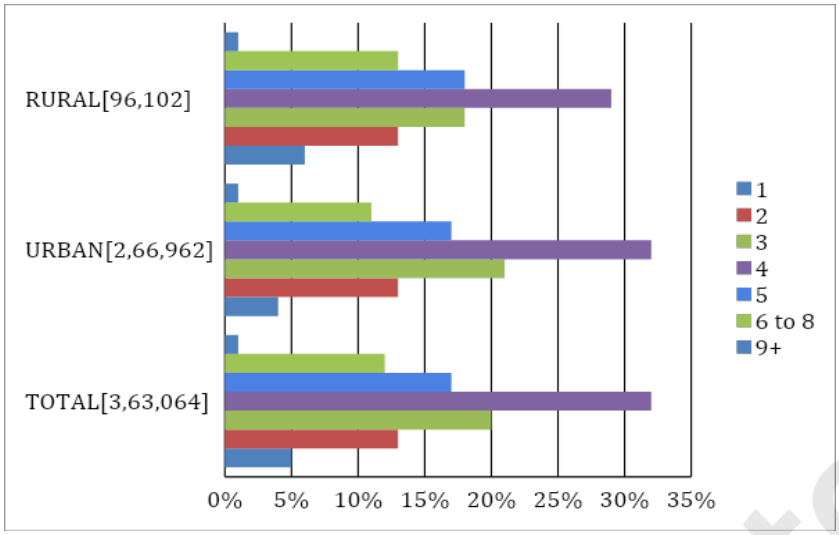

Figure 10-3 Percentage of households with household sizes

10.3 Slums

10.3.1 Number of slums with households

Housing conditions in slums are unpleasant and the services are absent or in the worst state. Therefore, merely providing or improving the house will not suffice. According to the data collected from Tiruchirappalli municipality there are 268 slums in which 197 are approved slums and 71 are unapproved slums with total households of 37192.

S.No	Region	No of slums	No of households	H.H Already completed	H.H under process	Housing needs for slums
1	Srirangam	65	9875	2555	348	4972
2	Ariyamanagalam	82	9425	1415	63	6947
3	K . Abishekapuram	60	9664	378	-	5466
4	Ponmalai	60	8228	84	-	7252
	Total	268	37192			

Table 10-6 Number of slums with households

Source: Tamil Nadu Urban Habitat Development Board 2023

The old master plan proposed accommodation for EWS people at Kallikudi south village. This proposal was implemented in Nagamangalam, Palakkarai, Srirangam and Vannarapettai. The following are the details of the proposals which are under progress based on Central Sanctioning and Monitoring Committee (CSMC) Meeting, 2017 (Under Pradhan Mantri Awas Yojana (PMAY-U), Slum clearance board) :

Affordable Housing in Partnership (AHP) – 1056 House holds

Tenements having a plinth area of 400 sq. ft with basic and social infrastructures are constructed at an average unit cost of Rs.10.00 lakh both as insitu reconstruction and resettlement at alternate locations to provide houses for families living in dense slums and other objectionable locations.

- Vannarapettai (Dobi Colony) – 384 Households
- Nagamangalam MGR Nagar – 512 Households
- Jailpettai Phase II – 64 Households

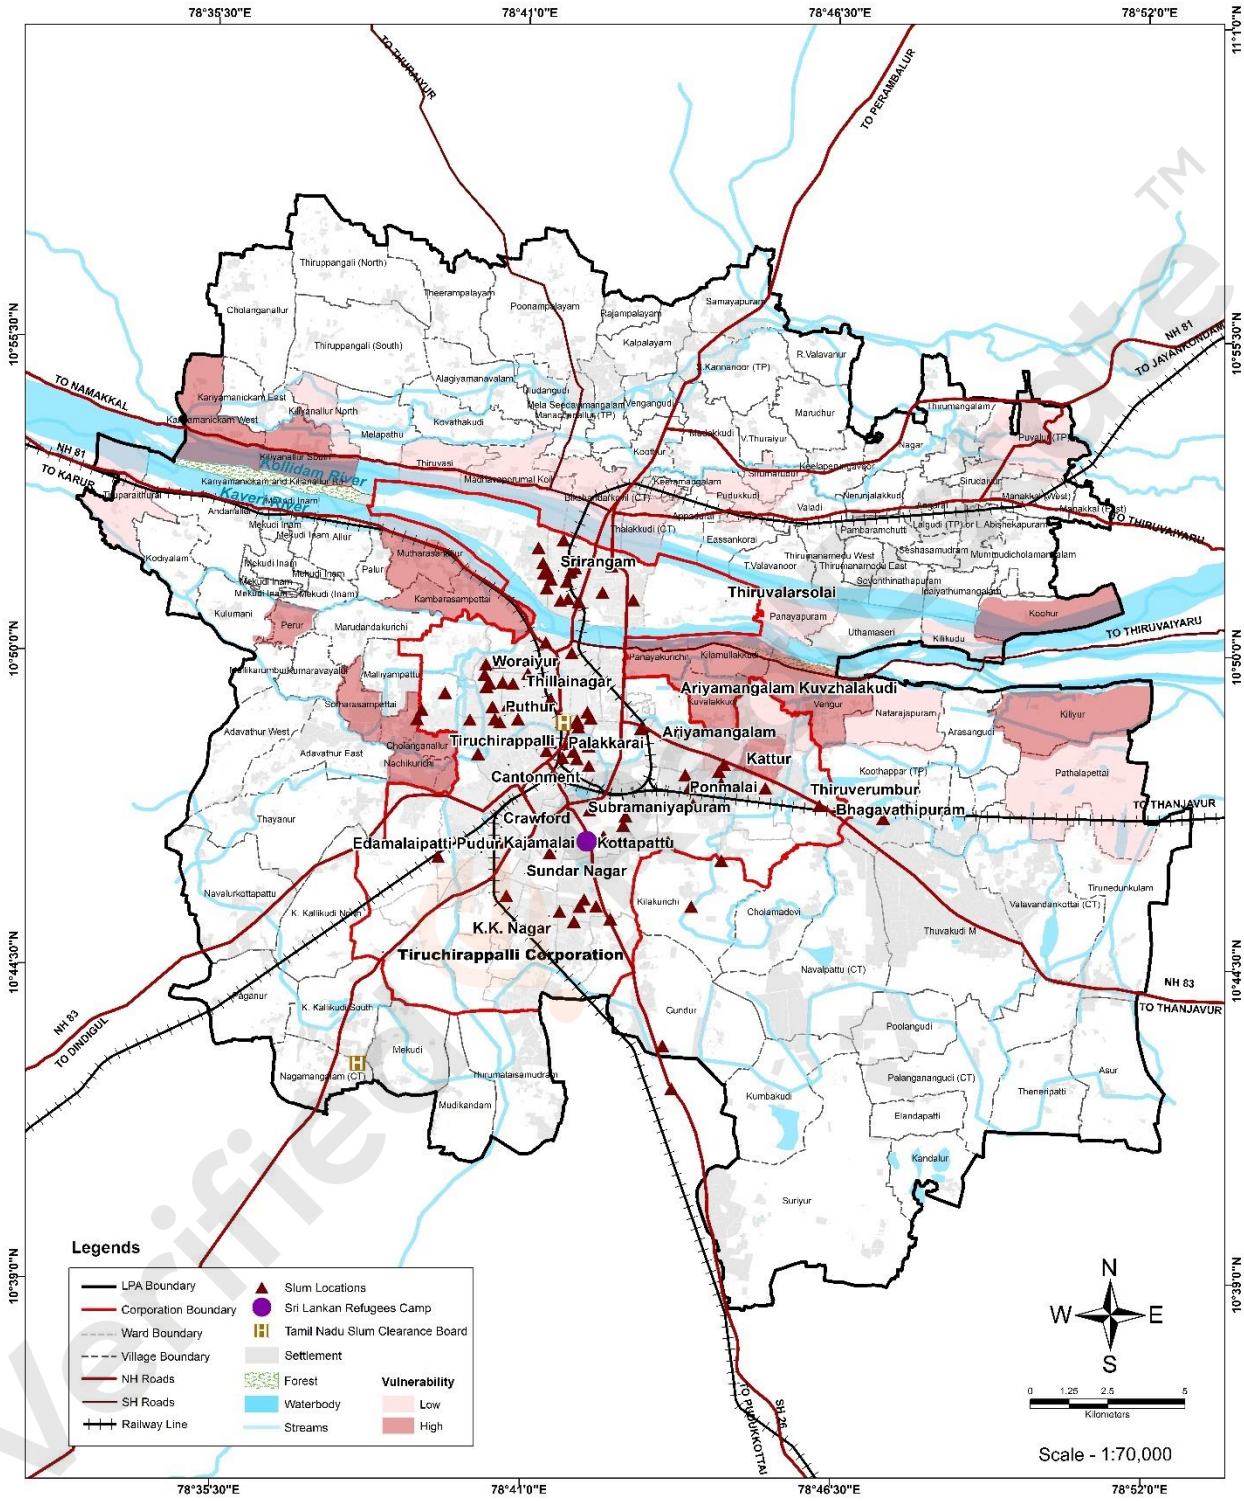

Figure 10-4 Vannarapettai and Nagamangalam MGR nagar

Beneficiary Led Construction (BLC) - 8123 Households

Under the Beneficiary Led Construction, financial assistance of Rs. 2.10 lakh is given to the eligible Economic Weaker Section urban households, to construct house on their own, with not less than 30 sq.m carpet area.

10.3.6 Population & Household projection 2041

The housing projection for the year 2041 is calculated based on the projected population. For projecting future housing requirement, Tiruchirappalli LPA has been classified into five types based on the nature of Urban and Rural local bodies as well as the proposals. They are as follows,

- Tiruchirappalli Corporation
- Census towns
- Economic Growth poles
- High Demand Corridors
- Rest of LPA

Classification of Census Towns, High Demand Corridors and Economic Growth Poles comprise of the following towns and Villages as shown in Table below.

Census Towns	High Demand Corridors	Economic Growth Poles
Palanganankudi	Thalakudi(CT)	Thuvakudi(M)
Navalpattu	Pichandarkovil(CT)	Kallikudi
Valavanthankottai	Venganngudi	Manachanallur(TP)
Nagamangalam	Madakkudi	
	S.Kannanur(TP)	
	Samayapuram	
	Malliyampattu	

Table 10-10 Classification of Tiruchirappalli LPA for housing projection

The category of high demand corridors are proposed along the mentioned census towns, town panchayat and villages. This increases the density in these regions and thus vertical development is encouraged.

Verified RealEstate™

Description	Tiruchirappalli Corporation	Census Towns	Economic Growth poles	High Demand Corridors	Rest of LPA	Total
Population in 2011	915569	45244	76380	56676	339298	1433167
Projected Population 2041	1540720	81520	118312	95319	508984	2344855
Additional Population	625151	36276	41932	38643	169686	911688
Additional Households in 2041	156288	9069	10483	9661	42422	227922
Type of Town (in 2041) as per URDPFI	Metropolitan City	Small Town I*	Medium Town I*	Small Town I*	-	-
Density as per URDPFI (Hectares)	125-175	75-125	100-150	75-125	75-125	-

Optimal land area per house in sq.m	229	229	229	229	400	-
Area requirement in Sq.km	44.6	2.09	2.42	1.12	17.14	**66**

Table 10-11 Population & Household projection 2041

Verified RealEstate TM

The additional houses required for the year 2041 is calculated from the projected population of 2344855. For the projected population, the additional houses required are 227922 households. This is calculated from the population and household size. The average household size for the planning are is 4 persons per household. The total number of household required for the year 2041 is 267393 households. This includes the housing requirement of slums and dilapidated structures. The density guideline from URDPFI gives density for different classification of towns. The corporation in LPA falls under Metropolitan city classification, the census towns and High demand corridors fall under small town classification and Economic Growth Poles fall under medium town classification. Though these fall under different classification, considering the growth of the census towns, economic growth poles and high demand corridors the density is taken same as the corporation density which is 175 persons per hectare. Apart from this, the density and FSI of high demand corridors are considered high and thus the area required is less. For the rest of LPA the density considered is the average density of small town I classification which is 100 persons per hectare. The area per household is calculated based on the guideline. This gives the additional residential area required for the proposed Land use 2041. The additional residential area required is 66sq.km.

ENVIRONMENT

Verified RedEstate™

11. ENVIRONMENT

Tiruchirappalli is situated in central South-Eastern India, almost at the geographic centre of the state of Tamil Nadu. The Kaveri Delta begins to form 16 kilometres (9.9 mi) west of the city where the river divides into two streams—the Kaveri and the Kollidam—to form the island of Srirangam.

Tiruchirappalli's topography is nearly flat, with an average elevation of 289 feet (88 meters). A few Isolated hillocks rise above the surface, the highest of which is the Rockfort, one of the oldest rocks in the world with an estimated age of 3,800 million years. A few other notable hillocks are the Golden Rock, Khajamalai, and one each at Thiruverumbur and Uyyakondan Thirumalai.

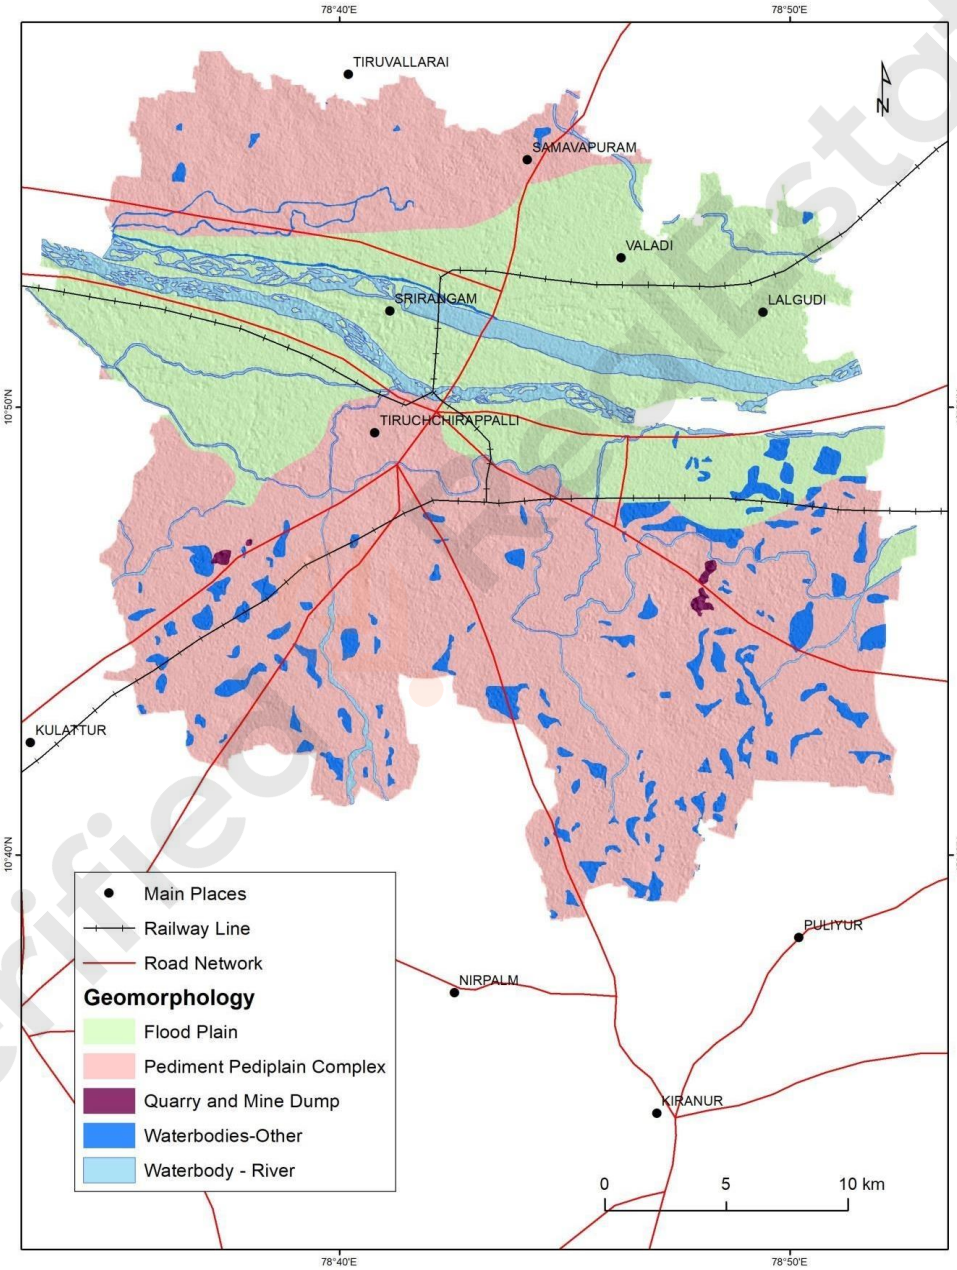

Apart from Kavery and its tributary Kollidam, the city is also drained by the Uyyakondan Channel, Koraiyar and Kudamurutti river channels. The land immediately surrounding the Kaveri River—which crosses Tiruchirappalli from West to East—consists of deposits of fertile alluvial soil on which crops such as finger millet and maize are cultivated. Further South, the surface is covered by poor-quality black soil.

A belt of Cretaceous rock runs to the north-east of the city, and to the South-East there are layers of archaean rocks, granite and gneiss covered by a thin bed of conglomerate laterite. The region falls under Seismic Zone II, where the chances of an earthquake is very low. Buried Pediments have been identified in almost all blocks of LPA except Manikandam. Pediments, both shallow and deep, constitute the most prominent geomorphic unit in the region and are evenly distributed. Very small patches of Quarry and Mine Dump are found near Thiruverambur in the region.

The Kaveri River makes the area fertile, making it ideal for farming, fishing, leisure,

Verified RealEstate

and water supply. The advantages to the environment are essential to the city's survival. Over exploitation and disaster are the negative parts of this resource. The Kaveri River, Kollidam River, ground water table, existing forest areas, and their ecosystem are significant environmental concerns in Tiruchirappalli. These places should be managed to maximize advantages while having no negative effects on the ecology—instead, it should be improved.

Map 11-1 LPA Geomorphology Map

11.1 Surface Water

11.1.1 Existing Water Network: Topography

The River Kaveri which flows between Tiruchirappalli and Srirangam towns, forms the natural divider, conterminous with the boundaries erstwhile municipal administration of the two towns. The southern half of the LPA region is constituted by numerous lakes which then collect and flow down to the Kaveri river through streams, nallahs and channels. Koraiyar and Uyyakondan rivers are some of the major streams running through the city meeting the river.

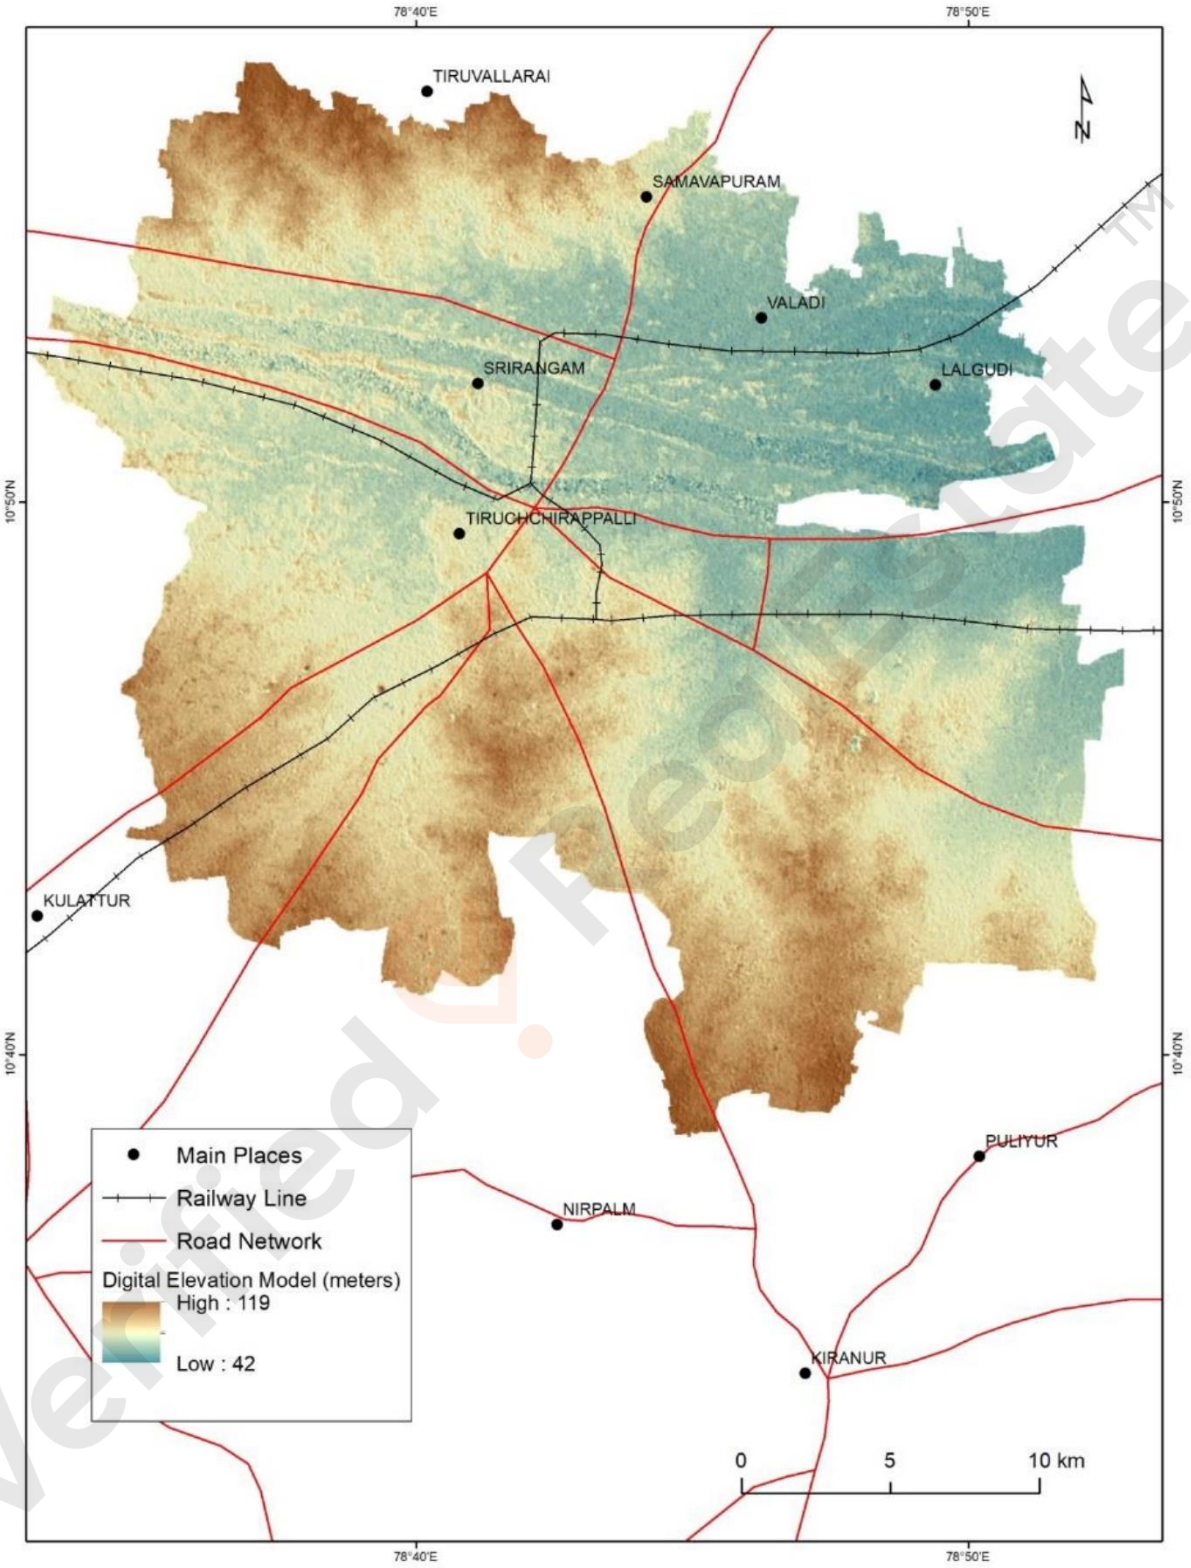

The upper and lower portions of the LPA has the highest elevation marking up to 119 meters and lowest elevations as 42 falling in the central regions of the LPA. The places such as Srirangam, Samayapuram, Valadi, lalgudi fall under mid elevated areas.

The master slope of the region is towards the east. The general topography of the region slopes from West to East, towards Cauvery from the South and Kollidam from the North.

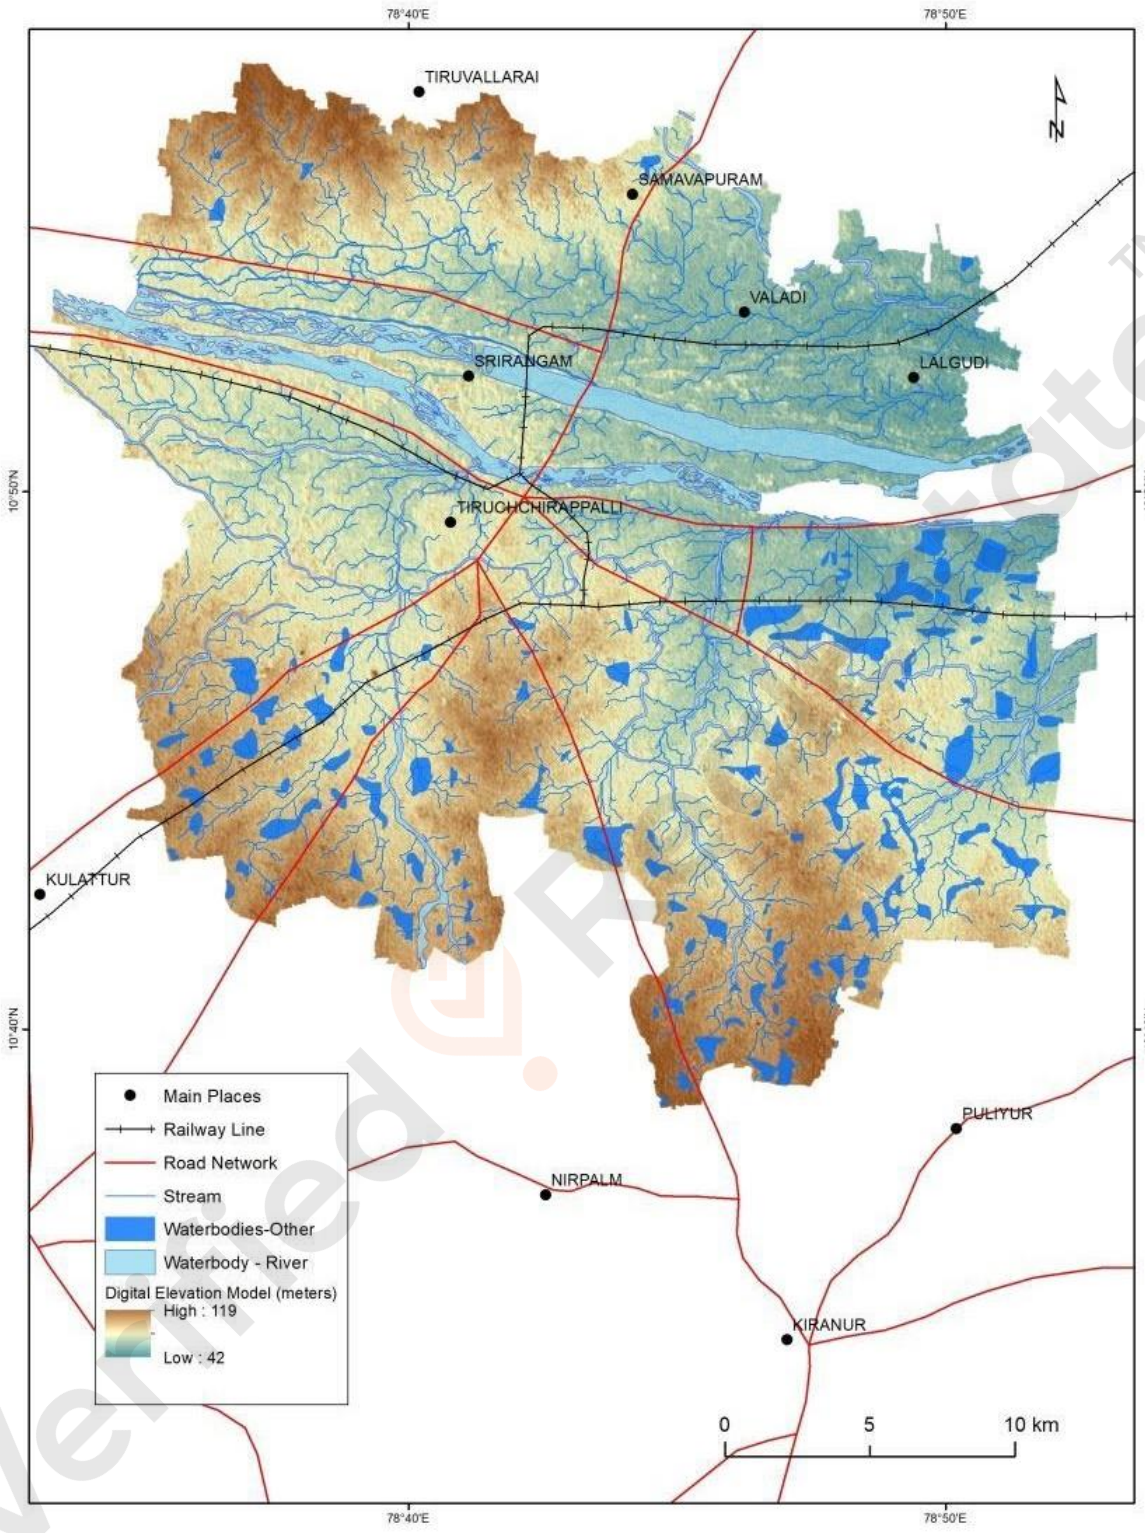

River Cauvery and River Kollidam are the most prominent rivers of Trichy and flows from West to East. Kaveri is the major, and the only perennial river which is the southern branch and the northern branch of Kaveri, known as 'Coleroon' (Kollidam) is mainly flood-carried. The total length of the river in this district is about 125 Kms, and the area of the river basin extends about 17,200 hectares of land. Ponnaniar, Uppamodai and Siddhayalli reservoirs are mainly used for irrigation purposes. The prominent tributaries of the district are Ayyar and Uppar in the north and Koraiyar in the south. Most of the rivers are structurally controlled and form the dendritic drainage pattern.

A dam known as upper Anicut was constructed in 1836 at a place where the Cauvery branches off into two at the west end of Srirangam, to regulate the flow of water in the Cauvery and Coleroon rivers. In its original form, the upper Anicut consisted of a simple masonry dam of 230 meters in length divided into three parts.

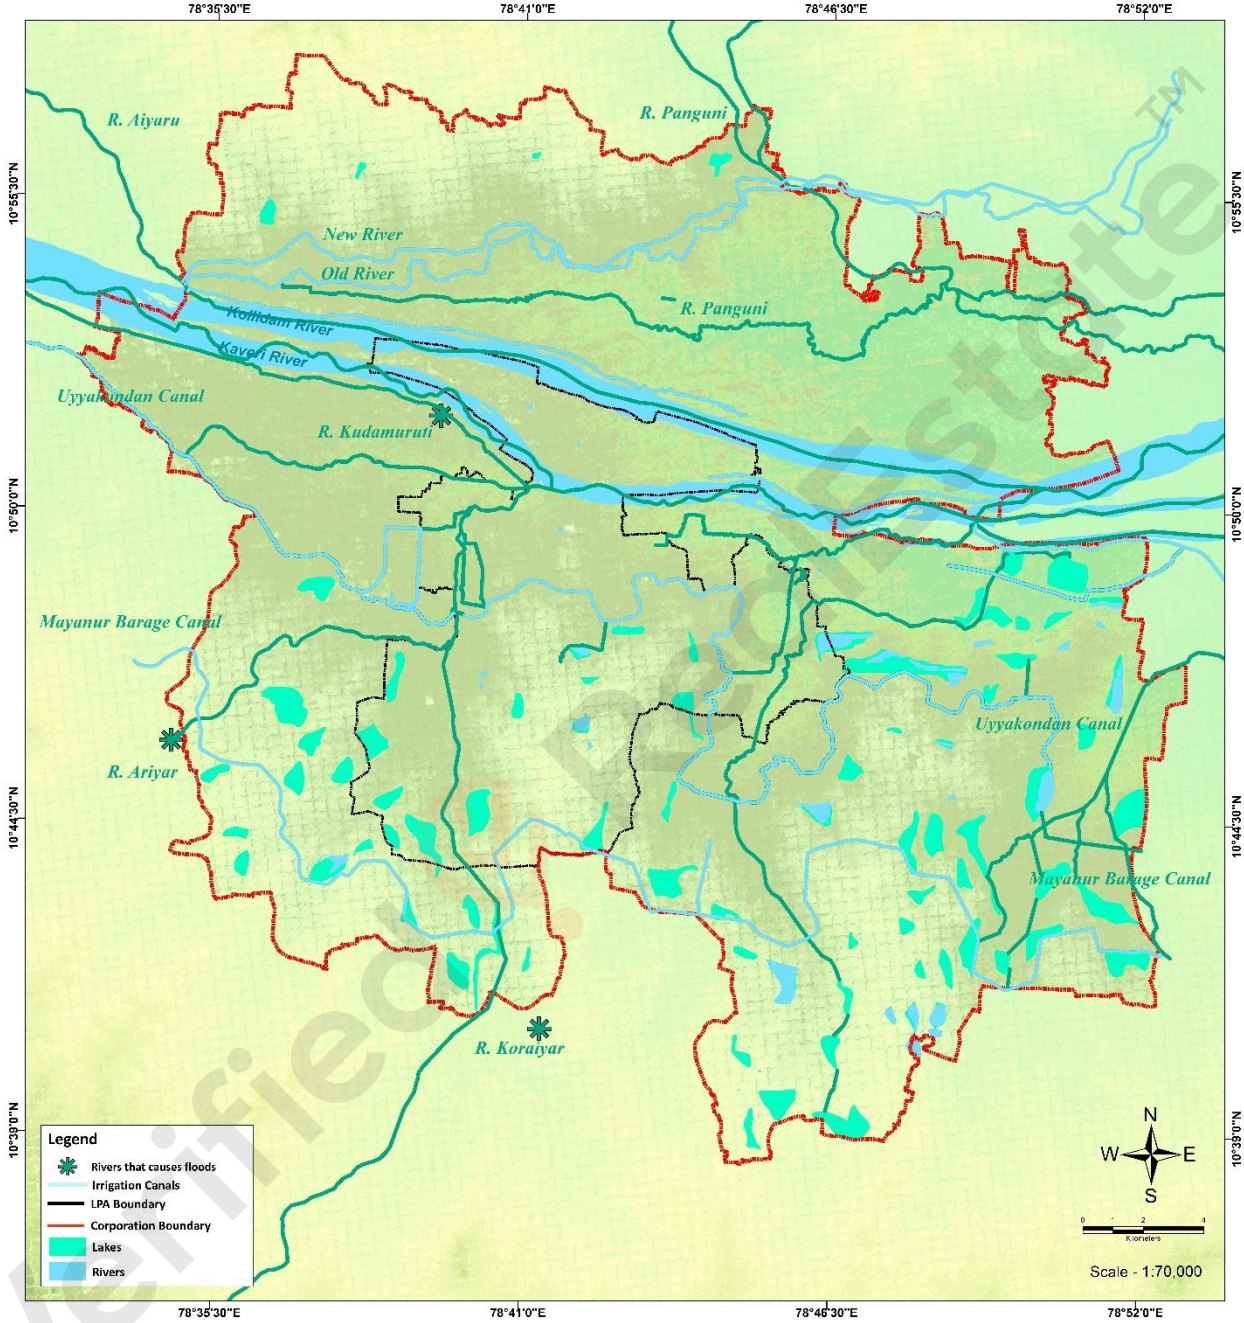

Verified RealEstate™

Map 11-2 Digital Elevation Map

Map 11-3 LPA Drainage Map

EXISTING WATER NETWORK

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 11-4 Existing Water Network

Below the Grand Anicut, the Cauvery further splits into two, one being called the Cauvery and the other, the Vennar River. These channels are utilized as the main canals for irrigation.

KarikalaCholan, an early Chola King, constructed the grand Anicut. It is situated on the northern bank of Cauvery about 16 km east of Tiruchirappalli town and mainly used for irrigation purposes.

11.1.2 Existing Water Network: River

River Aiyaru and River Panguni flows from the North and drain into River Kollidam.

River Koraiyar and River Ariyar collects the water from the western and southern areas such as Manaparai and drain into River Kaveri.

Koraiyar River rises from KaruppurReddiyarpatti hill R.F at an elevation of about 500m. The river carries water from catchment areas of Puttanattam, Viralimalai, Malaikudippatti, Tennalur, Illupur, Kalluppatti, Arur, Kulakkattaigudi, Keeranur and Thuvarankurichi. The catchment area of the river is 632 sq.km and the length is 75 km. The entire catchment of the river is covered by a large number of tanks.

Ariyar River rises in Manapparai area from PallivelliMukku at an elevation of about 700m. The river carries water from Kadavur and Semmalai reserve forests, Vairampattai, Kulattur and Manapparai areas. The catchment area of the river is about 832 Sq.km.

River Kudamuruti, River Ariyar and River Koraiyaaru are the prime flood causing rivers. Floods occur where the rivers drain into River Kaveri.

11.1.3 Existing Water Network: Irrigation Canal

The Principal purpose of irrigation is to increase agricultural production by cropping more areas, the sources for irrigation includes canals branching from the river Cauvery, ordinary wells, tanks and tube wells.

Verified by PeelEstate™

Man made canals like Uyyakondan and Mayanur barrage canals are overlaid. They run from West to East across the city.

They form the Irrigation basis of the region and connect several lakes and ponds along their direction of flow.

Together with the river and irrigation network, they give an indication of Trichy's water flow.

11.1.4 Existing Water Network: Lakes and watersheds

Natural Lakes and Existing watersheds highlight the large number of lakes present in the southern region of the city.

The existing rivers and canals are well connected to the catchments, ponds and lakes making it suitable for agriculture and water retention.

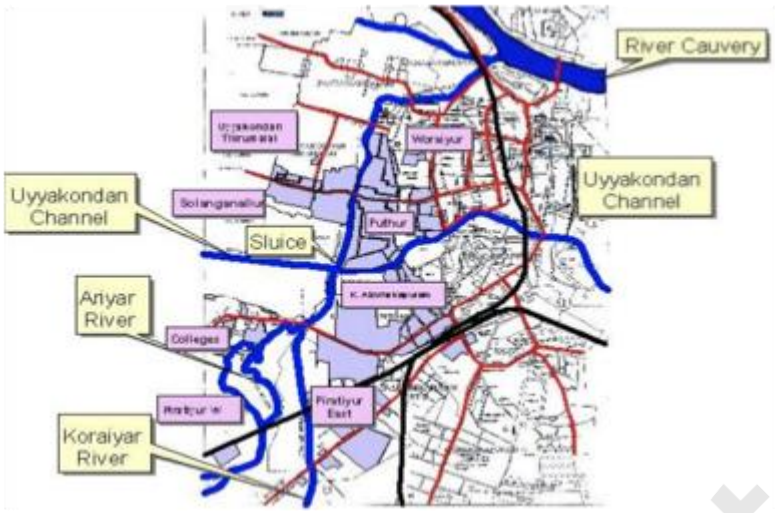

Collectively they form the network of waterbodies in the city.

The water network is revived as a connected system to strengthen the natural ecosystems.

11.1.5 Current Status - Surface Water Bodies in LPA

- Densely Populated
- Illegal Occupancy/ Encroachments
- Lack Of Positive Relationship With Water
- Absence Of Access Between The Banks
- Lack Of Designated Public Space
- Improper Sewage And Solid Waste Management

11.2 Groundwater

11.2.1 Ground Water Resource Estimate

11.2.1.1 Soil Type

The major soil types in the LPA consist of black cotton soils, red sandy to loamy soils and alluvial soils. Alluvial soils of considerable thickness occur in the central and eastern parts particularly in Tiruchchirappalli and Lalgudi taluk and Thuraiyur has red loamy soil.

11.2.1.2 Aquifers in LPA

Formation	Sp.Yield (%)	Transmissivity (m2/d)	Hy. Conductivity (m/d)	Yield of Wells (lps)	Storativity
Alluvium	7.2	49-216	2-5	10-20	_
Cretaceous	0.3 - 2.56	33-772	10-66	1.1-3.5	_
Gondwana	1.5 – 2.5	43-52	10-20	1-2	_
Crystallines	1.5	32-80	5-10	1-2	1.6 X 10^{-4} to 9.6 X 10^{-4}

Table 11-1 Aquifer Parameters

Source: CGWB

11.2.1.3 Unconsolidated Aquifer (Yield < 200 Cu.m/day)

The unconsolidated and semi consolidated formations in the district include shales, sandstones and clays of Jurassic age (Upper Gondwana), marine sediment of Cretaceous age, sandstones of Tertiary age and Recent alluvial formations.

As the Gondwana formations are well compacted and poorly joined, the movement of groundwater in these formations is mostly restricted to shallow levels.

Verified by RealEstate™

Ground water occurs under phreatic to semi confined conditions in the intergranular pore spaces in sands and sandstones and the bedding planes and thin fractures in shales.

In the area underlain by Cretaceous sediments, ground water development is rather poor due to the rugged nature of the terrain and the poor quality of the formation water.

Quaternary formations comprising mainly sands, clays and gravels are confined to major drainage courses in the district.

The maximum thickness of alluvium is 30 m whereas the average thickness is about 15 m. Ground water in these formations is being developed by means of dug wells and filter points.

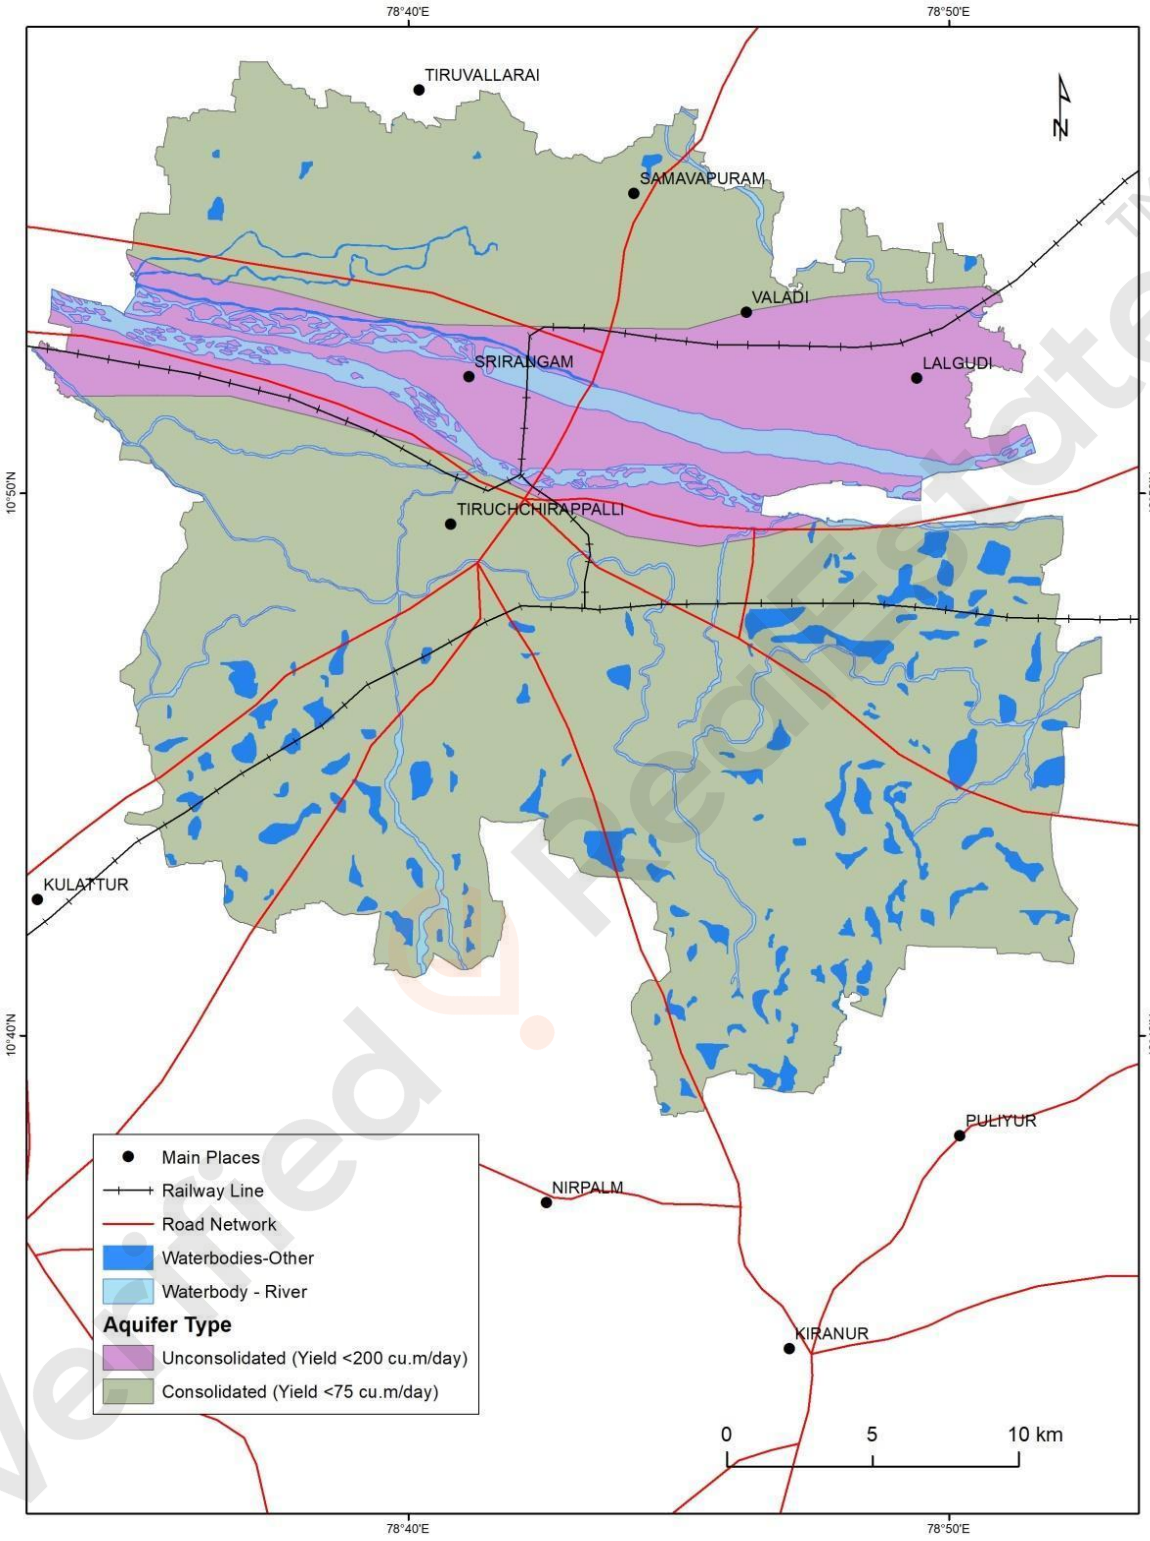

11.2.1.4 Consolidated Aquifer (Yield < 70 Cu.m/day)

The water bearing properties of crystalline formations which lack primary porosity depend on the extent of development of secondary inter granular porosity either through weathered or fracturing.

These aquifers are highly heterogeneous in nature due to variations in lithology, texture and structural features even within short distances.

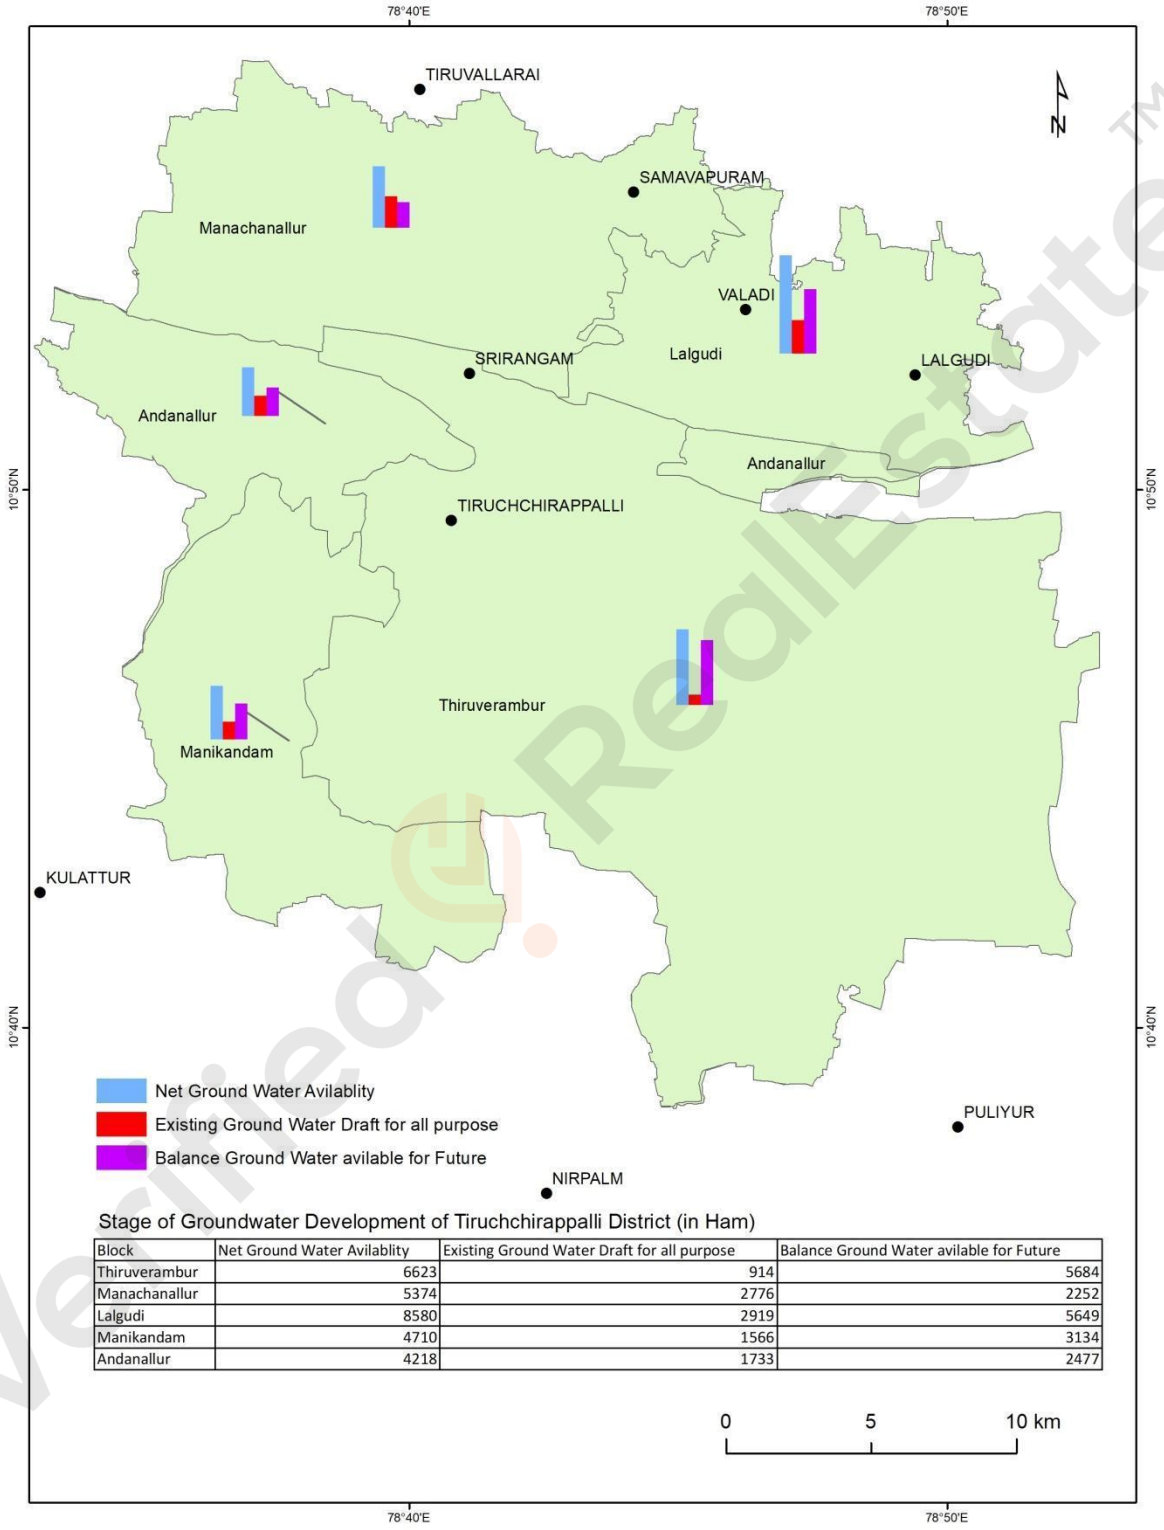

Ground water generally occurs under phreatic conditions in the weathered mantle and under semi-confined conditions in the fissured and fractured zones at deeper levels. The thickness of the weathered zone in the district is in the range of 2 to 25 m.

Verified RealEstate™

Map 11-6 LPA Aquifer Type Map

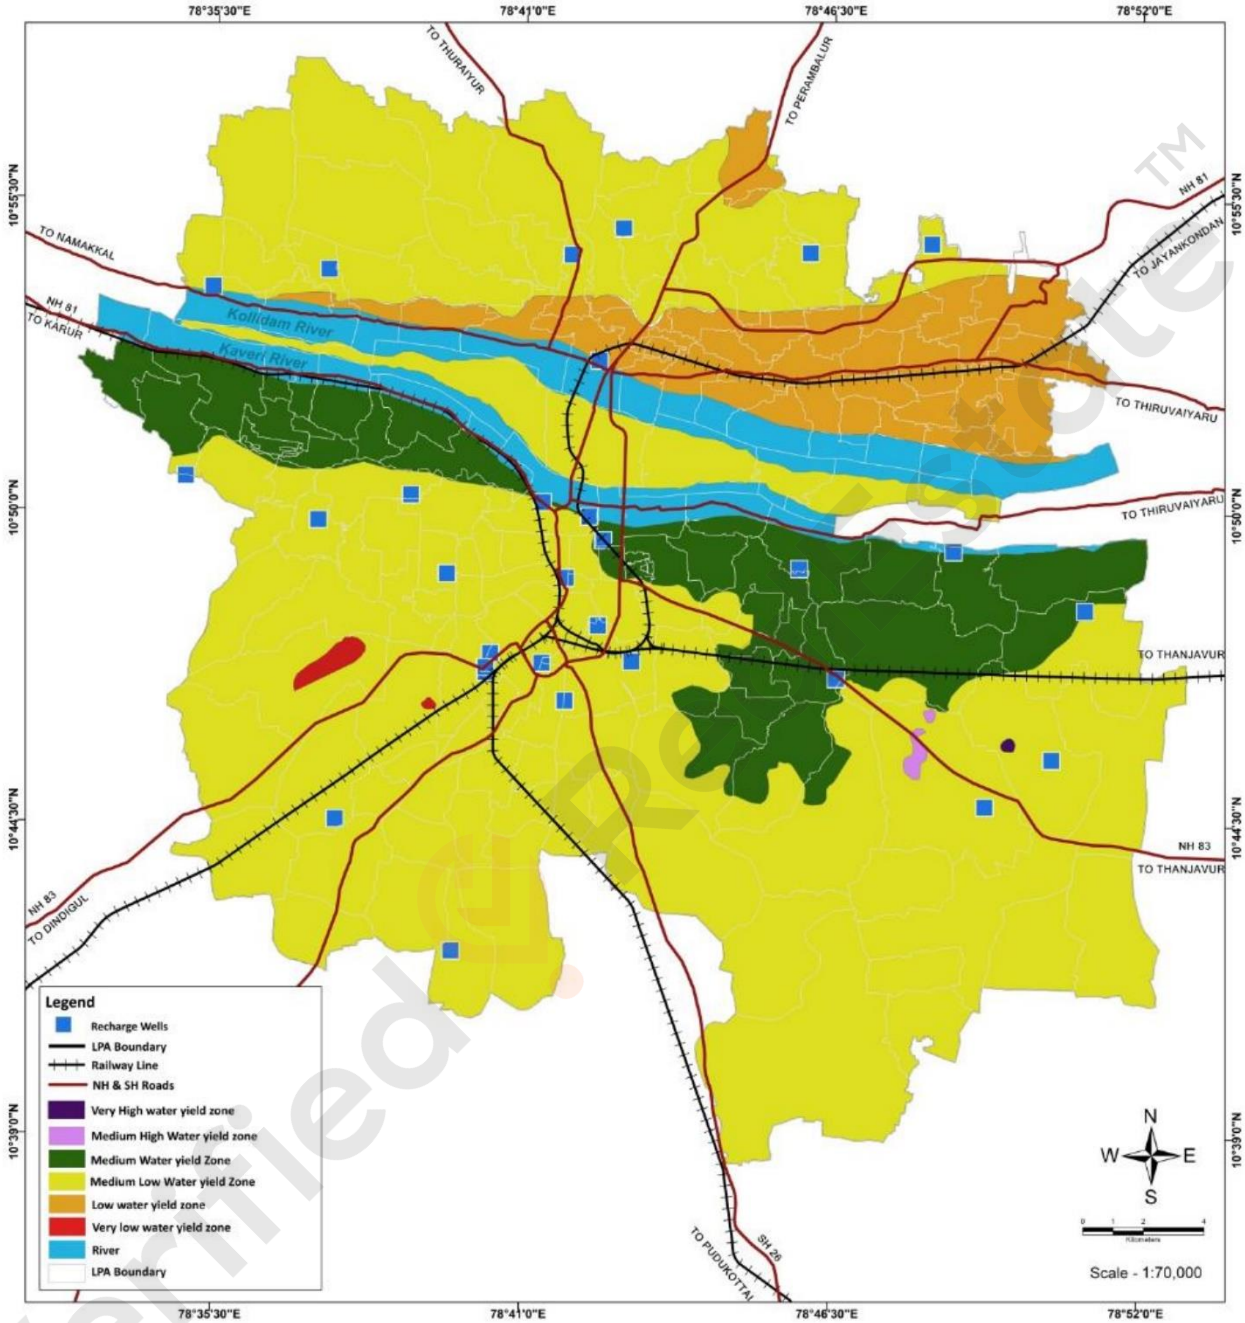

11.2.1.5 Ground Water Availability in LPA

Stage of Groundwater Development of Tiruchchirappalli District (in Ham)

Block	Net Ground Water Avilablity	Existing Ground Water Draft for all purpose	Balance Ground Water avilable for Future
Thiruverambur	6623	914	5684
Manachanallur	5374	2776	2252
Lalgudi	8580	2919	5649
Manikandam	4710	1566	3134
Andanallur	4218	1733	2477

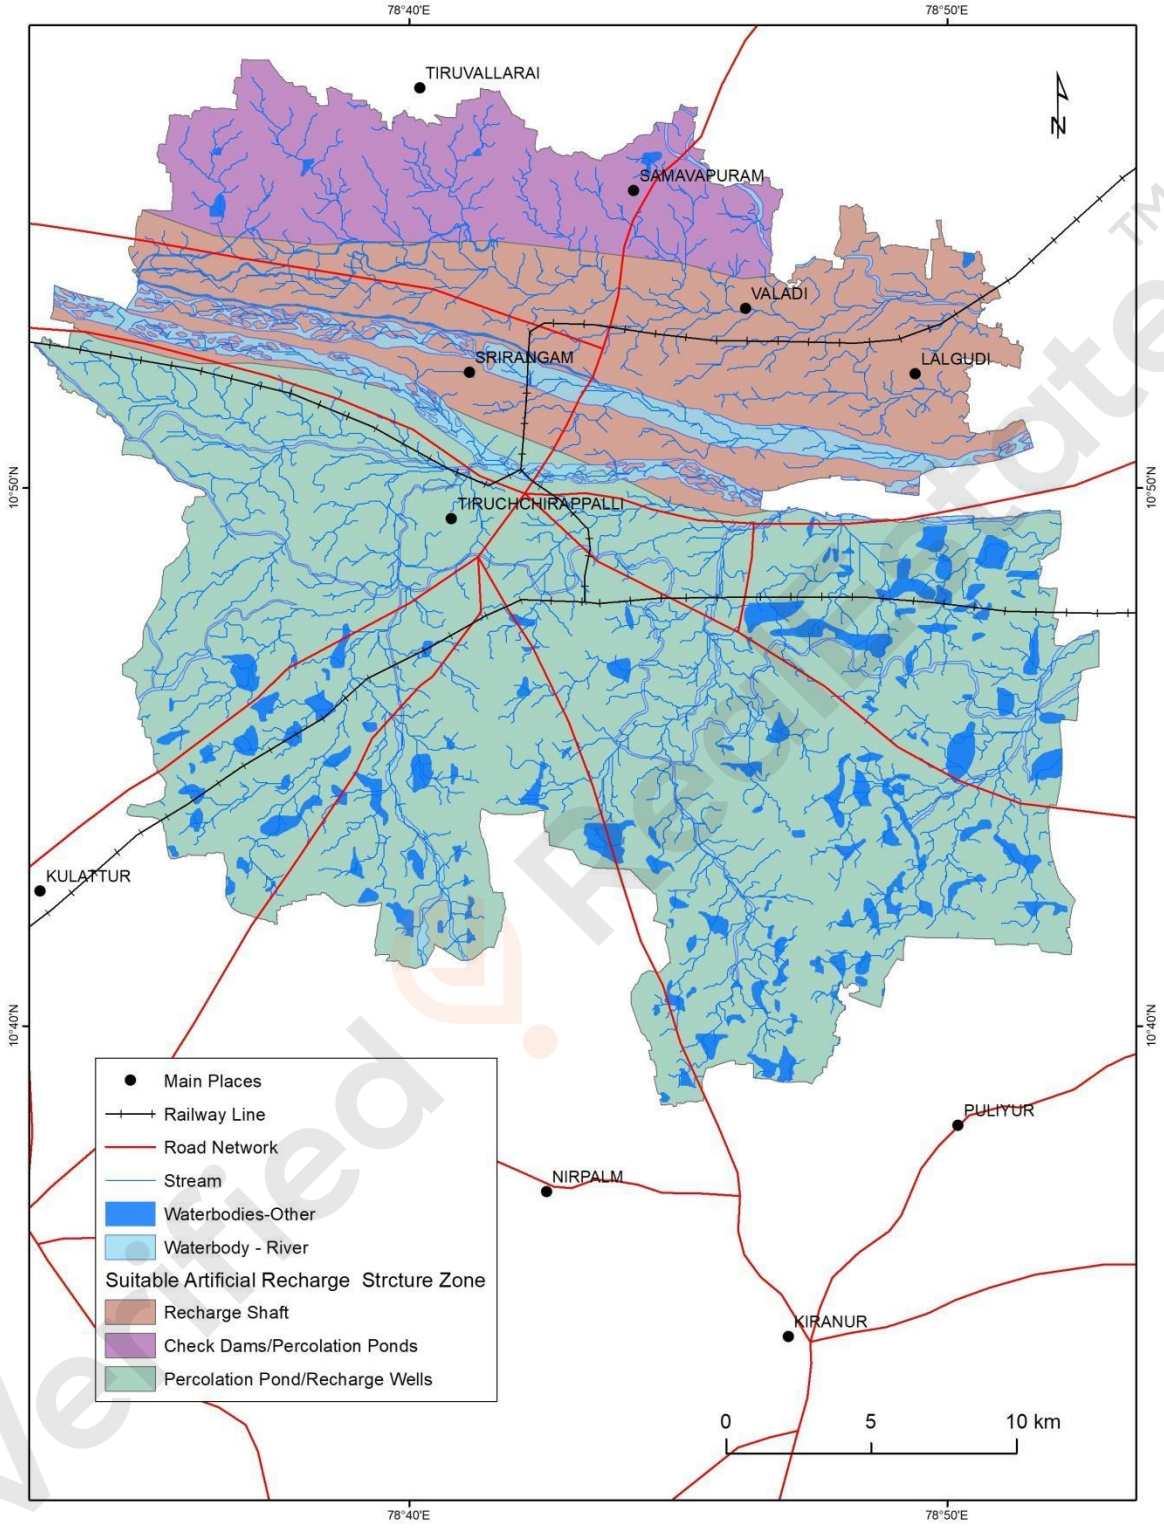

Map 11-7 LPA Groundwater Availability

WATER YIELD ZONE MAP ALONG WITH RECHARGE WELL

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 11-8 Water yield zone along with recharge well

Map 11-9 LPA Recharge Zone

11.2.1.7 Recharge Zones

Dug wells are used to extract groundwater from weathered formation while deeper fractures are tapped through bore wells and dug cum bore wells. The yield of large diameter wells in the district, tapping the weathered mantle of crystalline rocks or the unconsolidated formations ranges from 200 to 900 lpm for drawdowns ranging from 0.4 to 2.5 m. The wells tapping the deep-seated fracture system can yield about 1 – 5 lps and can sustain a pumping of 6-8 hrs a day.

11.2.1.8 Water Level Pre-Monsoon/ Post Monsoon

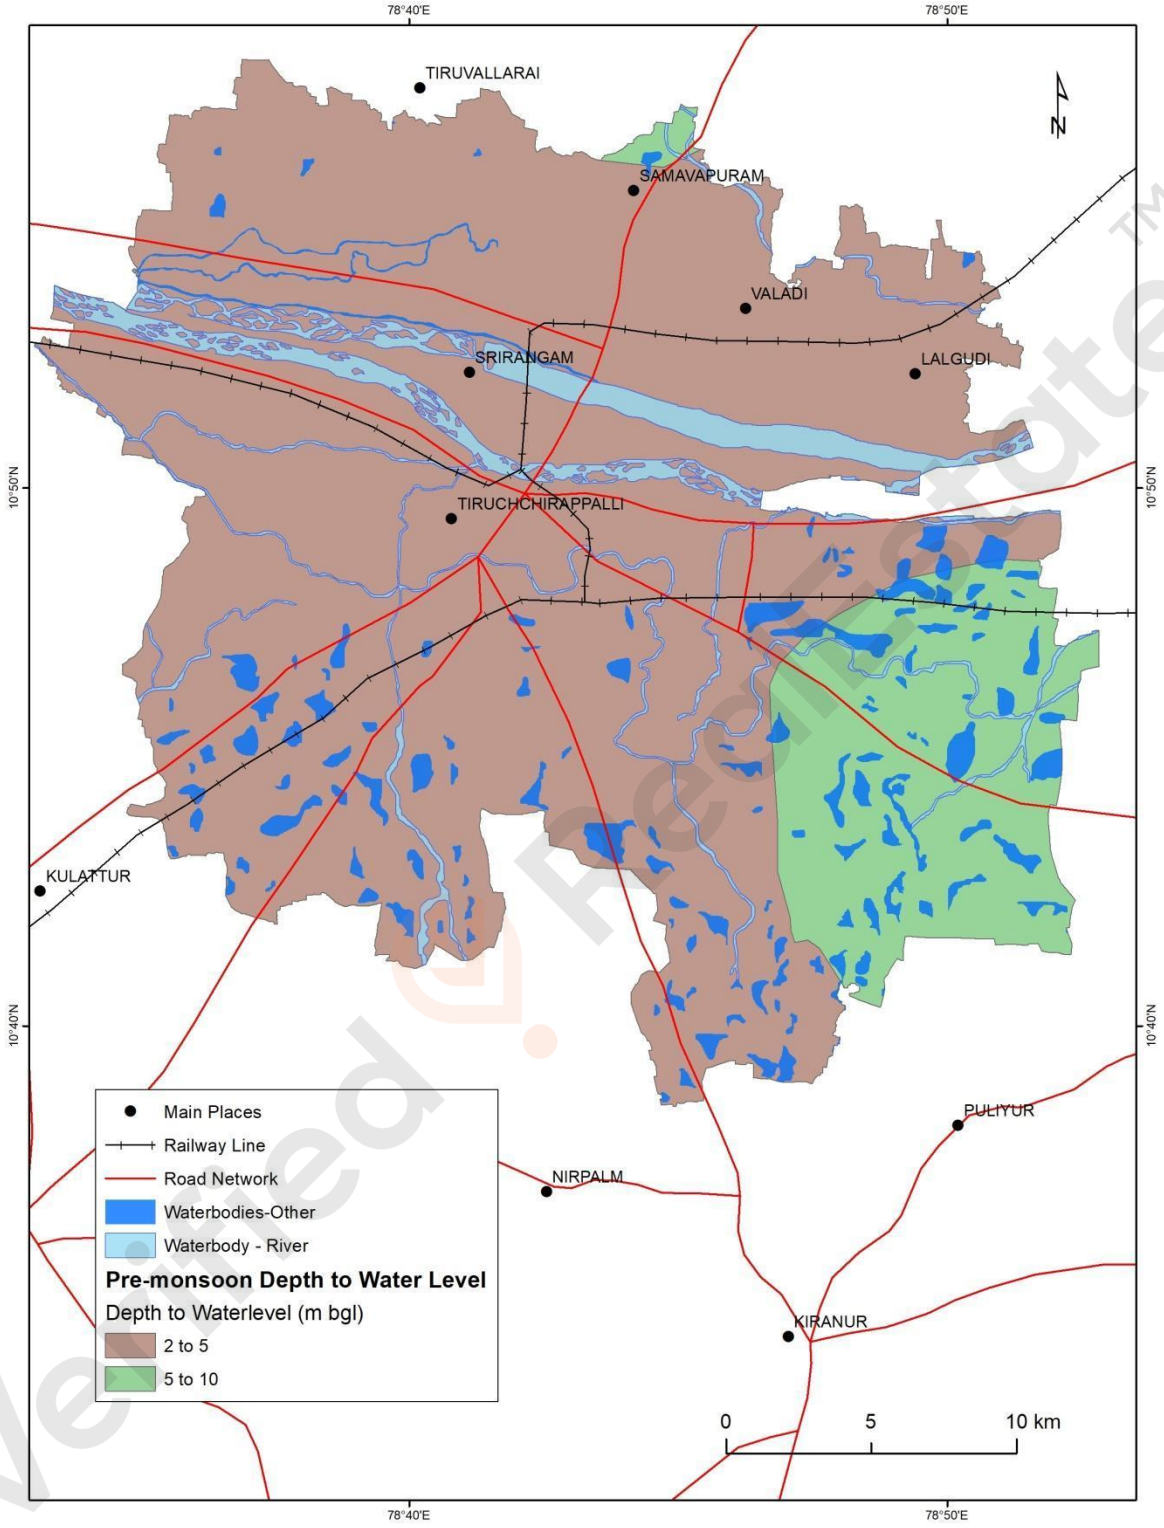

In general Trichy District, during the pre-monsoon, the water level generally has a declining trend ranging from ground level to 15 m.

The depth of well below ground level 12.0m becomes dry during hot seasons like May, June, July. In the post monsoon, the water level generally has an upward trend due to rainfall and it reaches the ground level.

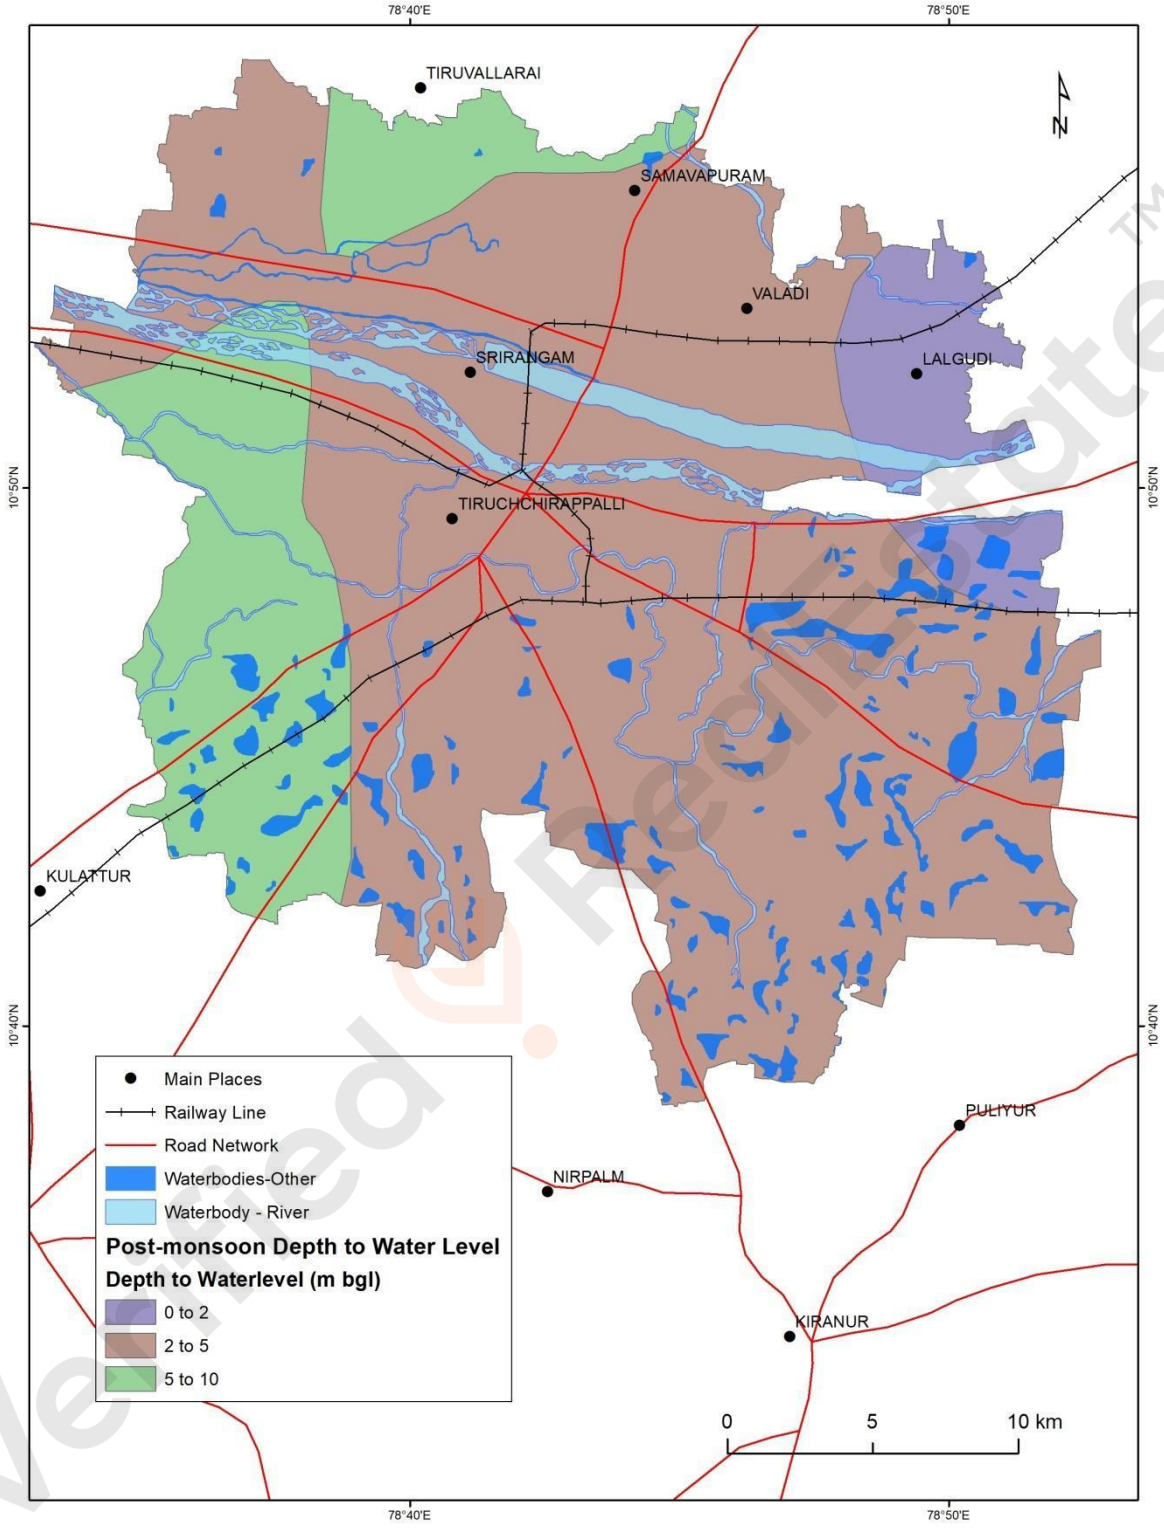

The depth to water level during pre-monsoon (May 2006) in the district varies from 1.95 to 9.49 m bgl. Out of 17 wells, 6% of wells had the depth to water level in the range of 0- 2 m bgl, 47% in the range of 2 – 5 m bgl and 10 – 20 m bgl.

The depth to water level during post monsoon (Jan 2007) varied from 1.6 to 15.15 m bgl and 5% of wells had depth to water level in the range of 0 - 2 m bgl and 58% of the wells in the range of 2 – 5 m bgl. 26% of the wells had depth to water level in the range of 5 - 10 m bgl and 10% of the wells had the depth to water level in the range of 10 - 20 m bgl.

Table 11-2 Stage of Groundwater Development of Trichy based on Firka LPA - 2018 Firka Wise Summary (in ha.m)

Source: Groundwater Resources; CGWB

Verified by RealEstate

The entire Tiruchirappalli District is classified and assessed by 41 Firka,with 16 Firka falling in Tiruchirappalli LPA. CGWB has categorized Over-Exploited, Critical, Semi-Critical, Safe and Saline instead of Dark, Grey and White blocks. The Blocks with more than 100% extraction were categorized as "Over Exploited Blocks", the blocks with 90% to 100% extraction as "Critical Blocks", the blocks with 65% to 90% extraction as "Semi Critical Blocks", the blocks with less than 65% extraction as "Safe Blocks" and the bad quality blocks were categorized as "Saline Blocks".

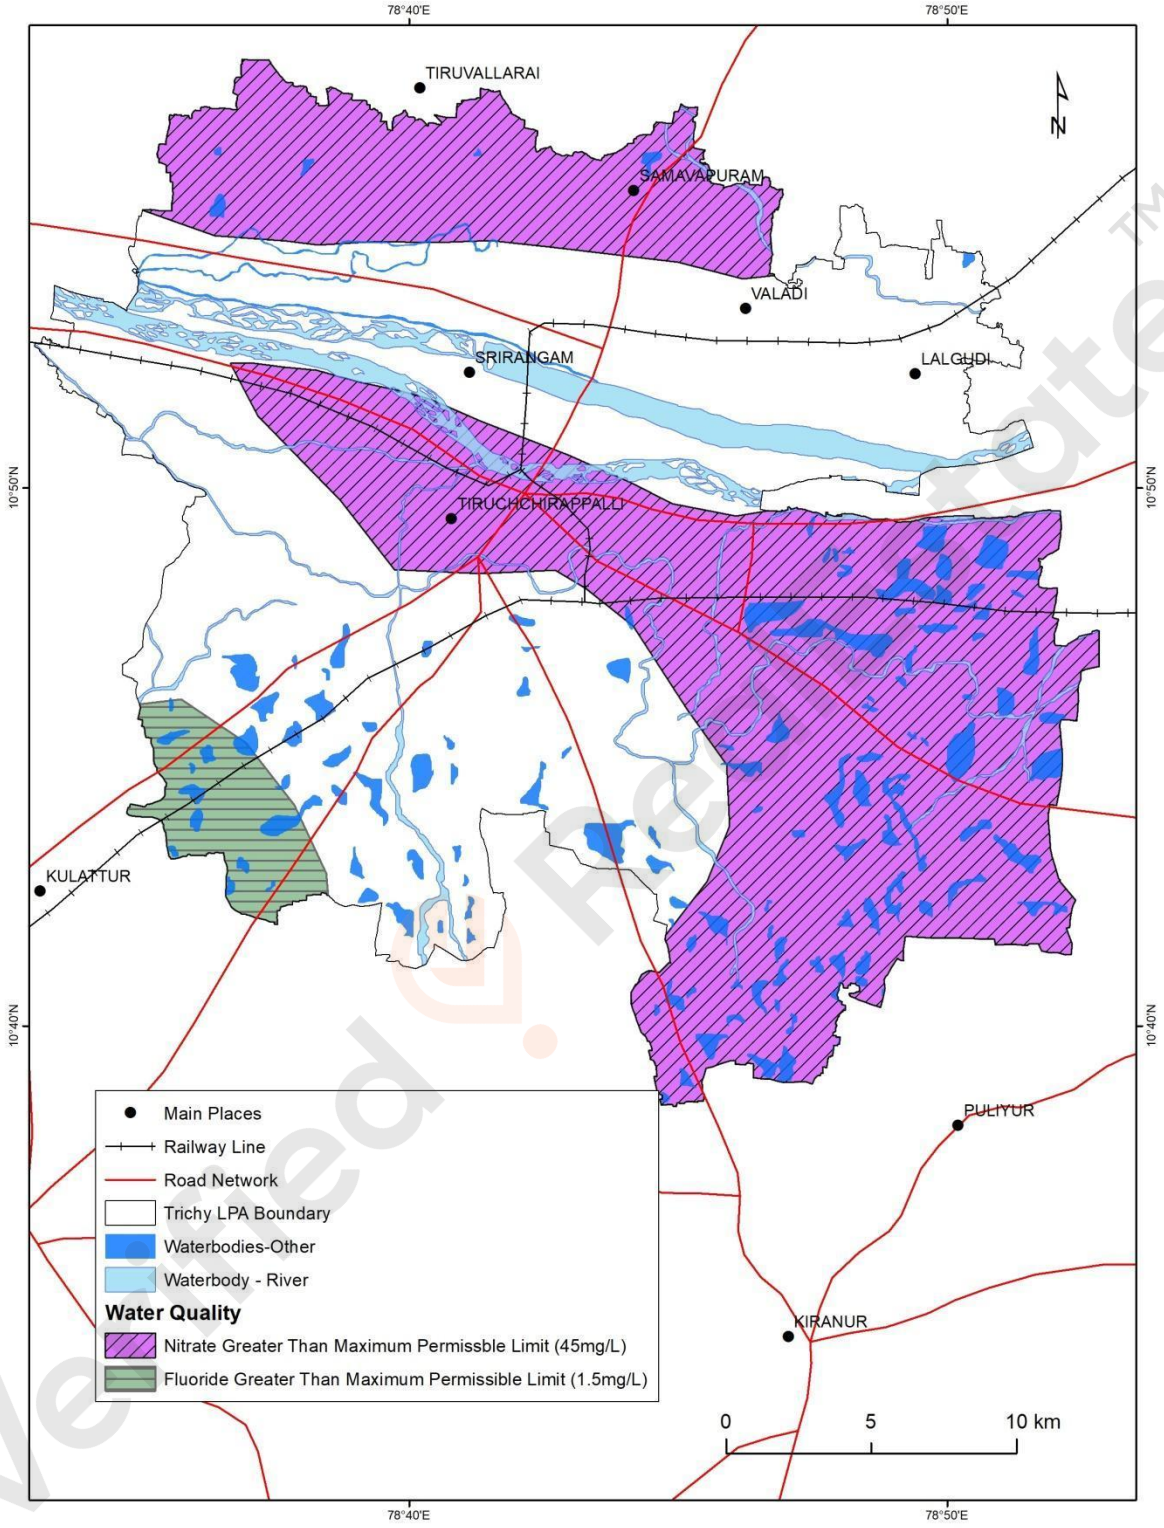

11.2.3 Ground Water Quality

The rainfall is the main source for the availability of water both in surface and sub-surface. The TDS value of less than or equal to 2000 mg/l have been demarcated as good quality and the value more than 2000 mg/l as bad quality areas.

Presence of fluoride <1.0 mg/l in drinking water reduces dental diseases whereas higher level > 1.50 mg/l will affect the health and cause dental fluorides. Nitrate is noted significantly in Ground Water due to use of chemical fertilizer for agriculture and other local pollution rocks and soils are also contributing nitrate to Groundwater. Arsenic is another poisonous heavy metal with allowable limits for drinking purposes are 0.05 mg/l.

In Tiruchirappalli District, the quality of Groundwater generally ranges from moderate to good quality both in the shallow dug well and bore wells except in & around the Kazhuveli tank, where the water quality is poor due to seawater intrusion in the lagoons during high tide seasons, and also due to the production of salt and Aquaculture farming.

Verified PeelEstate™

Map 11-12 LPA Ground Water Quality

11.3 Forest and Biodiversity

As per Trichy Forest division, During 2015 Annual Wildlife Census conducted in Trichy forest, Manapparai, Thuvarankurichi and Thuraiyur (Over a spread of 45,272 hectares), total of 12 Species were recorded that includes Bonnet monkeys, Indian Gaurs, Hares, Deer, Wild boars, Red jungle fowl, Asiatic wildcat, Loris, Bengal fox, Indian palm squirrel, Indian palm squirrel, Indian gray mongoose and Porcupine.

As per in a Two-day Birds and Butterfly Joint survey conducted during January 2021 by the Tropical Butterfly Conservation, Trichy (TBCT), The Forest Department and Act for Butterflies, an NGO, 149 bird species and 105 butterfly species were recorded in Trichy district. Some of the birds spotted includes Greater Spotted Eagle, Osprey, Black Winged Kite, Oriental Honey Buzzard, Indian Spotted Eagle,Red Necked Falcon, Booted Eagle, Boneli's Eagle, White Eyed Buzzard, Eurasian Marsh Harrier,Pallid Harrier, Shikra, Black Kite and Brahminy Kite, Crested Serpent Eagle, Short Toed Snake Eagle, Indian Courser, Mottled Wood Owl, Rock Eagle Owl, and Jungle Owlet.

And According to the survey conducted in Pachamalai survey some of the butterfly species spotted includes White Banded Awl, Banded Blue Pierrot, Glad-eye Bushbrown, Glassy Tiger, Dark Wanderer, Malabar Spotted Flat, Golden Angle, Double-banded Judy, Straight Swift, Indian Palm Bob, Blue Pansy, Peacock Pansy, Swallowtails, Pioneer, Tawny Coster, Monkey Puzzle, Peacock Royal, Slate Flash, Plains Cupid and Common Hedge Blue. Some rare species like Dark Pierrot, Peacock Royal, Redspot and Plumbeous Silverline were also sighted in the scenic hills. Most dominating species were Common Mormon, Common Banded Peacock, Blue Mormon, Common Grass Yellow, Common Emigrant and Indian Skipper. It is a serious responsibility to protect these species and facilitate in improving their living conditions.

11.3.1 Kariyamanickam and Kiliyanallur Reserve Forest

Verified © RealEstate™

The Kariyamanickam and Kilianallur reserve forest is located on the banks of river Kaveri and Kollidam which is the only reserved area inside the local planning area. This forest consists of a considerable amount of flora and fauna due to its wet characteristics in those places.

11.3.2 Butterfly Park

Butterfly Park in Srirangam is one of the most beautiful tourist attractions. It is a tropical butterfly conservatory located in the Upper anaicut reserve forests in Srirangam with an extent of 25 acres. This park has 27 plant varieties corresponding to 27 stars (Nakshatras) and 12 plants corresponding to 12 rasi's.(Zodiac signs of Indian astrology) The gentle breeze carrying the smell of grass & mud the myriad of flowers and plants and the eye catching dance of the butterflies provides the cozy and restful environment.

11.4 Disaster Management

11.4.1 Seismology

The IS factor assigns a zone factor of 0.10 for Zone 2, Tiruchirapalli falls under this zone where the chances of earthquake is very low.

11.4.2 Covid -19

The recent pandemic Covid -19 is included in disasters and the number of people affected & reported were less than 15 per day during three consecutive waves in the year 2020-2021 in Tiruchirappalli district. The region fell in the orange zone based on TN Government's Covid -19 classifications. The district tops in Covid-19 vaccination drive with 11,07,2022 being vaccinated as per 2022 records with low risk.

11.4.3 Cyclone and Floods

11.4.3.1 Kaveri Kollidam River Course

Kaveri Kollidam River (310 km) rises at an elevation of 1,341 m at Talakaveri on the Brahmagiri range near Cherangala village of Kodagu district of Karnataka and drains into the Bay of Bengal and the total length being 765 km. The Kaveri basin extends over states of Tamil Nadu, Karnataka, Kerala and Union Territory of puducherry and drains a total area of 87,900 Sq.km. It falls in peninsular India and lies between 75°27'E to 79°54'E and 10°9'N to 13°30'N. It is bounded by the Western Ghats on the west, by the Eastern Ghats on the east and south and by the ridges separating it from Krishna basin and Pennar basin on the north. It Slopes gently towards east/southeast and the maximum elevation of about 2000-3000m is observed in the basin.

Agricultural land is dominant in this basin followed by forest area and Wastelands. The land use/land cover in the basin also include fallow land, scrub land, scrub forest, river/stream/canal, rural, urban mining, swamp/mangrove and coconut trees.

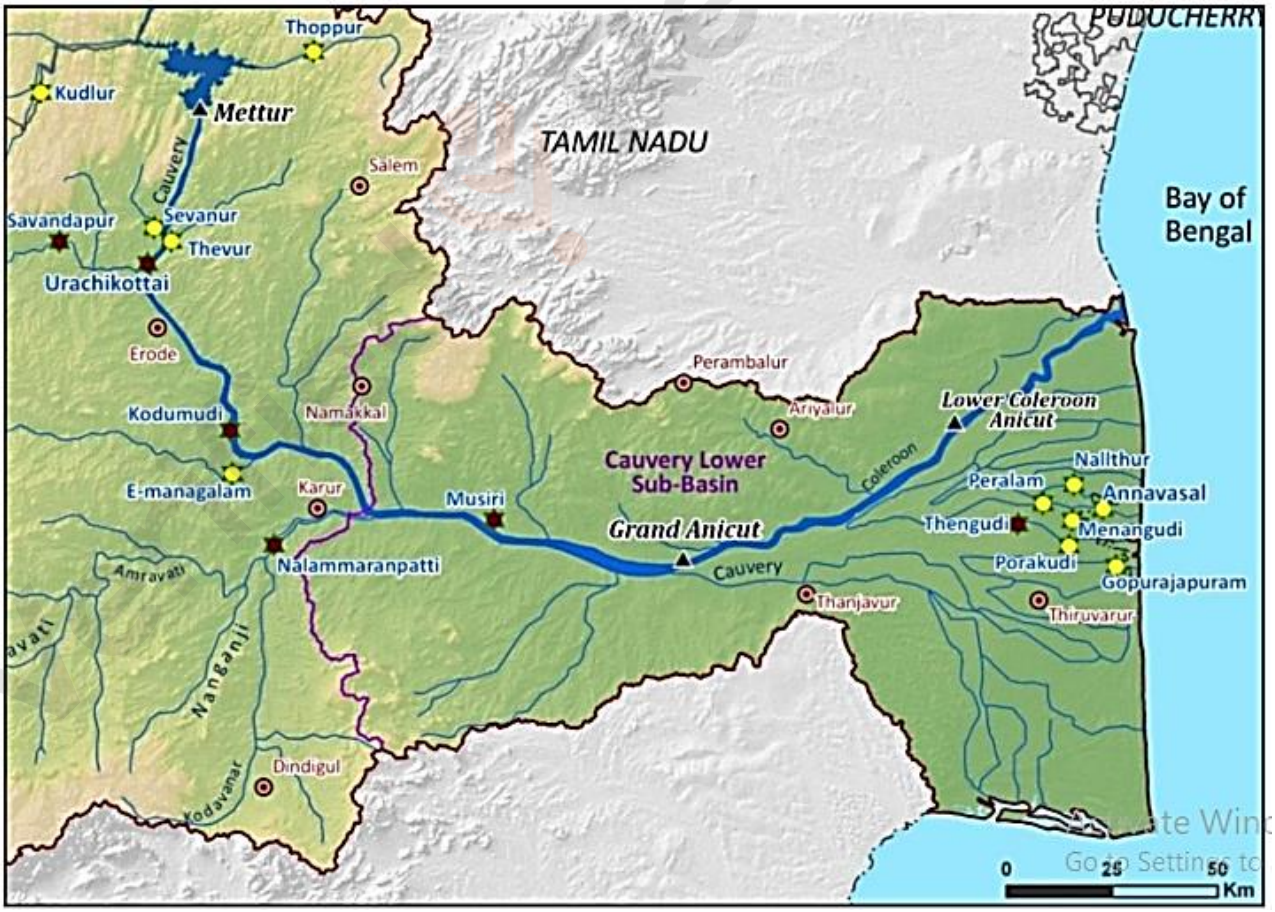

The principal soil types found in the basin are clay, loamy clay, sandy clay, silty clay, loamy sand, sand, loam, sill loam, silt, sandy loam and rocky. The soil in the basin is classified into moderate, slight and severe and the major soil slope classes are gently, steep, moderately and nearly leveled.

Verified RedEstate™

Lower Colleron Anicut and Grand Anicut are some of the important cross structures over Kaveri River in its entire stretch of 765km that falls under Thiruchirapalli LPA. Ayyan and Srirangam north vaikkal are the river channels that fall inside LPA.

Sl No	Structure Name	Chainage (km)	Location	Position

Table 11-3 LPA Existing Dam and Anicut; Source: IWAI

Map 11-13 Trichy Kaveri Kollidam basin; Source: IWAI

11.4.3.2 Vulnerability Analysis

The district has experienced cyclone and flood havoc in the years 1924, 1952, 1954, 1965, 1977, 1979, 1983, 1998 and 1999, and ravaged floods in 2005. The rivers Cauvery, Coleroon and their tributaries, which form a network of irrigation system, naturally inundate larger areas during floods. The North East Monsoon has all along been the main reason for the cyclone, as well as floods in this district.

The low-lying areas are along the tributaries of Uyyakondan river, has faced flooding multiple times. Uyyakondan River is now being polluted with people's waste dumping and encroachments. Anjaneyar Waterfalls in-between Shanmugha Nagar and Ammayappa Nagar is a point of intersection of two rivers, namely, Uyyakondan canal and Korai River. It splits into two branches where one meets Cauvery and the other travels through the city. Based on the below mentioned table vulnerability map is generated.

Table 12-1Existing Landuse 2003 and Proposed Landuse 2011 (Approved in 2009)

This evaluation is a very important step in understanding the demand projection and by analyzing the existing landuse, we can understand if the City has developed as proposed. In the previous Masterplan, the landuse category for Institutional was segregated as Educational and Public and semi public.

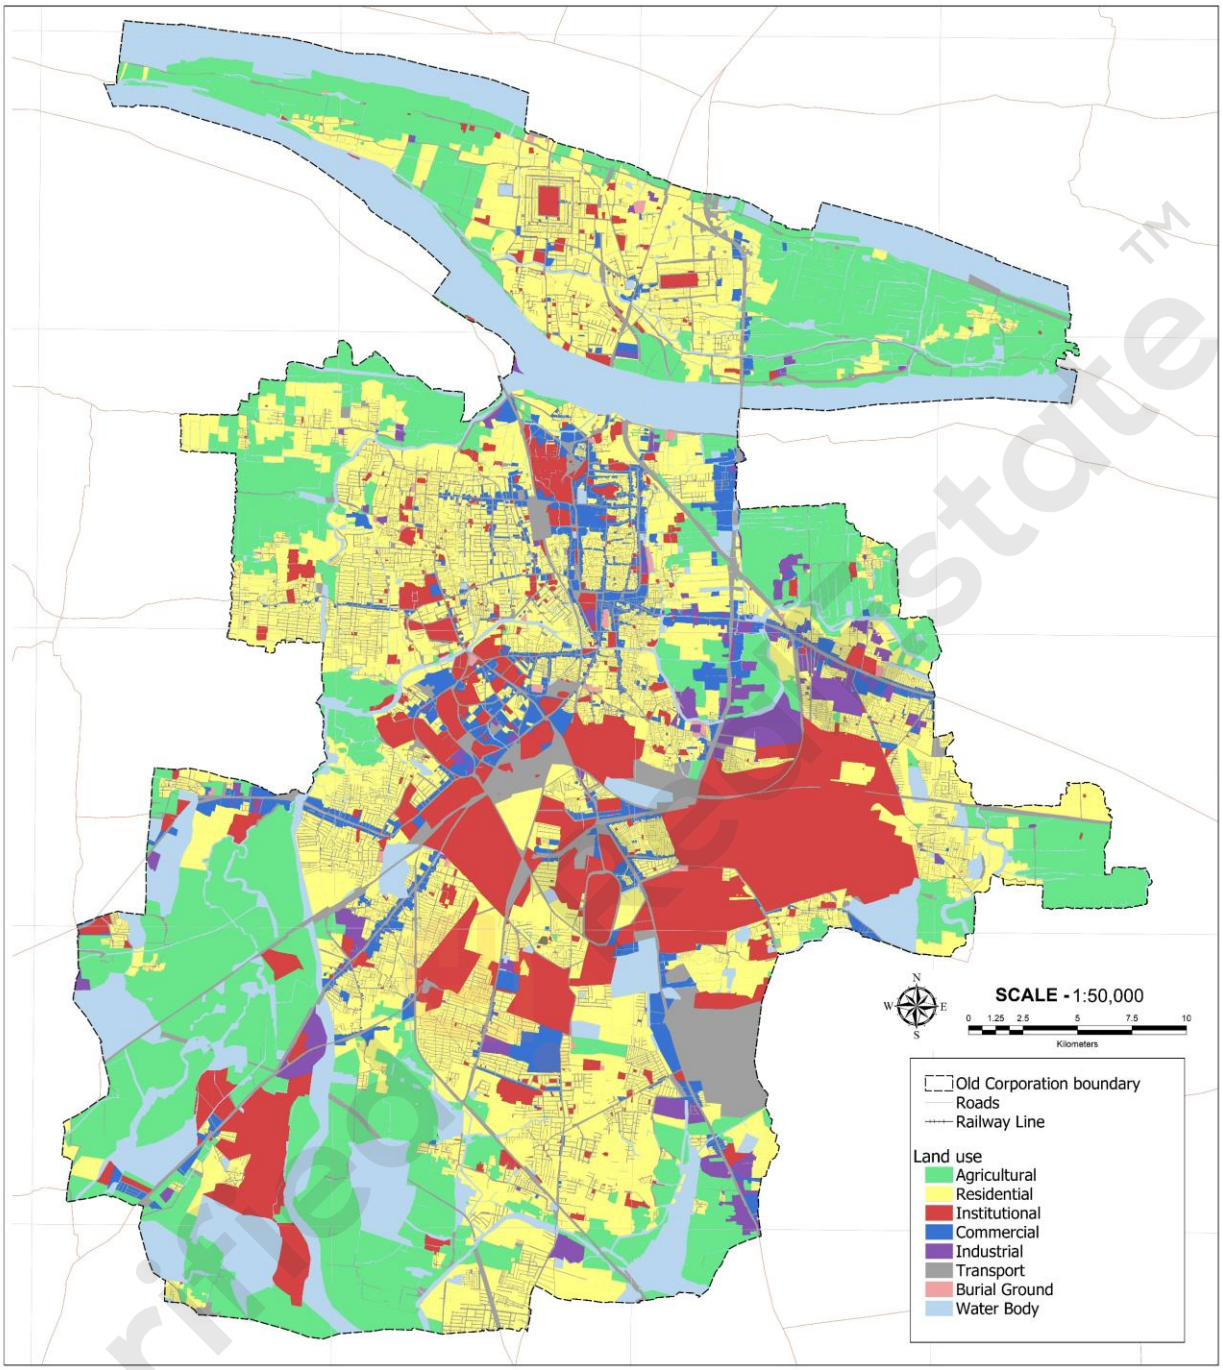

The comparison of the Proposed Landuse 2011 and the Existing Landuse of the

Verified by PropTiger

geographical extent of the Previous Master plan was conducted to understand the level of success for each landuse. The Following Maps 12.1, 12.2 shows the Landuse comparison of Proposed Landuse 2011 and Existing Landuse 2021 for the Previous master plan boundary for the Corporation, LPA excluding corporation. Map 12.3 shows the Proposed Landuse 2021 and Existing Landuse 2021.

Map 12-5 Proposed landuse Map2021 Navalpattu (NTDA)

This comparison shows that the Corporation along with the 2003 LPA has not undergone Landuse change as envisaged in the previous Master plan even after 10 years past the proposed period. The comparison of the existing land use of the Navalpattu NTDA shows that the demand on this land was very heavy and has undergone land use change beyond what was envisaged. It will be pertinent to note that the NTDA Masterplan proposal was prepared for the year 2021. This proves that there is rapid urbanization happening in the South East of Trichy corporation.

12.2 Evaluation of Implementation of Master Plan 2011 Proposals

An evaluation of the success rate of previous Masterplan proposals will provide guidance for future proposal drafting after understanding the practicalities of the region. Below is the list of proposals made in the previous master plan and their current status based on completion.

Road Improvements
New residential use zones in East of Chennai-Tiruchirappalli trunk road - More than a decade there is no considerable residential development, hence residential land can be reverted back to Agricultural.
Shifting of Gandhi Market to Pirattiyur along inward of ring road

Verified RealEstate™

Shifting of Onion market and Vellamandi to varaganeri village along chennai bye-pass road
A 40 feet wide link road connecting Dindigul road and karur road along Korairar river bund
A 80 feet wide link road connecting east Boulevard road to chennai bye pass road
A 100 feet wide link road connecting Madurai road and Dindigul road at Pirattiyur village.
A 60 feet wide link road connecting the above 100 feet road and the existing 60 feet road in the approved society layout
Formation of 120 feet wide ring road around the Tiruchirappalli Town about 80km
HEIGHT project
Junction Improvements
Mannarpuram junction
No.1 Tollgate junction
Palakarai Bazaar road and Heber road junction
Mainguard Gate junction
Junction of Thanjavur road Madurai road near Gandhi market
Puthur Four road junction

Verified RegiEstate™

Road over bridges and underpasses
Bridge over Uyyakondan channel near Palakarai police station
River bridge on EVR road near court
River bridge on Kulumani road on Kudamurutti river
Over Bridges at level crossing (4 lane)
Level crossing in Heber road at Beemanagar
Road over bridge across Trichy-Chennai railway line near Thiruvanaikovil
Road over bridge on Salai road near fort station
New bus stands
Devadanam
Panjapur
Kottappattu
Truck terminals
Truck terminals suggested in HEIGHT project along Dindigul road
Pedestrian ways
Subway opposite to main guard gate

Verified RealEstate™

Subway at singarathope junction
Improvement of Anna Stadium
Walkers track inside the Anna stadium
Accommodation to be provided for EWS people at Kallikudi south village - Instead of this accomodation provided in Nagamangalam, Palakkarai, Srirangam and vannarapettai
Trichy - Srirangam UGS scheme under National River Conservation Project

LEGEND NOT COMPLETED IN PROGRESS COMPLETED

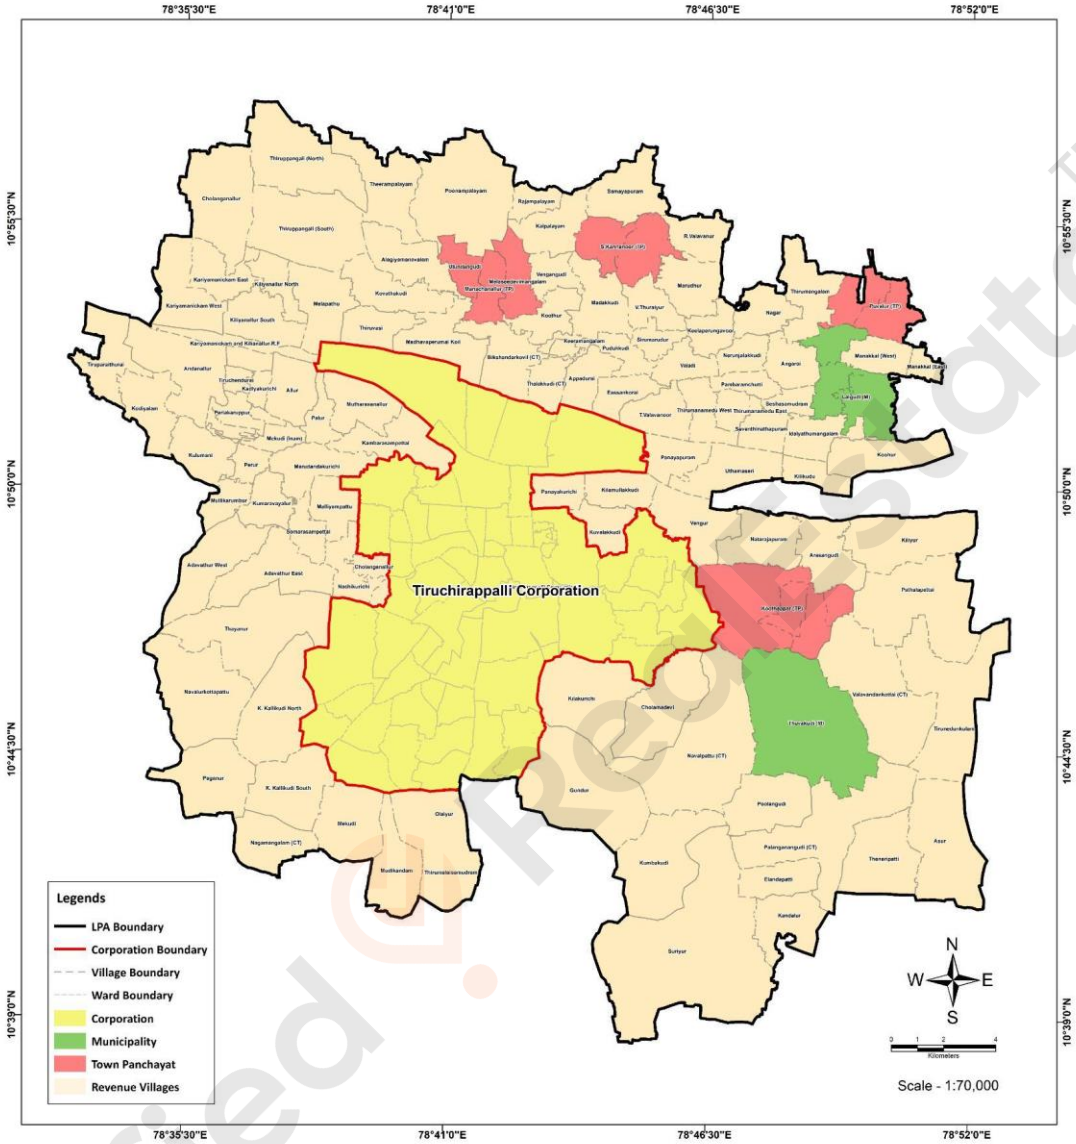

Table 12-4 Stages of proposal and Implementation of previous Master plan

12.3 Existing Landuse (2021) of Proposed LPA 2041

The existing Landuse of the Proposed LPA 2041 of the Corporation and rest of LPA excluding corporation was studied. In addition the existing Landuse of Urban Local Bodies namely Thuvakudi Municipality, Lalgudi Municipality, Koothappar Town Panchayat, Manachanallur Town Panchayat, S.Kannanoor Town Panchayat & Puvalur Town Panchayat were also studied and the developable land area was calculated which excludes agriculture and water bodies since they are undevelopable. The breakup of percentage of each landuse to the developable area is compared with the URPFI Guidelines. The location of the local bodies of the Proposed LPA is shown in the Map: 12-7 below. The Corporation falls under the category of a Large Town and the existing Landuse structure of developable area was evaluated against the same category in the URPFI Guidelines. Thuvakkudi with a very high Industrial Landuse can be considered as an Industrial Town and the existing Landuse 2021 was evaluated against the proposed landuse structure of an industrial Town. The remaining urban local bodies are of the category of a small town based on their population based on the URPFI Guidelines and hence

Verified by RealEstate™

evaluated against the proposed landuse structure of a small town.

Table 12-11 Table: Existing LU (2021) of Puvaliur Town Panchayat

The developable area of the corporation is 85.88 sq.km out of which the major land use component is going to the institutional landuse after residential with 19.64%. It is important to observe that the landuse classification under recreation is not delineated separately but incorporated within the institutional landuse. Hence it can be assumed that a large town should have a percentage of 24-28% of

Verified RealEstate ™

institutional landuse. The developable area for Thuvakudi Municipality is 13.95 sq.km, Lalgudi Municipality is 2.65 sq.km, Koothappar Town Panchayat is 4.72 sq.km, Manachanallur Town Panchayat is 3.18 sq.km, S.Kannanur Town Panchayat is 1.89 sq.km and Puvalur Town Panchayat is 1.23 sq.km. It is interesting to note that the developable area of the corporation is only 51.55% with 14.72% land under water bodies and 33% under agriculture. The fact that the river Kaveri bifurcates the corporation and it occupies a considerable amount of land area must be acknowledged for this phenomenon. Thuvakudi Municipality has a developable area of 71.21%, while Lalgudi Municipality has a developable area of 30%. Koothappar, Manachanallur, S.Kannanur & Puvalur Town Panchayat have developable land of 30.3%, 36.51%, 25.85% & 18.9% respectively, showing that there is strong agricultural base in the region as well as the geographical constraint of the presence of waterbodies which are an integral part of an agricultural economy. Thuvakudi is the most urbanised in terms of landuse. Koothappar Town Panchayat has 18.3% of its land under waterbodies and 51.4% of land under agriculture. It also has a good amount of industrial landuse which can be furthered. Its commercial landuse is more than double the stipulated commercial land use for a small town, which can be ascribed to it geographical location along the Trichy Tanjore NH and concentration of service sector industries, whose landuse fall under commercial. Manachhanallur Town Panchayat will do well with more land allocated under commercial and institutional landuse. There is further scope for tapping its agro based industrial capability. S.Kannanur has high concentration of commercial laduse of 16.4%, institutional land use of 8.5% an transportation land use of 18.5% owing to it being a Pilgrim centre with the famous Samayapuram temple located here. It can be observed that there is lack of recreational facilities across all urban areas based on land use. Hence conscious effort needs to be made to decentralise recreational landuse across the settlement area to promote quality of life. This can be easily achieved by promoting water front developments with focus on the water bodies in close proximity to settlements and by a careful mix of landuse constraints using mechanisms like controlled FSI in the buffer zones of rives, lakes, streams and

Verified © RealEstate™

canals.

Focus also has to be given to providing the required physical infrastructure facilities for the maintenance of health and well being of the population in the form of solid waste management facilities, sewage treatment, storm water drainage, water supply and electricity. Solid waste management should be major focus on pilgrim towns where there is a lot of floating population and with it the generation of waste. Norms like plastic free zones, as pracitised in temple towns like Tirupathi and other eco sensitive areas can be beneficial.

12.4 Land Use, Land Cover (Land use and Land cover) and Land suitability

Inculcating the knowledge from the previous section, the structure plan for Tiruchirappalli 2041 is to be conceptualized for detailed project proposals later. To identify the structure plan, land suitability analysis should be carried out to identify the spots of development.

Land Use and Land Cover analysis done by Bhuvan Geo Portal & Web Services Group (BGWSG), National Remote Sensing Centre is used for inference of the region. The statistics which is available at the district level is shown below in the Figure: 12.4.1

Tiruchirappalli is an agriculture dominating district with 72.5% of the district is in agriculture area. 9.08% is built-up in the district. LPA region is 18.27% of area of total district. 6.74% of the area is under waterbodies. 9.15% of the district area is forest area. The LULC map for the LPA region is given as follows.

Verified RealEstate™

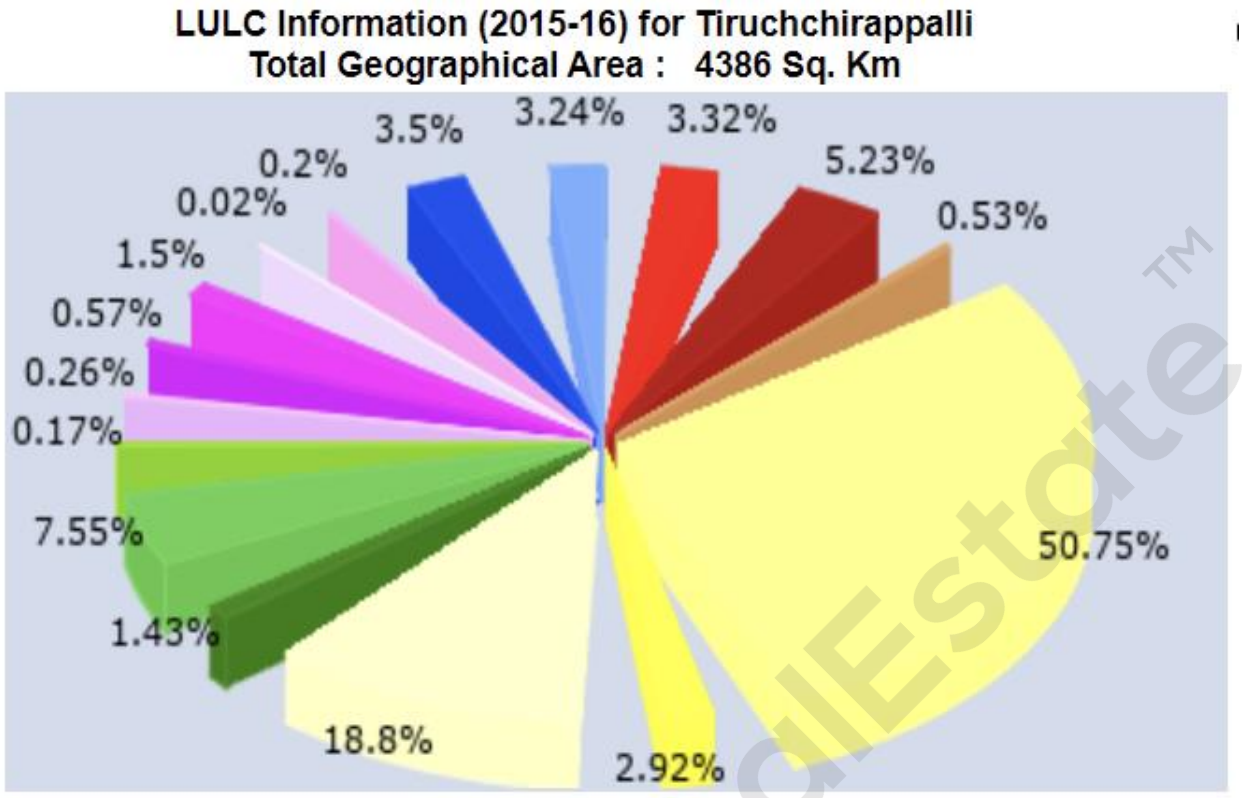

Figure 12-3 - LULC percentage 2015-16 – District

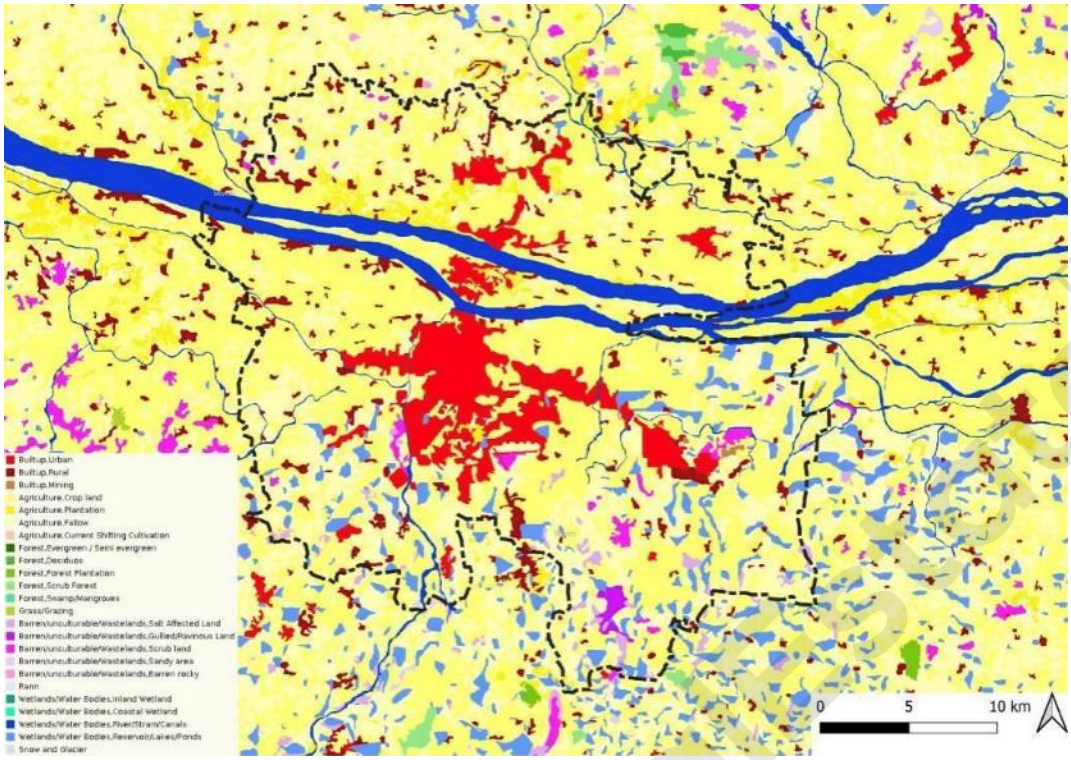

Source: Bhuvan - NRSC

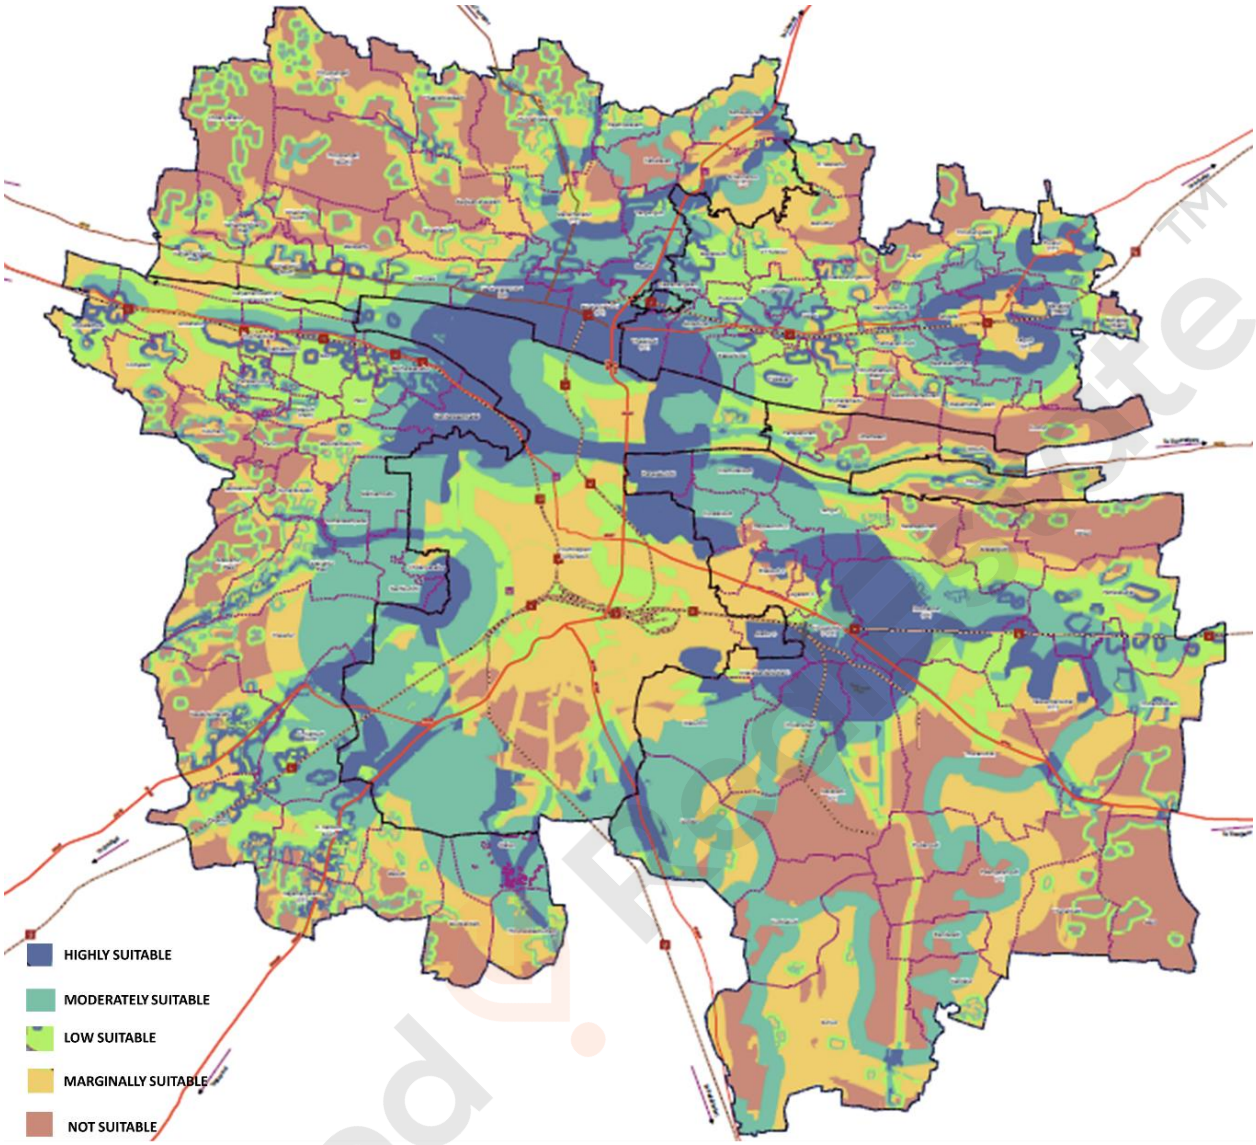

Map 12-18 LULC 2015-16

Source: Bhuvan - NRSC

The LULC analysis of the LPA region shows that the built-up is increasing on all the transport corridors. Industrial areas are seeming to be increasing in the southeast region. 2015 has more rural areas indicating that the commuting options have gone higher, and people are willing to stay away from the urban core. Built-Up is growing rapidly and in a dispersed manner which might be an issue for other uses and against the vision of the masterplan which is a compact city.

12.4.1 Land Suitability analysis

The land suitability analysis is done for the LPA region considering the development facilitator and constraints for development. Parameters like slope, built-up, buffer, water bodies, restricted areas and transport corridors are considered for the analysis. Each of these parameters are given weights and a weighted overlay method of land suitability analysis is done using ArcGIS. The land suitability analysis is given below.

Map 12-19 Land Suitability Analysis

The areas which built-up already exist have low levels of development suitability. The areas around these built-up areas are highly suitable for development. The agriculture areas are far from transport corridors which makes those areas not suitable for development. There is huge potential for development along the transport corridors avoiding the water bodies.

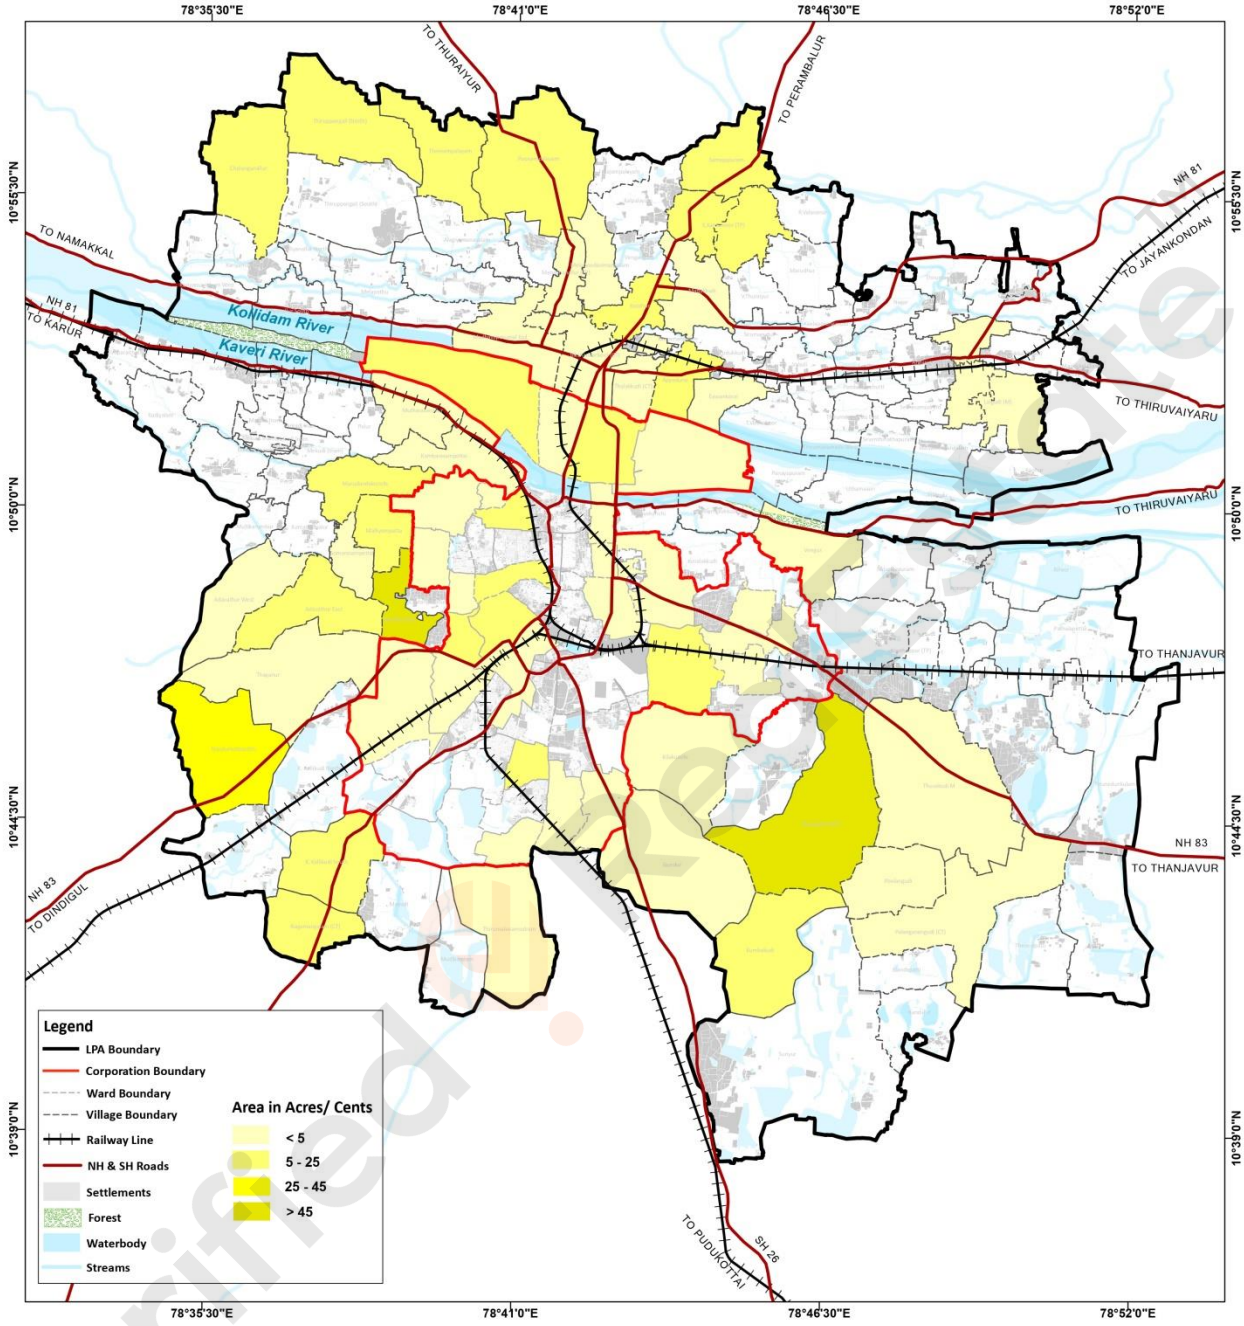

12.5 Land development trend

A study of the trend of landuse in the past decade from 2011 to 2023 was undertaken by analysing the area in square meters of residential buildings,

commercial buildings, institutional buildings and industrial buildings which were submitted for approval of construction and the approval provided by the Local Planning Authority and other Local bodies. Residential layouts which were approved by the Local Planning Authority in acres and one industrial layout approved was also studied. This study helped in identifying the direction in which the development was happening in the form of commercial buildings, institutional buildings and industrial buildings. It also helped to identify the direction of development undertaken by the residential market forces in the form of residential layouts. It can also be used as a reflection of lower land prices or market speculation of future growth since ownership of residential land is considered as an investment. The disadvantage of making decisions of future landuse based on the trend is that the trend might be based on a flawed projection of growth by the market just based on land value, which will lead to uncontrolled sprawl.

The study of residential layout approval trend shows that the maximum area approved falls in the Navalpattu census town and Nachikurichi which falls between Vayalur road and Dindigul road. Navalurkuttappattu, Nagamangalam

13

ISSUES AND POTENTIALS

Verified RedEstate™

13. POTENTIALS AND NEEDS

Based on the analysis of existing conditions of the sectors that were taken up for detailed study in the previous chapters, the strengths of Trichy were identified and measures to be taken to build on this strength and convert them to potential for propelling the development of the City, LPA and the region were charted out. At the same time prevailing issues were studied for understanding the ground realities and a way forward was charted out in the form of needs, to mitigate their immediate impacts in the short run and to rectify them completely by the planning horizon period of 2041.

13.1 Economy

13.1.1 Potential

- Industrial growth through the promotion of SEZs and industrial parks
- Technological innovation and growth in IT and startup sectors
- Becoming a Research and development hub by strengthening higher education/ Research institutions
- The defense corridor is based on existing defense production facilities and will set up new industry clusters to create a supply chain of MSMEs, manufacturers with testing facilities and export facilitation centers.
- Strong agricultural base in the form of land and water and technological capabilities in the LPA can collaborate for value addition in agriculture.

13.1.2 Needs

- Infrastructure development, especially along roads and major transportation networks for seamless trade.
- Need for diversification of industries to enhance employment opportunities.

Verified by RealEstate™

- Emphasis on education and skill development, especially women, and the need to encourage their increased participation in the workforce.
- Need for a detailed survey in the study area to decode the existing scenario of workforce participation rate.
- Promotion of more Agro-industries to add value to agricultural products.
- Sustainable resource management as Agriculture is reducing due to the boom in the real estate market, which needs to be controlled to prevent misuse of land.

13.2 Tourism

13.2.1 Potentials

- Trichy boasts a rich cultural and historical heritage with its iconic landmarks such as the Rock Fort Temple, Srirangam Ranganathaswamy Temple, and the Jambukeswarar Temple holding significant religious and architectural importance.
- Trichy is endowed with natural landscapes with the river Kaveri flowing across the LPA with a great potential for eco tourism and river front development.
- Vast lands under agriculture and a rich agriculture base can also present as a potential for rural tourism.

13.2.2 Needs

- There is an immediate need for detailed cataloging of all heritage precincts within the LPA before they lose their identity in the present trend of architectural modernisation.
- Despite its tourism appeal, Trichy faces challenges related to infrastructure and accessibility. The city needs improved transportation facilities, better

Verified RealEstate™

roads, and enhanced connectivity to key tourist sites.

- Preservation of heritage sites and monuments is crucial for maintaining Trichy's cultural identity. Efforts are needed to ensure the proper conservation and restoration of these historical landmarks.
- Legal framework to promote conservation of heritage precincts to enhance the experience of the tourist at the same time not impacting commercial development by formulating guidelines to control the ambience of the entire locality.
- There is a need to enhance tourism promotion efforts for Trichy, including marketing campaigns, improved tourist facilities, and the development of guided tours to showcase the city's heritage and cultural offerings.
- Balancing tourism growth with environmental sustainability and the preservation of heritage sites is essential. Sustainable tourism practices and responsible visitor management are important considerations for the long-term preservation of Trichy's heritage.
- An integrated approach for development of destinations providing not only core tourism products but also ancillary requirements such as connectivity, performing arts infrastructure, public health, hygiene and safety and other such requirements, which impact tourists.

13.3 Mobility

13.3.1 Potential

- Geographical central location of Trichy and its excellent intra state road and rail connectivity increases its potential to become a major transportation hub for intrastate mobility.
- Trichy with its radial growth pattern with a radial road network has a potential to develop nodes of transit oriented development.

Verified RealEstate™

- MRTS proposals are already in place considering city growth.

13.3.2 Needs

- Densification of the city center is observed which creates congestion due to increased use of private mode of transportation. Hence there is a need to formulate measures to encourage people to change their mode preference from private modes to public mode by improving last mile connectivity to important urban centers and improving the public transport system from the perspective of comfort and reliability.
- Facilities to support freight movement to be planned out.

Road widening required in bottleneck roads to improve their Level of Service

13.4 Environment

13.4.1 Potential

Presence of natural waterways throughout the LPA and availability of large pockets of undeveloped land in close proximity to them, have a potential to be developed as urban forests or resilient landscapes to transform the LPA into a sponge city.

13.4.2 Needs

- With a strong presence of the Healthcare Industry which is a major source of producing hazardous biomedical waste, demands the need for dedicated Biomedical waste management facility in the City
- With the ongoing reclamation of land efforts at Ariyamangalam Dump Yard site, there is an urgent need for identifying alternative land for solid waste management at a large scale.
- More than 70% enterprises in Trichy LPA registered with the Pollution Control Board are categorized as Orange and red, which recognises the need for

Verified RealEstate™

an efficient waste management system.

- The distribution of enterprises which are categorized as orange and red, and falling within the vicinity of surface water bodies, need to be evaluated to identify their impact on the water system.

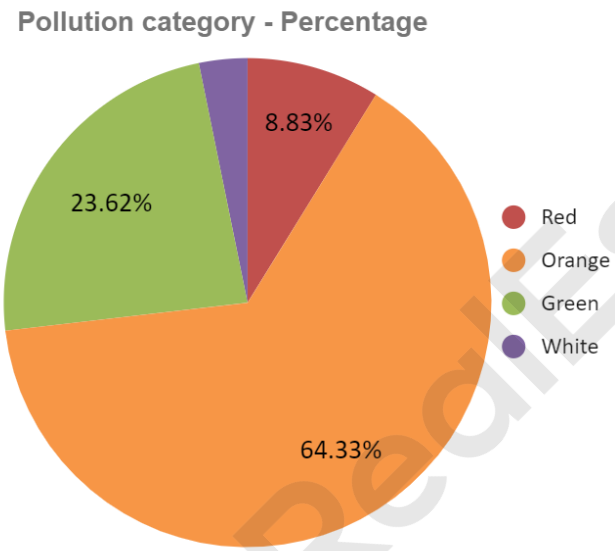

Figure 13-1 Pie-chart showing Pollution Category Percentage

13.5 Physical Infrastructure

13.5.1 Potentials

- Presence of natural water bodies as sources of potable water. Natural topography aiding in relatively easier drainage system planning.
- Availability of land for treatment plant proposals.
- Strong intention towards improvement in solid waste management strategies has been already expressed from the government side.

13.5.2 Needs

- Water supply and its storage capacity gap is high in the corporation area compared to the rest of the LPA and there is a need for identifying new

modes and mechanisms to increase storage capacity in a more efficient manner.

- UGSS covers Corporation and two Town Panchayats but Municipalities and other TPs need to be covered. Need to control disposal of untreated effluents into the natural waterways especially the Uyyakondan Canal.
- Storm water drains cover only the corporation area whereas only 4.6% of the rest of LPA is covered. The natural drains can be utilized to meet the storm water drainage but they need frequent maintenance to prevent choking due to landfills and encroachments
- Solid waste management - Landfill is one of the means of disposal which will be cleared and MCC, Biomethane process to be installed to meet the current and future requirement.

13.6 Social Infrastructure

13.6.1 Potentials

- Growing healthcare facilities.
- Educational institutes are on a High growth rate
- Parks in central city business districts.
- Utilizing all the notified parks can decentralize recreation.
- Green blue corridor has a potential to double up to fill in the gaps of recreational open spaces in Trichy.

13.6.2 Needs

- Primary Health Care units are in deficit along the region. (Private hospitals subside only the current deficit) and hence there is need for formulation of mechanisms to encourage public private partnerships to improve the

healthcare facilities in the rural areas as well as to cater to the marginalized population by measures of subsidization.

- Fire Station deficit needs to be prioritized as a Short Term requirement.
- The Primary school deficit needs to be subsided by Higher Secondary Schools.

Verified RealEstate™

14

PLANNING PROPOSALS

Verified RedEstate™

14. PLANNING PROPOSALS

14.1 Vision/Ideation

As envisioned, the LPA is focused on the development of key sectors viz., Culture, Heritage, Industries, River Restoration and Agriculture, CHIRA 2041 wherein the ideation is economic development by boosting agriculture and related industries simultaneously conserving the indigenous values of the city and its resources.

Based on detailed analysis of ground conditions and considering the potentials of the LPA and the forecasted requirements, the following statement has been arrived:

"The Trichy Masterplan articulates the vision for the city's growth and development driven by its immense cultural & heritage value, lucrative industrial opportunities and sustainable agriculture, thereby strengthening the economy of the city without degrading river resources"

To ensure a sustainable and well-planned future growth of Tiruchirappalli, it is crucial to encourage a more compact and form-based approach. This entails preventing land degradation and mitigating the pressure on services through proper regulation and framework development. By promoting compact growth, the city can optimize land use and reduce sprawl, which in turn conserves natural resources and protects valuable ecosystems. Implementing regulations that prioritize smart urban design and limit urban sprawl will help create vibrant, liveable neighborhoods while minimizing strain on infrastructure and public services.

A comprehensive framework for development will enable the city to anticipate future needs, plan for infrastructure expansion, and ensure the efficient provision of essential services to support the growing population. By adopting these strategies, Tiruchirappalli can achieve sustainable growth while preserving its natural environment and improving the quality of life for its residents. Proposals for each sector has been arrived keeping in mind Trichy's sustainable and eco-friendly

Verified RealEstate™

development.

14.2 Guiding principles

Taking into account Trichy's strategic location and the hoard of natural resources it holds, the Masterplan is proposed keeping in mind the following aspects,

A. Conservation of Natural & Cultural Assets: Trichy's prime strength lies in its natural and cultural heritage. It has an immense network of water system with rivers, streams, canals, tanks and ponds which not only act as major source of water supply and irrigation, but also houses sensitive wildlife that has to be conserved. The Masterplan aims at conserving the natural eco-system of Trichy in addition to making it climate resilient so it is inherently transformed as Sponge city. Additionally, Trichy's rich history and culture plays a pivotal role in the LPA's development.

B. State of the art Infrastructure: Improvement in the living standards through provision of better infrastructure facilities and better connectivity.

C. Agriculture Oriented: Trichy is bestowed with excellent water system and soil conditions. Improvement in infrastructure network services and value-added innovations will aid in development of economy through agriculture and upliftment of farmers' life standards.

D. Tourism & Industries - Drivers of Economy: Owing to its rich heritage, improvement in regional and city mobility and strengthening the non-motorized roads in heritage areas will prove efficient in improving tourism.

14.2.1 Blue and Green Infrastructure

14.2.1.1 River/Canal Front Development

The river Cauvery, which flows between Tiruchirappalli and Srirangam towns, is a major source for water supply and irrigation. Koraiyar and Uyyakondan are major streams that gets connected to Cauvery. These major waterways are often considered as backyards of activities, in time get neglected.

Proposal focusses on activating the riverfronts and conceive them as front yards of

Verified RealEstate ™

interactions that connect the neighbourhood with the waterways, which in turn aids in conserving the river's history & heritage. Over time, this shall ensure that the river is in pristine shape through the "Eyes on the Waterbodies" approach, wherein it is in the constant view of the public.

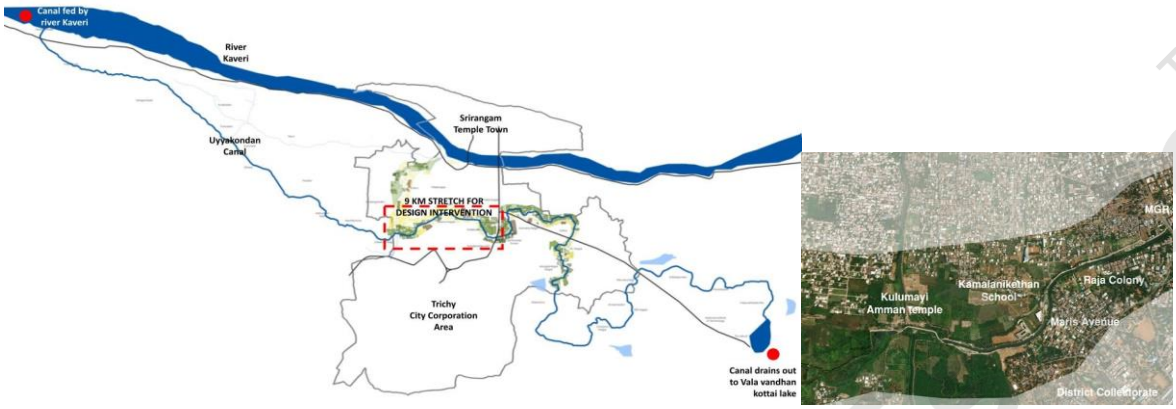

A. Cauvery Riverfront Development: In addition to the existing guidelines on 15m buffer on either side of the river, it is proposed to transform these buffer zones into interactive spaces with the following features:

- *Riparian Buffers:* Continuous stretch of vegetation along the riverbanks that protect them from adjacent landuse and improve water quality.
- Connecting the rivers seamlessly with the neighbourhood through recreational spaces where the community can engage with the water.
- Walking trails along the buffer with seasonal fairs and vending zones to enliven the connection.

Figure 14-1: Reference Images of Riparian buffer, walking trails and interactive public spaces for the proposed riverfront development

B. Uyyiakondan – Koraiyaaru Canalfront Development: Koraiyar and Uyyakondan are the two major streams running through the city S-N and E-W connected with the Cauvery River.

Map 14-1: Uyyakondan stream and proposed intervention location

This proposal conceived by CARE, SoA is to redevelop the Uyyakondan canal with riparian buffers and side-walks and interactive public spaces more focused towards wards 36,38 and 39.

Figure 14-2: Present condition of Uyyakondan canal

Additionally, bridges along the Uyyakondan canal can be treated as leisure zones and interactive spaces that can enhance the experience of the pedestrian footfall, keeping the waterbody on the front yard.

Figure 14-3: Reference Images for the Proposed interactive bridges along Uyyakondan canal

C. Odathurai Riverfront Development: It is proposed to develop a part of the Cauvery riverfront spanning a approx. length of 300mts [Development Area – 5460 Sqm] within the city limits [Ward No.15] along Cauvery South Bank Road, wherein amenities are designed for the community to engage with the waterfront. As the southern part of the site is predominantly residential and commercial, recreational space such as this can be highly functional which will also indirectly prevent pollution and non-confirming activities.

Map 14-2 - Map showing proposed site for development along Odathurai Riverfront

Verified RealEstate ™

Figure 14-4- Existing condition of the Odathurai Riverfront

The riverfront is envisaged to be developed with walking tracks along the entire site length giving a picturesque view of the river giving a sensory experience to the users. Community engagement with the water is brought out through provision of bathing ghats, kids play area and amphitheaters. Sundial and watch towers are also designed to enhance the experience along with other public amenities.

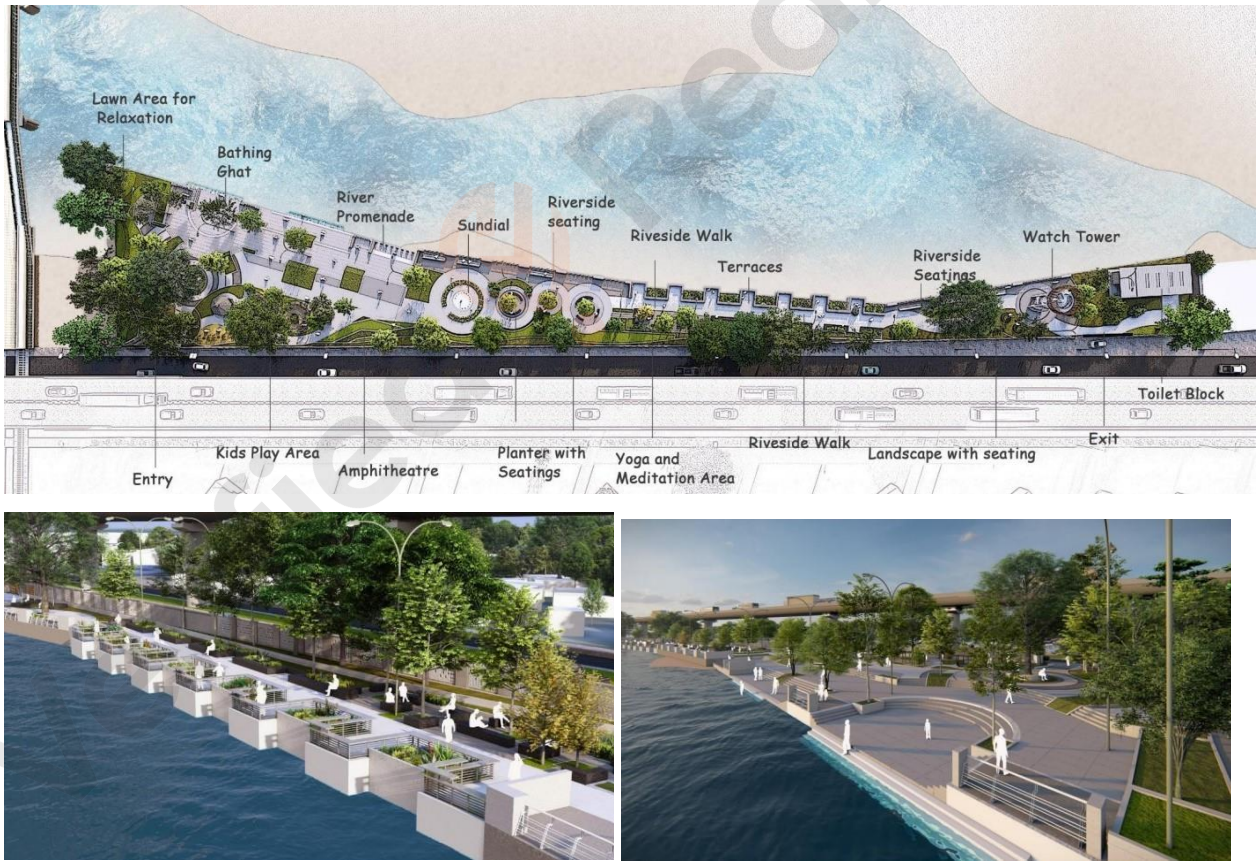

Figure 14-5 - Proposed Promenade Design with walking tracks & bathing Ghat

14.2.1.2 Rejuvenation of WaterBodies

The southern half of the LPA region is constituted by numerous lakes which then collect and flow down to the Cauvery River through streams, nallahs and channels. These water bodies need to be maintained and rejuvenated for efficient functioning of the natural drainage & catchments. As a value addition, the waterbodies can also act as tourist attractions with parks, boating facilities, walk ways created around them. In order to reinforce the water bodies, the following proposals are submitted:

- Rejuvenation of Kollangulam tank with boating facilities
- Rejuvenation of 6 ponds in corpn zone 3
- Green buffer of 15m with SuDS for Koothappar, Gundur, Vazhavandankottai and Thayanur Lakes
- Boating facility in Kollangulam, Thiruverumbur Vazhavandankottai Aeri & Manachanallur Water Bodies
- Upgradation of 47 water bodies in the corporation limits

Verified RedEstate™

Figure 14-6: Existing condition of waterbodies [Top] and reference images for the proposed boating facilities & upgradation of water bodies [Bottom]

14.2.1.3 Urban Forestry

Urban forestry advocates the role of trees as a critical part of the urban infrastructure. It is a process of planting, maintaining and conserving the tree population in urban setting thereby significantly improving the tree canopy. It plays a major role in the creation of inclusive cities and communities.

As we seek solutions for the coming climate crisis, urban forestry will be a significant component in micro-climate management and the many benefits it will provide.

Better Environment: Urban forestry aids in maintaining ecological balance by restoring degraded lands and promoting bio-diversity conservation. These trees become home to numerous species of birds in an urban setting, effectively safeguarding natural resources and enhancing overall environmental health. Additionally, this creation of green lungs amidst concrete jungles improves the community's mental health.

Pollution & Climate Control: With urban centres facing high levels of air pollution, concentrated tree canopies help in absorbing harmful gases and releasing oxygen leading to improved air quality. Also, trees act as carbon sinks, absorbing CO2 which in turn reduces the overall temperature setting in micro-climatic changes that not only benefits the environment, but also reduces energy consumption.

Storm Water Management: Studies show that runoff from an area covered in impervious surface is five times that of a forested watershed of the same size.

Verified RealEstate™

Urban forests mitigate the risk of flooding and promotes recharge of ground water tables. This reduces the pressure on the storm water management system. Strategic tree plantation near water bodies and in arid regions can significantly contribute to water conservation efforts.

Urban forests have been proposed in the following locations in the LPA,

- Urban Forestry at Suriyoor [2.2 Acre]

2 acres of government land at Suriyoor village falling under agriculture land use was identified and the land was cleared off weeds and shrubs. Fifty trees of 8 different native species that are highly adaptive to Trichy's climatic conditions were planted in the site, which is to be further developed and maintained by the Forest Department.

Figure 14-7 Image of the site prior [Left] and after clearance of weeds & Shrubs [Right]

Tree saplings were selected based on careful consideration of Suriyoor's soil condition, climate and water table. Selected typology are indigenous species that thrive in the given climate and soil conditions.

Figure 14-8 - Inception of Tree Plantation at Suriyoor

The following native species have been selected for Urban Forestation.

Arasamaram [Peepal Tree]: Ficus religiosa or sacred fig is native to the Indian subcontinent that belongs to Moraceae, the fig or mulberry family. The sacred fig is considered to have a religious significance in three major religions that originated on the Indian subcontinent, Hinduism, Buddhism and Jainism. The tree provides shade and is an excellent habitat for birds and other animals. It also produces a significant quantity of oxygen during the day, making it an essential component of urban landscapes for reducing pollution and fostering healthier ecosystems.

Naaval Maram [jamun Tree]: Syzygium cumini, native to India, is an evergreen tropical tree in the flowering plant family Myrtaceae, and favored for its fruit, timber, and ornamental value. It can reach heights of up to 30 metres (98 ft) and can live more than 100 years. The tree is also known for its medicinal properties and is used in traditional medicine to treat various ailments.

Pungai Maram: Millettia pinnata belonging to the pea family , Babyaceae is native to the tropical regions of Asia. It has varying levels of tolerance to drought, salinity, and heavy metals in the soil. It has potential to mitigate climate change through CO2 sequestration. By restoring degraded land, it can bring socio-economic benefits to communities.

Verified by RealEstate

Athi Maram: Ficus carica, a species of small tree in the flowering plant family Moraceae, is native to Southern Asia. It has been cultivated since ancient times and they bear fruits year long. This becomes a massive food source for a variety of bird and animal species. Keeping surrounding wildlife alive and thriving directly benefits urban ecosystems' health and diversity. Milling around a bountiful fig tree, frugivores deposit the seeds – either in their droppings or by shedding those attached to their bodies, thus introducing a complex and diverse range of plant species back into the system resulting in healthy and dynamic regrowth of deforested landscapes.

Neem Tree: Azadirachta indica, native to India, belongs to the mahogany family Meliaceae. It is widely known to purify air by reducing GHG through photosynthesis absorbing large quantities of CO2 and producing oxygen. Besides, neem has remarkable ability to withstand air and water pollution, as well as heat. It also restores and maintains soil fertility.

Magizham Tree: Mimusops elengi is a medium-sized evergreen tree found in tropical forests. Its timber is valuable, the fruit is edible, and it is used in traditional medicine. As the trees give thick shade and flowers emit fragrance, it is an excellent addition to urban settings giving out a positive social impact on the community.

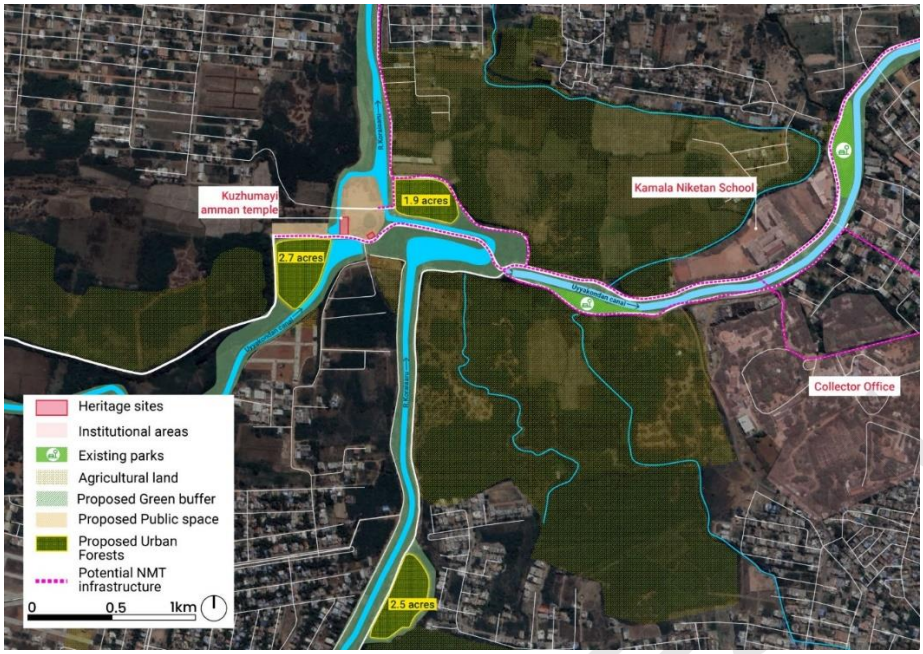

Ichchi Tree: Ficus amplissima, also known as the Indian Bat tree belongs to Moraceae, the fig or mulberry family. It is most commonly planted to provide shade due to its dense and wide foliage.

Iluppai Tree: Madhuca longifolia is an Indian tropical tree belonging to the family Sapotaceae. It is adaptable to arid environments, being a prominent tree in tropical mixed deciduous forests in Tamil Nadu.

Some of the other proposals are,

- Eco-forests connecting butterfly park and Mukkombu
- 7.1 acres of urban forestry along Uyyakondan – Koraiyaaru BG Corridor

Verified RealEstate™

Map 14-3: Proposed Urban forestry along Uyyakondan - Koraiyaaru BG Corridor

14.2.1.4 Sustainable Urban Drainage System [SuDS]

Sustainable Urban Drainage System (SuDS) is a design approach that manages surface water runoff in a way that imitates natural processes, slowing down the runoff rate while providing wider benefits, such as public realm improvements and ecological restoration of the area. An overall area level SuDS approach can be supplemented with small cost-effective landscape features.

Major benefits of SuDS include, reduced pressure on the Storm Water Drainage System during intensive rainfall events, water conservation, flood control, improved biodiversity, green and natural environment, improvement in microclimate through evapotranspiration and diffusion of pollutants.

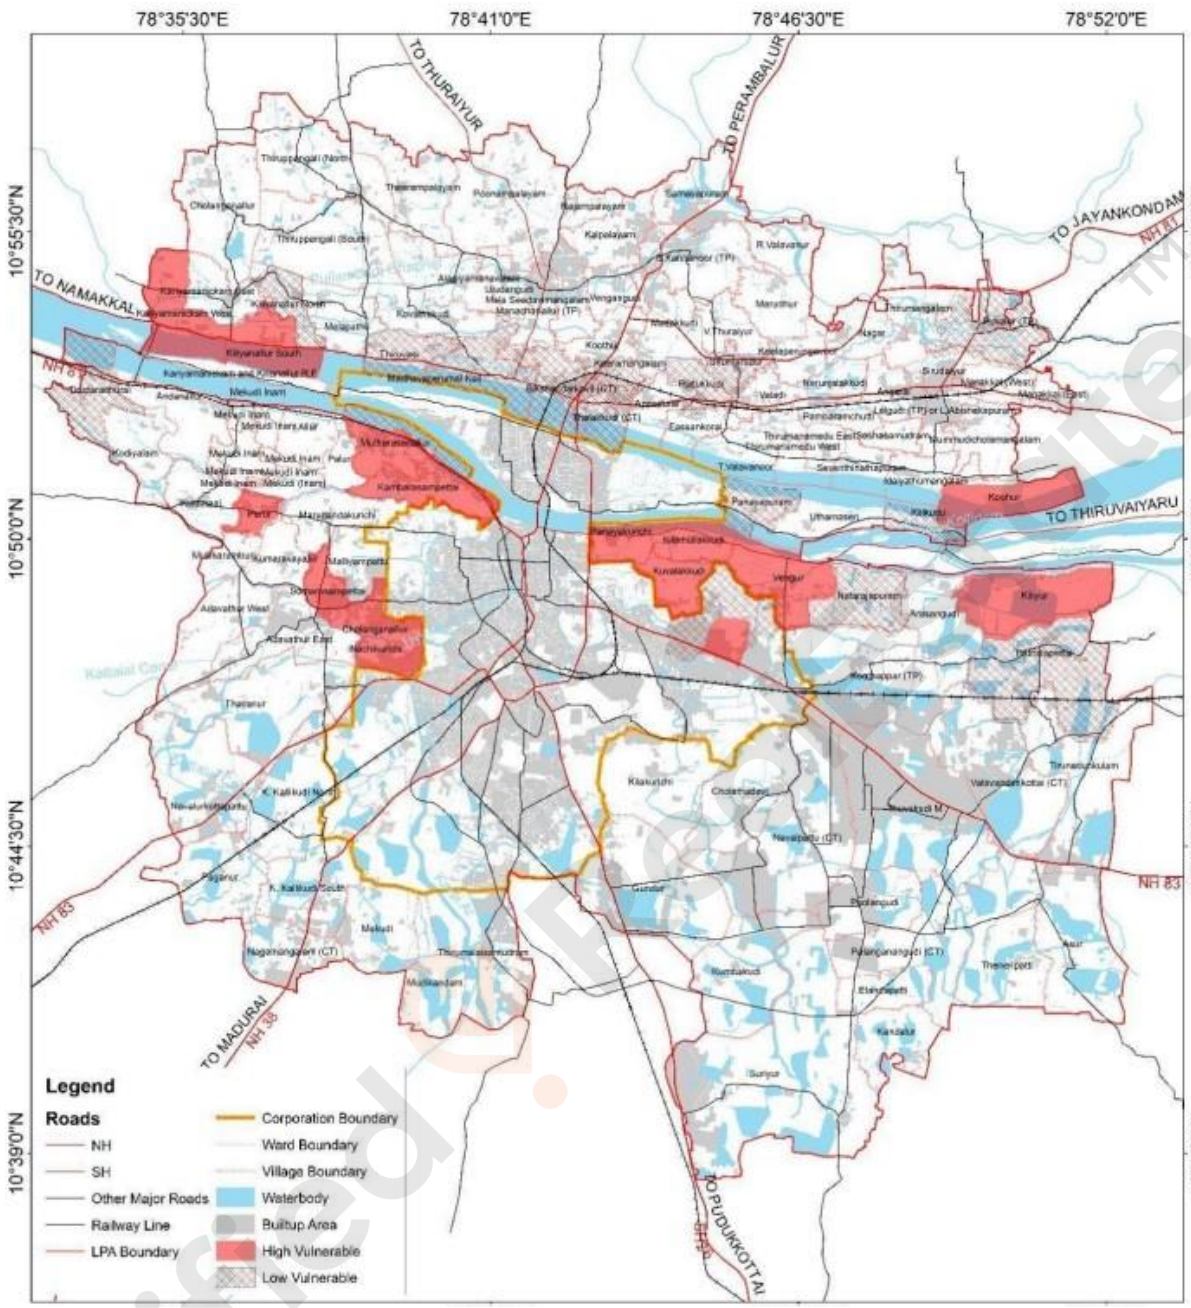

Figure 14-9: Reference images for the proposed Bioswales & Rain Gardens

The rivers Cauvery, Coleroon and their tributaries naturally inundate larger areas during floods. DEM analysis also indicates that the topography naturally slopes towards the river and tributaries making them flood prone. The low-lying areas along the tributaries of Uyyakondan river, has faced flooding multiple times. The identified hotspots are mostly along the river banks and hence treating these flood prone areas with SuDS elements will prove to be highly effective.

As formulated by CARE SoA, riverfronts along these areas can be proposed to created with Rain Gardens which are depressed landscaped areas that can take up storm water runoff temporarily to manage or prevent flooding along the transit networks and residences. At other times, they are beautified lawns and pavilions that add up to the beauty of the riverfront. Bio-swales are similar landscaped open drain that aid in channelizing rain water run-off towards the waterbodies preventing inundation and reducing pressure on the storm water drainage system.

Verified RealEstate™

Map 14-4- Identified Inundation Hotspots

14.2.1.5 Recreational Spaces

The prominent recreational activities are Butterfly Park, Ibrahim Park, Science Park, Anna planetarium and Anna sports stadium. Hence, to provide an urban zone with sustaining local Eco-Habitat, the following are proposed:

- Parks & Walking Tracks - Lalgudi & Thuvakudi
- Upgradation and creation of additional parks & open spaces

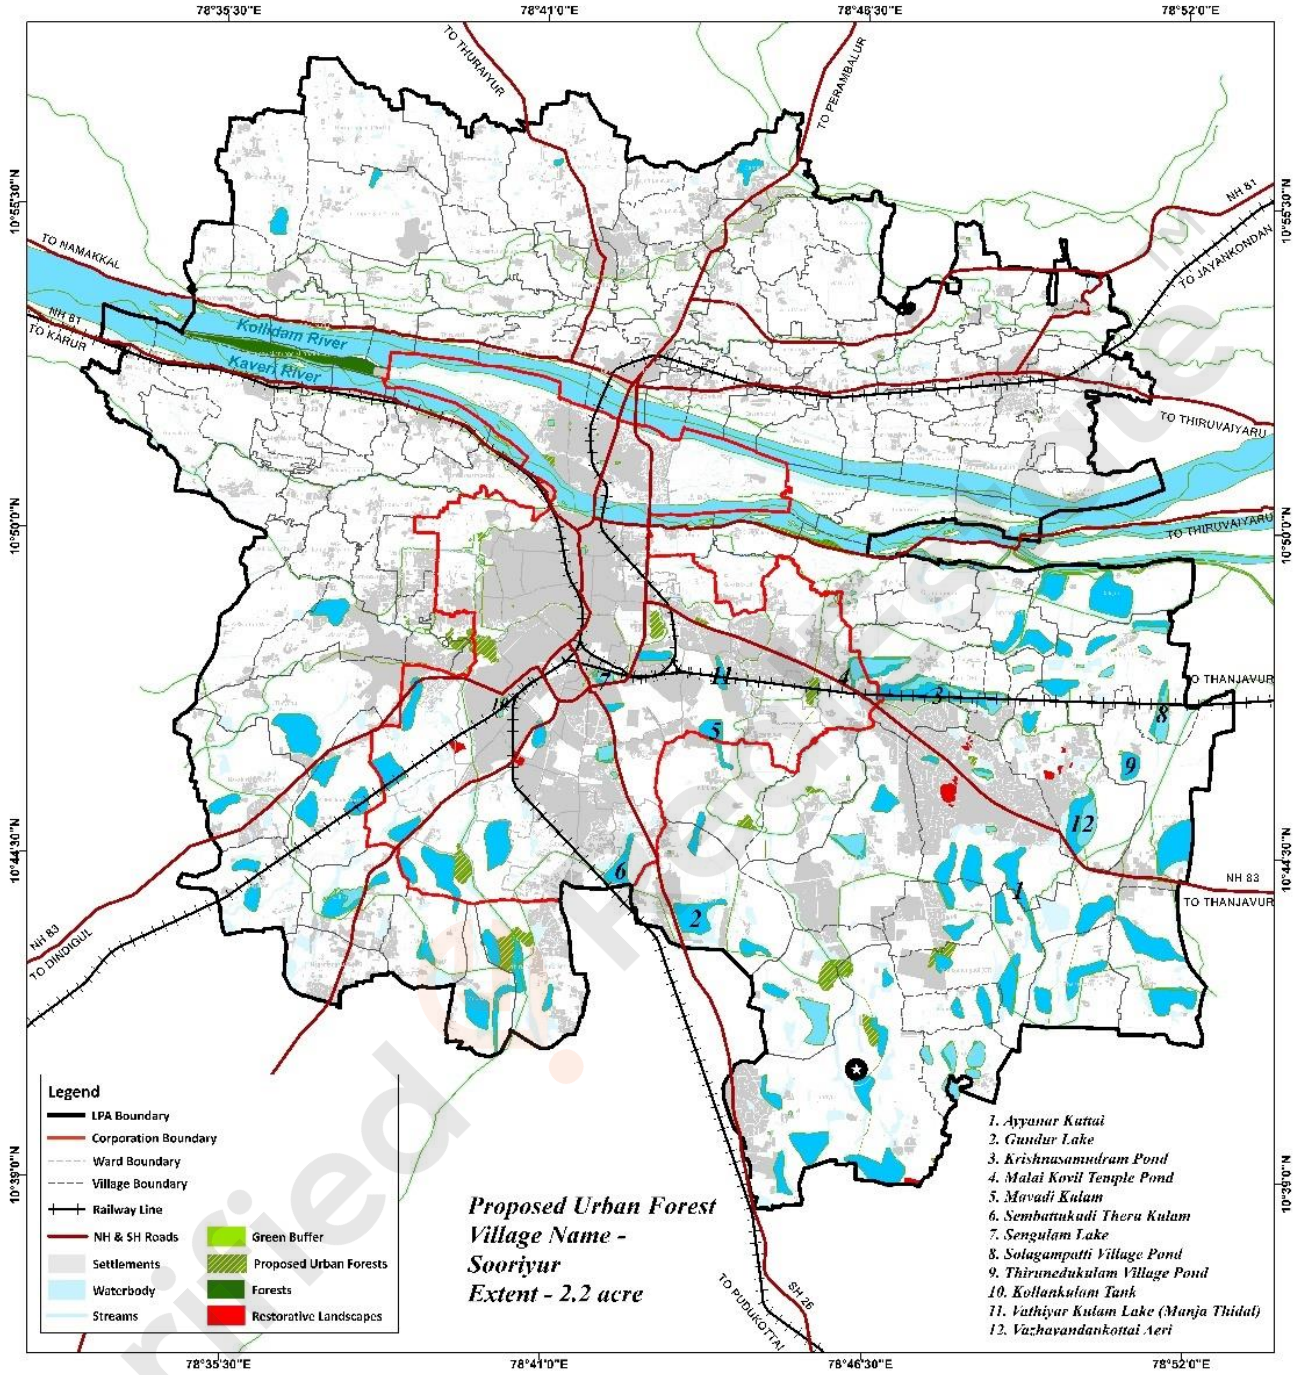

- Children's park in South Thiruverumbur – Kattur Kaveri nagar

14.2.1.6 Policy Level Strategies

The above proposed river/canal front developments and rejuvenation of waterbodies all are focused towards conservation of waterbodies through effective transformation as "Front yard of Activities" which will put the waterbody on the forefront, preventing it from pollution and unauthorized developments bring in an "Eyes on the water" approach. Proposals like these combined with efficient policies and regulations will keep these lifelines thriving for decades to come. The River Centric Urban Planning [RUCP] Guidelines proposed by Town & Country Planning Organization [TCPO], Ministry of Housing & Urban Affairs, shines light on a holistic approach towards Urban River Management & Planning. As Trichy LPA is predominantly a river oriented settlement with its economy and culture relying mostly on the water bodies, some key indices of the RUCP guidelines that can be included in the DCR are discussed below,

- Establishment of No Development Zone and No Construction Zone in the active flood plains.
- River Regulation Zones [RRZ] and River Conservation Zones [RCZ] that will establish permitted uses and activities along the riverfront.
- Categorization of river stretches in the urban and peri-urban zones.
- Creation of zones along the riverfront as Eco-sensitive, Active and Passive recreational zones to limit and regulate activites.
- Devising an exclusive urban river management plan including action plans for flooding and draught scenarios.

Verified RedEstore

Map 14-5 Map depicting the proposed Blue-Green Developments in the LPA

14.2.2 Heritage & Tourism

Being a historical city, Tiruchirappalli has various architectural marvels & various temples in and around the city which creates a huge tourism potential for the city. Various sites such as the Amma Mandapam, Rock Fort temple etc., add to the important spots to attract the tourism.

14.2.2.1 Cultural/ Heritage Tourism

According to Urban Reform 8: Supplementary Guidelines, Ministry of Finance, DoE, GoI, dt 19.6.2023, identification of economic activities and resources is the most important factor that leads to economic development of any city. Trichy has numerous spots enriched with heritage and cultural aspects which attracts heavy tourist population that has a potential to contribute to the economic growth of the city. Presence of ASI structures and religious places, architectural and engineering marvels help to boost the Cultural/Heritage Tourism. The notified ASI sites are Pallava Upper Cave, Pallava Lower Cave, Mainguard gate & Erumbeeswarar Temple.

A. Srirangam Special Notified Zone [SNZ]

The region around major historical sites such as Srirangam, Thiruvanaikoil [1.5 km radius around both the temples] are retained to maintain their cultural value and is strengthened through "Special Notified Zones [SNZ]" as proposed by CARE SoA. These zones provide a more personalized and convenient experience for tourists, as well as better preservation of the heritage sites. SNZs allow for better coordination between tourism officials and local residents, as well as for the development of tourism-related businesses simultaneously preserving and emphasizing the heritage character of the sites and its surroundings

The Srirangam Ranganathaswamy temple site is on a large islet bounded by the Cauvery river and Kollidam river. As per UNESCO, Srirangam is considered the biggest functioning Hindu temple in the world covering an area of about 631,000 sq.m with a perimeter of 4 km. In 2017, the temple won the UNESCO Asia Pacific Award of Merit 2017 for cultural heritage conservation, making it the first temple in Tamil Nadu to receive the award from the UNESCO.

It is a vast and planned as a temple town with *Sapta-Prakaram* [Seven Enclosures] design where the sanctum, gopuram, services and living area are co-located in seven concentric enclosures formed by thick and huge rampart walls that run round the sanctum sanctorum in which the deity presides. The temple monuments

Verified RealEstate™

are located inside the inner five enclosures of the complex, surrounded by living area and infrastructure in outer two enclosures. Numerous gopurams [Numbered 21] connect the *Sapta-Prakaram* enclosures allowing the pilgrims and visitors to reach the sanctum from many directions with the Raja Gopuram, ranking the tallest in Asia, is 240 feet tall.

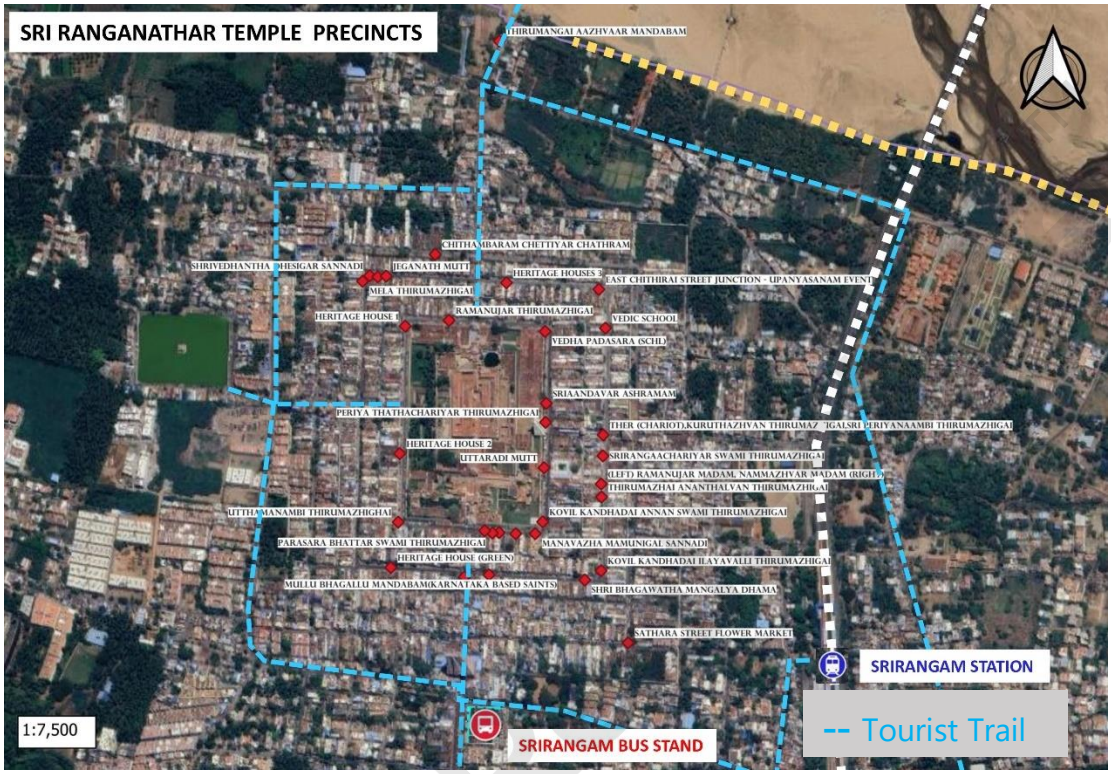

Figure 14-10 - Srirangam Eagle's view [Left] and Prakaram Entries [Right]

Active interchange of human values is happening between the public and tourists of the temple complex. Part of the temple is dedicated to its regular sevas, festivals and activities of Vaishnav Cult. The other part is vibrant with regular human settlement with all its daily routines and events. The temple is the nucleus and the life of people is centred around it. Unlike Madurai and Chidambaram, which are examples of settlements around a temple, Srirangam is a settlement within the temple. The urban form of Srirangam is followed by Sarvatobhatra of Manasara – Ancient Vedic Planning System.

On survey of the Saptha Prakarams, the usage and predominant activities of the veedhis were recorded and mapped. Map 14-5 depicts the list of cultural landuses that have been identified in the notified zone.

The four enclosures inside the complex are processional pathways for the deity and the fifth and sixth enclosures viz., Uthira and Chithirai Veedhis, house thirumazhigais, mutts and vedha patashalas, upanyasam mandapas and ashrams. The seventh enclosure, adayavalanjan veethi, houses chathirams amongst residential accommodations and the sathara street is filled with commercial

activities and markets.

Map 14-6- Map depicting surveyed confirming uses and precincts around the Saptha Prakarams and Tourist Trail

There are two major festivals, one the Sethi festival, during which the deity is taken procession to Woraiyur Nachiyar Temple through the *Sapta-Prakarams* and Amma Mandapam. During this trail, mantras are chanted, with music accompanying thousands of devotees. Another festival, is a 10-day Thai Utsavam wherein the deity's procession happens in the four Uthirai veethis finally commemorating with Thiruvizha. Around this time of the year, pilgrimage tourists are found to be much higher.

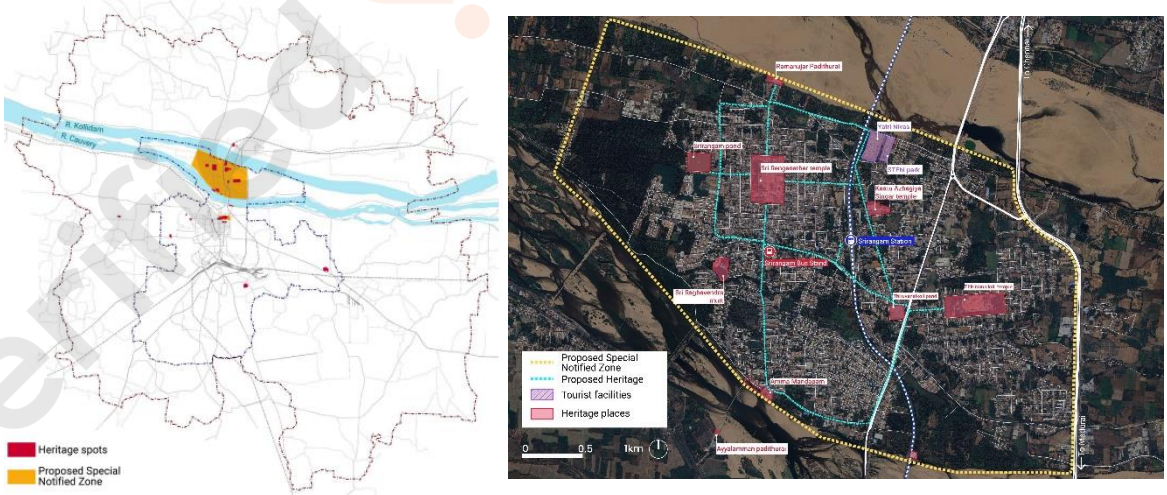

Figure 14-11- Processions in Prakara Veethis during Utsavams

A heritage loop is identified, which effectively connects the tourist and transit facilities in Srirangam island [Map 14-4]. This is an initiative for ensuring that the religious and heritage sites of the city are visited by all who visit the island.

For a heritage precinct with such cultural importance, in addition to the existing height restriction [Height to restricted to 9mts] norms for the 1km radius influence area the following considerations are proposed,

Adaptive Reuse of heritage buildings - agraharams around Srirangam temple precinct as,

Map 14-7 Proposed SNZ at Srirangam and Heritage sites' location

- Heritage Centres/ Performing arts Centre to promote traditional arts
- Tourist accommodation & Guest houses
- Kalakendras

Model villages exhibiting cultural practices, food & work of the ancient tamils

- Changes/Reuse of non-confirming landuse in the zone
- Architectural control in terms of facade, frames and modules to conserve the heritage values and avoid heterogeneity.

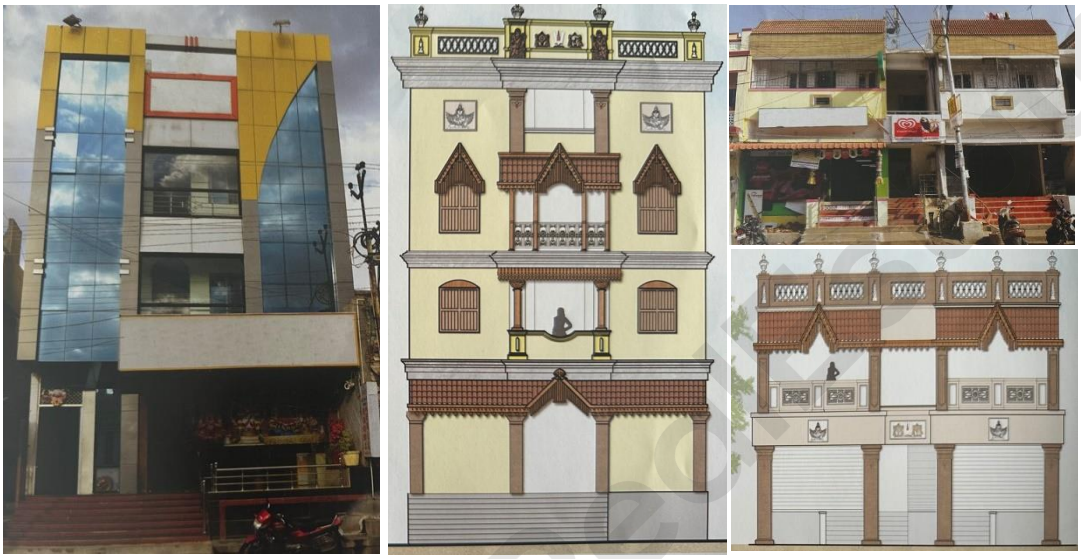

Figure 14-12 Elevation of existing buildings & suggested facade treatments conserving Srirangam's heritage elements

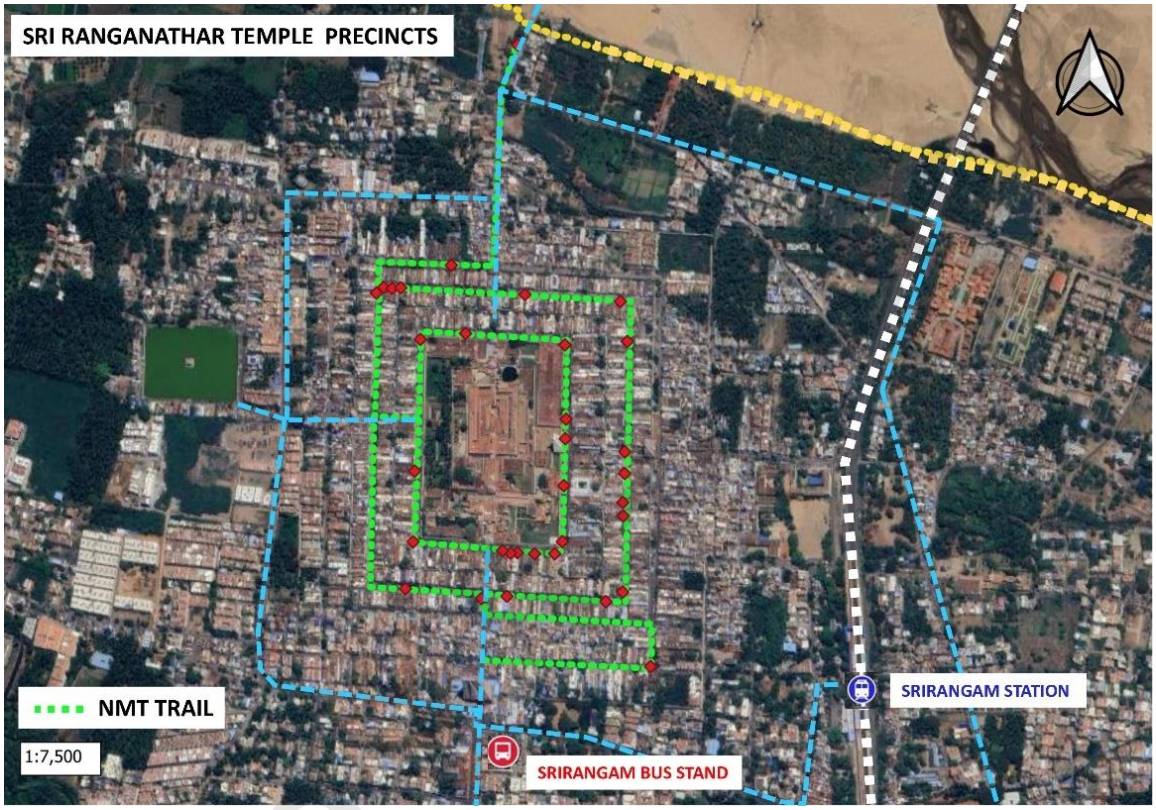

Figure 14-13 - Street view before [Top] and after facade control [Bottom]

- Grading of heritage buildings for adaptive reuse
- NMT priority in streets with heavy pedestrian footfalls

NMT trails are proposed in alignment with the heritage loop to enhance visitors'

experience. Based on the survey, the following streets have been identified as NMT Trails with pedestrian friendly facilities and street elements. The vehicular traffic can be diverted to the roads branching out from this main road towards east and west thus converting the thoroughfare with Extra Wide Sidewalks, Neighbourhood Streets and Pedestrian only zones.

Map 14-8 - Srirangam SNZ with proposed NMT Trails

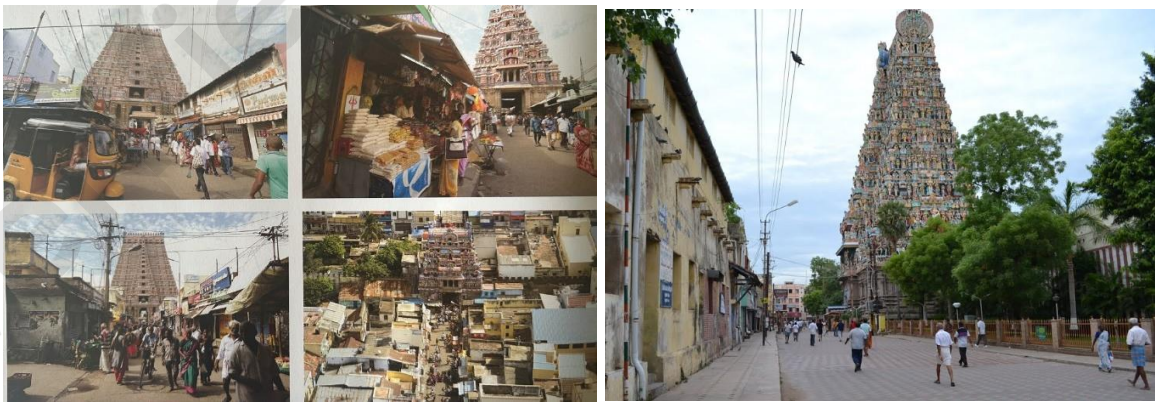

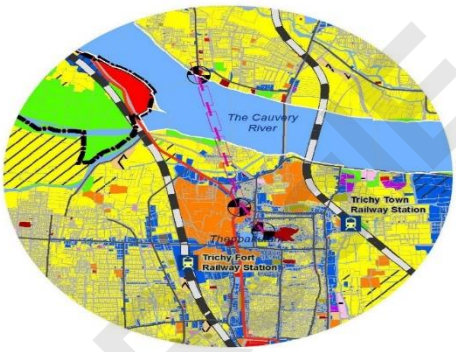

Figure 14-14- Existing condition of Prakara veethis [Left] & reference image of the suggested Transformation [Right]

Heritage sites are important to the city and should be treated with the same reverence as other cultural treasures. The greatest approach to guarantee that

historical sites in the city are maintained and preserved is through heritage policies and a specially crafted DCR. In order to maintain artifacts, structures and precincts of historic, architectural, aesthetic, cultural or environmental and heritage value, a special provision in the DCR is proposed for Special Notified Zones, addressing architectural elements, height restrictions, landuse control, grading of heritage buildings and their grain sizes etc.,

In order to further attract more tourists, the following are proposed:

- Rope Car from Rockfort temple to Amma Mandapam

Map 14-9: Proposed Rope car facility

- Tourist Infrastructure facilities at Amma Mandapam

14.2.2.2 Eco-Tourism

To promote adventure tourism aside religious tourism, the city has the potential to explore & implement various Eco- tourism places to further add value to the tourism potential of the landscape. Some of the Eco-tourism sites already in existence or under progress are the Butterfly Park, Anna Science Planetarium, Sir C.V Raman STEM Park, Jallikattu at Suriyur, Aadi Perukku at Amma Mandapam & Deer Park.

In addition, the proposals are submitted to further enhance the tourism potential,

- Establishment of Zipline from the Butterfly Park to Mekkudi railway station across Cauvery River is proposed.

Map 14-10: Proposed zip line facility

- Walking & Cycling Tracks along Uyyakondan Canal

- Geo-scaping of Defunct Quarries

Six abandoned quarries falling inside LPA region encompassing an area of 276.8 hectares have been identified [Table 14-1].

Quarry Type	Location	Extent [Hec]
Rough stone quarry **Total area: 276.8 hectares**	Valavanthankottai, Thiruverumbur	86.5
		49.5
		72
		20
	Kulathur, Srirangam	41
	Tiruchi (West), K.O Abhisekapuram	7.8

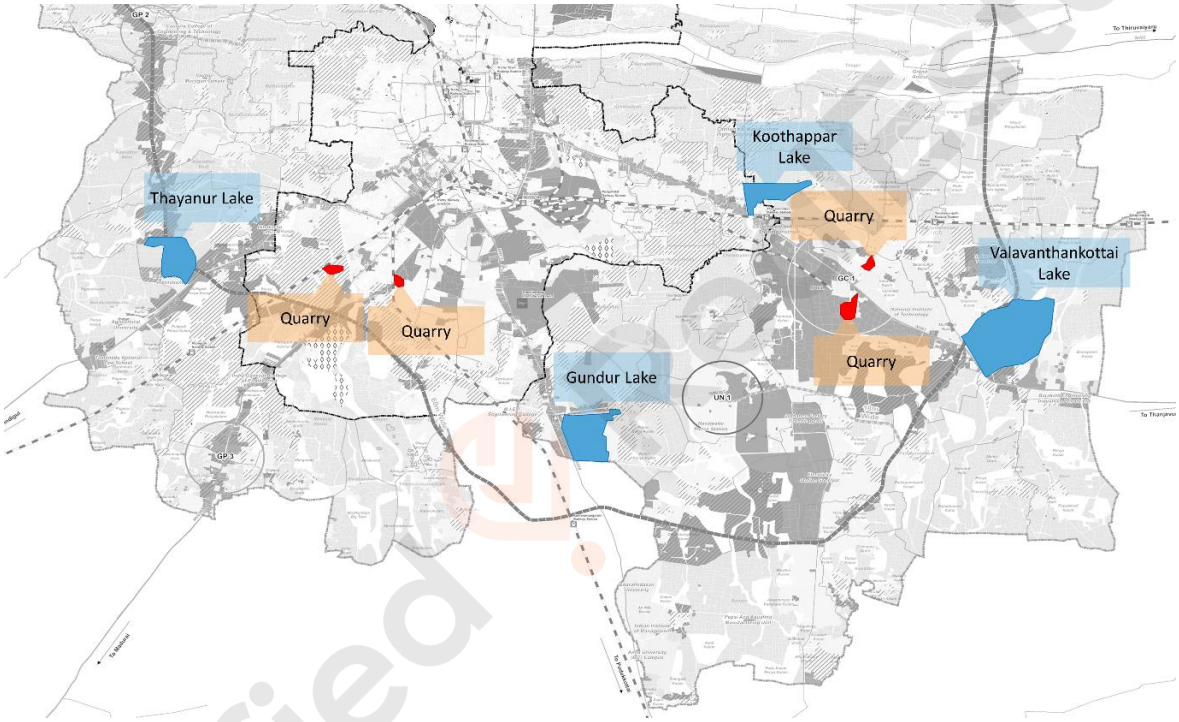

Table 14-1 Location & Extent of Quarries

Since the quarries expose the ground water table, it is viable to convert them into

Verified RealEstate™

reservoirs which will act as a man-made lake, storing run-off and recharging ground water. Other than rainwater catchments, these sites can also be redesigned as recreational spots and get-aways with public amenities that provide regional level social engagement.

Quarries away from the major roads can be considered as rainwater catchments and those which are closer to major roads are proposed to be developed as recreational stops for increased leisure and tourism activities. It would invite an adequate number of users improving the city's imageability.

Map 14-11- Location of Quarries & Major Waterbodies

Figure 14-15: Present condition of Quarry at Abishekapuram [Top] & Reference images for the proposed restoration of defunct quarry sites [Bottom]

While restoring the mined-out lands, it is proposed to create diverse forest area with plant species that facilitates the local species of birds, insects, small animals & reptiles to thrive, transforming this area in the future to be a fully functioning ecosystem. While acting as rainwater catchments and recharging ground water tables, these sites will gradually emulate a natural self-sustaining eco system that supports local bio diversity, as well as establishing experience centres that are not only recreational but also educational.

14.2.3 Economic Planning

One of the fundamental aspects of urban planning is its economic component, which examines how urban objectives work economically and how urban development has an impact on their economies which makes it a significant feature for formal delineation of sub region. Tiruchirappalli is an important

commercial center, and the major commercial establishments are located along the major roads. The study analysis shows that the concentration of non-primary activities [secondary & tertiary] in and around Tiruchirappalli and other emerging urban areas is more.

Identification of economic activities, resources and their integration with the transport network results in the hierarchy of growth districts [First, Second & Third Order].

14.2.3.1 Micro Clusters

Apart from being the Boiler capital of India & Defence Corridor Node, the presence of Central Government educational institutes and industries makes it a hub for heavy and metal industries. Also, the study area has excellent road and air connectivity. This can be explored for additional employment generation through ancillary industries and micro clusters. In this view, the following are proposed,

A. Micro-clusters for Agro based firms in Manachanallur

Manachanallur is equipped with two Primary Processing Centres [PPC], one for onion and other for banana. Onion PPC is well connected to SH62 by Edumalai road, giving it an easy access to the road transport. This location is a major Onion growing and trading cluster. It caters the trading, processing, and export community of production group around Mannachanallur. The crop grown around a radius of 30km can be processed in here.

Banana PPC is well equipped with a packhouse and additional handling area to handle about 24 MT of banana on a daily basis. This PPC is established to focus on handling bananas. Other basic amenities such as admin block, power station and sanitary blocks are also provided inside the premises. A quality control lab is provided in the facility for the assessment of the quality of produce before and after processing. This is to ensure the quality standards of the produce delivered from the processing centre.

Verified PedEstate™

With such infrastructure and connectivity, development of agro based micro clusters that encompass agri and agri-oriented firms which can be developed under Pradhan Mantri Formalization of Microfood Processing Enterprises (PMFME) scheme will significantly improve the economy generation.

B. Establishment of Trade Centre – Panjappur

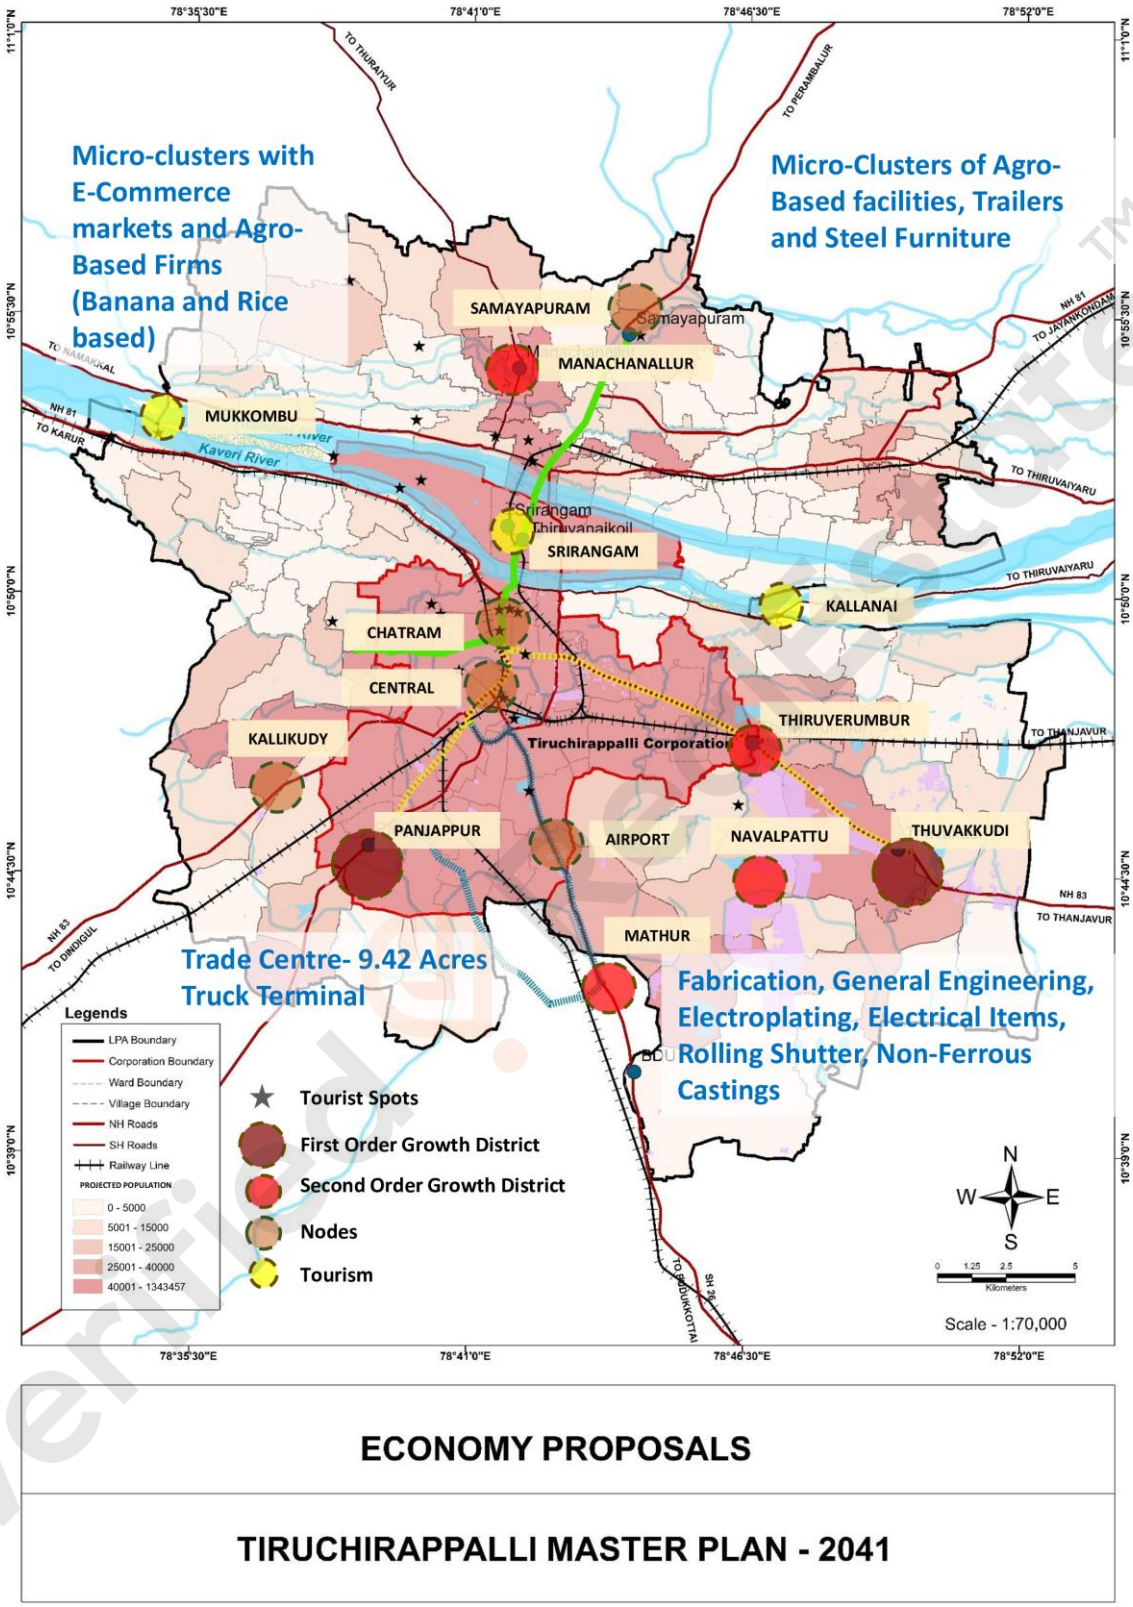

Establishment of Trade centres will serve as a catalyst for Micro, Small & Medium Enterprises [MSME]. Based on preliminary studies, TIDITSSIA [Trichy District Tiny & Small Scale Industries Association] in co-ordination with district administration have identified site for trade centre development at Panjappur [9.42 acres] which has been confirmed by SIDCO. Trade centre can be used as a platform for marketing various production and conducting conventions and fairs. This would help diversify small scale industries and provide opportunities for them to flourish in the central region.

Some of the other proposals are,

- Identification of nodes for Low Volume High Margin investments
- Medium and small units in fabricated metal products offering 50k+ jobs

Below map [14.9] depicts the proposed growth districts superimposed over the projected population map to compare and contrast the influence of population along the growth districts. The projected population in major nodes implies that growth potential is identified around the strategic locations.

Verified RealEstate ™

ECONOMY PROPOSALS

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 14-12: Proposed Micro clusters and nodal growth centres

14.2.3.2 Technological Advancements

Being an Educational hub with the presence of central and state educational institutes like National Institute of Technology (NIT), National Law University (NLU), and Indian Institute of Information Technology (IIIT) Scope for linked enterprises and employment generation. The advantage of R&D and technological innovation centres will be easy for access, with which the following proposed are submitted:

- Establishment of E-Farm Markets & Upgradation of Farmer's markets

- Analyzing strategic places for setting up terminal facilities (like near Gandhi market, Panjapur etc)

14.2.3.3 Knowledge Dissemination

In addition to the identification of growth districts and introducing IOT in the economy sector, it is imperative to preserve arts and crafts native to the region and identify strategies for income generation so the craft stays alive and adds to the heritage and economy of the region.

One such craft is East India [EI] Leather. It is an Indian vegetable-tanned leather produced exclusively by the tanneries in Trichy & Dindugal. EI leather craft has been there in the region since 1856, under the British Raj. The tannery unit based on the EI technique, after the East India Company, popularized the technique in this region to cater to the British Army.

Today, EI Leather has been approved and registered as an exclusive geographical product under the Geographical Indications of Goods (Registration and Protection Act), 1999. This gives the product an exclusive brand image indicating the special quality or characteristic/reputation unique to the geographical location. The unique process and craftsmanship of producing EI leather (East India denoting its colonial legacy) has been adopted by the small-scale tanners in Trichy areas in Tamil Nadu for over a century. Many units have been functioning here since 1850

has dominated Indian leather exports till 1970 before the advent of chrome-processed finished leather. Due to this, number of EI leather operational units has now come down to eight from around 25 units.

Expert tanners confirm that there is good scope for manufacturing niche products from EI leather and export of these products are highly viable as there is a good demand for EI leather in foreign countries, especially Europe [possibly in Mathur cluster as most of the tannery units in Trichy are located here]

Trichy being an educational hub, it is highly feasible to create knowledge dissemination centres for to revive native and age-old crafts from expert craftsmen and passing down to the next generation. Additionally, special sanctions from government can aid in setting up tanneries in the identified growth nodes for the production and export of EI Leather.

14.2.4 Mobility Plan

14.2.4.1 Road Network Plan

Tiruchirappalli has a radial network with roads emerging from this city center and connecting various places in the city. The core city is the center for commercial and market activities for the district and the region, resulting in very high travel demand in the city. Due to the floating population, certain extent of congestion on the road to absence straight roads / by pattern to carry the traffic that are more between points beyond Tiruchirappalli, there is a need to strengthen regional connectivity through improved transportation strategies. In order to keep the interdependence between Trichy LPA and its hinterlands intact, improved transportation modes with better frequency as well as intermodal transit are required. Also, the connecting the growth Urban area in the LPA need to be improved. In this regard, to improve the Road Network the following are proposed:

A. Improvement of Ring Roads

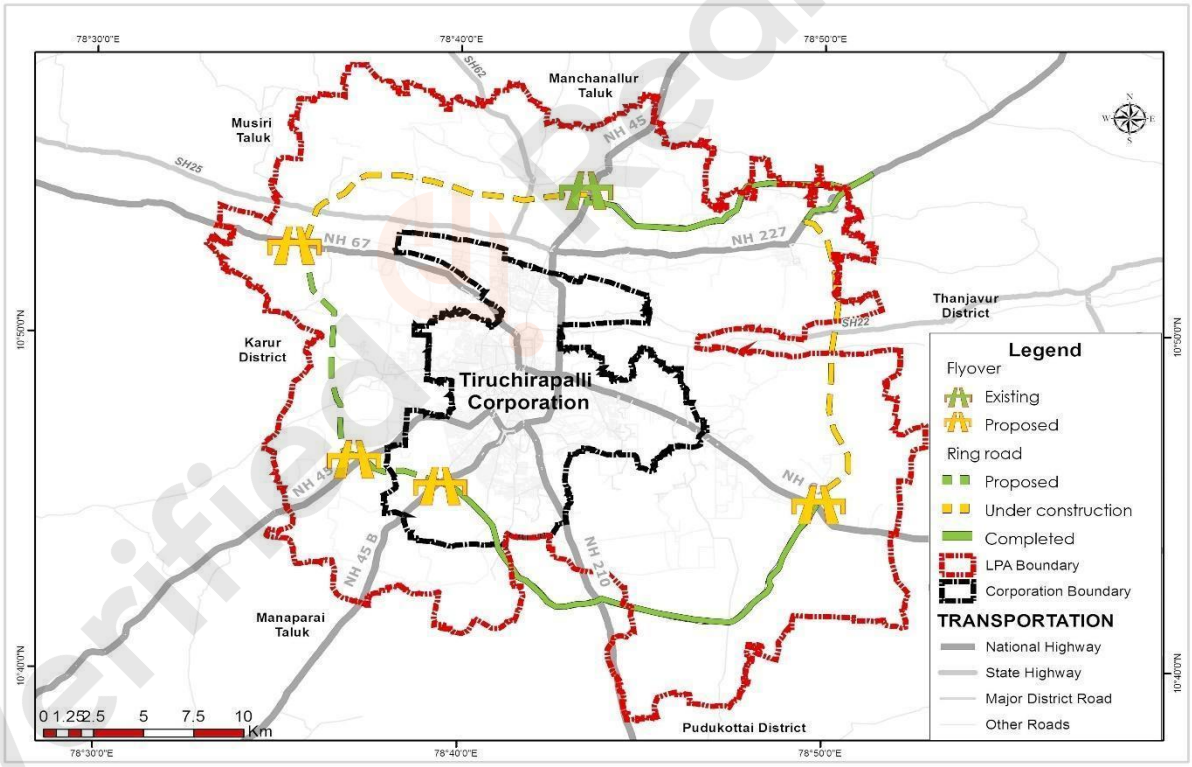

The outer ring road is proposed is on southern side based on NHAI project. The total length of the road is 43.51km and passes through Tanjore road, Pudukkottai Road,

Verified © RealEstate™

and Dindigal road and it ends in Karur road. The ring road is further proposed to connect Thuraiyur Road, Chennai Road, Ariyalur Road and back to Tanjore Road and length of the road is 36.27km. Presently, ring road is 50% completed with Chennai NH45 to Ariyalur NH227 and Tanjore NH67 to Madurai NH45B. Ring Road is under construction from Madurai NH45B to Karur NH67. The remaining portion of the road is proposed for development.

B. Additional Flyovers & River Bridges at strategic locations

Tiruchirappalli gets traffic through these main National Highways from all direction. Creation of a ring road might hinder this movement and signalized junction might cost valuable time. Therefore, the places of intersections are proposed with flyovers. The locations of the flyovers are given in the map below.

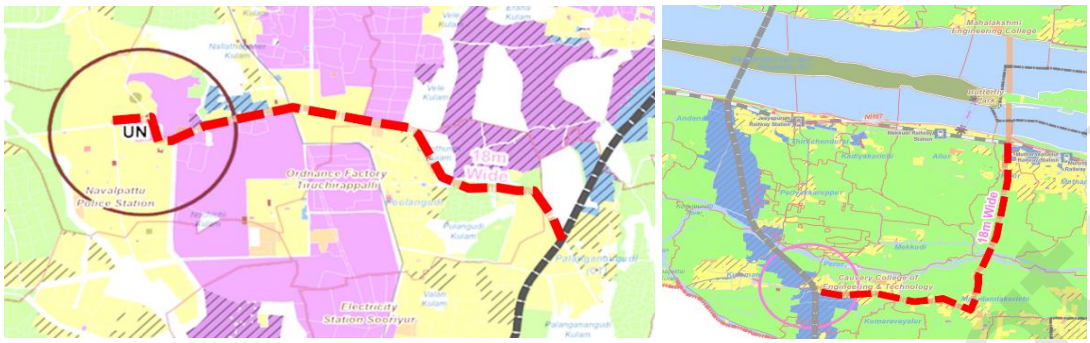

Map 14-13 Map showing the Proposed Ring Road links & flyovers

C. Improving the SEZ link Roads

Navalpattu SEZ has a 18m road connecting Pudukkottai Road NH210 through Gundur village ending abruptly. Therefore, a link road of 18m from the proposed ring road to this road would create a continuous flow. Another link road from NH67

at Palur village that connects the proposed outer ring road at Perur village is proposed.

Map 14-14- Map depicting proposed Navalpattu SEZ link road [Left] & Palur to Perur Link road [Right]

Road Network	Node	Length [Kms]
Ring Road (incomplete stretch on the eastern side)	Kallikudy-Thayanur-Adavathur-Jeeyapuram- Melapathu-Madakudi- Sirumayamkudi-Thuvakudi	33
Missing Links	Trichy IT Park Road and Trichy By Pass	6.7
Missing Links	Butterfly Park Road	6.7
Fly over	Chatram Bus Stand	2 nos
River Bridge	Amma Mandapam to Karur main Road	1 nos

Table 14-2 Proposed Links & Road Networks

Verified © RealEstate™

A total of 46 km of the additional road network is proposed for the city which includes, the ring road and link road proposed. Attributing to the industrial character and the heavy flow of freight traffic in the city, the outer ring road is proposed which will further enhance the connectivity of the study area in the coming decades and would ensure a smooth flow of passing through freight traffic.

D. Widening of Roads

E. **Road Network**	**Existing ROW [m]**	**Length**	**Proposed ROW [m]**
Salai Road (from Kohinoor Signal to Puthur Agraharam Road)	12	2.46	18
Big Bazaar Street (from NSB Road till Trichy Market Arch)	10	1.13	15
Palakarai Street (From Trichy Market Arch to Sivaji Ganeshan Junction)	12	0.60	18
Widening of Koothapar to Pathalapatti village road	7	6.27	18
Widening of Ponmalaipatty road	7	2.28	18
Widening of Thiruverumbur to Sooriyur road	7	4.15	18

Table 14-3 Proposed Road Widening

Verified RedEstate™

A total of 17 km roads has been proposed for widening/upgrading. The list of roads and the proposed ROW is provided below,

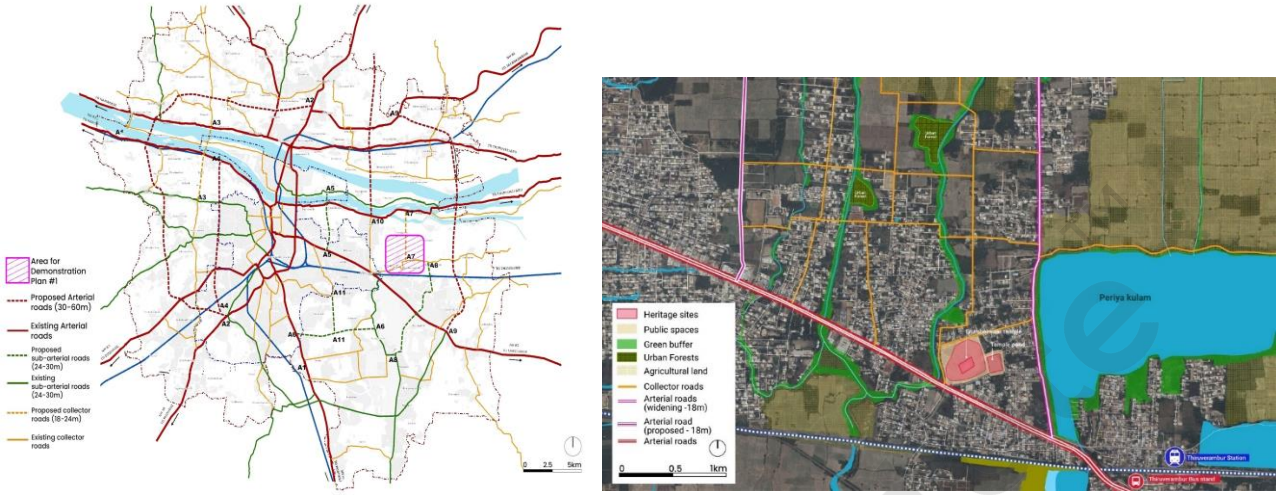

B. Grid of Roads

The site selected for the demonstration plan is between Thiruverumbur & Vengur. The slope and lay of the land are identified to be in line with existing water bodies and the direction of natural water flow. Major roads are oriented along the natural flow of water which also assists in developing efficient stormwater and drainage infrastructure. The existing Vengur Road is widened to have at least 18m Right of Way and a new parallel road of 18m wide on the West is proposed along the natural slope of land. These two parallel arterial roads are connected by a grid of collector roads spanning 250- 450 meters to encourage

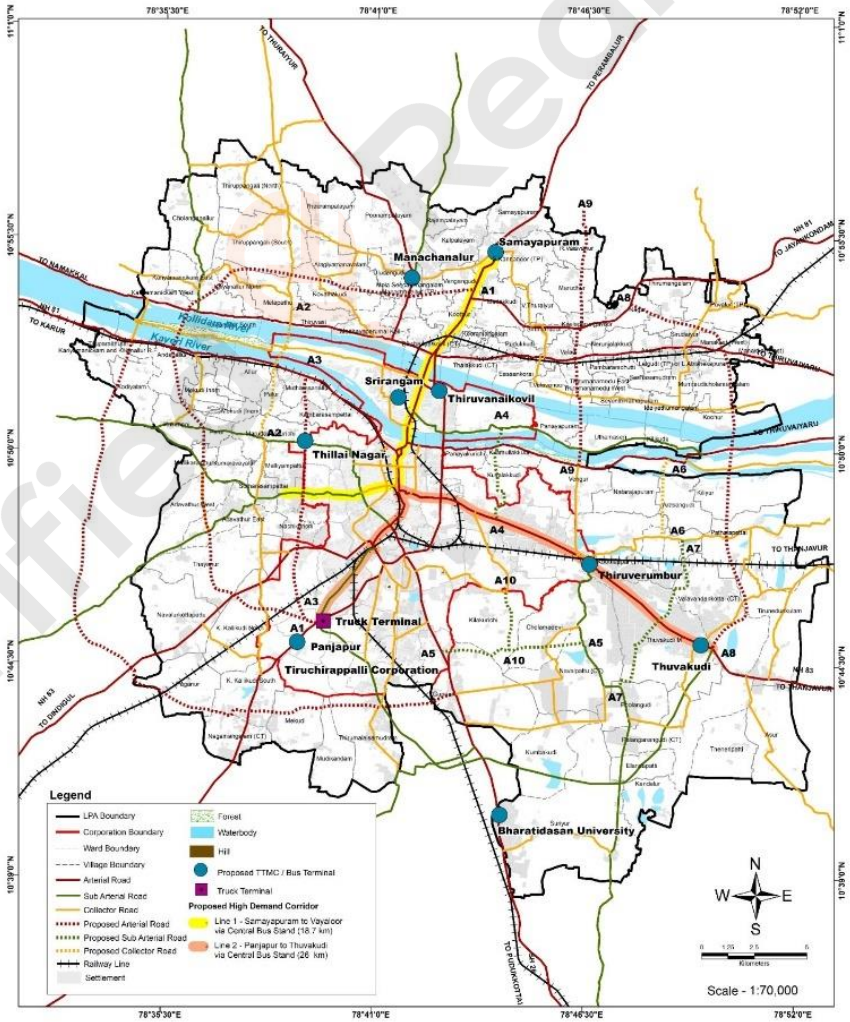

walkability. It is planned to retain the road hierarchies subject to contextual conditions for effective connectivity. Any new developments to be in line with the grid of roads thus maintaining it as a connected system. A well-connected grid of roads along with features such as continuous green buffer of 3m on either banks of the canals, 15m wide urban forest corridors around the Periyakulam lake and public space around the Thiru Erumbeeshwarar heritage site, add to walkable and well-connected neighborhood, which has a potential to support appreciable quality of life.

This proposal conceived by CARE, SoA is to be manifestedto be manifested at neighborhood level across the city by taking the respective local context into consideration without disrupting the natural ecology, especially the water bodies and the adjacent green corridors. Proposed roads should respect the natural slope of the land and aid in the efficient storm water drainage and thereby minimizing foreseeable damages in case of floods. Apart from the arterial roads, the sub-arterial, collector and sub-collector roads to be developed so as to create urban blocks of 250m-450m grid which will encourage walkability.

Table 114-4-4: Grid of Roads - Proposed Hierarchy

To alleviate all the existing and possible future transport problems and to facilitate safe and efficient movement of people, a Comprehensive Mobility Plan [CMP] that provides a long-term vision and mobility solutions for the citizens

of Tiruchirappalli was prepared. The study develops a perspective plan for sustainable urban transport over a 20-year horizon period.

The Vision of Comprehensive Mobility plan is "To ensure that mobility solutions for Tiruchirappalli are integrated to be people centric and are in conformity with sustainable mobility, targeted for the horizon year 2042".

CMP has envisaged a multi-pronged approach with various mobility and policy strategies to achieve the vision as below,

Figure 14-16 - Mobility proposals under CMP 2041

14.2.4.2 Public Transport Strategies

A. Panchappur Bus Stand

The city has 2 major bus termini, Chathiram Bus stand near the historical core and Central Bus Stand near the center of the Corporation. An Integrated Bus terminus is under construction at Panchappur along the Trichy Madurai Highway NH38, with an aim to decongest the City Centre. For easy access and better traffic flow, a new bus stand is being built in Panchappur. This will stop traffic flow towards the center of the city and clear congestion. Due to the presence of

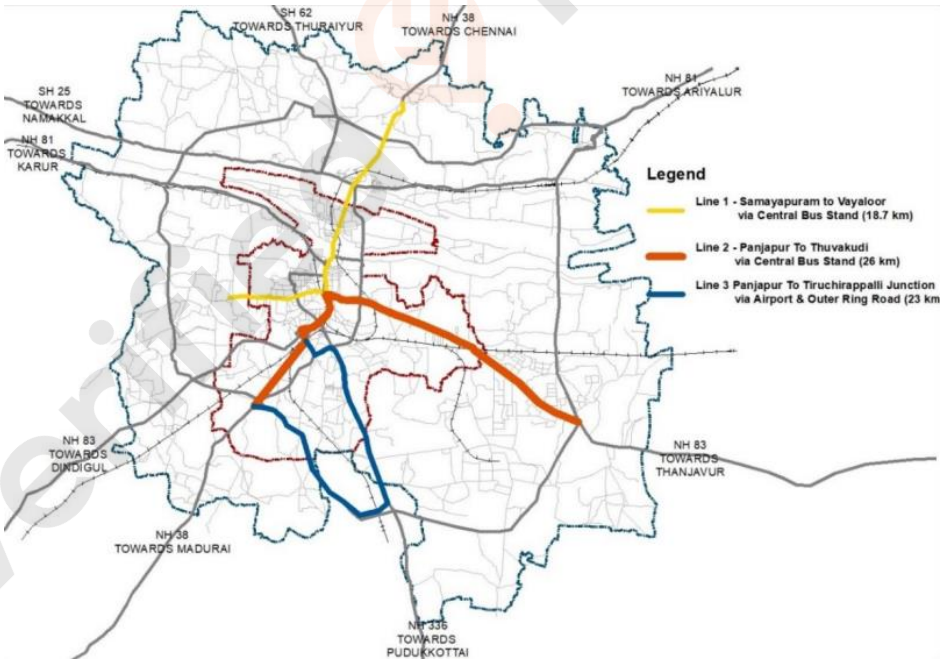

several educational institutes in and around Panchappur, this bus stand would serve the student population. The presence of proposed stadium adjacent to it will help create a node that gets busy during special events.

Figure 14-17: Location and Reference images for the Proposed bus shelter at Panchappur

B. Proposed High Demand Corridors

It is envisaged that buses shall continue to be one of the major modes of public transport in Tiruchirappalli, and keeping in mind the increase in population and future growth of the city, 'High Demand Public Transit' corridors have been identified for the study area along the North-South and East-West corridors of the city, covering a span of 68 km.

Map 14-17 Map showing proposed high demand mass transit corridors

14.2.4.3 Traffic Planning & Parking Management

Strengthening the transportation will allow for population concentration to support TOD. The basic need for a strong transportation system to support the economic development is the traffic planning of the location. In order to strengthen over the existing signalling & to accommodate free flow of future traffic growth the following aspects are proposed:

- Junction & Corridor Improvements
- Smart signals & Signages
- Improved Road Pavement Markings for all roads
- Providing smart parking facilities (like multi-storey parkings), parking tolls/tag.

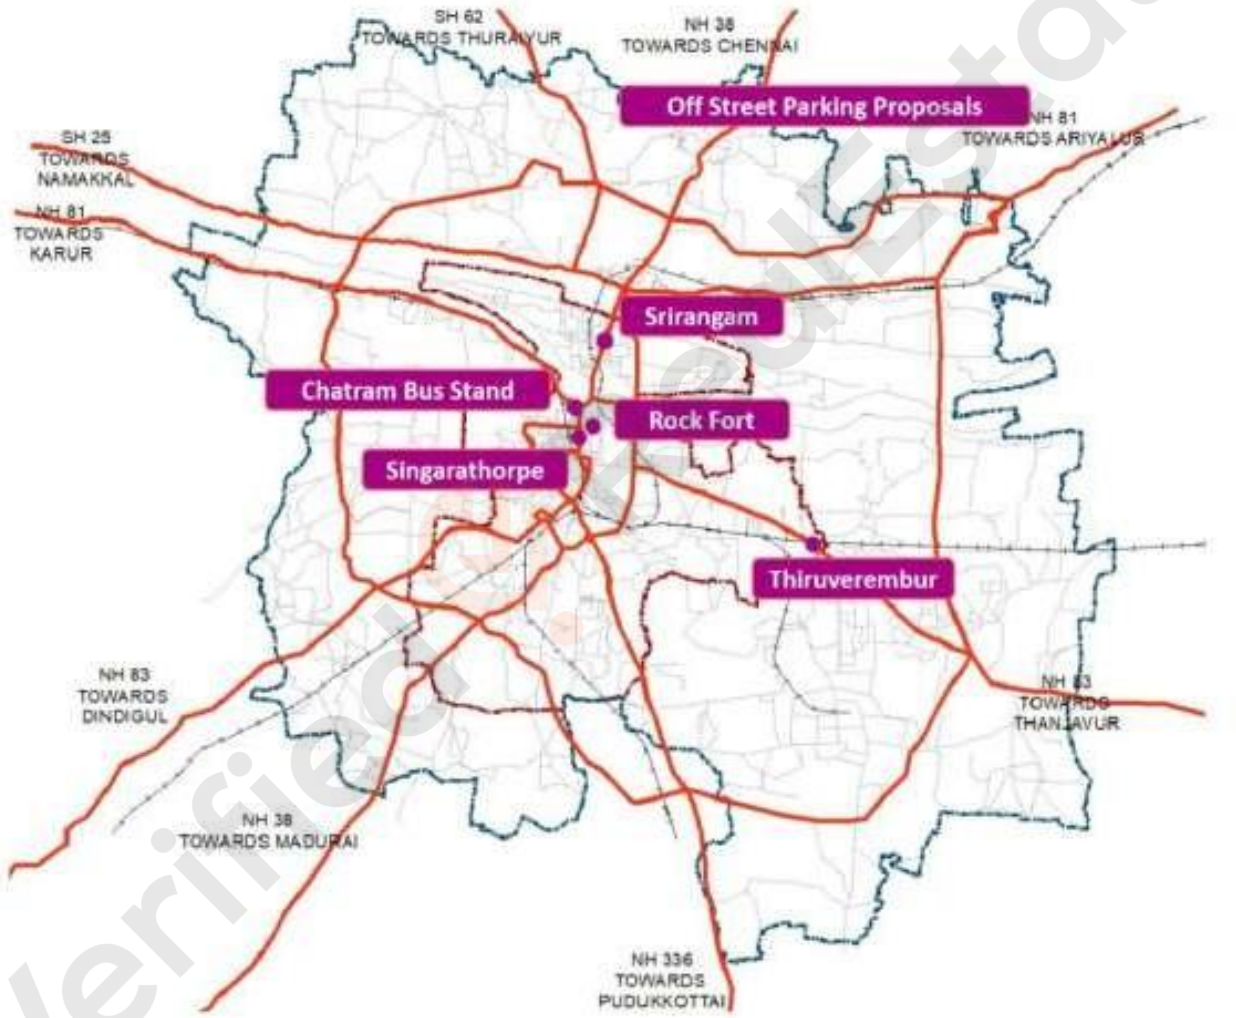

A. On-street & Off-street Parking Proposals

- To ensure that all on-street parking areas and parking lots in off-streets are clearly marked and easily identified, the following standards should be followed-
- On-street parking spaces shall be designed as per IRC: SP: 12:2015.
- Boundaries of all on-street parking spaces will be marked by white line as indicated in IRC: 35- 1997.
- Signage marking parking and no-parking areas shall be marked as per IRC: 67-2012.
- Certain following guidelines need to be observed while defining no-parking areas:
- Prohibition of parking for at least 50 m from all junctions.
- Prohibition of parking at least 10 m from all zebra crossings.
- No private vehicle parking beneath multi-modal transit stations.
- Street parking, if necessary, should only be provided at a distance of 50 m from the metro station.
- For enforcing parking near schools, hospitals, educational institutes, and

Verified PadEstate

other facilities, authorities can facilitate and encourage them to involve volunteers, traffic wardens, or others to manage to park.

As a Part of the Comprehensive Mobility Plan 2041, 5 multi-level car parking (MLCPs) have been proposed in Srirangam, Chatram Bus Stand, Rockfort area, Thiruverumbur and Singarathoppu. Rock Fort Off Street parking will be implemented in Phase 1, and rest four will be implemented in Phase 2 and 3.

Map 14-18 - Proposed Off Street Parking Locations

14.2.4.4 Non-Motorized Transport

Some areas like the Sri Ranganatha Swamy Temple and its heritage precincts

have accumulated traffic and congestion. A solution for it is to make few parts of the road pedestrian friendly and make it non-motorized road for free flow of people. The traffic can be diverted to the roads branching out from this main road towards east and west. Converting the thoroughfare with:

- Wide sidewalk - NMT - Footpath Proposal
- Neighborhood Streets
- Extra Wide Sidewalks
- Limited Vehicular Access with Pedestrian Crossing Infrastructure
- Pedestrian Only Zone
- Bicycle Tracks

Verified RealEstate™

Figure 14-18: Reference image for the Proposed NMT Infrastructure

14.2.4.5 Freight Management

Freight management is the process of efficiently and strategically moving freight across a network from its point of origin to its desired destination using various modes of transportation, intermediaries, and technologies. This will enable the economic growth of the region. The growth of freight movements has seen to be increasing at Tiruchchirappalli through Rail, Air & Roads. It has been observed that, due to the presence of high amounts of freight transport along the NHs, a requirement for truck terminal is required that prevents heavy trucks entering the city.

Additional freight terminals and freight consolidation centres will alleviate all the existing and possible future transport problems and will facilitate safe and efficient movement.

Figure 14-19: Reference image for the Proposed Freight terminals

Verified RedEstate™

14.2.4.6 Transit Oriented Development [TOD]

TOD is an approach to Urban Development designed to bring people, services, and activities together with quality public transport supported by walking and cycling conditions to facilitate shorter trips, better lifestyles, and more efficient use of city resources.

TOD promotes compact city growth by integrating land development and transport network combating urban sprawls and pollution through reduced use of private vehicles. It also helps in creating vibrant built environments with safe walking and NMT facilities, besides ensuring integration among various modes. Accessibility and connectivity will get a boost since resilient neighborhoods will provide the needs of daily living, within walking distance [0.5 to 1 km radius] The major components of the TOD approach are as below,

- **NMT Network & Complete Street Design:** Walking and cycling are the two major forms of NMT which are the fundamental features of TOD resulting from a human centric approach of street design activating neighbourhoods.
- **Mixed Landuse & Optimised Densities:** Concentrated and diverse activities enable flexible journeys and detours that not only reduces the dependence on vehicular transport but additionally increases the value of spaces proximal to the transport network so they are used and more spaces can be allocated for community engagement and other activities. This integrates transit and activities in a space efficient way.
- **Interconnected Street Network & Housing Diversities:** This allows the mix of people from all income classes so as the neighbourhood is developed more inclusive. A densely connected locality promotes walking and cycling in addition to being self-sufficient.
- **Multi-Modal Integration – First & Last Mile connectivity:** Success of TOD zones, depends on how well these neighbourhoods are connected with other modes. This helps to increase transit riderships by serving the missing connections.

Verified RealEstate ™

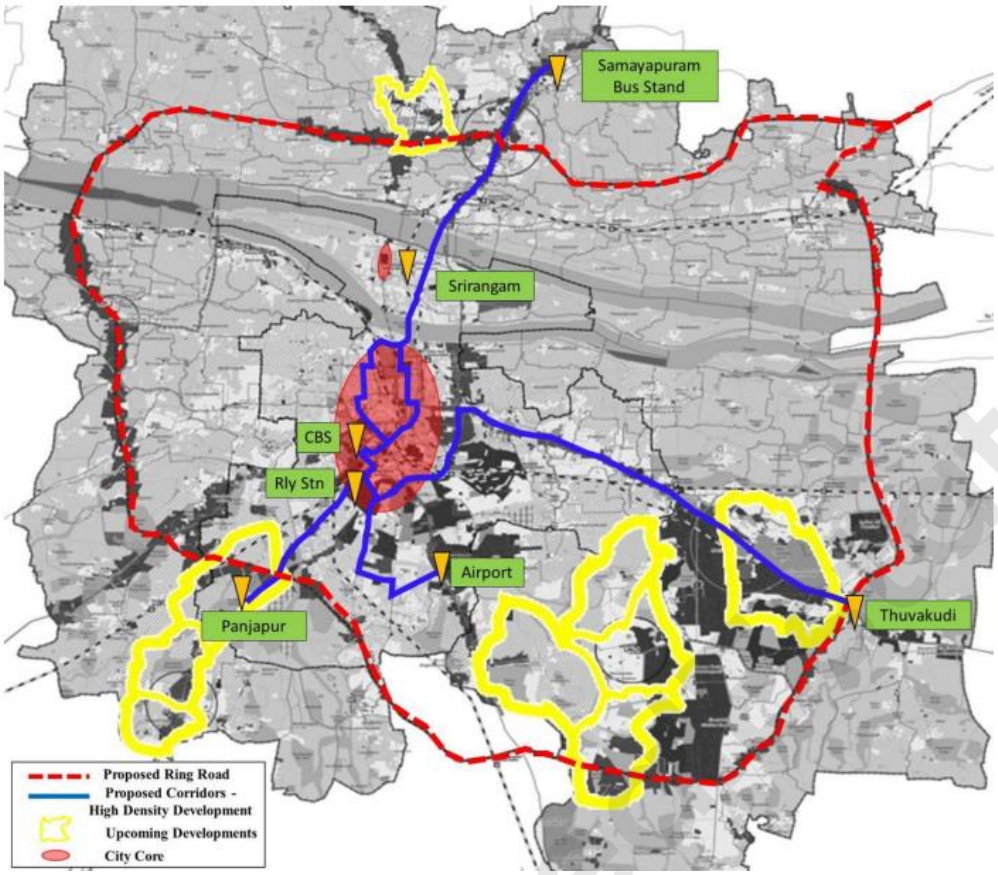

- **Traffic Calming & Managed Parking:** TOD aims at reducing the impact of private vehicular traffic and reclaim the spaces for human interaction and reduce pollution. To enable this, existing road infrastructure needs to be prioritized accordingly and introduce additional parking spaces in proximity to the TOD zone.

In the LPA, future developments are expected towards the North, South and Eastern regions of the study area. While planning new neighborhoods in these areas, it provides the opportunity for bringing all aspects of TOD in a holistic manner. New neighborhoods can be planned with mixed uses, walking, and public transport to maximize development potential and ensure short and convenient trips and healthier environments.

As per CMP 2041, the proposed TOD zones that will aid in the improvement of accessibility of the region are as follows:

- Along Madurai Main Road from Panjapur Proposed Bus Terminal Sivaji Ganeshan Statue Junction.
- Along Quaide Millet Road, West Boulevard Road, College Road, Nandhi Koil Street and Trichy Chennai Trunk Road.
- Vellore - Thoothukudi Highway on to Grand Southern Trunk Road towards Thanjavur Road to Thuvakudi.
- From Simco Road to Trichy Airport via Rajaram Road and Wireless Road

Verified RedEstate™

Map 14-19- Proposed corridors for high density development

Maximum permitted FSI in urban bodies of Tamil Nadu is 2 [without considering premium FSI]. For the purpose of encouraging Transit Oriented Development, CMP recommends an increase in FSI up to 3 in all the influence areas of the high mass transit corridors. Additionally, to facilitate the implementation of the TOD strategy, CMP proposes a TOD Policy be undertaken along with a detailed TOD study for Tiruchirappalli Local Planning Area.

14.2.4.7 Air Transport

Trichy City is located almost at the geographical center of Tamil Nadu. Its strategic location with respect to its neighboring Cities and suburban towns of the State, testifies its potential to become a significant economic center with inter and intra-regional dependance. Trichy International Airport located on the NH210- Trichy Pudukkottai Highway, connects Trichy domestically with Chennai, Bangalore, Hyderabad & internationally with Colombo, Malaysia, Singapore and the Gulf countries. Air cargo from Trichy mainly consists of petroleum and flower.

Due to its strategic location, there is a huge necessity for expanding air cargo to 6000 MT [as per vision TN $1 Trillion] and to support the forecasted expansion, passenger capacity augmentation is also proposed.

14.2.5 Physical Infrastructure

Physical infrastructure refers to the basic physical structures required for an economy to function and survive, such as transportation networks, a power grid and sewerage and waste disposal systems.A city's provision of these basic necessities will reflect how well the city is developed and effort made to achieve this level of Level of Service (LOS).

14.2.5.1 Water Supply

The availability of natural water sourced through Considering the continual improvement in the standard of living and population growth (projected at 27,80,491 by 2041), the water demand is envisaged to increase to 264 MLD, which can not be met with the existing Water supply and its storage capacity. It may also be noted that, the gap is high in corporation area compared to rest of the LPA. In order to address the rising demand in water supply & storage the following proposals are submitted:

- Over Head Tanks (OHTs) shall be provided in required locations to meet the gap in demand
- Water source augmentation possibilities such as rain water harvests, improvement of catchments, recharge pits/zones etc shall be identified & implemented at strategic locations.
- Sustainable use of water & distribution shall be implemented.

14.2.5.2 Sewerage

The objective of a public wastewater collection and disposal system is to ensure that sewage or excreta and sullage discharged from communities is properly collected, transported, treated to the required degree and finally disposed off

Verified by RealEstate™

without causing any health or environmental problems. The projected Capacity for Sewage treatment by 2041 should be 206 MLD whereas the existing capacity is 102 MLD. In order to meet the demand for treatment facilities the following STPs are proposed:

- FSTP in Lalgudi Municipality
- STP in Panjapur near koraiyar river bank.

At present the UGSS covers only Corporation & 2 Town Panchayats, however, it is proposed to cover the Municipalities & other Town Panchayats along with additional STPs as per requirements. Further, DEWATS system is proposed in Town Panchayats & villages where low population is observed. Implementation of systems for re-cycle & re-use of wastewater is also proposed to reduce the stress on the demand for fresh water.

14.2.5.3 Storm Water Management

The purpose of providing storm water drains is to carry the rainfall (storm) runoff from the terraces, paved courtyards, footpaths, roads etc. in the developed area so that flooding does not occur. There is need for an integrated drainage plan for Tiruchirappalli Local Planning Area. The estimation of runoff reaching the storm water drains is dependent on the intensity and duration of rainfall, characteristics of the drainage area and time required for such flow to reach the storm water drains. At present the storm water drains cover only the corporation area whereas only 4.6% of the rest of LPA is covered. To ensure proper functioning of storm water drains to avoid frequent flooding, it is proposed to

- Provide 100% storm water drain coverage in corporation
- Utilize the natural drains to meet the storm water drainage wherever possible
- Cleaning & maintaining the natural drains to channelize the water flow.
- Extend Full coverage of storm water drains in ULBs and villages

14.2.5.4 Solid Waste Management

Tiruchirappalli city has been divided into 4 zones having total number of 65 wards with approximately 750 nos. of wheelbarrows, 85 numbers of tractor-trailers and tippers available with the Municipal Corporation.

Solid waste management forms an obligatory function of Urban Local Bodies (ULBs) and hence, it calls for proper disposal of waste with appropriate strategy. At present there is no scientific waste collection, disposal/treatment being adopted which is leading to foil smell, unhygienic conditions and mosquito breeding. There is one existing land fill site is located in Ariyamangalam village covering an area of 40 Acres (12 Lakh metric tonnes), where no scientific process is being adopted.

Solid waste management forms an obligatory function of Urban Local Bodies (ULBs) and hence, it calls for proper disposal of waste with appropriate strategy. In order to scientifically address the issue, the following are proposed:

- Removal of Ariyamangalam Dump Yard

Figure 14-20: Existing situation of Ariyamangalam Dump Yard

- Additional MCC/ Biomethane/ Incineration centre to meet the gap due to removal of landfill site.
- New Bio-Gas plant at Manachanallur TP MCC with 5.5 Metric ton capacity - Lalgudi Municipality
- Biomethanation centre 100 TPD capacity - within corporation area

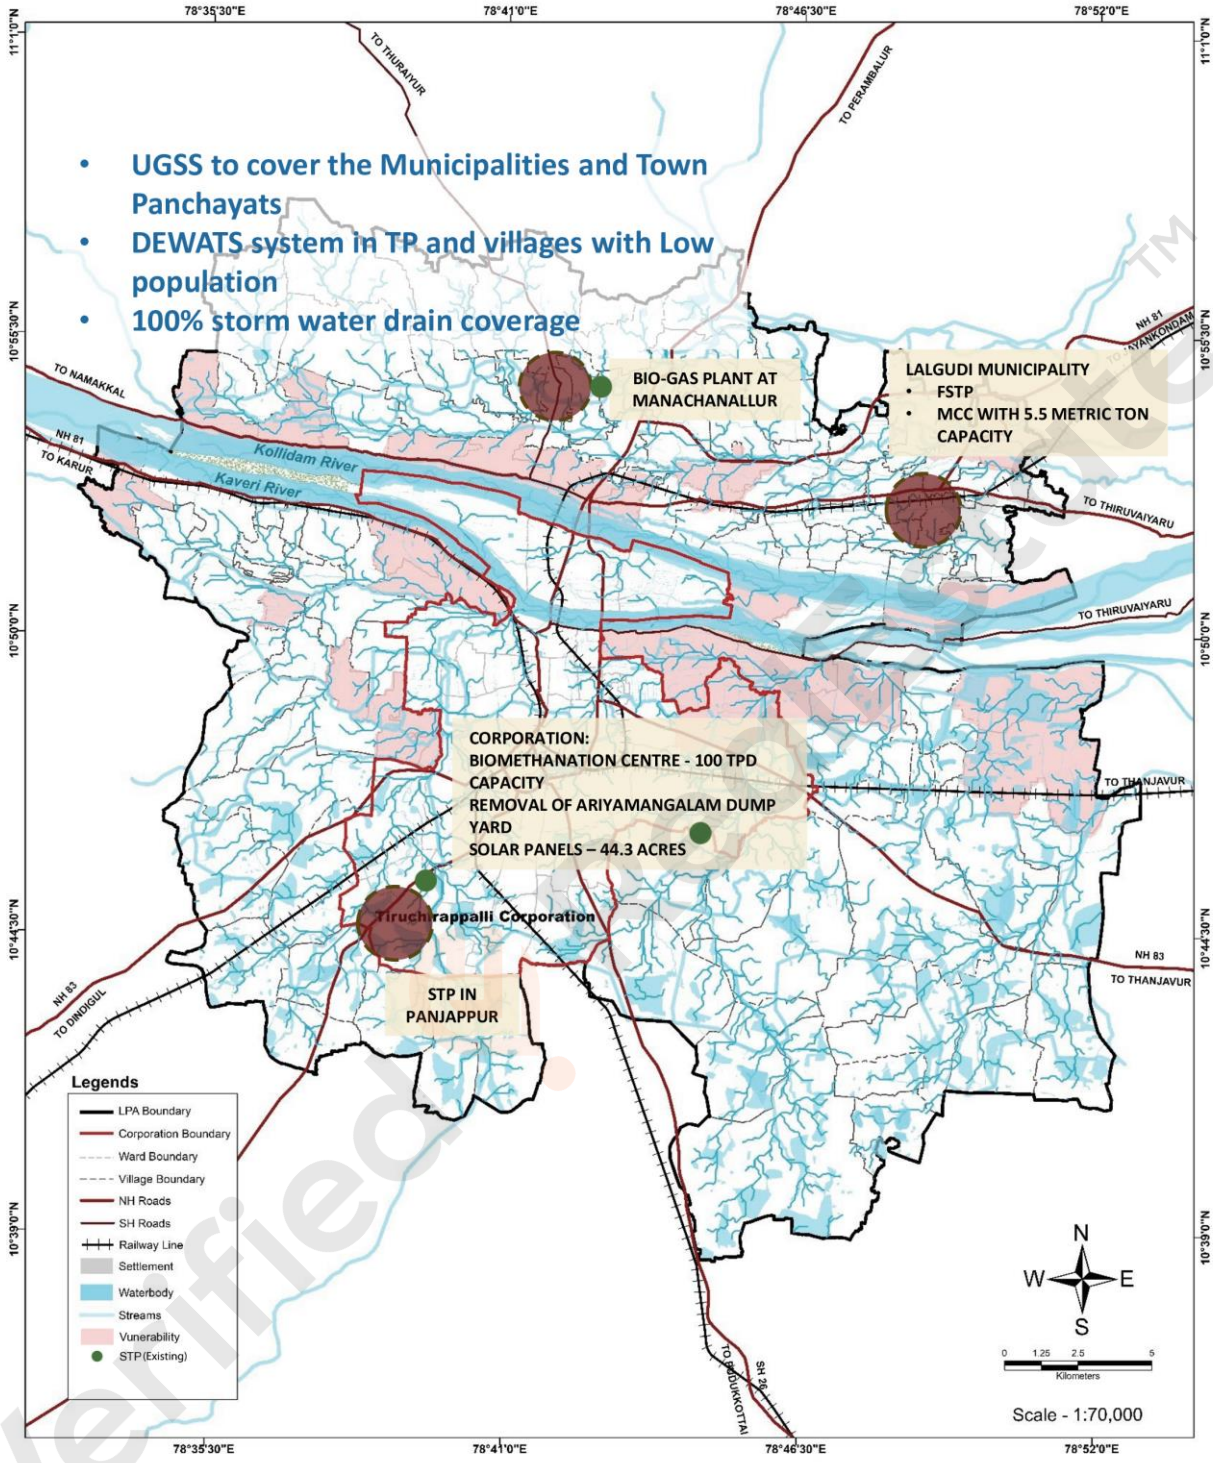

Verified RedEstate™

14.2.5.5 Electricity

The increase in population will create a up-surge in Electricity demand. With the current trends sustainable approach to meet the future needs is envisaged and the following are proposed:

- Installation of sub stations to meet the future demand
- 100% supply of electricity with adequate substations and transmission lines.
- Use of renewable energy resources.

Verified RealEstate™

PHYSICAL INFRASTRUCTURE PROPOSALS

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 14-20 Physical Infrastructure proposal

14.2.6 Social Infrastructure

Social infrastructure are essential resources, and services that ensure people can participate in productive social and economic activities. This deals with the health, education, recreation, sports, safe and security, socio-cultural facilities and distribution services.

14.2.6.1 Health

Trichy corporation has been provided with various health care facilities such as Primary Health Centres, Private & Government Hospitals, Maternity & child health care centres, speciality hospitals, veterinary hospitals etc. However, with the expanding demography, the existing Health Care Infrastructure will be deficit with the growing population. It is also observed that the Primary Health Care

units are in deficit along the region. (Private hospitals subside only the current deficit). Hence, the following proposals are submitted to improve over the existing Health Care systems:

- Primary Medical Centre Health Sub center needs to be provided in Thuvakudi.
- Even though the private health care eases the primary health care centers, the 24x7 dedicated accident centre hospitals along NH45 Highway are needed.
- The Government Hospitals & Sub district Hospital deficit must be addressed along rest of LPA.
- Temporary Accommodation facilities to cater to the increasing inflow of medical visitors from neighbouring districts for treatment periods
- Upgradation of Siddha Hospital in Somarasanpettai

14.2.6.2 Education

Facilities and Infrastructure providing Educational Services to the population like

schools and Colleges are provided to improve social integration and bring social equality in the communities. The infrastructure is provided based on the URDPFI guidelines with the estimated population demand in the LPA. It is noted that the Primary schools deficit are subsided by Higher Secondary Schools. The proposals of various category of educational facility are discussed below within the Tiruchirappalli Local Planning Authority.Corporation Primary Schools are required along the corporation zone and rest of LPA for the marginal population. As per the geometric projection, an additional 122 for urban primary schools & 16 for urban Secondary schools have to be provided within the year 2041.

- The Anganwadis & Special schools - Corporation zone and rest of LPA
- Agricultural Research /Training Institutes are needed along the zones.
- More women-based education training through Learning centres or skill programs colleges
- More research-based colleges are required.
- The future demands for the community clubs / career interest clubs (Eg: Youth Clubs, Knowledge Centre, Libraries & Community Halls etc)
- Sports Campus in Panjapur

Verified RedEstate™

Figure 14-22: Reference Image of sports complex - Proposal at Panjapur

14.2.6.3 Open Spaces & Recreation

Recreational facilities in LPA region are numerous yet small neighborhood level parks. The prominent recreational activities are Butterfly Park, Ibrahim Park, Science Park, Anna planetarium and Anna sports stadium. Therefore, the major proposal for recreational activities is the stadium proposed in the Panchappur region and the theme park provided on the east of Sri Rangam. In addition the Parks in central city business districts and all the notified parks can utilized for recreation.

The following are proposed to improve the recreational centres in the area and to use tourism potential in Tiruchirappalli and facilitate the growth:

- Children's park in South Thiruverumbur – Kattur Kaveri nagar
- Open Air Theatre [OAT] in Kottapattu Kamanmedu

Verified © RealEstate ™

Figure 14-23: Reference image of OAT - Proposed in Kottapattu

14.2.6.4 Others

- Fire Station has to be established along the Corporation Zone - Thiruverumbur due to its deficit.
- The extension of Fire Station must also be there along the entire regions to meet the growing population.
- Police station along Panjapur is required to meet the growing demands.
- Police station along Uyyakondan is needed for the growing population along the Corporation.
- Identification of potential developments in co-ordination with municipal corporation based on feasibility studies in the cleaned out Ariyamangalam dumpyard.

14.2.7 Housing

14.2.7.1 Slums

The PMAY – U Mission addresses urban housing shortage among the EWS/LIG and MIG categories including the slum dwellers by ensuring a pucca house to all eligible urban households. The following table consists of the current projects and its status falling in the LPA boundary.

(Source : PMAY – U)

14.2.7.2 New Proposal

Apart from the projects mentioned in the table the Tamil Nadu slum clearance board (TNSCB) has identified two potential locations to construct housing units for accommodating around 4000 families in Tiruchirappalli.

The families located near water bodies and objectionable lands are to be relocated to the two identified sites in Panjappur and Kottapattu.

14.3 Land use Plan

To regulate the growth of the local Planning in an orderly manner and also to ensure its economic viability, social stability, and sound management for the present and the foreseeable future, the Master Plan with zoning and development regulation is necessary. The idea of zoning is that the segregation of certain uses from others reduces the effect of negative externalities that some uses have on others.

The Tiruchirappalli Local Planning Authority has a total area of 804.55 Sq. Km, out of which, around 70.46% (566.92 sq.km) is non-developable area coming under agriculture use and water bodies. Only the remaining 29.53% (237.63 sq.km) is available for development. Based on the Project Proposals formulated in the previous sections, the proposed land use plan for Tiruchirappalli LPA for the horizon year 2041 is prepared. Table 14.9 shows the Proposed Land structure for Tiruchirappalli LPA. The tables 14.7 and 14.8 shows the land use breakup of the existing land use of 2021 and proposed land use of 2041 for the Tiruchirappalli Corporation and Tiruchirappalli LPA excluding the Corporation.

In the proposed land use, land falling under dry agriculture and wastelands have been considered for development and thus the total developable land for proposed land use 2041 was increased to 378.36 sq.km which is an addition of 140.73 sq.km, which is 17.5% of total land available for development. The airport complex was represented under transportation in the existing land use 2021, it has been brought under the land use category of institutional land use as per Tamil Nadu Combined Development Rules, 2019. Hence the existing land use percentage under transportation to the developable area is 14.48% which is higher than the recommended land use share of 12-14% for transportation for a Large City according to the URDPFI guidelines. Though an addition of 1.23 sq.km of land has been proposed to be brought under transportation. The airport being shown as institutional land use in the proposed land use category has hidden the actual allocation of land under transport facilities. The same goes with the Integrated bus stands under construction at Panjappur and the ones proposed at Srirangam and

Verified by PadEstate

Thiruverumbur etc. The URDPFI guidelines are compared with the proposed percentage of the land use for total developable land. The existing landuse and proposed land use gives the perspective of the respective land use changes from the above given table. Due to the increase in the developable land, all the land uses have increased. The percentages are now more evenly distributed in consideration of the URDPFI guidelines.

The overall objective of this proposed land use is to improve the economy of Trichy and to cater to the future population of the LPA with its potential identified through the analysis of ground realities and based on the vision statement drawn at the project inception stage. Proposed land use zoning for Tiruchirappalli LPA has been prepared based on the TNCDBR, 2019. In the proposed land use 2041 of Tiruchirappalli LPA, land use zones are classified as residential, commercial, institutional (Public and semi-public, service and utilities, transportation and communication), Industrial, Agricultural uses and water bodies. Roas have also been demarcated.

The proposed land use of Tiruchirappalli LPA 2041 has residential land use of 24.19% of the total land area of the LPA (804.55 sq.km). This is based on the projected requirement for the projected population of 2041 and based on the decadal trend analysis of residential layouts and residential building approvals in the LPA. Residential land use has been proposed majorly towards the West and South West as an envisaged expansion of the Corporation in this direction. Residential land use is also proposed to the North along the major transport corridors. Commercial land use has been proposed along the 5 major transport corridors and nodes of the proposed ring roads. There is a higher percentage of commercial land use proposed which is justifiable based on the fact that the major economic sector of Tiruchirappalli is the Service sector. Industrial land use has been proposed in the three projected growth centers namely Thuvakudi region, Panjappur and Manachanallur.

14.3.5 Land Use Zone Classification

The various land use classification shall be in the following zones:

14.3.5.1 Residential Zone

Residential Zone is further classified into four micro zones viz, R1, R2. The parameters applied for the sub-classification are as under:

14.3.5.2 Residential Zone - 1 (R1) (Contiguous Planning Core Area):

Residential Zone falling within the proposed contiguous Planning core area, i.e. the contiguous area in north and south of River Cauvery, and wherein the detailed planning of roads and various urban use zones are proposed.

14.3.5.3 Residential Zone - 2 (R2) (Planning Growth Nodes):

Residential Zone falling within the proposed non-contiguous Planning growth nodes, i.e. the non-contiguous area that is separated from the Planning core by Urban Agriculture zone in between, and wherein the detailed planning of roads and various urban use zones are proposed.

14.3.5.4 Commercial Zone

Commercial Zone is further classified into two micro zones viz. C1, C2. The parameters applied for the sub-classification are as under:

14.3.5.5 Commercial Zone- 1 (C1) (Contiguous Planning Core Area):

Commercial Zone falling within the proposed contiguous Planning core area, i.e. the contiguous area in North and South of River Kaveri and wherein the detailed planning of roads and various urban use zones are proposed.

14.3.5.6 Commercial Zone- 2 (C2) (Planning Growth Nodes):

Commercial Zone falling within the proposed non-contiguous Planning growth

Verified RealEstate™

nodes, i.e. the non-contiguous area that is separated from the Planning core by Urban Agriculture Zone in between, and wherein the detailed planning of roads and various urban use zones are proposed.

14.3.5.7 Industrial Zone

Areas earmarked as Industrial Use Zone in the proposed Land Use Plan only.

14.3.5.8 Institutional Zone

Areas earmarked as Institutional or Educational use or Public and Semi-public use, Public, Semi-public Amenities and Utilities Zone in the proposed Land Use Plan, and the sites specifically earmarked for any such public/semi-public use including recreational, open space recreational.

14.3.5.9 Transportation and Communication Zone

All the roads as earmarked in the proposed Land Use Plan, and the sites specifically earmarked for related facilities.

14.3.5.10 Agriculture Zone

Areas earmarked as Agriculture Zone, around the identified 'Contiguous Planning Core Area' and 'Planning Growth Nodes' in the proposed Land Use Plan. This zone includes dry agriculture and wet agriculture lands

14.3.5.11 Waterbodies Zone

Water Bodies Zone indicates all existing water bodies, i.e., Rivers, Streams, Lakes, Tanks, as indicated in the topographical sheets published by the Survey of India, the State Irrigation Department or Revenue Department or other competent authorities. The boundary of the water bodies relate to the Full Tank Level as indicated in relevant maps, covering both perennial and non-perennial parts when such distinction exists.

Verified RealEstate™

14.3.5.12 Open Spaces and Recreation

Open space and recreational areas are the breathing spaces for the environment. Making sure these areas are provided adequately will ensure various benefits. Ground water recharge, reduce carbon footprint, protect eco-system to an extent and increases the quality of life of the residents.The open spaces can include the following three categories, namely:

- Recreational space
- Organized green
- Other common open spaces (such as vacant lands/ open spaces including flood plains, forest cover etc. in plain areas.)

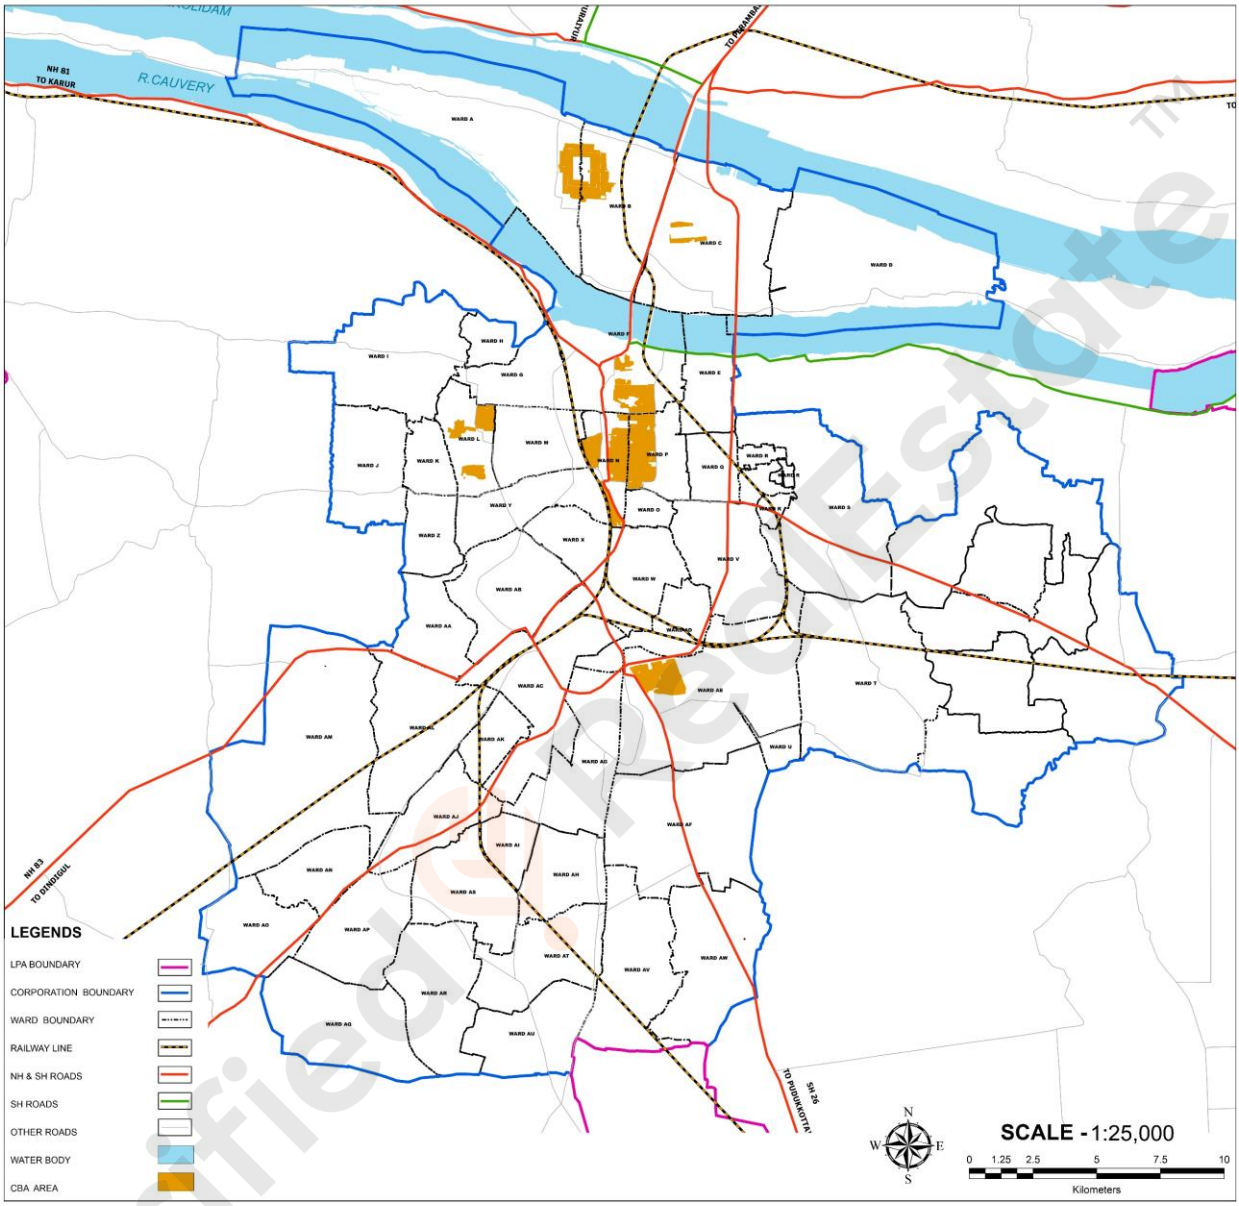

Considering open spaces, including all the above-mentioned categories, provision of 10-12 sqm per person may be desirable. In the built-up area (excluding recreational space, vacant land, flood plain, forest) the NBC suggests 3 sqm/ person as minimum norm.

14.4 Land use Recommendations

To develop Tiruchirappalli as envisioned for 2041, the proposals in the previous sections along with few further recommendations must be considered.

They are: (1) ensuring sustainability in every strategy, (2) aiming for holistic development and (3) preserving indigenous culture and local heritage. The recommendations are discussed below: It has been identified that there are industrial land uses near existing water bodies that, unless precautionary measures are considered, will disrupt the natural ecology. Reforms 7 and 8 of the Supplementary Guidelines, Ministry of Finance, DoE, GoI, Dated:19.6.2023, specifically mention the importance of preserving urban ecosystems through urban planning and hence, only green industries that support environmental development and those which are non polluting should be permitted in industrial areas near waterways.

Verified RegiEstate™

CONTINUOUS BUILDING AREA

TIRUCHIRAPPALLI MASTER PLAN - 2041

Map 14-24 Continuous Building Area

In line with the same, there is a need to sub-classify the industrial land use into special and hazardous industrial use and green-industrial use as in CMA, thus helping in preserving the existing natural ecosystem.

The vulnerability analysis of the LPA based on flooding implies that proper land use and flood management system is required to be evolved cohesively. Along the banks of the River Cauvery and River Kollidam, high to medium vulnerability regions have been discovered. It is recommended for retaining the lands as agricultural zones, public open spaces, and recreational uses in the high vulnerability areas. High sensitive locations must be taken into account when creating detailed development plans, and measures must be taken to limit damage from calamities. Maintenance of the existing water bodies and reinstating existing drainage networks and their reclamation from landfills and diligent solid waste management which would help prevent choking of waterways will help tap into the centuries old irrigation system for both flood prevention and development of agriculture in the region. Care needs to be taken to prevent bifurcation of water bodies while delineating transport networks. In unavoiidable circumstances, mechanisms need to be devised to prevent disrupting the natural drainage.

Tiruchirappalli being endowed with enormous cultural and heritage wealth, needs to take the necessary measures for the preservation of the characteristics of heritage sites. This will ensure that the tourists and pilgrims experience the City in its true beauty and sanctity instead of being overwhelmed by the crassness of unregulated and unrefined commercial architecture and graphic design in the vicinity, which cause visual pollution.

Since Trichy experiences a serious dearth of open spaces for recreation and parks, residential layouts should be encouraged to provide more open spaces for the same. Developing the existing water bodies for recreation can help maintain them as well as provide the City dwellers with much needed respite for relaxation thereby improving the quality of life in the LPA.

PHASING & IMPLEMENTATION

Verified PeriEstate™

15. PHASING & IMPLEMENTATION

15.1 Proposal Phasing

This section details out the project phasing viz., short term, medium term and long term of the proposals discussed in the previous chapters. Short terms proposals are conceived to be implemented during the first five years of the plan implementation period whereas medium term proposals are to be implemented in the next five years. Long term proposals are those projects that are to be implemented in the final phase of the horizon period that is the final ten years.

Additionally, certain proposals such as urban forestry and upgradation of natural systems in the entire LPA require the entire time period for materialization. These proposals will be under implementation throughout the horizon period so as to get maximum benefits.

15.2 Costing Components

Block costing of the proposals is carried out with the following baseline data,

A. Guide Line Values [GLV]: Land costs are extracted from Commercial Taxes and Registration Department for the locations where the identified proposals are to be implemented.

B. Construction Costs: An overall average cost of construction of a particular facility is calculated based on the ground conditions such as,

- Rejuvenation of Water Bodies – 0.217 Cr/ha
- Upgradation of Streams – 0.22 Cr/ha
- Development of Parks & Green Spaces – 7 Cr/ha
- Waterbodies as recreational spaces – 33.45 Cr/ha

Verified RealEstate™

- OHT Construction – 1.8 Cr/MLD
- STP – 1.75 Cr/MLD
- Medical facilities – 35,000/ m2
- Institutional buildings – 20,000/ m2
- Other buildings – 18,000/ m2
- Environmental centre – 25,000/ m

15.3 Proposals – Phasing & Block Costing

15.3.1 Environment

Phasing - Proposals	River/Canal Front Development	Lakes & Water Bodies	Urban Forestry & Recreational Spaces
Short Term	Redevelopment of Uyyakondan canal within city [Wards 36, 38 & 39] (Rs. 158 Cr) Odathurai Riverfront Development (Rs.14 Cr)	Rejuvenation of Kollangulam tank with boating facilities (Rs. 26.4 Cr)	Eco-forests connecting butterfly park and Mukkombu Open Air Theatre [OAT] in Kottapattu Kamanmedu Children's park in South Thiruverumbur – Kattur Kaveri nagar Urban Forestry at Sooriyur [2.2 Acre]

	Total Cost	5304

Table 15-4 Mobility Proposals - Phasing & Block costing

15.3.5 Physical Infrastructure

Phasing - Proposals	Physical Infrastructure
Short Term	Over Head Tanks – 149 MLD gap (Rs. 268.2 Cr) Removal of Ariyamangalam Dump Yard

Verified RealEstate™

	FSTP in Lalgudi STP in Panjapur near koraiyar river bank
Medium Term	Solar Panels in cleaned out Ariyamangalam Dumpyard - 44.3 Acres New Bio-Gas plant at Manachanallur TP (Rs. 0.1 Cr) MCC with 5.5 Metric ton capacity – Lalgudi Ward 45 – New Sanitary workers office
Long Term	Manachanallur Resource Recovery Park land with 10748 cu.m of legacy trash - Reclamation through Bio-Mining Biomethanation centre 100 TPD capacity - within corporation area

Table 15-5 Physical Infrastructure Proposals - Phasing & Block costing

15.3.6 Social Infrastructure

Phasing - Proposals	Social Infrastructure
Short Term	Unified school in Ukkadai & Rail Nagar Primary Medical Centre – Thuvakudi Bus Stands in Lalgudi & Thuvakudi Children's park in South Thiruverumbur – Kattur Kaveri nagar Open Air Theatre [OAT] in Kottapattu Kamanmedu Weekly Markets in Thuvakudi Upgradation of Mahathma Gandhi GH

Verified RealEstate™

Medium Term	Central Bus Stand in Thiruverumbur & Srirangam Additional anganwaadis Library [Ward 46] Knowledge Centre & Community Hall – Lalgudi Commercial Complex – Thuvakudi Govt Siddha hospital at Somarasanpettai
Long Term	Commercial complex, marriage hall & vehicle parking facilities in Ponmalaipatti Community Halls in TP [12 Nos] Libraries in TP [2 Nos] Sports Campus in Panjapur

Table 15-6 Social Infrastructure Proposals - Phasing & Block costing

15.4 Implementation Mechanisms

For successful implementation of Master Plan, a fool-proof mechanism has to be derived wherein for each proposal specified, there is a nodal agency allotted that will carry out all the required ground work and other related agencies assist in overall co-ordination and guidance.

Strategies can be developed in detailing out various stages of a particular proposal implementation and those stages can be effectively planned to reap maximum benefits.

GOVERNMENT OF TAMIL NADU

ABSTRACT

LOCAL PLANNING AREA – Tiruchirappalli – Declaration of Local Planning Area under section 10(1) of the Town and Country Planning Act 1971 – Preliminary Notification – issued.

RURAL DEVELOPMENT AND LOCAL ADMINISTRATION DEPARTMENT

G. O. Ms. No. 936 Dated: 5th April 1974

Read:

1. G. O. Ms. No. 1988 RDLA dated 20.09.73
2. From the Commissioner, Tiruchirapalli Municipality Letter No. F12/26662/73 dt. 18.10.93
3. From the Joint Director of Town and Country Planning Letter No. 37958/73 SM dt. 07.01.74

ORDER:

In super session of the orders issued in the G. O. first read above, it is proposed to declare the local areas specified in Column (3) of the table in the notification appended to this order forming a local planning area mentioned in the corresponding entry in Column (2) thereof to be a local planning area and to constitute for such local planning area a local planning authority. The appended notification will be republished in English and in Tamil in the Tiruchirappalli District Gazette.

The Collector of Tiruchirappalli is requested to republish the notification is the District Gazette.

The Director of Translation, Madras is requested to arrange to have the notification translated into Tamil and forward the translation urgently to the Collector.

The Collector of Tiruchirappalli is requested to report to Government the date of republication of the notification in the District Gazette.

ORDER:-

In his letter eighth read above, the Commissioner of Town and Country Planning has stated that, Tiruchirappalli Corporation is the fourth largest city in the State of Tamil Nadu experiencing multi pronged development. The river Cauvery flows in the middle of the city

segregating Srirangam Town as an Island sandwiched between River Cauvery and Coleroon. Owing to the religious importance of Srirangam, this part of the Town recently experience massive vertical development. Beyond coleroon on the Northern side, Tollgate is developing as an urban mode with hectic residential and commercial developments upto Samayapuram and beyond. On the eastern side of the town along Thanjavur road, Bharat Heavy Electricals Limited, is located and the developments from Bharat Heavy Electricals Limited area merge with the development emanated from Tiruchirappalli Town. On the sourthern side, traverses Pudukkottai road where Airport, Navalpattu, I.T. Park area located a part from the Housing colony developed under Tamil Nadu Urban Development Project. All these developments created land scares in this area and resulted in groom in the land market. Taking advantage of this trend, lot of unauthorised development spring up in the area. On the western side Vayalur road became crucial plank and experiences lot of residential development upto Vayalur mostly being unauthorised. Navalapattu New Town Development Area is within 15kms from Tiruchirappalli city and major industrial and institutional developments such as Bharat Heavy Electricals Limited, Ordnance Factory, Regional Engineering College, Industrial Estate etc., came up which triggers spurt of Urban Development in and around this area. Considering the on going Development in and around Tiruchirappalli Corporation, it is essential to revisit the delineation of the planning area and to establish an effective mechanism with specific powers to enforce, regulate and develop the city as envisaged in the development plans. In order to have comprehensive planning, it is necessary to delineate the development area afresh. Therefore he had suggested to amalgamate the existing Tiruchirappalli Local Planning Area and Navalpattu New Town Development Area and add certain areas which experiences fast growth in northern direction in the proposed development area.

2. The Government, after careful consideration of the proposal of Commissioner of Town and Country Planning in para 1 above, hereby declare their intention to add the villages covered under Navalpattu New Town Development Area and certain other villages in Non Plan Areas as detailed in the Appended Notification to Trichirappalli Local Planning area under clause (b) of sub-section 1 of section 10 of the said Act.

3. The appended Notification shall be published in the next issue of Tamil Nadu Government Gazette.

4. The Collector of Trichirappalli District is requested to republish the Notification both in English and Tamil in the District Gazette.

5. The Director of Tamil Translation is requested to arrange to have the Notification translated into Tamil and forward the translation urgently to the Collector of Trichirappalli District.

APPENDIX.

NOTIFICATION.

In exercise of powers conferred by clause (b) of sub-section (1) of section 10 of the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) and in supersession of the earlier Notifications issued in Housing and Urban Development Department Notification No.II(2)/HOU/.5307/80, published at pages 860 and 861 of Part II-Section 2 of the Tamil Nadu Government Gazette, dated the 3rd December 1980, Housing and Urban Development Department Notification No.II(2)/HOU/5227/80, published at page 844 of part II – Section 2 of the Tamil Nadu Government Gazette, dated the 26th November 1980 and Housing and Urban Development Department Notification No.II(2)/HOU/3469/89, published at page 521 of part II – Section 2 of the Tamil Nadu Government Gazette, dated the 28th June 1989, the Governor of Tamil Nadu hereby declares his intention to include additional areas in the Trichirappalli local planning area and to make the following amendment to the Rural Development and Local Administration Department Notification No.II(2)/RUL/3746/74, published at pages 438-439 of Part II-Section 2 of the Tamil Nadu Government Gazette, dated the 21st August 1974.

2. Notice is hereby given that the draft amendment will be taken into consideration under sub-section (4) of the said section 10 of the said Act, on or after the expiry of two months from the date of publication of this Notification in the Tamil Nadu Government Gazette and that any objection or suggestion, whichever may be received from any inhabitant or any local authority or institution in the local areas with respect thereto before the expiry of the period aforesaid will be duly considered by the Government of Tamil Nadu. Objection or suggestion, if any, should be addressed to the Secretary to Government, Housing and Urban Development Department, Fort St. George, Secretariat, Chennai – 600 009, in writing.

DRAFT AMENDMENT.

In the said Notification, for "THE TABLE", the following "TABLE" shall be substituted, namely:-

"THE TABLE.

ORDER:

In the Government order eighth read above, the Government declared the intention to add the villages covered under Navalpattu New Town Development Area and certain other villages in Non Plan Areas to

Verified RealEstate

Tiruchirappalli Local Planning area under clause (b) of sub-section (1) of section 10 of the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972).

2. In the letter 9th read above, the Commissioner of Town and Country Planning has stated that no new villages are added with the Local Planning Area of Tiruchirappalli declared under the said section 10(1)(b) and only the number and spelling mistakes in the village names are corrected. Therefore, the Commissioner of Town and Country Planning has requested the Government to issue Notification under sub-section (4) of section 10 of the said Act for confirmation of areas included in the Tiruchirappalli Local Planning Area.

3. On consideration of the above proposal, it is decided that the object can be achieved by the following:-

(1) Notifying Tiruchirappalli Local Planning Area under sub-section (4) of section 10 of the Act for confirmation of areas included in Tiruchirappalli Local Planning Area which comprises of Navalpattu New Town Development Area and other villages and rescinding existing Navalpattu New Town Development Area, under the said sub- section (4) of section 10 of the Act.

(2) Directing that existing rules and order made regulations and directions issued under the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) and hitherto in force in the erstwhile Tiruchirappalli Local Planning Area shall apply to Tiruchirappalli Local Planning Area now declared under sub-section (4) of section 10 of the said Act.

(3) Directing the Tiruchirappalli Local Planning Authority to implement Navalpattu New Town Development Plan for the areas covered under erstwhile Navalpattu New Town Development Area and take over the assets and liabilities of Navalpattu New Town Development Authority under section 92 of the Act.

4. The Government after careful consideration of the proposal of the Commissioner of Town and Country Planning, hereby supersede the Housing and Urban Development Department Notification No.II(2)/HOU/ 7095/82, published at page 812 of Part II- Section 2 of the Tamil Nadu Government Gazette, No.48, dated 15th December 1982, declaring the Navalpattu New Town Development Area under sub section (4) of section 10 of the said Act and declare the area specified in the Notification appended to this order, to be the Tiruchirappalli Local Planning Area under sub-section (4) of section 10 of the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972).

5. The Government also direct the Member Secretary, Tiruchirappalli Local Planning Authority to implement the Navalpattu New Town Development Plan for the areas covered by erstwhile Navalapattu New Town Development Area until modified Master Plan is prepared for

Tiruchirappalli Local Planning Area alongwith the newly added villages under section 92 of the said Act. Further, the Government direct that existing rules and regulations made under the Tamil Nadu Town and Country Planning Act, 1971 to Tiruchirappalli Local Planning Area shall be applicable to the newly declared Tiruchirappalli Local Planning Area under sub-section (6) of the said section 10 of the Act. It is also directed that all properties, funds and dues which are vested in, or realisable by, the Navalapattu New Town Development Authority shall vest in Tiruchirappalli Local Planning Authority and all the liabilities which are enforceable against Navalpattu New Town Development Authority shall be enforceable against Tiruchirappalli Local Planning Authority, under section 92 of the said Act.

6. Accordingly, the appended Notifications shall be published in the next issue of Tamil Nadu Government Gazette.

7. The Collector of Trichirappalli District is requested to republish the Notification both in English and Tamil in the District Gazette.

8. The Director of Tamil Translation is requested to arrange to have the Notification translated into Tamil and forward the translation urgently to the Collector of Trichirapalli District.

9. The Collector of Trichirappalli District is requested to report to the Government, the republication of the Notification in the District Gazette.

402

Housing and Urban Development Department Secretariat, Chennai-9.

Letter No.4791974/UD4(2)/2023-1, dated 15.06.2023

014729
21 JUN 2023

From
Selvi. Apoorva, I.A.S.,
Principal Secretary to Government.

To
The Director of Town and Country Planning,
Chennai-600 107.

Sir,

Sub: Urban Development – Tiruchirappalli Local Planning Area – to include one additional area Olaiyur and delete the area Thogur situated in Budalur Taluk in Thanjavur District to the Tiruchirappalli Local Planning Area under section 10(1) of Tamil Nadu Town and Country Planning Act, 1971– Regarding.

Ref: 1. G.O.(MS).No.207, Housing and Urban Development Department, dated 23.11.2022.
2. Received from Director of Town and Country Planning, Na.Ka.No.30302/2005/TCP2, dated 17.05.2023

======

I am to invite your attention to the references cited wherein you have requested the Government to include one additional area Olaiyur in Srirangam Taluk and delete one area Thogur situated in Budalur Taluk in Thanjavur District to the said Tiruchirappalli Local Planning Area under section 10(1) of Tamil Nadu Town and Country Planning Act, 1971.

2. In this regard, I am to inform that there is no need to add Olaiyur village or to delete Thogur village in Tiruchirappalli Local Planning Area under section 10(1) of TamilNadu Town and Country Planning Act, 1971 since the Tiruchirappalli Urban Planning Area has already been declared vide G.O.(MS).No.207, Housing and Urban Development (UD4(2)) Department, dated 23.11.2022.

Yours faithfully,

15/6/2023

for Principal Secretary to Government.

ANNEXURE L

Abstract

Urban Development – Preparation of Master Plan for areas other than Chennai Metropolitan Area – Preparation of existing land use map using modern techniques in three phases at a total cost of Rs.41 crores – Implementation of first phase at a cost of Rs.4,91,46,400/- Work entrusted to M/s. Bharatidasan University and Exemption u/s 16(f) of TNTIT Act - Orders Issued.

==========

Housing and Urban Development [UD4(2)]Department

G.O.(Ms).No.23 Dated 29.01.2013

Read:

From the Commissioner of Town and Country Planning letter No.19990/11/MP1, dated 12.6.2012 and 4.9.2012

ORDER:

While moving Demand No.26, for the year 2012-2013, the Minister (Housing and Urban Development) made the following announcement in the floor of assembly.

"To cover all the left out areas of Tamil Nadu under planned development it is proposed to prepare Regional Plan / Master Plan in three phases. In the first phase, 8000 sq.km. comprising of expanded area of existing 27 Composite Local Planning areas, 8 New Town Development areas and newly formed Composite Local Planning areas viz., Dharmapuri, Gobichettipalayam, Rajapalayam, Kovilpatti etc., will be taken up".

2. The Commissioner of Town and Country Planning has stated the following with reference to the above announcement.

1. Preparation of development plan first involves preparation of existing land use map and then working out the proposed Master Plan report.

2. It has been stated in the announcement that the work of preparation of such plans will be taken up in 3 phases in which 8000 sq.km willl be covered in the first phase.

Verified © PedFstate ™

3. The details of area of extent for which plan has to be prepared is tabulated as follows:

Total geographical area of Tamil Nadu	1,30,058 sq.km.
Area of Chennai Metropolitan Area (CMA)	1,189 sq.km.
Area under the Jurisdiction of Town and Country Planning Department (T&CP Dept.) (Area excluding CMA)	1,28,869 sq.km.
Agricultural area	58,243 sq.km.
Forest area	21,431 sq.km.
Area to be planned by T&CP Dept.	49,195 sq.km.
Area already covered by Planning authorities (27 Composite Local Planning Authorities + 88 Single Local Planning Authorities + 8 New Town Development Authorities)	6,950 sq.km.
Remaining area to be brought under planning area	42,245 sq.km.

4. Even though, Master Plan for areas which have been covered already under planning area are at various stages of preparation, expansion of each of the planning areas is necessitated in the present day context of rapid development. Therefore, fresh survey of all the planning areas is also felt necessary. Therefore, the remaining area of 42,245 sq.km. and part of 6950 sq.km of existing master plan areas require fresh field survey for preparation of existing land use map and subsequent master plan / regional plan as the case may be.

5. It is assessed that to complete the master planning exercise for the entire area by engaging the staff of the department will be time consuming and is assessed to be about 20 years.

6. At the same time, use of modern techniques like GIS, Remote sensing and using external resources i.e., private consultants including Universities in preparation of plans, would greatly reduce the time and would enable to achieve the announcement early. Therefore, it is felt that it would be appropriate to outsource the work of preparation of existing land use maps and registers, using modern techniques like GIS and Remote sensing by prescribing the Terms of reference for such outsourcing. Once the existing land use map and register is prepared, the proposed

Verified RegiEstate™

land use map and schedules shall be done by utilizing the department staff.

7. Employing such modern techniques is a new nature of work for the department and therefore it is difficult to work out the actual cost for calling of tenders due to new methods involved as stated above.

3. The Commissioner of Town and Country Planning has further stated that,

- Based on the finalised terms of reference (TOR), expression of interest was received from three institutions and they have quoted the amount mentioned against each of them along with break up details for various components of the projects.

(i)	Bharathidasan University	Rs.5440/- per Sq.km
(ii)	Institute of Remote Sensing, Anna University	Rs.8125/- per Sq.Km
(iii)	School of Architecture and Planning, Anna University	Rs.7995/- per Sq.Km.

- As this is a special kind of work and first of its kind tried by the Department of Town and Country Planning, the Commissioner of Town and Country Planning has requested to consider giving exemption from going for tenders and to entrust the work to Bharathidasan University at the rate of Rs.5440/- per sq.km under section 16 of TNTIT Act, 1998, as they have quoted lowest among the three. It is proposed to take up 8447 sq.km of the area as of now, which has been detailed as below:

S. No.	Name of the composite local planning area	Existing extent of planning area (sq.km)	Proposed additional area (Sq.km)	Total area to be covered under the project (Sq.km)
1.	Coimbatore	1276	2331	3607
2.	Madurai	Madurai LPA * 721 Palkalai Nagar NTDA** 38 Tiruppuvanam LPA * 26 --- 785 ---	409	1194

Verified RealEstate™

3.	Tiruchirappalli	Tiruchy LPA * 281 Navalpattu NTDA** 208 --- 489 ---	315	804
4.	Thoothukudi	355	113	468
5.	Tiruppur	219.90 say 220	827.91	1048
6.	Erode	Erode LPA* 80 Chithode NTDA** 25.4 Perunthurai NTDA** 425 --- 530.4 --- say 530	201	731
7.	Hosur	292	303	595
	Total	3947	4500	8447

* Local Planning Authority
** New Town Development Authority

- Total cost for the work in first phase would be Rs.4,91,46,440/-.

4. The Commissioner of Town and Country Planning has proposed to meet the above expenditure from Town and Country Planning fund. He has stated that, the balance in this fund as an 31.3.2012 is Rs.71.00 crore and as per section 64(3) of the Tamil Nadu Town and Country Planning Act 1971, money from Town and Country Planning fund could be utilized by planning authorities for preparation of development plan. He has also stated that it would take 9 months to prepare present land use map and land use register as per the Terms of Reference. The penalty of 5% has been proposed to ensure timely completion. After the experience, the rest of the area of the State would be covered within a span of 2 years engaging more number of universities / consultants.

5. The Government after careful consideration has decided to accept the proposal of Commissioner of Town and Country Planning as detailed above. Accordingly, the Government direct the Commissioner of Town and Country Planning to take up the work of preparation of base map for the preparation of Master Plan covering 8447 sq.km as detailed in para 3 above at a total cost of Rs.4,91,46,440/- and entrust the work to M/s. Bharathidasan University at the rate of Rs.5440/- sq.km under section 16 of TNTIT Act, 1998, as they have quoted the lowest among the three Universities who expressed interest for the above project. The above expenditure shall be met from funds available in Town and Country Planning fund. The Government also exempt the above project from notification under 16(f) of the TNTIT ACT 1998.

ANNEXURE M

Urban Forest - Note order from the Chairman/Collector, Tiruchirappalli LPA/ District

தலைவர்/திருச்சிராப்பள்ளி உள்ளூர் திட்டக் குழுமம்/மாவட்ட ஆட்சித்தலைவர், அவர்களுக்கு குறிப்பு பணிந்து சமர்ப்பிக்கப்படுகிறது

கோப்பு எண்.4377/2023/திமா–3 நாள்:13.12.2023

பொருள்: நகர்ப்புற காடுகள் (Urban Forestry) – மாவட்ட நகர் ஊரமைப்பு அலுவலகம் – திருச்சிராப்பள்ளி மாவட்டம் – தமிழ்நாட்டில் திருச்சிராப்பள்ளி உட்பட 8 நகரங்களில் நகர்ப்புற காடுகள் உருவாக்கி இந்திய அரசிடமிருந்து ரூபாய் 40 கோடி ஊக்கத்தொகை பெற வழிகாட்டுதல் – Schemes for Special Assistance to states for Capital Investment 2023–2024–Part–II (Urban Planning Reform) – தொடர்பாக.

பார்வை :
1) நகர் ஊரமைப்பு இயக்குநர், சென்னை அவர்களின் நேர்முக கடிதம் எண்.27237/2023/TCP3 நாள் 23.11.2023
2) Supplementary Guidelines on the "Scheme for Special Assistance to states for Capital Investment 2023–24"–Part–II (Urban Planning Reform)
3) Email from Secretary to Government, Housing and Urban Development Department dated 14.09.2023
4) Review meeting for "Scheme for Special for Special Assistance to states for Capital Investment 2023–2024" – Part–III (Urban Planning Reform) chaired by the Principal Secretary to Government, Finance Department, dated 06.11.2023
5) D.O.Letter No.5063023/Bud–1/2023 dated 07.11.2023

பார்வை 1–இல் கண்டுள்ள நகர் ஊரமைப்பு இயக்குநர், சென்னை அவர்களின் நேர்முக கடிதத்தில் பார்வை 2–இல் கண்டுள்ள Supplementary Guidelines on the "Scheme for Special Assistance to states for Capital Investment 2023–24"–Part–II (Urban Planning Reform) திட்டம் மூலம் தமிழ்நாட்டில் 8 நகரங்களில் நகர்ப்புற காடுகள் உருவாக்கி இந்திய அரசிடமிருந்து ரூபாய் 40 கோடி ஊக்கத்தொகை பெற்று வழிகாட்டுதல்களின்படி நடைமுறைப்படுத்த தெரிவிக்கப்பட்டுள்ளது.

மேற்படி பார்வை 2–இல் கண்டுள்ள வழிகாட்டுதலில் ஒருபகுதி நகர்ப்புற வனத்தை உருவாக்குதல் ஆகும். இந்த திட்டத்தின் கீழ் தமிழ்நாட்டில் கீழ்கண்ட 8 நகரங்களை தேர்வு செய்யப்பட்டுள்ளது.

1. கோயம்புத்தூர்
2. மதுரை
3. திருச்சிராப்பள்ளி
4. சேலம்
5. ஈரோடு
6. திருப்பூர்
7. திருநெல்வேலி
8. வேலூர்

Verified @ PropStrength™

இத்திட்டத்தின் வழிகாட்டுதலின்படி, ரூபாய் 5 கோடி ஊக்கத்தொகை பெற குறைந்த பட்சம் ஒரு ஏக்கர் நிலத்தில் வனங்கள் ஏற்படுத்த வேண்டும். நகர்ப்புற காடுகளை உருவாக்குவதற்காக இடம் கண்டறியப்பட்டு அவற்றினை முழுமைத் திட்டத்தில் நகர்ப்புற வனமாக ஒருங்கிணைத்தும், அவற்றினை சுத்தம் செய்து வனத்துறையால் பணிகள் துவக்கப்பட வேண்டும் என தெரிவிக்கப்பட்டுள்ளது.

பார்வை 4-இல் கண்டுள்ள ஆய்வு கூட்டமானது Principal Secretary to Government, Finance Department அவர்களின் தலைமையில் நடைபெற்றதில் இத்திட்டத்தின் சிறப்புகள் குறித்து தெரிவித்து இத்திட்டத்தினை குறிப்பிட்ட காலத்திற்குள் முடித்திட தெரிவிக்கப்பட்டுள்ளதால் அரசு செயலர், வீட்டு வசதி மற்றும் நகர்ப்புற வளர்ச்சித்துறை அவர்களால் நகர்ப்புற காடுகளை உருவாக்குதற்காக 15.01.2024-க்குள் பணிகள் முடித்திடுமாறு உத்திரவிடப்பட்டுள்ளது.

மாவட்ட நகர் ஊரமைப்பு அலுவலகத்தால் 1 ஏக்கருக்கு குறையாமல் அரசு புறம்போக்கு நிலம் கண்டறியப்பட வேண்டும். மேலும் மேற்படி இடம் முழுமை திட்டத்தில் விவசாய உபயோக பகுதியாக இருத்தல் வேண்டும் எனவும், தமிழ்நாடு ஒருங்கிணைந்த கட்டிட விதிகள் 2019-ன்படி நகர்ப்புற காடுகள் உருவாக்கிட விவசாய உபயோக பகுதியில் வழிவகை உள்ளதால் அறிவிப்பு செய்யப்படும் அரசு புறம்போக்கு நிலமானது திருச்சிராப்பள்ளி உள்ளூர் திட்டப் பகுதிக்குள் விவசாய உபயோக பகுதியில் அமையுமாறு தேர்வு செய்யப்பட வேண்டும் என தெரிவிக்கப்பட்டுள்ளது.

நகர்ப்புற காடுகள் உருவாக்கிட இடம் மாவட்ட நகர் ஊரமைப்பு அலுவலரால் தேர்வு செய்து மாவட்ட ஆட்சித்தலைவரின் ஒப்புதல் பெறப்பட்ட பின்னர் மாவட்ட ஆட்சித்தலைவர் மற்றும் மாவட்ட வன அலுவலருடன் கூட்டம் நடத்தப்பட வேண்டும். அடையாளம் காணப்பட்ட இடத்தில் நகர்ப்புற காடுகள் உருவாக்கிட வன அலுவலரால் அரசு விகித கட்டண அடிப்படையில் மதிப்பீடு வழங்க கோரப்படலாம். மேலும் அடையாளம் காணப்பட்ட இடமானது வனத்துறையால் நகர்ப்புற காடுகள் ஒருவாக்கி அதனை பராமரிக்க தெரிவிக்கப்பட்டுள்ளது. மேலும் நில உரிமை வனத்துறைக்கு மாற்றி அமைத்திட தேவையில்லை எனவும் குறிப்பிடப்பட்டுள்ளது.

நகர்ப்புற காடுகள் உருவாக்கிட வன அலுவலரால் அரசு விகித கட்டண அடிப்படையில் மதிப்பீடு வழங்கப்பட்ட பின்னர் அதனை எதிர்வரும் உள்ளூர் திட்டக் குழும கூட்டத்தில் பொருள் வைத்து தீர்மானம் நிறைவேற்றி தீர்மான விபரத்துடன் உத்தேசம் நகர் ஊரமைப்பு இயக்குநருக்கு அனுப்பிவைத்திட கேட்டுக்கொள்ளப்பட்டுள்ளது.

திருச்சிராப்பள்ளி மாவட்டத்தில் நகர்ப்புற காடுகள் உருவாக்கும் பொருட்டு இடம் தேர்வு செய்திட வருவாய் ஆவணங்களில் அரசு புறம்போக்கு நிலங்கள் கண்டறிந்து அவற்றின் தற்போதைய நிலை குறித்து இடம் நேராய்வு செய்யப்பட்டு காடுகள் அமைத்திட ஏற்ற இடமாக திருவெறும்பூர் வட்டம், சூரியூர் கிராமம், சர்வே எ.ண்.400/1 (மொத்தப் பரப்பு-5.03.00 ஹெக்டேர்)-ல் 1 ஏக்கர் பரப்பளவிற்கு குறையாத இடத்தினை தேர்வு செய்து நகர் ஊரமைப்பு இயக்குநருக்கு சமர்ப்பிக்கப்பட்டது.

Verified by RealEstate™

முழுமை திட்ட விதிகள் மற்றும் தமிழ்நாடு ஒருங்கிணைந்த கட்டிட விதிகள் 2019-ன்படி விவசாய உபயோக பகுதியில் காடுகள் அமைத்திட வழிவகை உள்ளதால் திருச்சிராப்பள்ளி மாவட்டம், திருவெறும்பூர் வட்டம், சூரியூர் கிராமம், சர்வே எ.ண்.400/1 (மொத்தப் பரப்பு-5.03.00 ஹெக்டேர்)-ல் 1 ஏக்கர் பரப்பளவிற்கு குறையாத வண்ணம் நகர்ப்புற காடுகள் அமைத்திட இடத்தினை ஒதுக்கீடு செய்ய ஒப்புதலும், மாவட்ட வன அலுவலர் அவர்களை மேற்கண்ட சூரியூர் கிராமம், சர்வே எண்.400/1-ல் ஒதுக்கீடு செய்யப்பட்ட இடத்தில் நகர்ப்புற காடுகள் உருவாக்கிட மதிப்பீடு வழங்க கோரப்பட்டு. மேலும், அத்தொகையினை திருச்சிராப்பள்ளி உள்ளூர் திட்டக் குழும நிதியிலிருந்து பயன்படுத்தவும் அனுமதி வேண்டி குறிப்பு பணிந்து சமர்ப்பிக்கப்படுகிறது.

மேற்படி இப்பொருள் குறித்து எதிர்வரும் உள்ளூர் திட்டக் குழும கூட்டத்தில் பின்னேற்பாக பொருள் சேர்க்கப்படலாம் என்ற குறிப்பும் ஒப்புதலுக்காக பணிந்து சமர்ப்பிக்கப்படுகிறது.
