1 Introduction

1.1 Introduction

A master plan is a dynamic long-term planning document that provides a conceptual layout to guide future growth and development in a sustainable way over a plan period of 20 to 30 years. In Tamil Nadu, a Master Plan is prepared with the legislative support of the Tamil Nadu Town and Country Planning Act 1971. The Master plan includes analysis, recommendations, and proposals for a town's economy, housing, transportation, physical infrastructure, and social infrastructure. It is based on public input, surveys, planning initiatives, existing development, physical characteristics, and social and economic conditions.

1.2 Purpose of a Master Plan

As per the Tamil Nadu Town and Country Planning Act, of 1971, the Master plan may purpose or provide for all or any of the following matters, namely,

- The manner in which the land in the planning area shall be used;
- The allotment or reservation of land for residential, commercial, industrial, and agricultural purposes and parks, play fields, and open spaces;
- The allotment and reservation of land for public buildings, institutions and civic amenities;
- the traffic and transportation pattern and traffic circulation pattern;
- the major road and street improvements;
- the areas reserved for future development, expansion and for new housing;
- the provision for the improvement of areas of bad layout or obsolete development and slum areas and for relocation of population;
- the amenities, services and utilities;
- The provision for detailed development of specific areas for housing, shopping,etc.

Verified RealEstate™

- industries and civic amenities and educational and cultural facilities;
- the control of architectural features, elevation and frontage of buildings and structures;
- the provision for regulating the zone, the location, height, number of storeys and size of buildings and other structures, the size of the yards and other open spaces and the use of buildings, structures and land;
- the stages by which the master plan shall be carried out; and
- Such other matters as may be prescribed.

The URDPFI 2015 guideline describes the Master Plan (Development Plan) in the following manner:

- The objective of the development plan is to provide further necessary details and intended actions in the form of strategies and physical proposals for various policies given in the perspective plan and regional plan depending upon the economic and social needs and aspirations of the people, available resources, and priorities.
- Proposals of a development plan should be definite and supported by an implementation strategy and evaluation criteria.
- The time frame of these plans is generally valid over 20-30 years and should be planned in phases of 5 years, for periodic reviews.

1.3 AMRUT Scheme

Vellore Local Planning Area is one of 33 towns identified in Tamil Nadu under the AMRUT scheme for preparation of Master Plan. The Government of India (GoI) launched the Atal Mission for Rejuvenation and Urban Transformation (AMRUT) in 2015, as a Centrally Sponsored Scheme for urban development. Besides creating infrastructure for basic amenities, the Mission also focuses on reforms and capacity building of the Urban Local Bodies (ULB). Urban Planning and City-level Plan is one

Verified RedEstate™

of the 10 identified reforms. The sub- reforms under Urban planning and city-level plans are:

- Preparation of Master Plan using GIS
- Preparation of Service Level Improvement Plans (SLIP)
- Establish Urban Development Authorities
- Make an action plan to progressively increase the green cover in cities to 15% in 5 years
- Develop at least one Children's Park every year in AMRUT cities
- Establish a system for maintaining parks, playground and recreational areas relying on the People Public Private Partnership (PPPP) model
- Implementation of Parameters given in the National Mission for Sustainable Habitat

1.4 Master Plan for Vellore LPA

The Directorate of Town and Country Planning (DTCP), Government of Tamil Nadu (GoTN) has taken up Master Plan preparation of Vellore LPA along with other towns in the state. As per the G.O. (Ms). No. 172/ H&UD, dated 17.10.2016, Vellore LPA comprises of the following revenue villages, town panchayats along with the Vellore Municipal Corporation as shown in Table 1.1.

Vellore LPA comprises of 1 Municipal Corporation, 2 Town Panchayats, and 43 Revenue villages. Map 1.1 shows the administrative boundary of Vellore LPA. The area of the LPA is 314.07 Sq. Km and a population of 6,59,742 as per the 2011 Census. The Municipal Corporation accounts for 28% of the total LPA Area and accounts for 75.8% of the total population of the LPA. The mismatch between the population and the area will be a challenge for balanced development. For this preparation of master plan Vellore and Katpadi taluk villages are taken as the planning area. Since the Walaja Taluk went under the jurisdiction of Ranipet District, due to constrain of jurisdiction the planning area is restricted to Vellore District.

The boundary of the composite Local Planning Area, including the villages and the Vellore City Municipal Corporation was approved by the Government in G.O. (Ms). No.172 H&UD, dated 17.10.2016 as shown in the Figure 1.1. The area of Six villages and one Reserve Forest in Ranipet District, which is not included in the current Planning area due to District Trifurcation occurred through G.O.(Ms).No.40 R&DMD, RDW [RA 1(1)] Section Dated:12.11.2019.

1.5 Objective of the Master Plan

The objective is preparation of a holistic master plan where in the socio-economic standards and quality of life of the people are improved by the generation of employment opportunities, access to basic amenities and facilities, robust connectivity and infrastructure services, etc. The following chapters will elaborate on the above sectors and topics with detailed analysis and insights.

1.6 Preparation of the Draft Master Plan 2021 To 2041

From the Government Order G.O (Ms.) No.172 Dated 17.10.2016, Under the section 10 (4), Tamil Nadu Town and Country Planning Act 1971 (Tamil Nadu Act 35 of 1972) Directorate of Town and Country Planning (DTCP) directed to prepare the Master Plan for Vellore LPA under AMRUT GIS based master plan cities in Tamil Nadu Package – 2. Preparation of Existing Land use

The Existing Land Use Map for the Local Planning Area was prepared by the DTCP in accordance with AMRUT Guidelines, utilizing high-resolution satellite images acquired from the National Remote Sensing Agency (NRSC). Village maps, including survey numbers obtained from the Survey and Land Records department, were employed to create the cadastral framework through georeferencing of scanned paper maps based on satellite images. Survey boundaries were digitized as polygon features in the GIS database, along with the village name and survey number.

Satellite Data Acquisition & Ground Truthing – Following AMRUT guidelines, high-resolution satellite images were obtained from the National Remote Sensing Centre (NRSC of ISRO). NRSC initially formulated a land use map for the Base layer, building footprints, and land use and land cover maps from the satellite images. Verification of the land

Verified RealEstate™

use map through ground truthing data vetting was subsequently conducted.

GIS Survey & Georeferencing – Village maps with survey numbers from the Survey and Land Records department were used to establish the cadastral framework. Differential Global Positioning System (DGPS) surveys were conducted to collect Ground Control Points (GCPs) for the georeferencing of scanned paper maps. Survey boundaries were digitized as polygon features in the GIS database, including the village name and survey number. Government lands are to be delineated at the sub-division level. For the Vellore Local Planning Area, ward maps were geo-referenced, and polygons for each town survey number were captured in the GIS database. During the Master Planning Preparation period, the Revenue Land Authority did not update the present Vellore City Municipal Corporation area of Town Survey records. All the added areas of the Vellore City Municipal Corporation, based on available revenue records, were prepared village-wise, and the Proposed schedule was generated with the latest A-Register in a village-wise cum Town Survey Land records.

Source :NRSC

Figure 1.2: 0.5 x 0.5 Grid Map for Base Map Data Vetting

Verified RealEstate™

Quality Checking and Vetting – All GIS-generated data undergoes quality assessment and checks for topological and attribute correctness. Given that map data come from different sources, times, and scales, it is essential to verify layers individually and against one another as shown in Figure 1.2.

Preparation of Base Map – The Digital Terrain Model (DTM of SRTM) has been utilized to create the terrain and contours on the physical base map. This base map illustrates the topography, rivers, streams, and tanks in the Vellore Local Planning Area.

1.7 Inception Report

The inception report stage entails a preliminary assessment of the Local Planning Area (LPA) as a whole, relying on available secondary data and initial stakeholder interactions. The Inception Report furnishes a contextual background, outlines the project's need and scope, defines the aims and objectives, presents the approach and methodology to be employed, and introduces the project team and timeline.

It delineates the LPA by offering a demographic profile based primarily on secondary data obtained through the Census. The report also addresses aspects such as the road network, connectivity, status of physical and social infrastructure, and provides a brief overview of other pertinent sectors associated with planning, including housing, infrastructure, environment, etc.

1.8 Chapter Schema

This report has the following chapters which will provide an overall understanding of the various sectors and processes involved, analysis done to streamline the Vellore LPA with the overall vision of the Vellore Master plan

Verified RealEstate™

Chapter 1: Background

This chapter covers introduction, project background and the profile of the planning area including its location and regional setting as well as details of the planning area along with its urban and rural components.

Chapter 2: Profile and Setting

In this Chapter, the profile Vellore district and Vellore Local Planning Area in all the aspects is discussed.

Chapter 3: Review of Previous Master Plan 2011

In this chapter review previous Master Plan details of Land use changes and proposals of each sector is listed. Analysed the proposals of each sector and categorised the proposals based on implementations and not implementations. Justified the proposals which are not implemented in previous Master Plan.

Chapter 4: Demography

It highlights the detailed demographic profile of the Vellore LPA like rural urban population composition, population growth trends. Along with the existing trends, population for the horizon year is projected.

Chapter 5: Economy

This chapter details out the economic base of the planning area. The existing and projected economic base, workforce and their occupational structure along with major work areas for the horizon year is provided.

Chapter 6: Housing

This chapter focuses on the housing scenario, housing characteristics, and available facilities & infrastructure along with the condition of slum and urban poor. In this chapter the housing shortages and need for the horizon year is discussed.

Verified RedEstate ™

Chapter 7: Physical Infrastructure

This chapter deals with physical infrastructure facilities like water supply system, sewerage & sanitation, solid waste management and power supply. The issues & problems in different infrastructure and the requirement for horizon year are discussed.

Chapter 8: Social Infrastructure

This chapter highlights the existing Social infrastructure facilities available in the planning area. The chapter elaborates the education facility, health, and recreational facilities. The requirement for the horizon year is calculated and presented as per the planning principles.

Chapter 9: Traffic and Transportation

This chapter includes traffic and transportation scenarios in the planning area. The issues identified from analysis of primary surveys are discussed and the potential areas/ strategies of developments are mentioned.

Chapter 10: Environment and Natural Hazards

The chapter discusses the status of the physical environment including flora and fauna in Vellore LPA. The chapter also discusses the natural hazard vulnerability of the planning area.

Chapter 11: Land Use

This chapter gives an understanding of the processes of preparation of base map and existing land map of the planning area. Also, existing situations are analysed to find out the direction of future growth and future land use is proposed for the horizon year.

Chapter 12: Issues and potentials

This Chapter gives the overall issues and potentials of Vellore LPA. The proposals of each sector are drawn from issues and proposals.

Verified RedEstate ™

Chapter 13: Land Suitability

Land Suitability analysis is done to identify the potential area for zoning and proposing the future land use. The parameters are identified based on the site condition and land suitability map is prepared.

Chapter 14: Planning proposals and implementation

The proposals for each sector are drawn based on the ongoing government proposals and proposals based on analyzed issues and potentials. The sort term, mid-term and long term of proposals are segregated based on the need of the proposals.

Chapter 15: Proposed Land Use

This chapter gives the proposed land use of the Vellore Local Planning Area with respect to the zoning of land use. The Proposed land use is prepared based on the analysis of growth potential area through the planning permission within LPA.

Verified RedEstate ™

2 Profile And Setting

2.1 Introduction

The Government of Tamil Nadu, through the Directorate of Town & Country Planning, has undertaken the task of preparing a Master Plan for the Vellore Local Planning Area, as well as other towns in the state. This initiative aims to effectively manage and regulate the development and growth of these areas.

The Vellore Local Planning Area in Tamil Nadu was declared under section 10(1) of the Tamil Nadu Town and Country Planning Act, 1971. This declaration was made by the Department of Rural Development and Local Administration Department of the Government of Tamil Nadu through G.O. Ms. 1086 RD & LA, dated 23.04.1974. Later, the declaration was confirmed under section 10(4) of the same act through G.O. Ms. No. 2110 RD & LA, dated 23.04.1974. Furthermore, the Vellore Local Planning Area was constituted under section 11(1) and (3) of the Tamil Nadu Town and Country Planning Act, 1971 in G.O. Ms. No. 1138, dated 7th June 1976.

To manage and guide the development and growth in Vellore and the surrounding villages more effectively, the intention to include additional areas within the Vellore Local Planning Area was declared. The Housing and Urban Development Department, Government of Tamil Nadu, issued G.O. (Ms). No. 172 dated 03.07.2013, under section 10(1) of the Tamil Nadu Town and Country Planning Act, 1971

These additional areas confirmed as part of the Vellore Local Planning Area under section 10(4) of the Tamil Nadu Town and Country Planning Act, 1971. This confirmation was made through G.O.(Ms). No. 172, Dated 17.10.2016, by the Housing and Urban Development Department, Government of Tamil Nadu.

Verified RealEstate™

2.1.1 Vellore District

The North Arcot district was bifurcated to form North Arcot Ambdedkar and Tiruvannamalai Sambuvarayar district in 01.10.1989. Later North Arcot Ambedkar district was renamed as Vellore district as per GO Ms.No.618, dated 01.07.1997. The district lies between 12° 15' to 13° 15' North latitudes and 78° 20' to 79° 50' East longitudes and has a total area of 6062.35 Sq.km, accounts for 4.6% of the total area of Tamil Nadu and having population of 39,36,331 as per 2011 Census before trifurcation of Vellore District. The present area of the Vellore District after Trifurcation is 2030.11 Sq.km.

Vellore city is the administrative Head-Quarters of Vellore district. Palar river passes through the city and the city is located close to the forested slope of Eastern Ghats with a gentle slope from west to east. According to a legend, many babul trees (known locally as Velan trees) surrounded this region, which led to the name "Vellore". Ancient City is named for the historical Vellore Fort, Government Museum, Science Park, Vainu Bappu Observatory, Amirthi Zoological Park and religious places like Jalakandeswarar Temple, Srilakshmi Golden Temple, Big Mosque & St. John's Church and Yelagiri Hill station and attracts tourism.

District Administrative Setup

Undivided Vellore district consists of 3 revenue divisions as Vellore (taluks include Vellore, Katpadi, Gudiyatham), Ranipet (Taluks include Walajah, Arakonam, Arcot), and Tiruppathur (Taluks include Thiruppathur, Vaniyambadi, Ambur). This district has 9 Taluks, 20 Community Development Blocks, 52 Firkas, 1 Municipal Corporation, 13 Municipalities, 22 Town Panchayats and 36 Census Towns. After trifurcation, new Vellore district had been established with the 2 revenue divisions, 6 Taluks, 20 Firkas, 1 Municipal Corporation and 317 Revenue villages. Out of this, Gudiyatham division has been newly formed with three Taluk namely Pernambut, Gudiyatham and newly established K V Kuppam taluk. The administrative setup of newly formed Vellore district is listed in the following Table 2.1.

Verified RealEstate™

Geographical Location and District Trifurcation

Verified RealEstate

For administrative purpose, the district has been trifurcated into Vellore, Tirupathur and Ranipet districts in G.O.Ms. No.430 dated 12.11.2019. After Trifurcation, the area of the Vellore district is reduced to 2030.11 Sq.km and total population of 18,57,041 (as per 2011 census) which is 2.23% of the total population of the state. The district is situated in the northern part of the state. it is bounded by Andhra Pradesh on the north, Thiruvallur district on the northeast, Tiruvannamalai district on the South, and newly formed Ranipet and Tirupathur district on the east and west respectively. Figure 2.1 shows the geographical location of Vellore District and before, and after images of trifurcation of Vellore District. Figure 2.2 shows the area and profile of Vellore District after trifurcation.

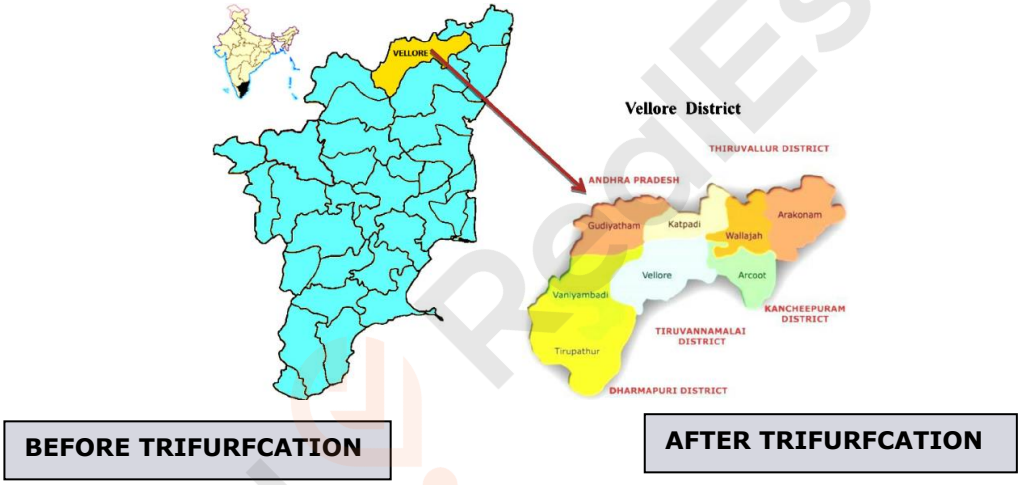

Figure 2.1: Geographical Location of Vellore District and District Trifurcation

Vellore District Area 2030.11 sq.km	Tirupathur District Area 1797.92 sq.km	Ranipet District Area 2234.32 sq.km

(Source: Vellore.nic.in)

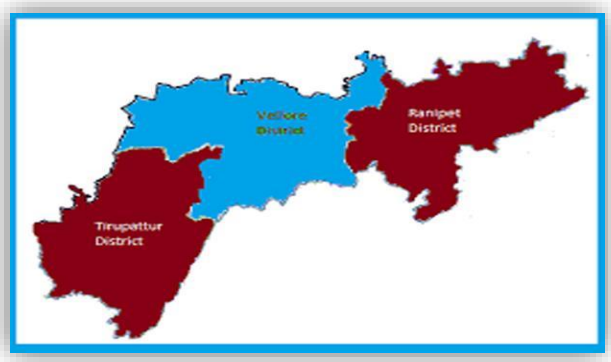

Figure 2.2 Area and Profile of the District after Trifurcation

2.1.2 Vellore LPA

The Vellore Municipality was first constituted in the year 1866, under the provision of Town Improvement Act, 1865. The municipality was upgraded to First Grade Municipality in the year 1947 and to Selection Grade Municipality in the year 1970 and further upgraded to Special Grade in the year 1979. The Vellore City Municipal Corporation Act, 2008 (Act 26 of 2008) changed it to Vellore Municipal Corporation on August 1st, 2008, with an area of 11.65 sq. km and 48 wards. As per G.O.(Rt). No. 221 dated 28.09.2010, the Corporation extends its boundaries by incorporating neighboring villages, encompassing an area of 87.91Sq. Km and 60 wards. Vellore Municipal Corporation is divided into four zones namely Katpadi, Sathuvachari, Vellore Fort, and Shenbakkam.

In addition to the municipal corporation, the LPA has 2 Town Panchayats and 43 revenue villages spread in 3 Taluks, namely, Vellore Taluk, Kaptpadi Taluk and Wallajah Taluk. Tiruvalam Town Panchayat is located in Katpadi Taluk and Pennathur Town Panchayat is located in Vellore Taluk. The profile of Vellore is described in the Table 2.2

Table 2.2 Profile of Vellore LPA

Description	Area
Area of the LPA	314.07 Sq. Km
Composition of the LPA	
Vellore Municipal Corporation	87.91 Sq. Km
Town Panchayats Tiruvalam Pennathur	14.51 Sq.km
Revenue Villages – 43 Nos.	211.65 Sq.km
Total Population of the LPA	**6,59,742**

2.1.3 PROFILE OF VELLORE CITY MUNICIPAL CORPORATION

The Vellore Municipality was constituted as early as 1866 under the provision of Town Improvement Act, 1865. The Municipal Council was formed in the year 1920 as per the provisions of the MDM Act, 1920. The Municipality was upgraded to first grade in 1947 and to selection grade in 1970. It was further upgraded to a special grade in 1979. At the time of initial constitution of the Municipality, the areas of Kaspa, Fort, Adavananthal, Beripet, Velapadi, Salavanpet, Thottapalayam, Aruganthampoondi, Kosapet, Kavaraipet, Commissary Bazaar and Sankaranpalayam were included in its limits. Then it updated to Vellore Municipal Corporation from 1st August 2008 by Vellore City Municipal Corporation Act, 2008 (Act 26 of 2008) with an area of 11.65 sq.km and 48 wards. Corporation extend their limit by adding adjacent villages as per G.O.(Rt). No. 221 dated 28.09.2010 with area of 87.915 sq.km and 60 wards. As per Census, Population of Corporation in 2011 is about 5,00,331. The Vellore Corporation is divided into four zones namely Katpadi, Sathuvachari, Vellore Fort and Shenbakkam as shown in the Table 2.3.

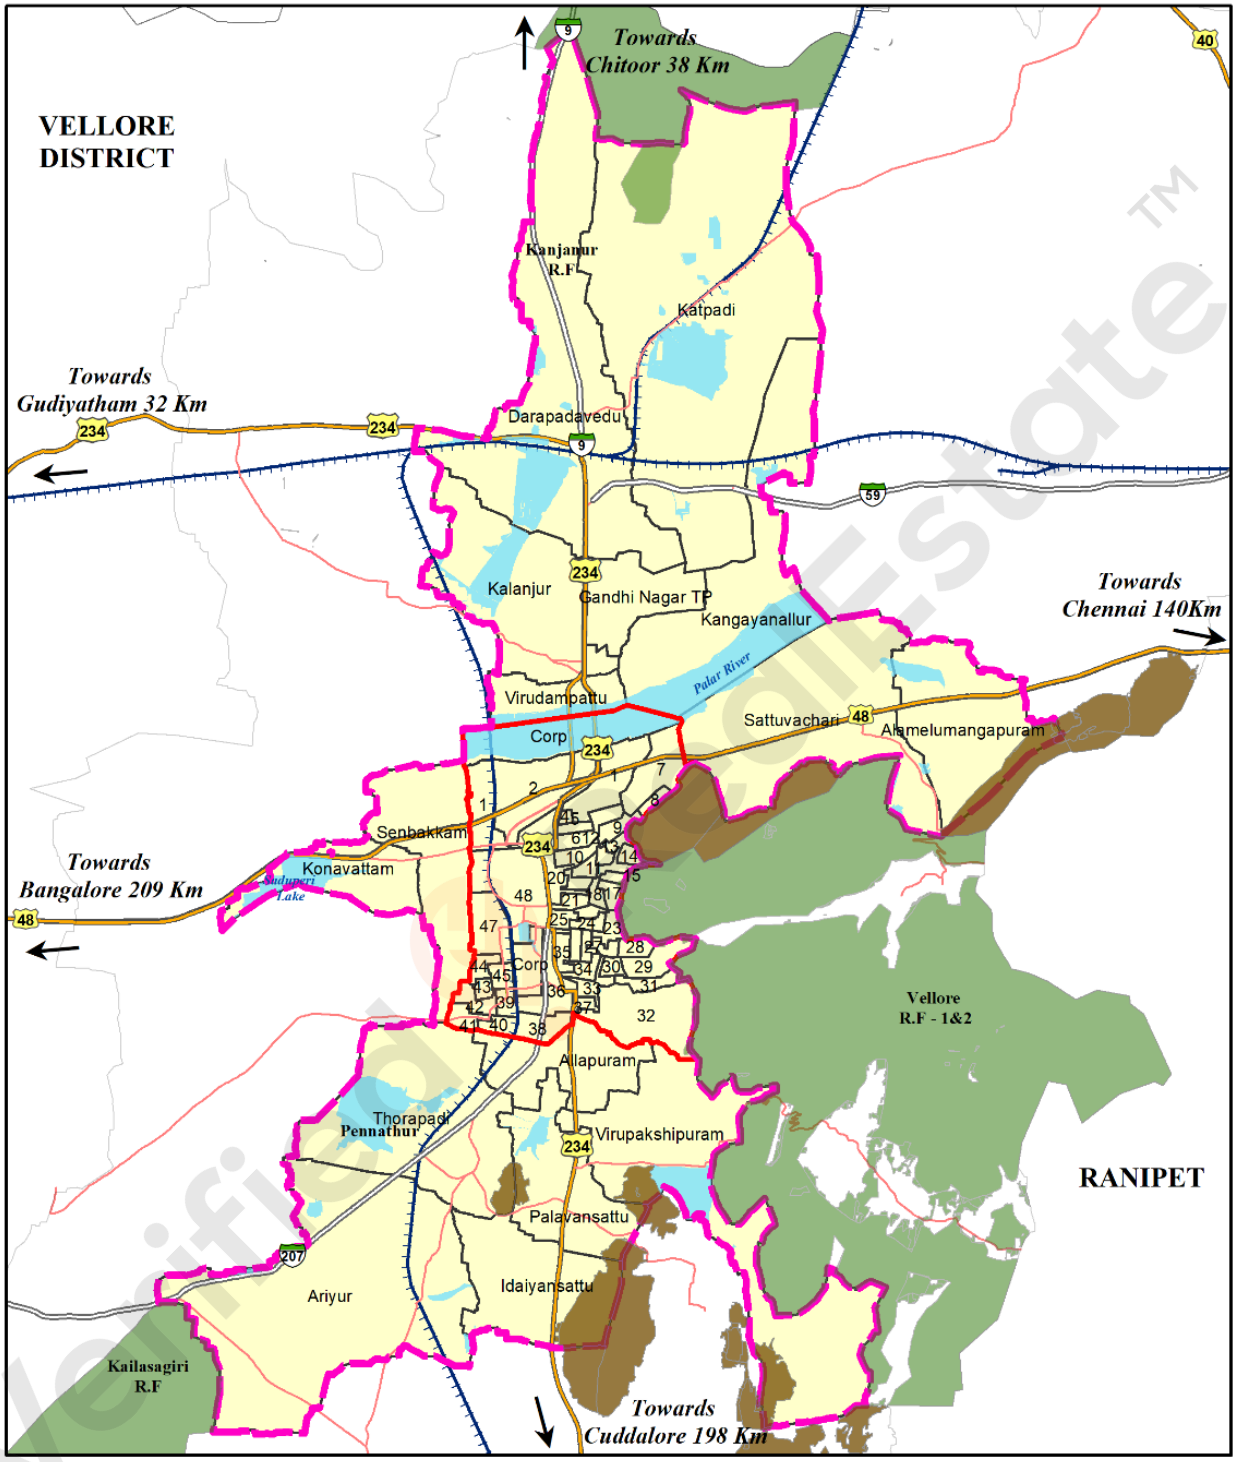

Table 2.3 Administrative Zones of Vellore

Administrative Zones	List of Wards / Villages Covered in Zone
Zone- 1	Dharapadavedu, Katpadi, Gandhinagar, Kalinjur, Viruthampattu and Kangeyanallur (Wards 1-15)
Zone -2	Sathuvachari, North Part of Old Vellore town, and Alamelumangapuram (Wards 16-30)
Zone-3	South Part of Old Vellore Town, Allapuram, Virupatchipuram and Palavanchathu (Wards 31-45)
Zone-4	Shenbakkam, Thorapadi, Edyanchathu, Ariyur, Chiteri and Konavattam (Wards 46 -60)

2.2 Historical Development of Vellore

Vellore reflects the old Dravidian civilization with its blend of tradition and culture. The Pallavas, Cholas, Nayak, Marathas, Arcot Nawabs, and Bijapur Sultan Kingdoms all had their capital there. The Vijayanagar Empire had Vellore as its capital from 1606 until 1672. During the 17th-century Carnatic War, the fort in Vellore was regarded as the greatest and strongest bastion. The district's monuments paint a striking picture of the city's development over time. The southern kingdoms and their capital cities saw numerous transformations in the centuries preceding India's independence. During the reign of the final Mughal Emperor, in 1810, the northern and southern parts of Arcot were included in the political map. The two districts, North and South Arcot, were created later in 1908. The North Arcot district's first capital was Chittoor, which is now in Andhra Pradesh. It served as the British military's main base ever since. 1911 saw Vellore become the capital of North Arcot District, which included Thiruvannamalai and Vellore. Vellore was known for its contribution to military service. The Christian Medical College constructed in the 1900s made Vellore a prominent landmark in India. Post-independence, Vellore has been one of the important locations of Tamil Nadu.

2.3 Trend Growth of Vellore LPA

Initially the major settlement is formed around Vellore Fort. The settlement became more densified after the formation Christian Medical College near Vellore Fort. Slowly the development started to spread toward the southern boundary of the Vellore Corporation. After the construction of National Highway 48 (Chennai – Bangalore Highway) and National Highway 234 (Villupuram – Bangalore) the settlement started to grow in a ribbon development along the Highways linearly. Another important node in Vellore LPA is Kadpadi Junction first the settlement started to grow around the Katpadi Railway Junction and after the construction of State Highway 59 (Katpadi - Tiruvalam) the settlement started to grow alone the SH. An important catalyst for the growth of settlement on the southern side of the Palar River is Vellore Institute of Technology. As Vellore developed as a major educational and healthcare hub the settlement started to develop around the Institutions. After the corporation boundary new settlements stared to form along the NH48 and NH234. In the last Decade roads paved way for the rapid growth of settlement outer side the corporation Boundary. Due to the presence of Vellore and Tiruvalam Reserved Forest of the East, Kanjanur Reserved Forest on the North and Kailasagiri Reserved Forest of the South the growth of settlement is restricted within the Vellore LPA boundary. The Map 2.2 shows the Dynamics of settlements in Vellore LPA.

2.4 Regional Context

Vellore LPA is bound by Andhra Pradesh in the North, Ranipet District in the East, Vanniyambadi in the South, and Gudiyatham in the West. It is well connected to the adjacent district headquarters Ranipet, Tiruvannamalai, Chittor by NH and SH. The National Highways passing through Vellore are NH 48 (Bangalore – Chennai Road) connecting Hosur, Krishnagiri, Ambur and Vellore, NH 234 (Mangalore to Villuppuram), NH 4 from Ranipet to Chennai and the Cuddalore – Chittoor. Vellore is well connected with the major cities in the districts and states of Tamil Nadu, Andhra Pradesh and Karnataka. Vellore has three railway stations viz, Katpadi Junction, Vellore Cantonment and Vellore Town. The Katpadi Junction is Major railway Junction in Vellore district, which is connecting in the Chennai – Bangalore broad – gauge line running to Chennai, Bangalore, Tirupathi, Salem, Coimbatore, Palakad, Ernakulam, Tiruvanatham and Villupuram, Trichy line. The Vellore airport was sanctioned under the second phase of the UDAN-RCS (Ude Desh ka Aam Naagrik- Regional Connectivity) Scheme and planning to connect the Chennai-Vellore-Bengaluru route in both directions. 2.5 Physical Characteristics

2.5.1 Climate and Rainfall

The climate in Vellore is tropical. Precipitation levels in the winter are substantially less than those in the summer. This specific weather pattern is classified as Aw (Tropical Savannah) by the Köppen-Geiger climate classification system. Based on available statistics, the average annual temperature recorded in Vellore is 26.9 °C. According to weather records, there is 938 mm of precipitation on an annual basis. The monthly maximum and minimum temperatures are given in figure 2.3 below. It could be seen the temperatures are highest in May and lowest in December.

(Source: Accuweather)

Figure 2.3 Mean Temperature in Vellore

Verified RealEstate™

The difference in precipitation between the wettest and driest months is 169 mm. The average temperature varies by 8.7 °C during the course of the year. November has the highest relative humidity of any month at 76.82 percent. May has the lowest relative humidity of any month with 52.38%. October (1.90 days) is the month with the most rainfall. February has the fewest number of days (18.03) in the year. The following Table 2.4 shows the average climatic scenario in Vellore.

2.5.5 Forests

There are three reserved forests in the Vellore Local Planning Area, viz., Konjanur reserved forest, Vellore reserved forest, Tiruvalam plantation reserved forest and Vellore reserved forest. Konjanur lies in the Northern part of LPA, Tiruvalam Plantation reserved forest lies in the North Eastern part of the LPA, and Vellore Forest lies in the Eastern of LPA.

2.6 Summary

Vellore Master Plan aims for holistic development of the area by improving the socio-economic conditions and enhancing the quality of life by the generation of employment opportunities, increasing the connectivity and improving the infrastructure facilities. Vellore LPA covers a total area of 314.07 Sq. Km., consisting of Vellore Municipal Corporation, 3 taluks, 2 Town panchayats and 43 revenue villages along with 3 Reserved Forests. Vellore is well connected to other districts in Tamil Nadu and with the districts of Andhra Pradesh and Karnataka. Vellore lies in the Palar River Basin and the topography is almost flat with a slope from west to east. Vellore had been a significant contributor to the history of Tamil Nadu and to that of India.

This Master Plan will focus on developing Vellore into self-sustaining entity with a robust economy, infrastructure facilities and facilities and inclusive growth.

Verified RealEstate™

3. Review of Previous Master Plan 2011

3.1 Background

The Vellore Local Planning Area in Tamil Nadu was declared under section 10(1) of the Tamil Nadu Town and Country Planning Act, 1971. This declaration was made by the Department of Rural Development and Local Administration Department of the Government of Tamil Nadu through G.O. Ms. 1086 RD & LA, dated 23.04.1974.

Later, the declaration was confirmed under section 10(4) of the same act through G.O. Ms. No. 2110 RD & LA, dated 23.04.1974. Furthermore, the Vellore Local Planning Area was constituted under section 11(1) and (3) of the Tamil Nadu Town and Country Planning Act, 1971 in G.O. Ms. No. 1138, dated 7th June 1976.

The Master Plan for Vellore Local Planning Area was prepared and consented in G.O.Ms.No.55, Housing and Urban Development Department dated 08.01.1983 and approved in G.O.Ms.No.399, H & UD Department dated 29.06.1992.

As per the provision in Sec.32(2) (b) of Town and Country planning Act 1971, Master plan has to be reviewed once in five years. In accordance of the same, it was reviewed in G.O.Ms.No.132, H & UD Department dated 21.04.2005 and approved in G.O.Ms.No.49 H & UD Department dated 25.02.2011.

Verified PadEstate™

3.2 Master Plan for Vellore Local Planning Area 1992

3.2.1 Objective of the Master Plan

The objective of the Vellore LPA Master Plan is to formulate a long-term vision and strategy to make the LPA vibrant, liveable and creditworthy. It will endorse growth in desired direction, promote economic development, improving service delivery and providing amenities to its people. It ensures rational policy choices besides providing a flexible frame work based on ground realities for defined time period. Besides rationalizing the land use pattern, it will also facilitate the identification of sectorial investments and reform areas needed to transform the LPA.

3.2.2 Jurisdiction Vellore LPA

Vellore Local Planning Area has an area of 191.66 sq.km, covering Vellore Town, 8 Town Panchayats, 24 Revenue Villages and 2 Reserve Forests. List of villages in LPA as per Master Plan 1992 are given in Annexure II. The Master Plan of 1992 covers an area of 54.57% of the extended LPA, which had been constituted in 17.10.2016

3.2.3 Distribution of Land Use

Vellore LPA Master Plan had been prepared by considering 1973 as the base year and ultimate year of 2001. The comparison of land use break-up of the base year 1973 with proposed year 2001 are tabulated in Table 3.1. Developed area in 1973 is 19.88 Sq. Km that is 10.37 % of the total area and then it is increased to 24.77% that is 47.48 Sq. Km.

The total undevelopable area in base year master plan 1973 is 171.83 Sq. Km which is 89.63 % of the total LPA area. In 2001, the total undevelopable area is 144.18 Sq. Km that is 75.23% of the total area.

Verified RealEstate™

The developable land is increased mainly due to the conversion of agricultural land in to residential land. The Undevelopable land in LPA is more because the LPA is surrounded with Vellore R.F, Punganur R.F and Kaliashagiri R.F. Other that this there are small hillocks which are present within the LPA boundary.

3.3 Review of Master Plan In 2011

The review of the Master Plan had been prepared and undertaking both primary and secondary surveys in the year of 2001. Developed area in 2001 is 24.77% of the total area and then proposed to 40.44% in 2011. It envisioned to develop 63.22 % more to the existing developed land. Residential and commercial land uses are proposed to increase by 60.17% and 182.28% respectively of already existing. Table 3.2 listed the land use distribution as per review of Master Plan 2011.

Verified RealEstate™

Total Developed Area	45.89	47.48	1.59
Total Undeveloped Area	145.77	144.18	-1.59
Total Area	**191.66**	**191.66**	

Source: Vellore Master Plan Review Approval- 2011

Verified RealEstate ™

3.3.2 Projected Population

The Master Plan estimated a population of 5,49,095 for year 2011 using geometric population projection method. As per Census 2011, LPA had 5,45,292 population and it can be observed that less than 1% decrease in estimated population.

3.3.3 Development Strategy

The existing developed land covers 24.77% (year 2001) and proposed developed land covers 40.44% (year 2011) of the total area of the Vellore LPA. Remaining existing undeveloped land area covers 75.23% (year 2011) under agriculture, water bodies, hillocks and forest, and proposed undeveloped land area covers 59.56% under agriculture, water bodies and forest.

- Residential land use in the year 2001 is 3309.02 hectares (includes roads, lanes and layout reservation). And proposed to increase to 5300 ha as per the anticipated population. In this, most of the area developed by TNHB (Tamil Nadu Housing Board) site and service schemes in the Vellore LPA.

- The commercial use (includes railway station, bus stand, Market, Mandies, services industries, etc.) is of 123.99 hectares in the year 2001 and it is proposed to 350 ha for the year 2011.

- In the Master Plan proposals, only major industrial use is normally indicated. The area occupied under this category is 188.3 hectares and is proposed for year 2011 is 600 hectares.

- The existing area under this educational use in the year 2001 is 267.81 hectares and is allocated for the year 2011

Verified RealEstate™

is 280 hectares. Proposed educational facilities are enough for the planning period (10 years).

- The existing area under this public and semi-public use in the year 2001 is 366.27 hectares and is proposed for the year 2011 is 520 hectares, because most of the Government offices were in rental buildings in Vellore, Gandhinagar and Sathuvachari. Hence additional area was needed.

- The existing area under transportation and communication land use is only 492.7 hectares. For the year 2011 it is proposed to 700 hectares because of existing area is less to cater the present population needs. As per the Master Plan, following were the suggested proposals in transportation sector:

- Widening of NH46 to 4-Lane

- Providing Traffic Management Measures like parking, subways, bus bays, semi-auto signals, truck terminals, etc.

- New bypass proposals (Connecting NH46 and SH9 at Pennathur and Konavattam with a length of 7 kms and connecting NH46 and SH9 at Sathuvachari and Dharapadavedu with a length of 6.1kms.

Verified RealEstate™

3.3.4 Conservation of Heritage places

The Vellore LPA has rich heritage that needs to be preserved, conserved and promoted to future generations. Vellore Fort is the identified major heritage structure and is a large 16th-century fort situated in heart of the Vellore city. These further need to be conserved with effective steps to be taken on priority to conserve, preserve and promote the ambience of the heritage to the future generations. Apart from the above, Clock Tower, a 150-year-old Church, Jalakandeswarar Temple and State Government Museum inside the Vellore Fort.

3.3.5 Agriculture and Reserved Forest

The existing agriculture dry land area (8552.13 hectares) had been converted into residential, commercial, industrial and institutional. 5843 hectares of wet land area is reserved for agricultural use in the proposed land use, 2011. The area proposed under water bodies and reserved forest is about 2103 hectares and 3470 hectares respectively. No major significant change, except a very less modification is proposed for these land uses.

3.3.6 Zoning Regulations

The proposed land use plan of the Master Plan of Vellore LPA followed zoning regulations under section 49 of Town and Country Planning Act, 1971. The following are the use zones as directed by Government in G.O. Ms. No. 1730, RD & LA. Department dated 24.7.74.

- Residential Use Zone
- Commercial Use Zone
- Industrial use Zone
- Educational Use Zone
- Public and Semi-Public Use Zone
- Agriculture Use Zone

Verified RealEstate™

3.3.7 The major concerns in the Review of Master Plan - 2011

Based on the development strategy and zoning regulation followed in this Vellore LPA Review of Master Review 2011, the following issues are identified and that is in consideration of preparing Vellore LPA Master Plan 2041.

3.3.8 Land Use

The proposed land use distribution for the Vellore town for the horizon year 2011, reflect land use/ land cover analysis. There is an absence of clear policy for development of Fort in the Vellore Town. The heritage structures, existence of mixed land use within the core area of the Vellore town, huge vehicular congestion, absence of parking facilities and other need regulation.

3.3.9 Population Density Pattern

The proposed population density pattern is not reflected in the proposed land use plan of Vellore. The future urban areas are along the major transportation corridors. There is requirement of detailed site planning exercise with statutory provisions in these areas to prevent unplanned and unregulated future development.

3.3.10 Employment Structure

The Master Plan represents employment structure with nine categories of main worker's classification for Vellore LPA. The spatial distribution and quantification of the primary, secondary and tertiary worker's/ work zones need to be identified and reflected in the Master plan.

Verified RealEstate ™

3.3.11 Civil Amenities

Vellore facing with lack of infrastructure and civil amenities to accommodate the present population needs. The urban insanitary conditions and pollution of water bodies are the major problems. To overcome these, internal sewerage system, sewage treatment plants, low cost toilets, organized solid waste management and management of other hazardous wastes are necessary. Recycling of waste needs attention. Green concepts and solar energy utilization proposals also could have been explored.

3.3.12 Disaster Mitigation and Management

In the present Master Plan there are no provisions for disaster management (such as earthquake, fire, flood, water logging, etc.). Provision of Disaster Mitigation and Management is mandatory in the Master Plan. All new built-up to be made earthquake resistant.

This will also include mitigations related to flood, water logging, fire, etc and rain water harvesting is also mandatory. The concerned local bodies should keep updating the building bye laws to safeguard against disasters and ensure effective and impartial enforcement.

3.3.13 Conclusion

Rapid urbanization has overtaken the planning process in Vellore. Often enforcement is weak and also a lack of planning capacity, leading to loss of credibility. Land use and transport planning are conducted as separate exercises, leading to new development without integrating transport and transport infrastructure to further town's long-term visions. Responsibility for land-use and transport planning is fragmented between different agencies and different tiers of Government. In the Master Plan for the future planning process residential use near the market area (core area) is converted to commercial use in 2011.

Verified RealEstate™

Though majority of the area under this is presently operating as commercial, there exists residential development and will continue to coexist. Hence it is appropriate to categorize this as mixed land use. Further this is a classic case of non-integration of land use and transportation. This area developed as an organic development over the years and need to be provided adequate transport infrastructure to make it operate in a proper way. There exists room for development of transport infrastructure in this area.

3.4 Land Use Changes in Existing Land Use '1973' And '2001'

The total area of the Vellore LPA is about 19116.12 Ha as per last Master Plan. As discussed in Review of Master Plan 2011 in chapter II, DTCP has made land use survey in the year 2001 for the revision of Master Plan. The total developed land at the LPA constitutes to 24.77% of the total area of the LPA. Within the developed land, the residential area constituted 69.66%, commercial area accounted for 2.61 % and public & semi-public accounts for about 7.71%. About 14418.03 ha of land were under non – urban use or water, which accounts to about 75.23% of the total area. The higher proportion of land to be under this category is due to the presence of hills and the more active practice of agriculture during the survey period. The existing land use of Vellore LPA for 1973 and 2001 are listed in the Table 3.5 with the proposed land use for 2011. Figure 3.1 shows the pictorial pie chart of the developed and undeveloped land in Vellore LPA.

3.5 Land Use Changes in Vellore Town

In accordance with last Master Plans of Vellore, the area of Vellore town was 1,054.12 hectare and vicinity area were 18,112 ha. On comparing the Land use of Vellore town for the year 1973 and 2001, the developed area in the town has increased to 23.94%.

The highest increase can be seen in commercial land use, about 29.17 ha of land is changes to commercial land use in the year 2001. This increase of land use change in commercial land is by 90.53%. Another major change in land use is the increase in public & semi-Public land use categories, about 146.08 ha of land is used for this use in the year 2001.

Residential land use increased by 34.48% due to rapid urbanisation. Industrial land use increased by least of 1.30% in the year 2001. In the developed area, transportation land use has been reduced by 5.74%. The total agriculture land use decreased by 28.58% due to the urbanisation and conversion of dry lands.

Water bodies use changed by a maximum of 32.27% and the total undeveloped area is decreased by 30.94%. All these changes are an indicator for development and growth in the town.

The following Table 3.5 and Figure 3.2 provides the change in land use in the year 1973 and 2001 and the increase in the percentage of particular land use activity in the Vellore town.

3.6 Land Use Changes in Vellore Vicinity Area

On comparing the land use of Vellore Vicinity Area (i,e) LPA area outside the Vellore town limit for the year 1973 and 2001, the developed area in the town has increased to 187.78%. The highest increase can be seen in the commercial land use, about 59.35 ha of land is changes to commercial land use in the year 2001. This increase of land use change in commercial land is by maximum of 641.62%. Another major change in land use is the increase in public & semi-public land use category, about 488 ha of land is used for this use in the year 2001. Residential land use increased by 403.31% due to rapid urbanization. Industrial land use increased by 219.58% due to the presence of leather industries and tanneries.

Table 3.6: Land Use Changes in Vicinity area in Vellore LPA 1973 & 2001

Land use	Area (Sq. Km) as per 1973 land use	Area (Sq. Km) as per 2001 land use	Land use Changes (Sq. Km)
Residential	5.75	28.98	23.23
Commercial	0.092	0.68	0.58
Industrial	0.55	1.76	1.21
Public and Semi Public	3.77	4.88	1.11

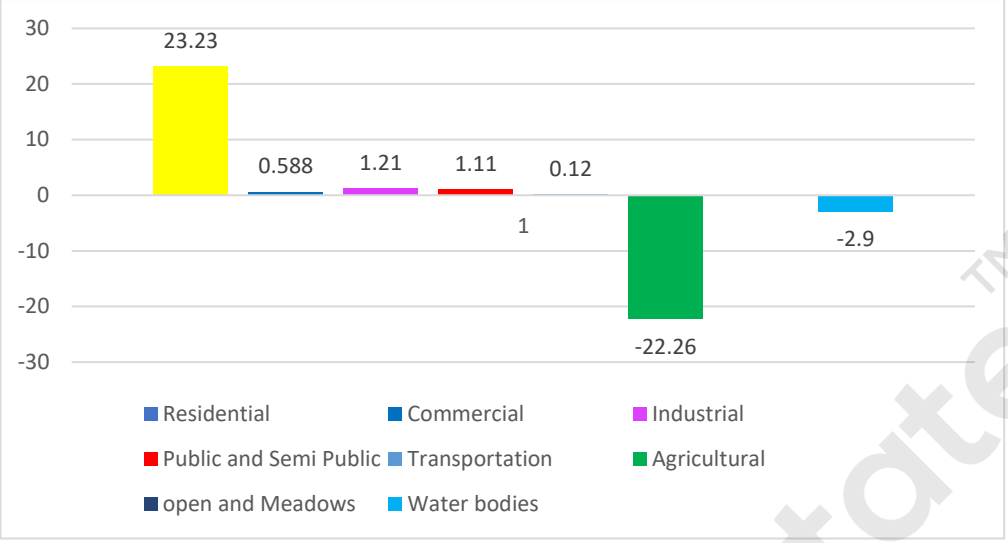

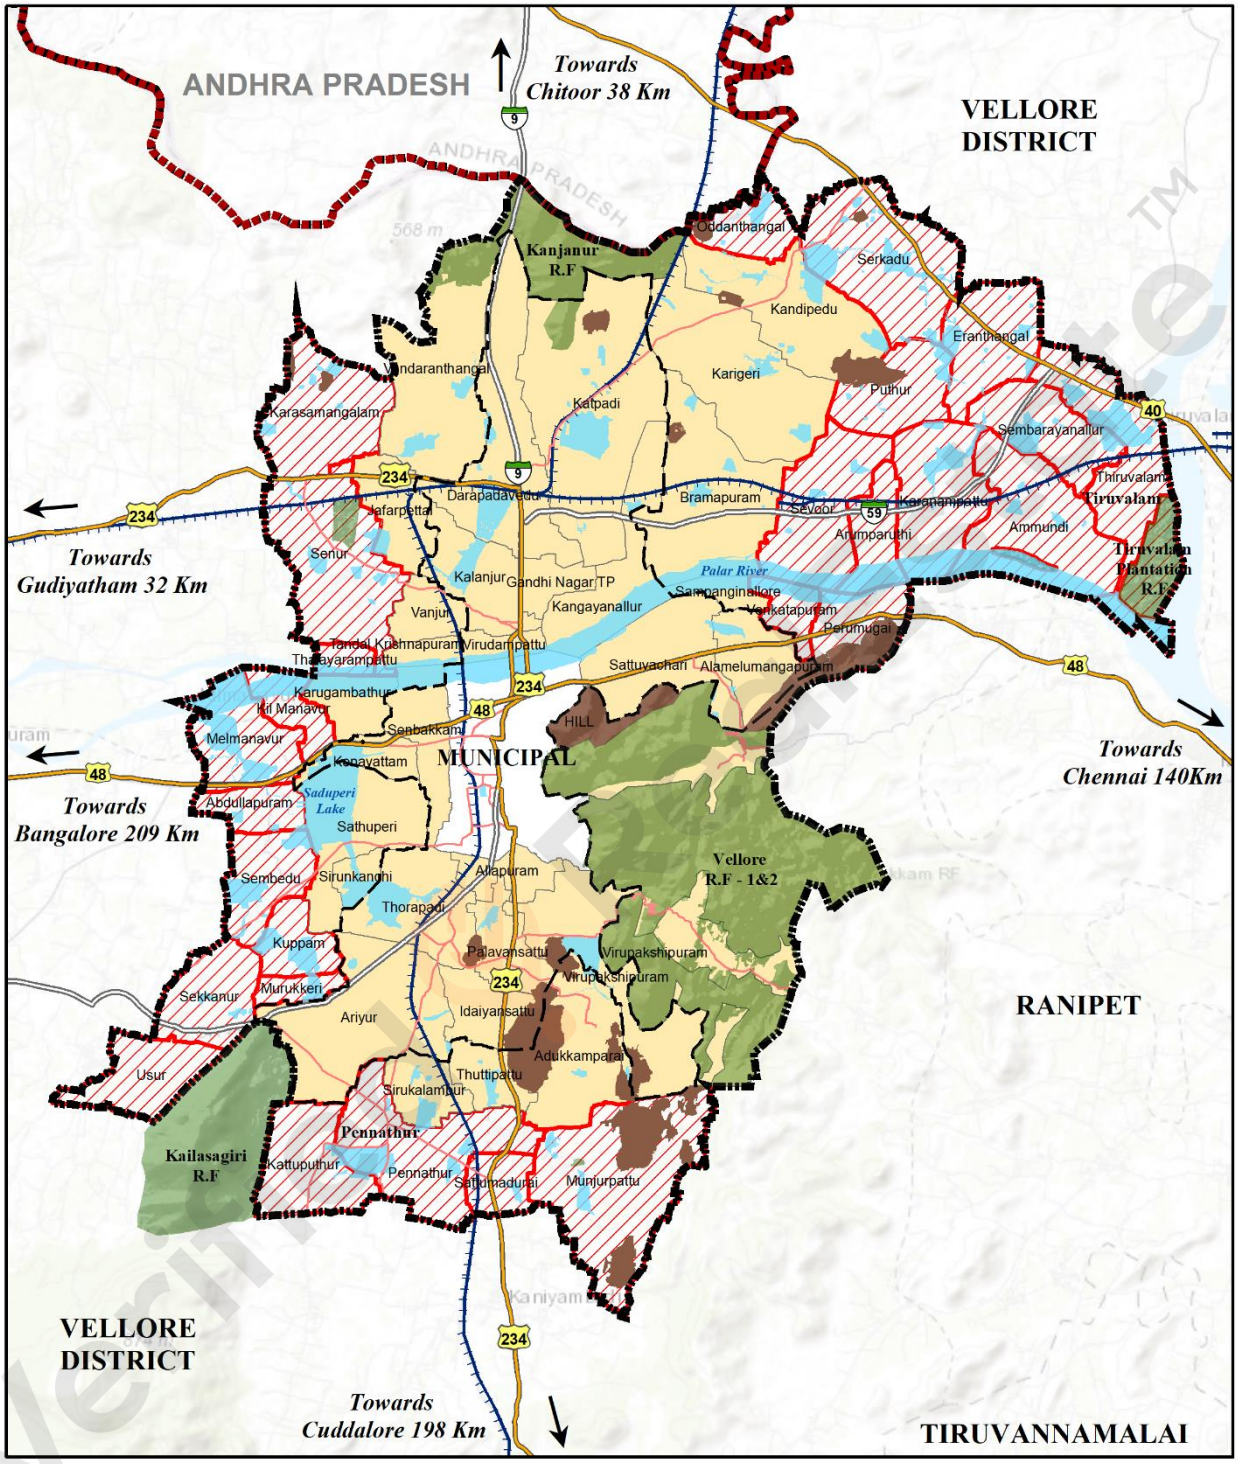

Figure 3.4: Land use Changes in Vicinity area in Vellore LPA

The total agricultural land use decreased by 21.21% due to the urbanization and conversion of dry lands. The total undeveloped area is decreased by 15.66% without any change in water bodies and reserve forests. All this change is an indicator for development and growth in the vicinity of the town. Table 3.5 provides the change in land use in the year 1973 and 2001 and the changes in percentage of particular land use activity in the Vellore vicinity area in LPA. Figure 3.3 shows the Land Use Changes in Vellore Vicinity area.

The following chapter will discuss about the demography and factors which have contributed to the demography sector.

4. Demography

4.1 Demographic Profile

The demographic study provides information about the trend of population growth, composition and distribution. This also provides information about workforce participation, literacy, sex ratio, migration patterns and highlights whether favourable conditions for growth is present in area or not which plays a major role in the planning process.

As per the Census 2011, the Vellore Municipal Corporation has a total population of 5,00,311 and the rest of the LPA has a population of 1,59,411. Together the Vellore LPA has a cumulative population of 6,59,742, out of which 3,27,766 are male and 3.31,976 are female. 78.65% of the total population is living in the urban area.

Total area of LPA is 314.07 Sq.Km which contributes 15.50% of total area of the district (2030.11 sq.km). Child (aged under 6 years) population of Vellore LPA is 10.20%, among them 51% are boys and 49% are girls. There are 1,54,819 households in LPA with an average household size of 4.3. The schedule caste accounts for around 16.75% of the total population whereas the scheduled tribes are 0.52% of the total population.

4.2 Trend of population and decadal growth rate

The overall population of the LPA has seen a gradual natural increase through the years 1981 to 2011, the population has increased by 38.43%. The table 4.1 shows the decadal population of the LPA from 1981 to 2011.The population of Vellore Corporation has shown a steady increase from 1951, the population has increased tenfold to 5,00,331 in the year 2011. The maximum decadal growth rate was experienced during 1961- 1971.

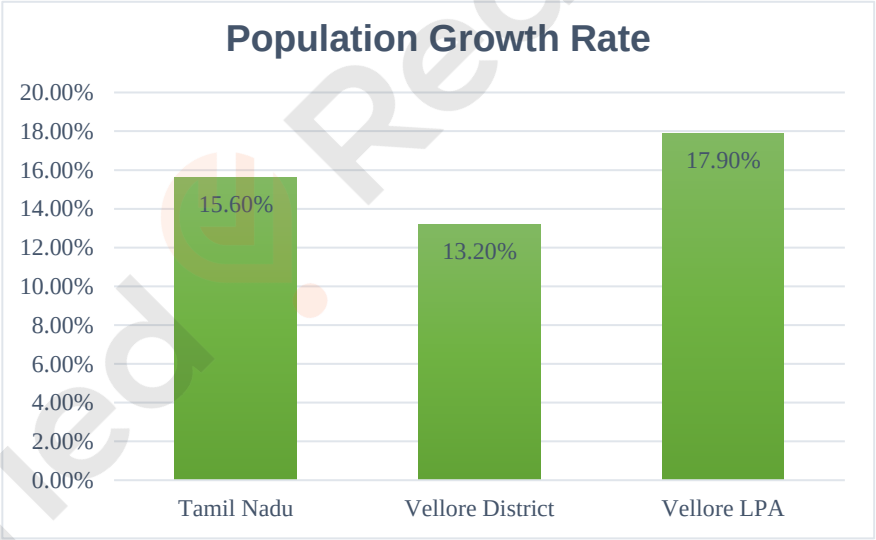

Verified © RedEstate™

Table 4.1 Decadal Population Increase in the LPA from 1981

Description	1981	1991	2001	2011
Vellore Corporation	299045	343881	423425	500331
Rest of LPA	105280	125268	136176	159411
Total Population of the LPA	404325	469149	559601	659742
Percentage Increase	-	16.03%	19.28%	17.90%

Source: Census of India

From the Table 4.1, it could be observed that the decadal growth rate has decreased by -1.38% in 2001-2011 as opposed to 1991 – 2001, the reason for this decrease is the migration of population to nearby Class 1 city, i.e., Chennai.

Source: Census of India

Figure 4.1 Population Growth Rate Comparison

The population growth rate of Vellore LPA is compared with the Tamil Nadu State (15.60 %) and Vellore District (13.20 %) from Figure 4.1, it is observed that the Vellore LPA shows more growth (17.90 %) in 2011 with state and district average.

Verified RealEstate™

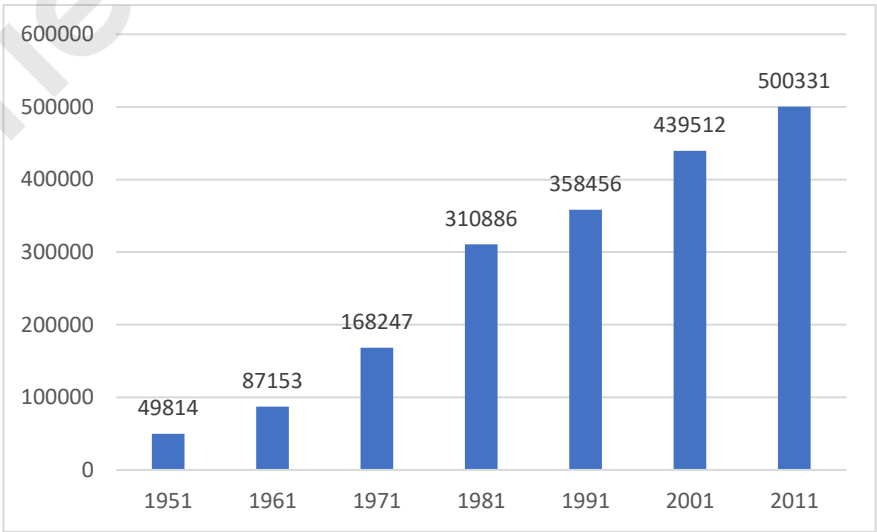

From this it is evident that the Vellore LPA is growing a step faster than the district. One of the main reasons for the growth is because Vellore is the headquarter of the Vellore District and Major trade activities have taken place here.

Table 4.2 shows the decadal growth rate comparison between Vellore Corporation, Vellore District, and Tamil Nadu Urban areas, it could be inferred from the table Vellore Municipal Corporation is ahead of Vellore District in Growth rate.

Table 4.2 Decadal Growth Rate Comparison

Decade	Decadal Growth Rate – Vellore Corporation	Decadal Growth Rate – Vellore District	Decadal Growth Rate – State Urban
1951-1961	74.96	7.84	14.88
1961-1971	93.05	16.23	38.7
1971-1981	84.78	22.41	27.98
1981-1991	15.30	13.34	19.59
1991-2001	22.61	10.49	44.06
2001-2011	13.84	13.50	27.04

Source: Census of India

Source: Census of India

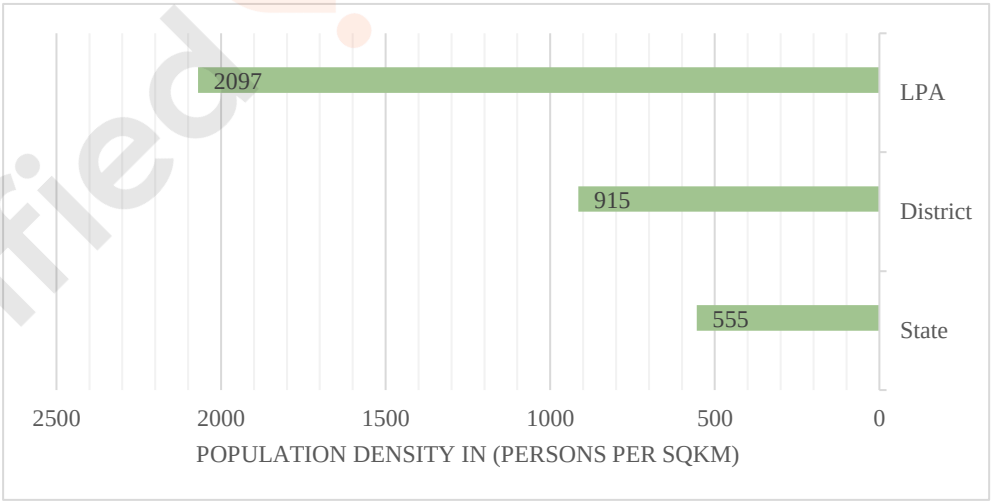

Figure 4.2 Population Growth in Vellore Corporation

Verified RealEstate™

The population growth in Vellore Corporation is shown in Figure 4.2, it is observed that the population growth in Vellore Corporation is steadily rising. The major factor for the increase in population because of major educational institutions and healthcare facilities. Another factor which are responsible for the population increase is the presence of major leather manufacturing industries. Before the bifurcation of Vellore, all the leather manufacturing industries were present in Vellore after bifurcation all the industries went to ranipet district. After 2011 there is no large leap in population growth in Vellore Corporation.

4.3 Population Density

The Population Density is defined as the number of persons per Square Kilometre. The Vellore LPA spreads 314.07 Sq. Km has the total population of 659742. The population density of the Vellore LPA is 2097. Comparing the population density with state and district as shown in the Figure 4.2, the Vellore LPA shows a higher population density of 2097 persons per Square Kilometre, this is due to higher population and less land area of LPA which is also a perfect indicator of urbanization.

Source: Census of India

Figure 4.3 Population Densities – Comparison between State and district

Verified RealEstate™

Table 4.3 shows the population density change for a decade in Vellore Urban and Rural, where in the case of urban area Katpadi shows the major change in population density since it has the Major Railway junction called Katpadi Junction which is the connecting point for the long-distance trains.

Alamelumangapuram and Virudampattu shows the significant change in population density since the National Highway 48 is passing through the village, improved connectivity and increase in commercial activity increases the population density of the village. Map 4.1 shows the 2011 population density of urban area in the LPA and Map 4.2 shows the population density in the rest of the LPA.

In the case of Rural, Thittupattu has major increase in the population density since it is adjacent to the Vellore Corporation boundary. A National Highway 234 passed through the village and increased economic activity are the major reasons for increase. Venkatapuram, Bhramapuram, Abdullapuram, Kelmanavanur, and Melmanavanur has increased population density because of the improved connectivity from National Highway and State Highway.

Thalayarampattu, Oddanthangal, Kuppam shows the negative population density. Thalayarmpattu is located near the banks of river Palar, majority of the land area comes in no development zone. Oddanthangal is located in the northernmost end of LPA. In Kuppam village most of the land comes under the water body. The Table:4.3 shows the trend of population and growth rate in Vellore LPA.

4.4 Scheduled caste and scheduled tribe population in the LPA

Table 4.4 shows the scheduled caste and scheduled tribe population in Vellore LPA. From Table 4.4 it is inferred that the population of the Scheduled Tribe and Scheduled Caste is increased significantly. The SC population constitutes 16.75 % (As per 2011 census) and ST population constitutes 0.52 % (As per 2011 census) of the overall population of the Vellore LPA. In urban area Vellore Municipal Corporation has more SC population whereas, in urban areas, Shenbakkam (TP) has more ST population. In rural area, Sandupperi has more SC population whereas Bhramapuram has more ST population in case of rural.

4.5 Sex Ratio

Sex ratio is an indicator to understand the demographic balance in a particular geographical area. Vellore LPA has sex ratio of 1013 and the child sex ratio is 960, the child sex ratios are higher than the state and district ratio. Sex ratio of LPA is lower than Vellore district due to trifurcation. Vellore Municipal Corporation has a sex ratio of 1010 and child sex ratio of 962 which is the highest in the average. The urban area of Vellore LPA has a higher ratio than the Tamil Nadu urban sex ratio. The sex ratios of Vellore LPA are highly influenced by the rural area of the LPA. The following Table 4.5 and Figure 4.4 give the Sex ratio and Child sex ratio of the LPA compared with Vellore District and Tamil Nadu State.

Table 4.5 Sex Ratio and Child Ratio in the LPA

Description	Sex Ratio	Child Ratio (0-6)
Tamil Nadu	996	943
Vellore District	1017	955
Vellore LPA	1013	960
Vellore Municipal Corporation	1010	962
Vellore Rest of LPA	1020	965

Figure 4.4 Comparison of sex ratio and child ratio of LPA

Verified RedEstate™

The LPA urban area has a sex ratio of 1011, which is lower than the sex ratio of LPA but higher than state and state urban. Amongst the census areas falling in Vellore Corporation, maximum sex ratio is for Shenbakkam town panchayat of 1065 and minimum of Katpadi town panchayat of 709. The LPA rural area has a sex ratio of 1020 females per males and the child sex ratio of 965 girls per 1000 boys, which are higher than the sex ratio of the LPA and the state. In rural area, maximum sex ratio is for Sirunkanchi village of 1,122 and minimum is Sathumadurai village of 972. Based on the above observation, Vellore LPA shows a perfect demographic balance with respect to male and female population. Table 4.6 shows the sex ratio of Vellore LPA.

4.6 Literacy rate

Literacy is one of the important social indicators for development. As per the 2011 census, the literacy rate is at 76.71% of Vellore LPA, 81.53% of males, and 71.96% of females which is more than the state literacy rate. Table 4.7 shows the comparison of literacy rate of LPA with the state and district.

Table 4.7 Comparison of literacy rate of LPA with the district and state

Description	Literacy Rate %		
	Total	Male	Female
Tamil Nadu	80.09	86.77	73.44
Vellore District	80.53	87.61	73.62
Vellore LPA	76.71	81.53	71.96
Vellore Corporation	78.47	82.68	74.31
Rest of LPA	70.81	77.54	64.22

Source: Census of India

Vellore Municipal Corporation has a literacy rate of 78.47% which is the highest in the LPA. The LPA urban area has a literacy ratio of 78.32%, which is higher than the LPA but lower than state, state urban and district. In urban area, maximum literacy ratio is for Gandhi Nagar TP of 89% and minimum of Pennathur TP of 72.40%.

The LPA rural area has a literacy ratio of 70.81%, which are lower than the LPA and the state. In rural areas, the maximum literacy ratio is registered for Sampanginallore village of 84.2% and minimum for Balamadai village of 51.70%. The Table 48 shows the literacy rate in Vellore LPA in case of urban Katpadi (TP) and Alamelumangapuram (CT) shows highest rate of percentage change in literacy rate compared to previous decade (2001). In rural, Thalayarampattu, Murukkeri, Karugampattur, Sampanginallore, Sembarayanallore shows the highest change is literacy rate compared to previous decade. Kuppam village shows the less change in literacy rate.

4.8 Population Growth and Projections

The population of urban and rural areas in Vellore LPA for last 4 decades are listed in the Table 4.10. The urban and rural population in 2011 is 5,18,909 and 1,40,833 respectively. Population is projected for urban and rural areas unit wise by Arithmetical Increase Method, Geometrical Increase Method and Incremental Increase method.

Population Projections in LPA are carried out by taking into account all villages and urban areas acting as individual elements. In the same lines, Population projections of urban areas in LPA are projected for Vellore City Municipal Corporation and the two town panchayats separately. In respect of the rural areas of LPA, population projections for all 40 villages have been done separately and adopted different methods.

Verified RealEstate TM

The following Table 4.10 shows the results of various projection methods used and Table 4.11 provides the projected population for the LPA.

Table 4.10 Results of Population Projection Methods

Description	1981	1991	2001	2011
Vellore Corporation	299045	343881	423425	500331

4.9 Summary

As per the Census 2011, the Vellore Municipal Corporation has a total population of 5,00,311 and the rest of the LPA has a population of 1,59,411. Together the Vellore LPA has a cumulative population of 6,59,742, out of which 3,27,766 are male and 3,31,976 are female. 78.65% of the total population is living in the urban area. Total area of LPA is 314.07 Sq. Km which contributes 15.50% of total area of the district (2030.11 sq.km). Child (aged under 6 years) population of Vellore LPA is 10.20%, among them 51% are boys and 49% are girls. There are 1,54,819 households in LPA with an average household size of 4.3. The schedule caste accounts for around 16.75% of the total population whereas the scheduled tribes are 0.52% of the total population.

Population Projection for the LPA has been done using various methods, from which the projected population for 2041 is estimated to be 10,47,29.

5. Economy

The economy is the backbone for the growth and progress of any city or region. The economy is studied concerning the primary sector, secondary sector, and tertiary sector. The primary sector comprises agriculture and allied activities, the secondary sector consists of industries and tertiary sector consists of service-related activities. Vellore City has been a significant commercial, administrative, and educational center of the region. This section provides a detailed analysis of the current economic situation in the Vellore district and planning area, including the current workforce participation rate.

5.1 Economic profile of Vellore LPA

Vellore has a diverse economy, primarily based in the service industries, leather processing, show manufacturing, automobile assembly, precision tool milling, etc., to name a few. The SIDCO and SIPCOT industrial parks also play a crucial role in the economy of Vellore. As per the Census 2011, majority of the workers, 85% of total workers, are engaged in tertiary sector in the Vellore LPA. The following Table 5.1 shows the split up of work force among various sectors. Map 5.1 shows the Workforce Participation Rate of LPA

Table 5.1 Work force composition in Vellore LPA

Location	Primary Sector	Secondary Sector	Tertiary Sector
Vellore Corporation	4740	12152	167699
Rest Of LPA	15466	6274	44631
Total Workers	20206	18426	212330
Percentage contribution	8.00%	7.00%	85%

(Source: Census of India)

Verified by PeoEstate

5.2 Workforce composition in Vellore LPA

Out of the main workforce, about 3 % of the workers are cultivators, 3.52% are agricultural labourers followed by 6.95% of household industry workers in Vellore LPA region. About 86.53% of main workers are involved in other workers category. In the urban area of the LPA, about 90.76% of workers are involved in the other workers category, while in Municipal Corporation about 91.82% of the main workers are involved in the other workers category. The comparison of main workers in the LPA with district and state is shown in Table 5.2 below.

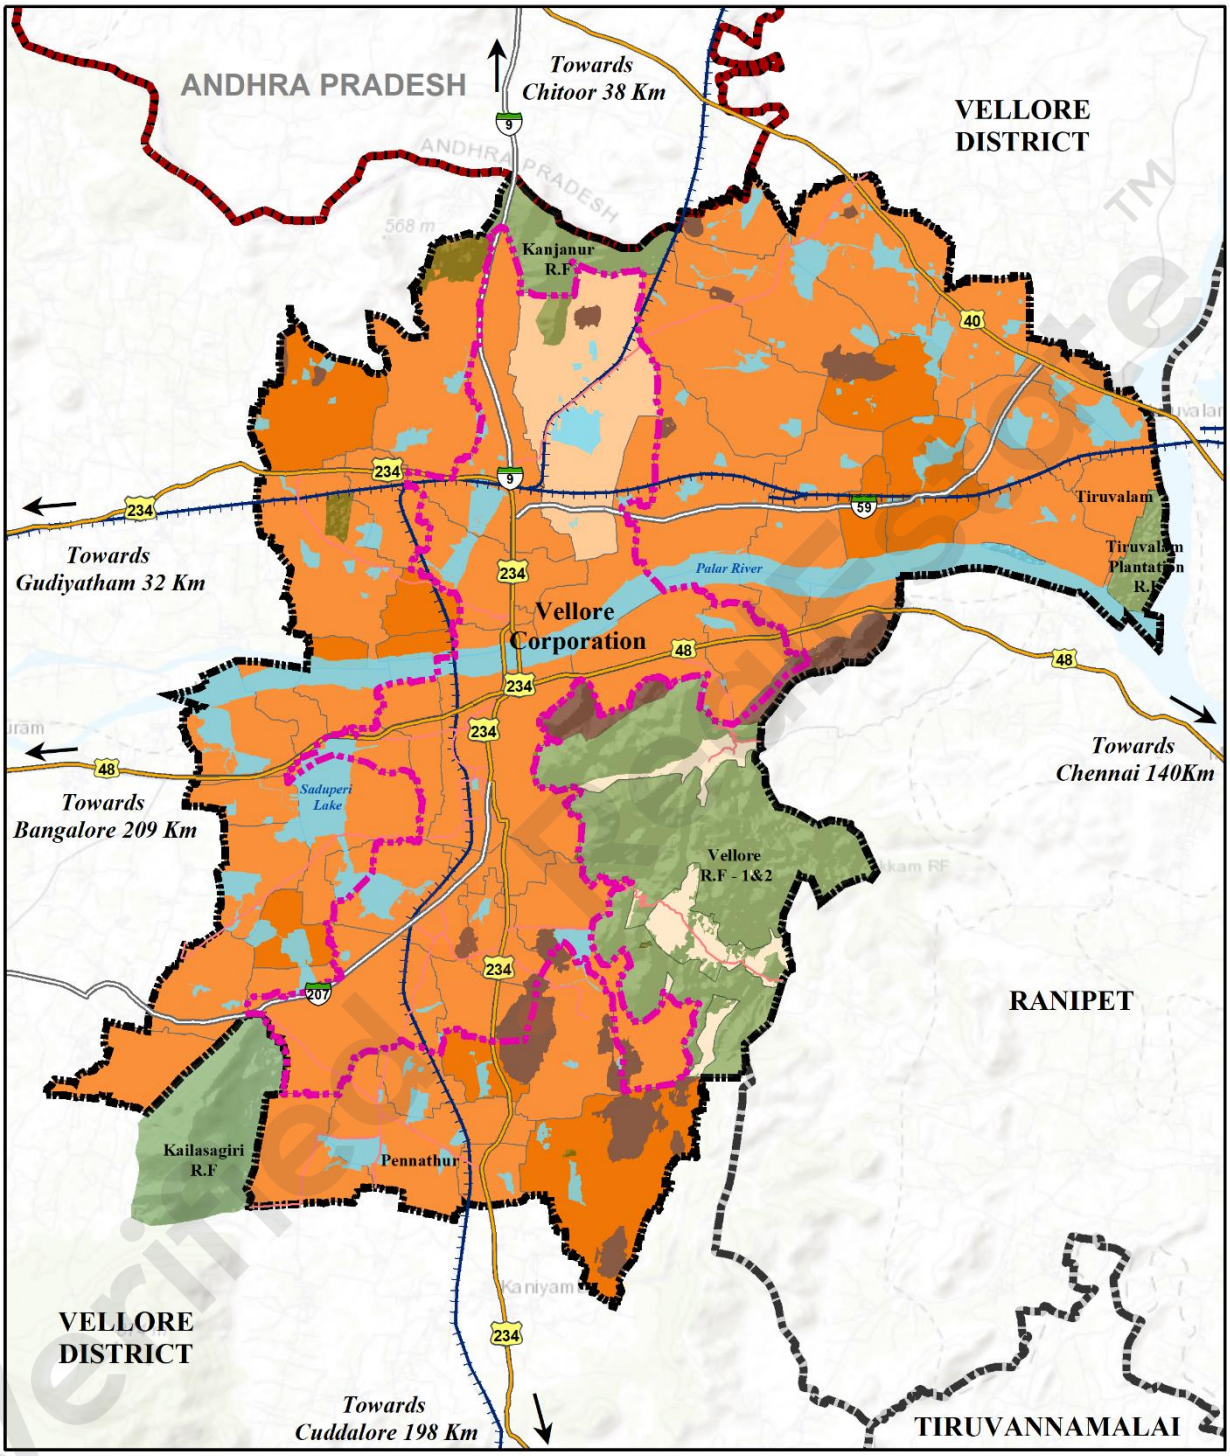

Table 5.2 Comparison of main workers in the LPA with district and state

Name	Main Workers	Cultivators (%)	Agricultural Laborers (%)	Workers in Household Industry (%)	Other Workers (%)

Verified Report

According to 2011 census, there are 32035 marginal workers in the LPA, out of which 71.45% of the workers are involved in other worker's category which is higher than the state ratio but lower than state urban. Only about 3.40% of marginal workers are cultivators followed by 15.15% of agricultural labourers. The remaining 10% of the marginal workers are involved in the household industries. The Table 5.3 shown below shows the comparison of marginal workers in the LPA with that of the district and state.

Table 5.3 Marginal Workers Composition in LPA

(Source: Census of India)

From the above Table 5.4 which shows the sectoral composition of Workers in Vellore LPA during 2001 and 2011, it is observed that the workforce composition of cultivators has seen a decline throughout the LPA except for Kattuputhur, similar downward trends is observed in Agricultural labourers throughout the LPA except for Kuppam and Balamadai. The other composition has seen a drastic increase from 2001 to 2011 through the LPA, due to the availability of better income and work conditions. Though Vellore LPA has 38.16% of land under agricultural land use, the decreasing trend of work force participation in the sector will lead to decline of agriculture. The development of agriculture is necessary for sustainable growth of the community and promote food security.

Verified RealEstate

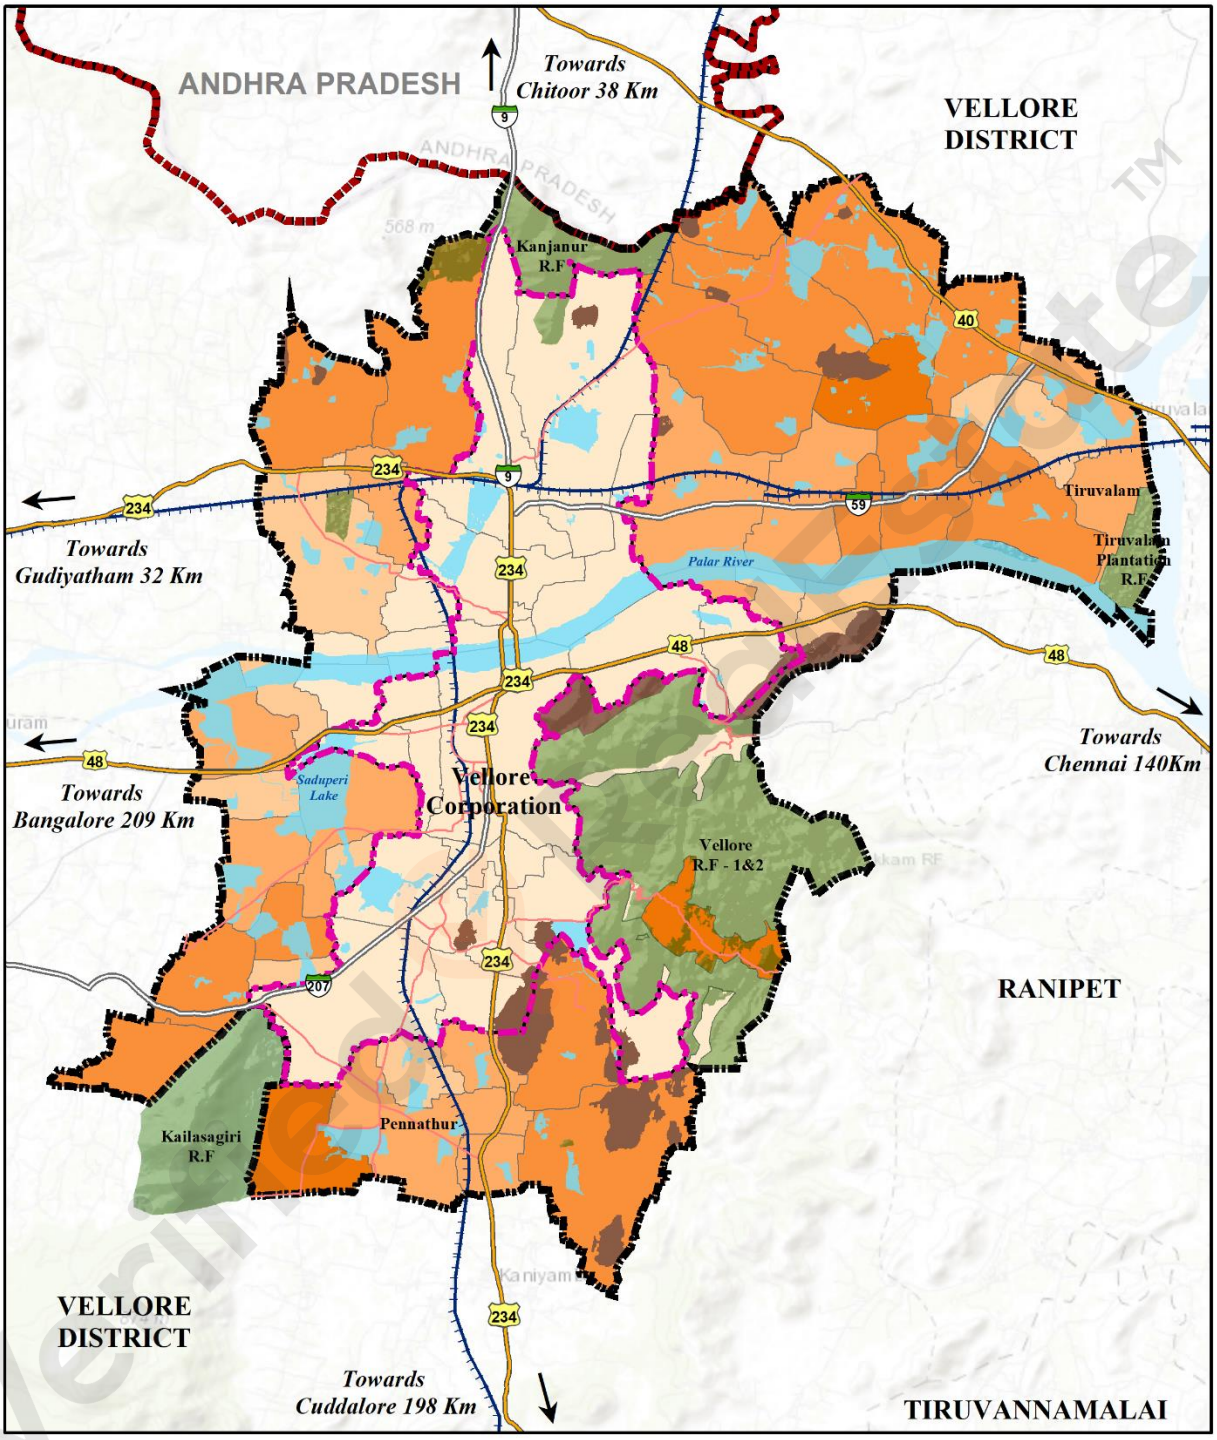

5.3 Agriculture

Agriculture is considered as the backbone of the economy; it is the important source of livelihood in many villages in the LPA. The main commodities cultivated are paddy, sugarcane, and groundnut, in addition to this vegetables, ragi, greens, bananas, dhoor dhal, and corn are also grown. Out of the total workforce only 8% are in involved in agriculture as per the 2011 census which is a decline from the 2001 census. This is very large imbalance as nearly 38% of land is under agricultural land use. Lucrative income and better quality of life in other activities are continuously attracting people from agriculture.

There are three Uzhavar Sandhai in Vellore LPA which are located in Kagithapattarai, Velapadi Toll Gate, and Katpadi Railway Station. There are two storage units which are present in Vellore LPA one is Vellore Ware House which has a capacity of 12500 Metric Tonnes and the other is Katpadi Ware House which has a capacity of 3400 Metric Tonnes.

5.4 Industries

Vellore has been a home for many industries, the nearly flat terrain on the Northern side and some undulated terrain on the southern side of the LPA. Vellore is placed in a strategic located which has the very near proximity for SIPCOT in Ranipet District. Majority of the industries which are located in Ranipet SPICOT is leather tanneries. The Bharath Heavy Electricals Limited is also located in Ranipet district.

The SIPCOT and SIDCO industrial parks which were set up in the 1970s has not only generated job opportunities but have also improved the life style of the people. Un-bifurcated Vellore District was the first region to get Electronics manufacturing cluster in Tamil Nadu. The LPA is well known for its contributor of finished leather products, Vellore leather accounts for 37% of the leather in the country. Tamil Nadu Industrial Explosives Limited (TEL) which is India's only government controlled and Asia's largest explosive manufacturing company is located in Katpadi. In addition to above, there are many categories of industries of various scale are found in Vellore LPA, the details of which are given below in Table 5.5. Small scale gold ornaments manufacturing companies are present in the fringe areas of Vellore. In Vellore LPA manufacturing of food products and Beverages Company are present in more numbers. The workforce participation in secondary sector is 7.34% which is less than the primary sector.

5.5 Service Sector

The majority of the workforce in LPA are employed in the tertiary sector. Accommodation and food service activities and, wholesale and retail trade along with repair of motor vehicles and motorcycles are the major categories present in the LPA. In addition to this, there are many other categories present in the LPA, the details of which are shown in Table 5.6 below. Vellore is known for its Educational and Medical Tourism, since majority of top educational and health care institutions are present inside Vellore LPA. The workforce participation for tertiary sector in Vellore LPA is 84.61%.

Vellore LPA also has more tourist places which also attracts tourist from other states. A huge percentage of workforce population is working in tourism sector which is also major contributor of GDP for this sector. There is more scope for creating more job in tertiary sector.

5.7 Summary

Vellore has a diverse economy, primarily based in the service industries, leather processing, show manufacturing, automobile assembly, precision tool milling, etc., to name a few. The SIDCO and SIPCOT industrial parks also play a crucial role in the economy of Vellore. Out of the total workforce, only 8% are involved in agriculture as per the 2011 census which is a decline from the 2001 census. This is a very large imbalance as nearly 38% of the land is under agricultural land use. Lucrative income and better quality of life in other activities are continuously attracting people from agriculture. The service sector has been the major employment generator. The accommodation and retail category is major category present in the Vellore LPA.

Based on the resources and prospects, it could be inferred that Vellore LPA has bountiful opportunities for employment generation. Employment projection for Vellore LPA has been done considering the past trend of workforce participation and projected population.

6. Housing

One of the most important components of social, civic, and economic growth is housing. For each urban region, having suitable residential zones in relation to workplaces, industrial sectors, and access to other facilities is also essential to a successful city development plan. The housing sector's primary goals are to provide aid to everyone, with a special focus on the impoverished and homeless, as well as to increase the amount of developed land available for housing—possibly through land-use planning.

6.1 Existing Housing Scenario

Housing growth rate in Vellore LPA for the decade 2001 – 2011 is 27.97%. In urban area Alamelumangapuram shows the highest increase growth of household since it is present near National Highway 48. Increased in connectivity and increase in economic activity is main reason for increase in houses. Rest of the Wards and Villages in area continuous to grow at a faster rate. In rural area, Thuthipattu show the massive growth of household since it is adjacent to corporation boundary. It is also well connected to the main town through National Highway 234. Oddanthangal, Thalayarampattu, Kuppam shows the negative growth in households. Oddathangal is located in the northern most end of the LPA boundary and there is no proper road connectivity. In Thalayarampattu majority of the land comes under no development zone since it is present in the bank of river Palar. Table 6.1 shows the growth rate of household in Vellore LPA.

6.2 Existing Housing Condition

The existing housing condition for Vellore LPA is assessed based on 2011 census data, the housing condition can be determined based on three prominent attributes which include,

- Condition of house
- Type of structure (based on construction material used)
- Ownership of the house

The following Table 6.2 shows the existing housing condition of Vellore LPA.

Table 6.2 Existing Housing Condition in Vellore LPA

Category	Particulars	LPA
Total Households		1,69,144
Condition of House	Good	1,37,706
	Liveable	29,262

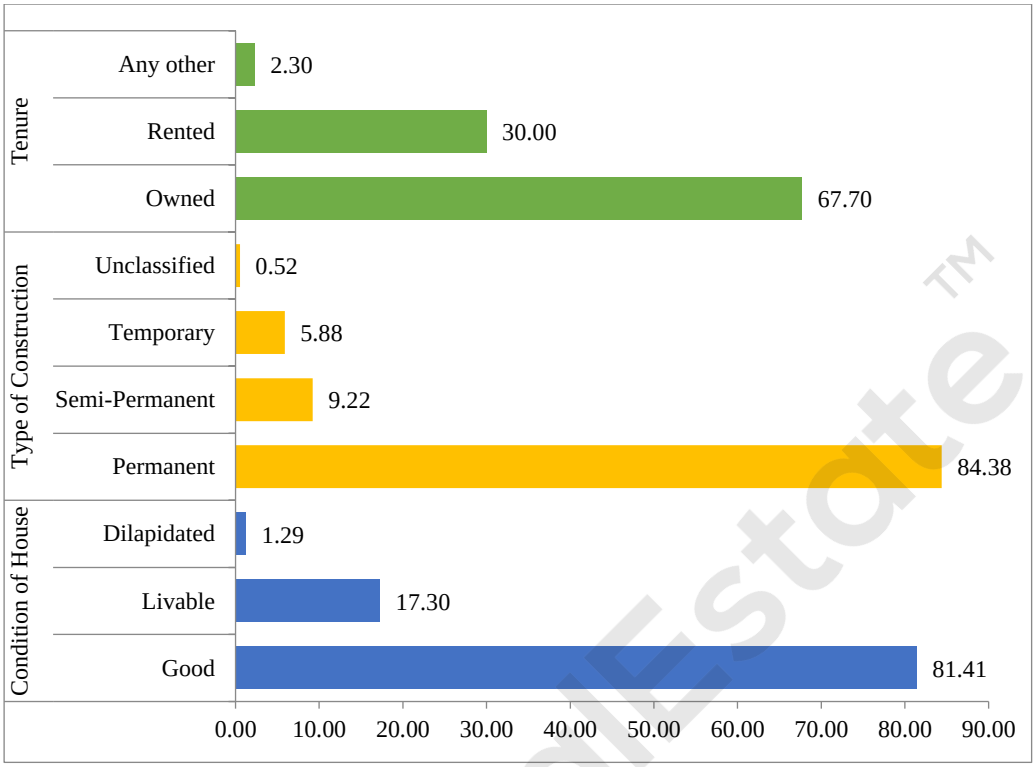

Verified RealEstate™

	Dilapidated	2,176
Type of Construction	Permanent	1,42,732
	Semi-Permanent	15,589
	Temporary	9,941
	Unclassifiable	882
Tenure	Owned	1,14,510
	Rented	50,751
	Any other	3,883

(Source: Census tables)

The above Table 6.2 gives the existing housing condition of Vellore LPA. These assessments of the housing units provide the existing shortage of housing in LPA Condition of houses is categorized into good, liveable, and dilapidated houses, of which the number of dilapidated houses are to be added with the existing shortage of housing units. The type of structure is further classified into permanent, semi-permanent and temporary houses depending upon their predominant construction materials of wall and roof. Temporary houses have been further classified into serviceable and non-serviceable depending upon their nature; this temporary housing is considered in the existing shortage of housing units. Ownership of the houses provides the breakage of owned and rented housing units within the Vellore LPA. The following Figure 6.1 provides the existing condition of housing in LPA based on the three attributes.

Verified © RedEstate™

(Source: Census Tables, Households by predominant materials of roof and wall of house, households by condition of house, ownership status)

Figure 6.1 Existing Housing Condition in Vellore LPA

The above Table 6.2 and Figure 6.1 provide the existing housing conditions in the LPA, the following will provide the percentage distribution of Households based on various attributes and their comparison in urban and rural areas of Vellore LPA.

6.3 Household Distribution by Condition of the House

From the Figure 6.2 it is inferred that about 81.13% of the households in the Vellore LPA are in good condition, which can have compared with the urban area which shows 82.01% of the housing units are in good conditions, whereas the rural area have a lower percentage as 78.15% of good houses. The percentage are high in case of liveable category in the rural area, they are about 20.13 % of the total household in the rural area are liveable, while the overall percentage of the liveable houses in the Vellore LPA accounts for about 17.57% of the total

Verified RealEstate™

households. Dilapidated houses are to be considered for calculating the existing housing needs. A small number of dilapidated houses exist in the urban area which is 1.18% of the total housing units. Comparatively rural area has little number of dilapidated households, which are about 1.71%. The total dilapidated households in the Vellore LPA are found to be 1.30% of the total households that is about 2,104 households.

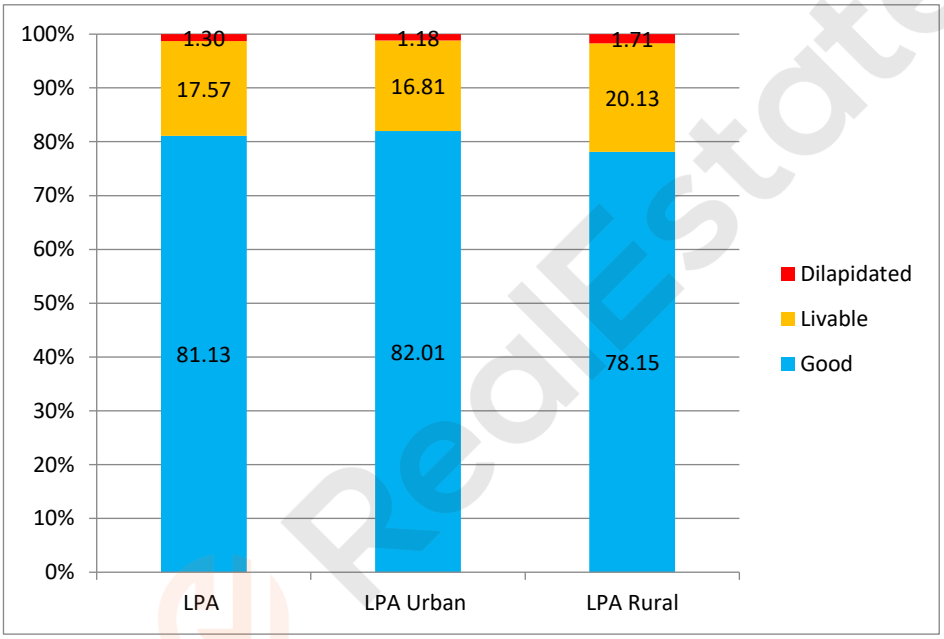

Figure 6.2 Household Distribution based on the Condition of House

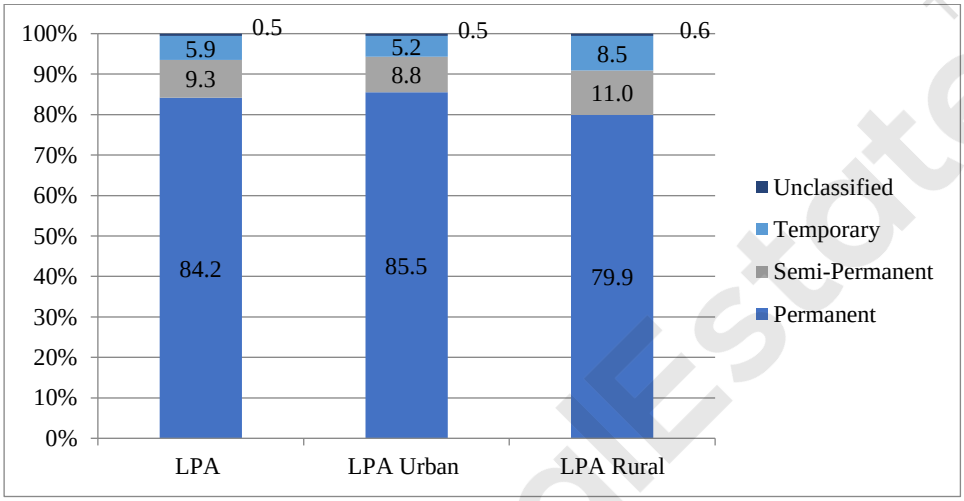

(Source: Census tables, HH-2- Household condition and the uses, Vellore Census – 2011)

6.4 Household distribution by type of construction

The type of construction of the house has a greater impact in the existing housing demand of the LPA. As per the type of construction about 84.2% of the household are permanent housing units in Vellore LPA which can be compared to 85.5 % of permanent housing units in urban are of LPA, whereas in rural area about only 79.9% of the total housing units are of permanent structure. It is followed by 9.3% of semi-permanent housing in LPA. The temporary housing units are higher in rural areas when compared to those in urban areas within the LPA. About 8.5% of the total

Verified by RealEstate TM

housing units in rural areas are temporary structures, that is about 3150 housing units are made of temporary materials. Figure 6.3 shows the household distribution based on the type of construction.

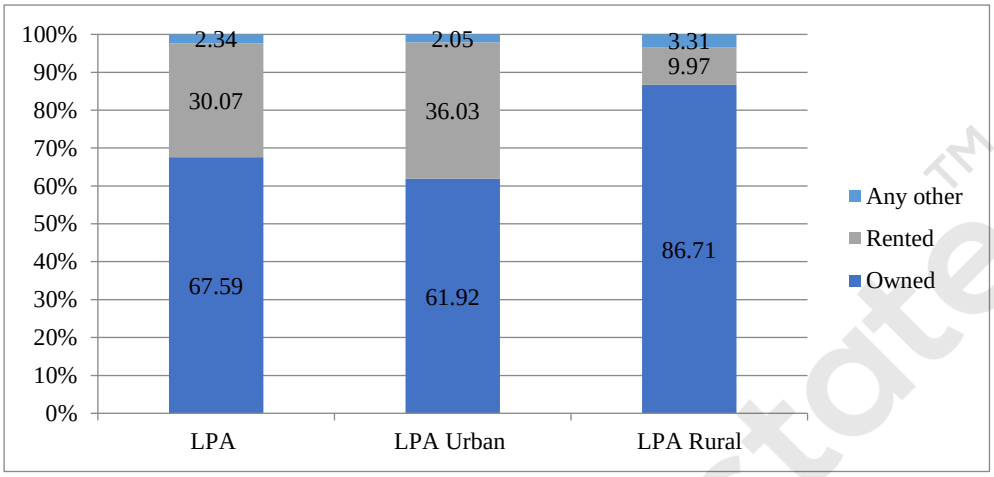

(Source: Census tables, HH-3: Households by predominant materials of roof and wall of census houses occupied by them, Vellore Census -2011)

Figure 6.3 Household distribution based on construction

6.5 Household distribution by tenure

Out of the total households in the Vellore LPA, the census data as shown in Figure 6.4 states that about 67.59% of the households are owned followed by about 30.07% of are rented in Vellore LPA. There percentage of the owned houses is highly influenced in the rural area of the Vellore LPA. 86.71% of the households in the rural area of Vellore LPA are owned whereas; in the urban area only 61.92% of the total households are owned. This can be due to the market rate for residential units; the rates of the residential units are high in the Vellore Corporation when compared to the nearby rural area. It can be seen from the below chart, that the percentage of rented housing in LPA is also directly related to the percentage of rental housing in the urban area. A small share of 2.34% of households in the LPA is contributed by another type of ownership i.e. for the public housing by the Government officials.

Verified RealEstate™

Figure 6.4 Household distribution based on the ownership status

6.6 Census House

There were 56,273 census houses in the old Vellore Municipal Corporation before expansion. Out of this, 53,566 houses are occupied which is about 95.19% of census houses. Only 41,325 houses are used for residential purposes and the remaining 12,241 houses are utilized for other purposes. About 290 houses are locked houses and 2,417 census houses are vacant which accounts for about 0.52% and 4.30% of the total household respectively as shown in Table 6.3.

Table 6.3 Status of Census Houses- Vellore Municipal Corporation

Values	Total No. of Census houses	Occupied census houses	Vacant Census house	Locked Census House
In numbers	56273	53566	2417	290
Percentage	100	95.19	4.30	0.52

(Source: Census Table, H-1: Census houses, Vellore Census – 2011)

Verified RedEstate™

The following Table 6.4 provides the use to which these census houses are put into. It can be seen that out of total census houses, only 73.44% of census houses is utilized for residential and residence cum other uses. The remaining percentages are used for other purposes other than residential use. Out of the total census houses, 0.52% are occupied and kept locked. The locked and vacant house can be used to meet the existing housing demand.

Table 6.4: Census House Usage

Usage	No. of census house	% of usage
Residence	40527	72.02
Residence cum other use	798	1.42
Shop / office	8966	15.93
School/College etc.	113	0.20

Locked	290	0.52

(Source: Census table, H-1: Census houses and the uses to which they are put, Vellore, Census -2011)

6.7 Condition of census houses

The total number of census houses used for residential purposes is 41,325 out of which 402 houses (0.97%) are dilapidated houses which are to be considered while estimating the housing gap. The following Table

Verified RealEstate

6.5 depicts the condition of the census house. The total number of census houses is considered after excluding the census houses used for other uses, locked houses, and vacant houses which is about 41,325 houses. Around 33,728 (81.62%) houses are in good condition in Vellore Municipal Corporation.

Table 6.5 Condition of census houses

Total No. of Census Houses	Condition of Census Houses		
	Good	Livable	Dilapidated
41325	33728	7195	402
Percentage (100)	81.62	17.41	0.97

(Source: Census table, H-2 Census houses use by condition, Vellore, Census -2011)

6.8 Existing Slum Scenario

There are a total of 59 slums in the Vellore City Municipal Corporation limit out of which none are notified slums. And about 33 slums in the LPA area outside the Corporation limit out of which 24 are notified. About 9.54% of the total population of LPA (66,403 persons) are living in slums. There are about 16,586 households in the slum with an average household size of 4. The following Tables 6.6 provide the population, household details, and sanitation and electricity facilities of the slum in Vellore Municipal Corporation and Vicinity areas.

6.9 Slum Census Houses

There are about 19,764 slum census houses present in Vellore LPA out of which 19,222 houses are occupied which 97.26% of census houses. Out of all 17,942 houses are used for residential purposes and the remaining 1,233 houses are used for other purposes. Only 47 houses are locked house and 542 vacant houses are present in the LPA. The following Table 6.7 provides the status of slum census houses. The total number of census houses used for residential purpose is 17,942 out of which 71.75% of houses are in good condition and about 287 houses (1.60) are dilapidated houses.

6.10 Pradhan Mantri Awas Yojana – Urban

The Pradhan Mantri Awas Yojana Scheme provides a Pucca house to all qualified urban households by the end of 2024, addressing the scarcity of urban housing among the EWS/LIG and MIG categories, including slum residents. Under PMAY-U, as of 2022, 8677 houses have been sanctioned, out of which 75.19% of the houses have been completed. Table 6.8 shows the status of PMAY -U in Vellore LPA. It should be noted that the houses are sanctioned under Beneficiary Led Individual House Construction category in Vellore LPA.

Table 6.8 Status of PMAY-U in Vellore LPA

6.11 Housing Projection

Housing requirement for the projected population is arrived at taking into account the additional population in 2041, slum households, dilapidated houses, and houseless population. Housing Projection is shown in Table 6.10. The housing projections are calculated to accommodate additional houses for the projected population. From the housing projections infrastructure required is also calculated.

For Housing projection, the projected population is taken to find out the additional population that requires houses. The houses sanctioned from the PMAY – U scheme are subtracted from the additional houses. Slum households, Kuccha houses, and dilapidated added to find out the additional households required.

From the below table, it is observed that an additional residential area of 6.95 sq. Km has to be created to cater to the projected population of LPA in 2041.

Verified RealEstate ™

Table 6.10 Housing Projection for Vellore LPA

Description	Population
Total Population 2011	659742
Projected Population 2041	1045253
Additional Population	385511
Additional Households Needed for the 2041 Population	91788
PMAY-Urban Sanctioned House	8677
Total House Household Required for 2041	83111
Slum Household	19764
Kuccha Houses	10832
Dilapidated Houses	2176
Net Additional Household Requires (2041)	115883
Average Household (Sq. M)	6953000
Residential Area required 2041 (Sq. Km)	**6.95**

6.12 Summary

One of the main objectives of land use planning is to solve the housing gap for existing and projected population. Villages having proximity to urban areas and major transport corridors have higher Household growth rates. A large share of population live in rented accommodation. Housing densities are very high in the core areas. The is high housing shortage both in terms of quality as well as quantity. About 9.54% of the total population of LPA are living in slums, most of which are deprived of basic amenities.

7. Physical Infrastructure

The degree of physical and social infrastructure availability, accessibility, and quality greatly influences the quality of life in each metropolitan region. The development of physical infrastructure is a key factor in economic growth. To maintain good urban health and lead productive lives, efficient solid waste collection and disposal, sewage, and water supply systems are necessary. The population's fast growth necessitates the expansion of physical infrastructure. Below is a summary of the current situation in Vellore LPA, followed by an analysis of future demand.

7.1 Water Supply

Vellore meets its water supply requirements through sub-surface sources and groundwater sources. The bore well / open well at the Otteri Lake, Palar River bed, Karugampathur head works and Ponnai river head works are the subsurface sources – which act the source of water for Vellore Municipal Corporation as Vellore does not have any perennial water source. The Palar River which passes through the town remains almost dry throughout the year, the river appears with a thin flow only at the normal and adequate rainfall. During the years 2005, 2015, 2017 and 2021, adequate rain was observed in the town and vicinity areas.

Caveri Combined Water Supply Scheme (CWSS) supplies the majority of more than 50% of the water supply,i.e., 32 MLD. Poonnai river head works contribute around 13% of the water supply and Palar head works contribute 11.3%. Figure 7.1 shows the percentage share of major water sources in Vellore LPA. CWSS Caveri scheme supplies the majority of water in LPA. Table 7.1 shows the water sources and their supply quantity.

Verified by PeqEstate™

Table 7.1 Major water sources

Type of water source	Name of the water Sources in use	Quantity of water tapped (MLD)
Surface water source (River/Dam/Lake/Pond/Canal)	CWSS Caveri	32

Verified RedEstate™

7.1.1 Water Supply Distribution

In corporation limit, water is distributed from the sources discussed above. Water supply is distributed in only 115 LPCD in the Vellore City Municipal Corporation but which usual norm is to supply 135 LPCD which will be attained when CWSS proposals meet their ultimate year. The total length of the distribution network is about 722 Km which covered 63,263 households by distribution stations. Water is being supplied continuously for 3 hours per day. Out of total households connected, 63058 households in residential are supplied with 60.00 MLD of water. About 205 commercial and institutional establishments are supplied with 2.00 MLD of water which is tabulated in Table 7.2 below.

Table 7.2 Water Distribution Connections

Descriptions	Number of connections provided	Quantity of water supplied (MLD)
Residential / Households	63058	60
Commercial and Institutional Establishments	205	2
Total	63263	62

(Source: Vellore Municipal Corporation, Implementation Jal Jeevan Mission urban or AMRUT2.0 draft report)

There are fixed charges for water connections in the city. The highest charges apply to commercial water connections, and no user charges are imposed on government schools and religious buildings.

7.1.2 Rural Water Supply

The Vellore Local Planning Area includes 42 villages in rural areas, the water supply for these villages is mainly from local source such as

Verified RedEstore™

bore wells and open wells maintained by each village panchayat of 42 villages. Only Puthur villages has been connected through CWSS. The rural area is provided with a water supply of 55 LPCD as per CPHEEO standards. The Jal Jeevan scheme is under implementation in all the villages. An average of more than 90% has covered under piped water supply and directly using the water without any treatment. The remaining area is to be covered under the Jal Jeevan scheme.

There are around 186 distribution stations which are distributed throughout all the villages of the Local Planning Area villages.
The total water storage capacity of distribution stations is 8.78 ML in all the villages. Above 90% of households have individual taped household connection.The source of the water intake by the local source of tube wells

7.1.3 Water Supply Demand Analysis

Vellore LPA having both urban and rural areas will be provided with different LPCD based on the character of the area. The water demand for the future has to be assessed separately for Vellore Municipal Corporation along with the existing gap in water supply, this gives the future forecast of the water supply required. Vellore Municipal Corporation is provided with piped water supply and underground sewerage system (phases II & III are under implementation). As per CPHEEO standard, a town with piped water supply and underground sewerage system is recommended to provide a water supply level of 135 LPCD. For rural area, the future water demand is projected for the future population and the total of both urban and rural demand will give the actual gap of water supply in Vellore LPA. The water supply demand is calculated till 2041 considering the existing gap in supply as well as for the projected increase in population. The following Table 7.3, Table 7.4, Table 7.5 shows the water supply demand calculation for Vellore LPA.

Verified RedEstate™

7.2 Sewage and Sanitation

Vellore City Municipal Corporation does not have a separate system for sewage and stormwater disposal. Approximately 75% of the households in this Corporation have septic tanks and soak pits for sewage disposal. The remaining households release the generated sewage into open drains. These drains are located on either side of most roads and carry both sullage and stormwater.

Approximately 96.7% of the 1,33,080 homes in Vellore City Municipal Corporation have septic tanks for their toilet needs. Swachh Bharath Mission (SBM) provided toilets for approximately 8605 Individual Household Latrine (IHHL). Across all 60 wards, there are roughly 50 community restrooms and 20 public restrooms, which further supports the corporation's policy of prohibiting open defecation.

7.2.1 Existing Underground Sewerage System

The Underground Sewerage System (UGSS) is currently available in the central town area of Vellore, which covers 24 of the 48 wards of the former Vellore Municipality and approximately 5.75 square kilometres of the 87.915 square kilometers of the current Corporation territory. Out of the 60 wards that make up the current municipal corporation territory, this system covers only 6.5% of the area and around 10–11% of the people.

Underground sewers gather sewage and transport it to the sewage treatment plant (STP) at the old Palar Bridge, which is close to Muthumandapam. The 10.28 MLD capacity STP process is based on the Activated Sludge Process (ASP). Following treatment, the effluent is released into Velavadi Eri at Alamelumangapuram, where it is subsequently put to use in agriculture.

The sullage from the northern portion of the town is gathered from the main drains along Arni Road and Katpadi Road. It is then transported by gravity to the location of the sewage pumping station, which is close to

Verified RedEstate

the current Palar water supply head works. After that, it is pumped across the Palar River to its northern bank and finally released into the roughly 20-acre sewage farm located at Viruthampattu village.

The sullage from the southern part of the town is collected via drains and streams that flow through Salavanpet, Velapadi, Suriyakulam, and then along the western corporate limit, bye-pass road, Katpadi road, and into the Palar River.

In Vellore LPA the rural area has a total population of 1,40,833 and has about 29,269 households as per the 2011 census. In rural areas, there is no dedicated sewerage management system, and are mostly dependent on septic tanks and soak pits for disposal of the waste.

7.2.2 Access to Sanitation Facilities

As per Census 2011, 30% of the houses in the LPA had latrine facilities within their premises while 70% of the households do not have latrine facilities within their premises. It is also observed that 50% of the houses in the LPA have no drainage, 17% have closed drains and 33% have open drains. Table 7.7 shows the sanitary facilities of Vellore LPA.

7.2.3 UGSS Progress and Proposals

The four phases of the underground drainage system being developed by Vellore City Municipal Corporation (VCMC) funded by TNUIFSL would encompass the entire current municipal corporation area (Phase I, Phase II, Phase III and Phase IV). After the system is completed, the level of collection and treatment will be increased, and the pollution load caused by sewage entering the stormwater drainage system will be prevented by implementing the most recent and improved management techniques.

Phase I refers to the current Underground Sewerage System that was previously mentioned. The region directly surrounding the central city on the southern bank of the Palar River is covered by Phases II and III. Phase IV is envisaged for the remaining regions in the southern and northern periphery. Details of the UGSS scheme is given in Table 7.8 below.

Verified RedEstate™

No of HSC connection	10,200	43,270	28900	82,370
Number of Pumping station	1	5	3	9
Number of Lifting stations	1	7	5	13
STP Capacity	10.28 MLD	50 MLD		60.28 MLD

(Source: DPR of UGSS Vellore Municipal Corporation)

7.2.4 Sewage Demand Gap Analysis

Sewage generation is considered to be 80% of the water supply in the present and future scenarios of urban and rural areas in the LPA. The sewage demand gap analysis has been done based on the projected population and projected water supply. The following Table 7.9 shows the sewage demand analysis for the LPA.

Table 7.9 Sewage Demand Gap Analysis

Description	Projected Water Supply in MLD		Projected Sewage Generated in MLD		Existing Capacity of STPs in MLD	Additional Requirement 2041 in MLD
	2031	2041	2031	2041		
Vellore Corporation	95.49	113.11	76.39	90.49	60.28	30.21
Town Panchayat (Two)	1.64	1.80	1.31	1.44	No STP	1.44
Rest of LPA	12.24	13.36	9.79	10.69	No STP	10.69

Verified PedEstate™

From the above table, it can be observed that an additional STP capacity of 42.34 MLD has to be created. There are no existing STPs in the town panchayats and village level. Decentralized Waste Water Treatment Systems (DEWATS) can be proposed in villages. Also, Ariyanendal Panchayat's greywater management model offers a sustainable solutional to the rural communities.

7.2.5 Wastewater Disposal Proposal for TP and Village Panchayat Area

Town Panchayats and Village Panchayats, the proposal for cluster settlement areas in Decentralized Wastewater Management Systems (DWMS) typically involves planning and implementing systems to manage wastewater at a local level.

Decentralized Wastewater Management Systems refer to the treatment and disposal of wastewater at or near its source, rather than through a centralized sewage treatment plant. Cluster settlement areas indicate a grouping of residences or buildings in a specific locality.

When proposing cluster settlement areas in the context of DWMS, the focus is on developing sustainable and localized solutions for wastewater treatment within these clusters. This could include the installation of decentralized sewage treatment plants, community septic systems, or other innovative technologies to effectively manage wastewater within the designated area.

It's important to consider local regulations, environmental impact assessments, and community engagement in the planning and implementation of such systems. This approach aims to address the challenges of wastewater management at a decentralized level, promoting sustainability and environmental responsibility.

7.2.6 Rural Sanitation and Grey Water Management

In Vellore LPA the rural area has a total population of 1,40,833 and has about 29,269 households as per 2011 census. In rural areas there is no dedicated sewerage management system and are mostly dependent on septic tanks and soak pits for disposal of the waste.

Grey water, the wastewater generated from domestic activities excluding toilets, is an often-neglected resource in rural areas. Its efficient management can address water scarcity, reduce pollution, and improve overall sanitation and hygiene. Here a detailed exploration of Ariyanendal Panchayat's pioneering greywater management model and its components, offering insights into how this best practice can be replicated and adapted to benefit the rural areas in the LPA.

Verified by RealCode

Effective grey water management is crucial for several reasons:

Water Resource Conservation: Greywater can be treated and reused for non-potable purposes, reducing the demand on freshwater sources.

Environmental Protection: Proper greywater disposal prevents contamination of natural water bodies, preserving aquatic ecosystems.

Health and Hygiene: Inadequate greywater management can lead to waterborne diseases and unsanitary living conditions, which affect public health.

Agricultural Benefits: Treated greywater can be used for irrigation, potentially increasing agricultural productivity.

Sustainable Development: Greywater management aligns with sustainable development goals, promoting responsible water use.

7.2.7 Ariyanendal Panchayat's Model

Ariyanendal Panchayat's greywater management model has gained recognition for its efficiency and sustainability. It comprises five key components:

Individual Soak Pits: Individual households have their designated soak pits for greywater disposal. These pits are typically shallow excavations filled with layers of gravel and sand to facilitate filtration and absorption. The treated water percolates into the ground, minimizing contamination and replenishing groundwater reserves.

Community Soak Pits: Community soak pits are shared facilities for greywater treatment and disposal. They serve clusters of households, reducing the strain on individual households to construct and maintain

Verified RedEstate TM

their soak pits. These pits are larger and designed to accommodate higher volumes of greywater.

Vertical Soak Pits: Vertical soak pits are a variation of individual soak pits. They are designed to be more space-efficient, making them suitable for areas with limited land availability. These pits use a vertical shaft filled with filtering media to treat and absorb greywater.

Horizontal Soak Pits: Horizontal soak pits, also known as trench soak pits, are designed for areas with high groundwater tables. They facilitate the lateral spread of treated greywater, preventing waterlogging and groundwater contamination.

Drainage Works: Greywater drainage works include the construction of channels or drains to direct wastewater from various sources (individual households, community pits) to treatment facilities. These channels can be engineered to allow gravity-based flow towards treatment areas.

Step-by-Step Implementation:

Replicating Ariyanendal Panchayat's model involves a systematic approach:

Community Awareness and Engagement: Raising awareness and involving the community is essential. Local leaders, NGOs, and government agencies should collaborate to educate residents about the benefits of greywater management and the various components of the model.

Site Selection and Design: Identify suitable locations for individual and community soak pits, considering factors such as soil type, groundwater level, and proximity to water sources. Designs should be adapted to local conditions.

Verified RedEstate™

Construction and Installation: Train local labourers and communities in the construction and maintenance of the various components. This can provide employment opportunities and ensure the long-term sustainability of the system.

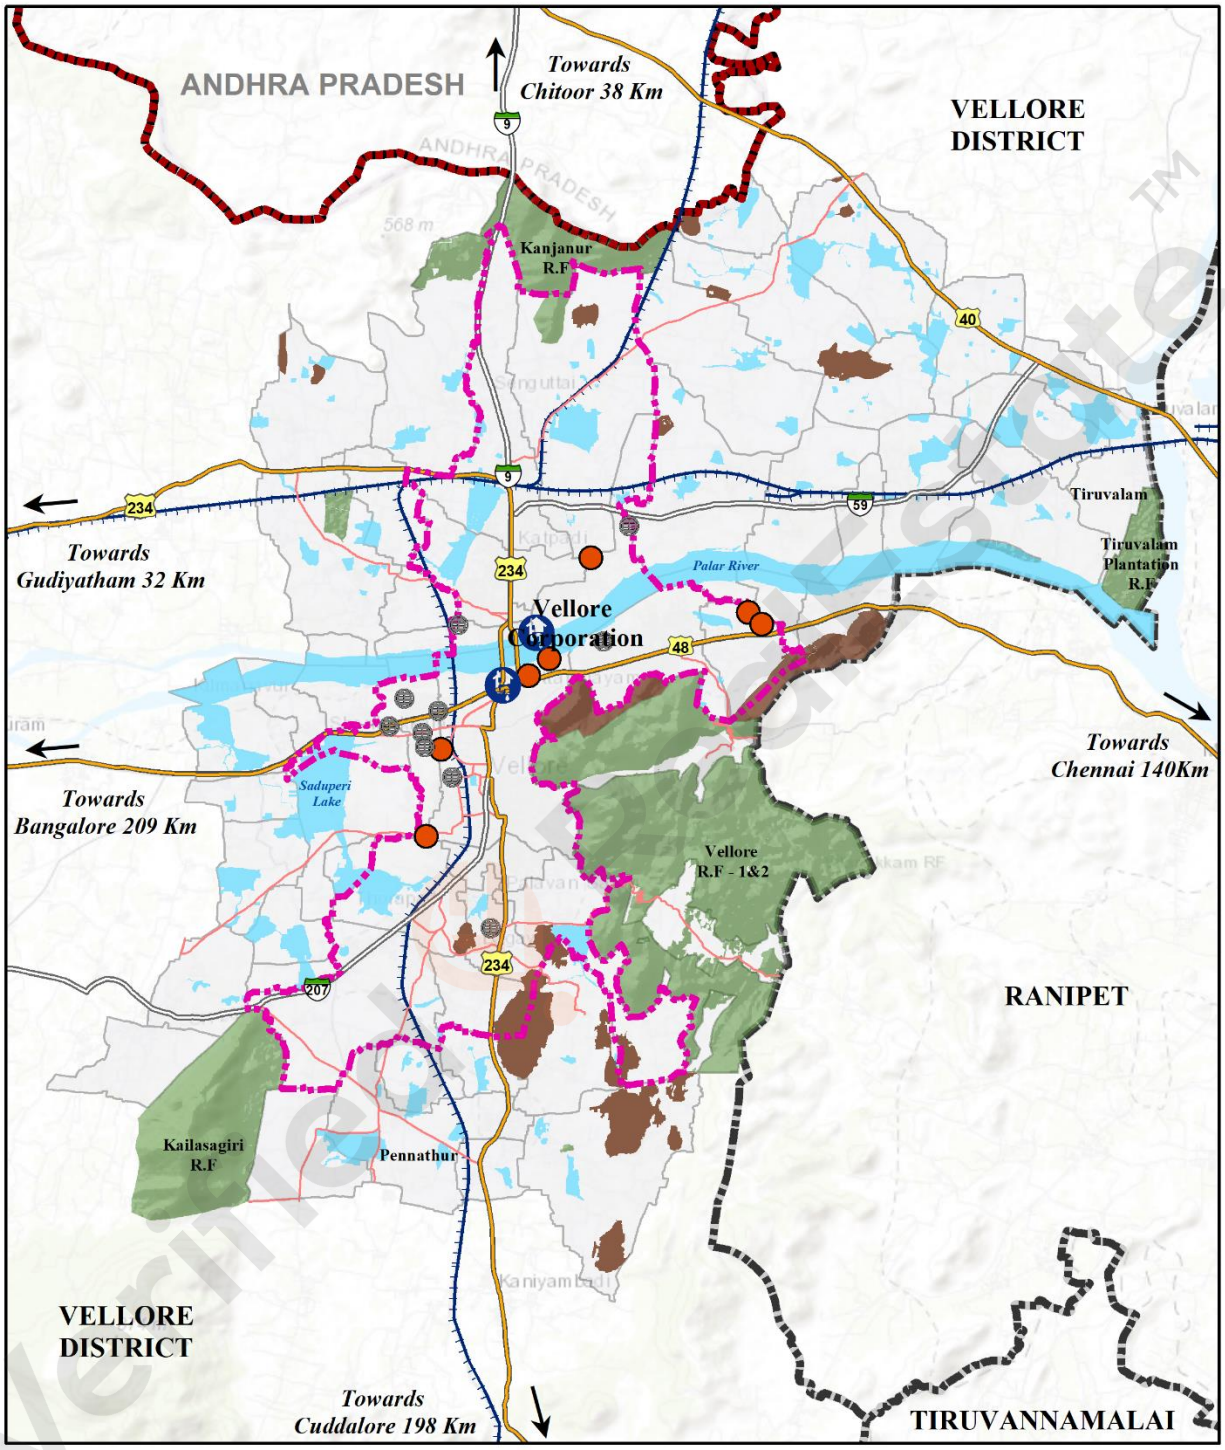

Water Quality Testing: Regularly monitor and test the quality of treated greywater to ensure that it meets safety and environmental standards.

Maintenance and Upkeep: Establish maintenance schedules and responsibilities to ensure the continued functionality of the greywater management system.

Conclusion: Replicating Ariyanendal Panchayat's best practices in greywater management offers a sustainable solution to a pressing issue faced by rural communities. The comprehensive model, encompassing individual soak pits, community soak pits, vertical and horizontal soak pits, and drainage works, has the potential to transform rural water management. By following a systematic approach to implementation and considering local conditions, this model can improve water availability, public health, and environmental sustainability, ultimately contributing to the holistic development of rural areas. The adoption of such innovative solutions is a step towards a more water-secure and sustainable future for rural India.

Vellore Municipal Institute

7.2.8 Storm water Drainage

The Vellore City Municipal Corporation does not have a separate system for storm water disposal. Even through in total 145.555 km length available out of which 133.40 km are open drain and 12.15 km are closed drain. Approximately 75% of the households in this corporation have septic tanks and soak pits for disposing of sewage. The remaining households discharge generated sewage into open drains. These drains are situated on either side of most roads and carry both sullage and storm water.

Storm water from the collector drains is collected by the 52 km long arterial storm water drains, which are overseen by the Public Works Department (PWD) and run across the city. Nevertheless, the town's current open drain system isn't working well enough. There are several instances of stagnant wastewater, which encourages the growth of flies and mosquitoes and creates unhygienic conditions in different parts of the town. The drainage network in the town is absent in the northern parts, i.e., the east-to-west portions south of the Palar River, except for one or two streets.

The southeastern part, which is partly a hilly area, lacks drainage facilities. The southwestern area of the fort, namely Vasanthapuram, has drainage facilities on one side along the roads. Thus, approximately two-thirds of the town has drainage facilities, while one-third lacks such facilities. The details of the existing storm water drain and gap is given in Table 7.10 below.

Verified RealEstate™

Table 7.10 Storm Water Drain Details

Description	Length (In Km)
Open Drain	110.09
Closed Drain	30.2
Earthen Drain	640.16
Total Length of Storm Water Drain	780.45
Total Road Length	649.69
Minimum Length of the Strom Water Drain is 100% of the Length of the Road	
Water Drain Coverage (120 - 150 % Ideal Condition)	974.54
Gap in Strom Water Drainage	194.09

7.3 Solid Waste Management

Solid waste management is a crucial service that has a direct impact on the environment and public health. Infrastructure for the collection, storage, segregation, transportation, processing, and disposal of municipal solid wastes must be built, run, and maintained by ULB. Inadequate solid waste management directly affects the region's environmental health and significantly lowers residents' quality of life.

7.3.1 Solid Waste Generation

Vellore City Municipal Corporation generates about 200 Metric Tonnes per day (TPD) of Solid Waste. It contributed about 120 TPD of wet waste and 80 TPD of dry waste. Waste generated from residential and commercial areas is about 67.5% (135 TPD) of total waste generated. The collected solid waste is transported and disposed of daily. Table 7.11 shows the solid waste generated per day in Vellore City Corporation.

Verified RedEstate™

Table 7.11 Solid Waste Generated per day in Vellore City Corporation

Solid Waste Generated	Tonnes per day (TPD)
Residential & Commercial Waste	135
Total No. of Bulk Waste Generators	45
Construction and Demolition waste	20
Total Waste Generated	200
Wet Waste Generation	120
Dry Waste Generation	80

(Source: Solid Waste Management Department Vellore Municipal Corporation)

Vehicles are used to collect the solid waste each day by door-to-door collection method for all 60 wards. Waste had been collected separately as dry and wet waste. The collected waste is then transferred and taken to compost yards. Secondary transportation is not operational in Vellore Corporation named “Bin Free City”. All bins have been removed in a phased manner and secondary transport completely stopped.

The vehicles involved in the collection process is as follows:

- Pushcarts – 75 Nos.
- Tricycles – 245 Nos.
- Battery Operated Vehicles – 216 Nos.
- LCV – 49 Nos.

The collected waste is processed in 20 onsite composting centers inside the parks with a quantity of 2 TPD and processed in 52 Decentralised Micro Composting Centres (MCC) with a quantity of 134 TPD, which is spread over all 60 wards. 3 TPD capacity of food and vegetable waste treated from Bio-Methanation Plant and produced gas is

Verified by PeaEstate™

utilized to gasifier cremation. Table 7.12 shows the processing methods and tonnes processed per day.

Table 7.12 Details of Processing Methods

Processing Methods	Nos.	Processing Tonnes per day (TPD)
On Site Composting Centre (Parks)	20	2
Decentralized Micro Composting	51	134
Bio-Methanation Plant	1	3

(Source: Swachh Bharat Mission, Solid Waste Management Department, Vellore Municipal corporation)

Micro Composting Centres have been established in 51 Locations with a total Capacity 185 TPD. In daily processing of 134 TPD of mixed waste in 51 MCC, bio waste is about 95 TPD. Production of compost is about 14 TPD which are given to farmers nearby at free of cost. Vegetable cultivation is also being done at site using the compost produced from the MCC. Sathuperi Compost Yard was used for dumping the 190 TPD waste before these MCC were operational. After these MCCs were established, dumping at Sathuperi dump yard has gradually reduced and completely stopped from 01.02.2018. The dumping yard is now sealed and closed and no waste is dumped there. Non-saleable combustible waste is transported to Ultra tech and Dalmaiya cement factory for co-processing. In Vellore Municipal Corporation, an area of 7.89 acres will be remediated through the process of bio-mining. Rural areas have solid waste management practices that involve a combination of traditional and modern methods.

7.3.2 Solid Waste Management Practices in Rural Areas

Vellore Local Planning Area of in rural areas has solid waste management practices often involve a combination of traditional and modern methods. Based on collection from the villages are some key aspects of solid waste management in rural areas:

Verified RealEstate™

Segregation at Source: Like in many waste management systems, the segregation of waste at the source is crucial. Households are encouraged to separate their waste into categories such as biodegradable and non-biodegradable.

Composting: In rural areas, composting is a common method for managing biodegradable waste. This can be done some of the at the household level or in community composting pits. The resulting compost is often used as organic fertilizer in agricultural practices.

Community Participation: Many villages in LPA actively involve the community in waste management initiatives. Awareness programs and campaigns are conducted to educate residents about the importance of proper waste disposal.

Plastic Recycling: Efforts are made to manage non-biodegradable waste, especially plastics. Recycling initiatives may include collection drives or the establishment of small-scale recycling units.

Government Initiatives: The government plays a significant role in promoting sustainable waste management practices. Policies and initiatives are implemented to support proper waste disposal and recycling efforts in rural areas.

NGO Involvement: Non-governmental organizations (NGOs) often collaborate with local communities to implement effective waste management strategies. They may provide support in terms of infrastructure, education, and awareness programs.

Challenges: Despite these efforts, challenges such as lack of infrastructure, awareness, and financial resources may still persist in some villages.

Verified RealEstate™

7.3.3 Solid Waste Demand Gap Analysis

According to the guideline for municipal solid waste management Per capita waste generation varies between 0.2 Kg to 0.6 Kg per day in cities with populations ranging from 1.0 lakh to 50 lakh. The solid waste to be generated in the future and the allowable waste generated as per this stand is found to be 416 TPD, 5 TPD, and 38 TPD for Corporation, Town Panchayats, and Rural areas respectively for the year 2041. Table 7.13 shows the projected Solid waste Generation.

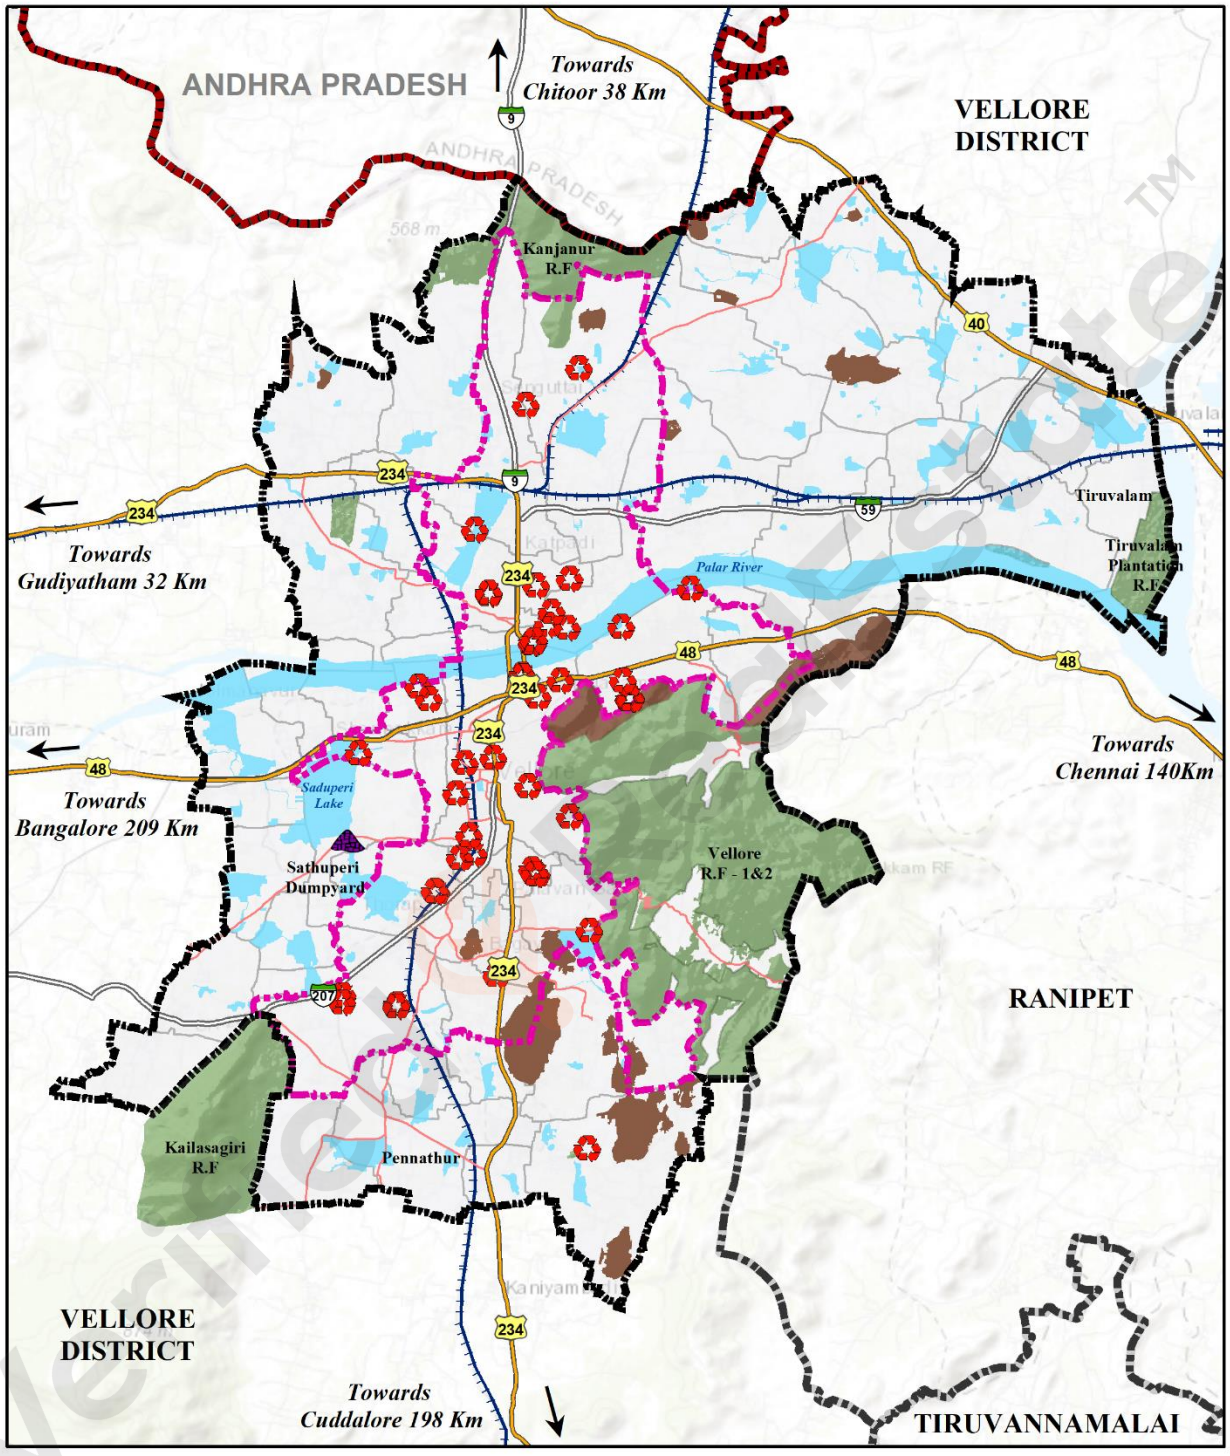

Table 7.13 Projected Requirement for Solid Waste Generation

Local Body	Projected Population (2041)	NEERI Standards (Kg/Capita/Day)	Projected Quantity of Waste Generated (TPD) 2041
Vellore Corporation	831711	0.5	416
Town Panchayat (Two)	25315	0.2	5
Villages	188227	0.2	38

Year	Population	NEERI Standard (Kg/Capita/day)	Quantity of Waste Generated (TPD)	Existing Capacity of Composting Yard	Additional Capacity Required
2011	500331	0.5	250	188	62
2021	592692	0.5	296	188	108
2031	702103	0.5	351	188	163
2041	831711	0.5	416	188	228

7.4 Power Supply

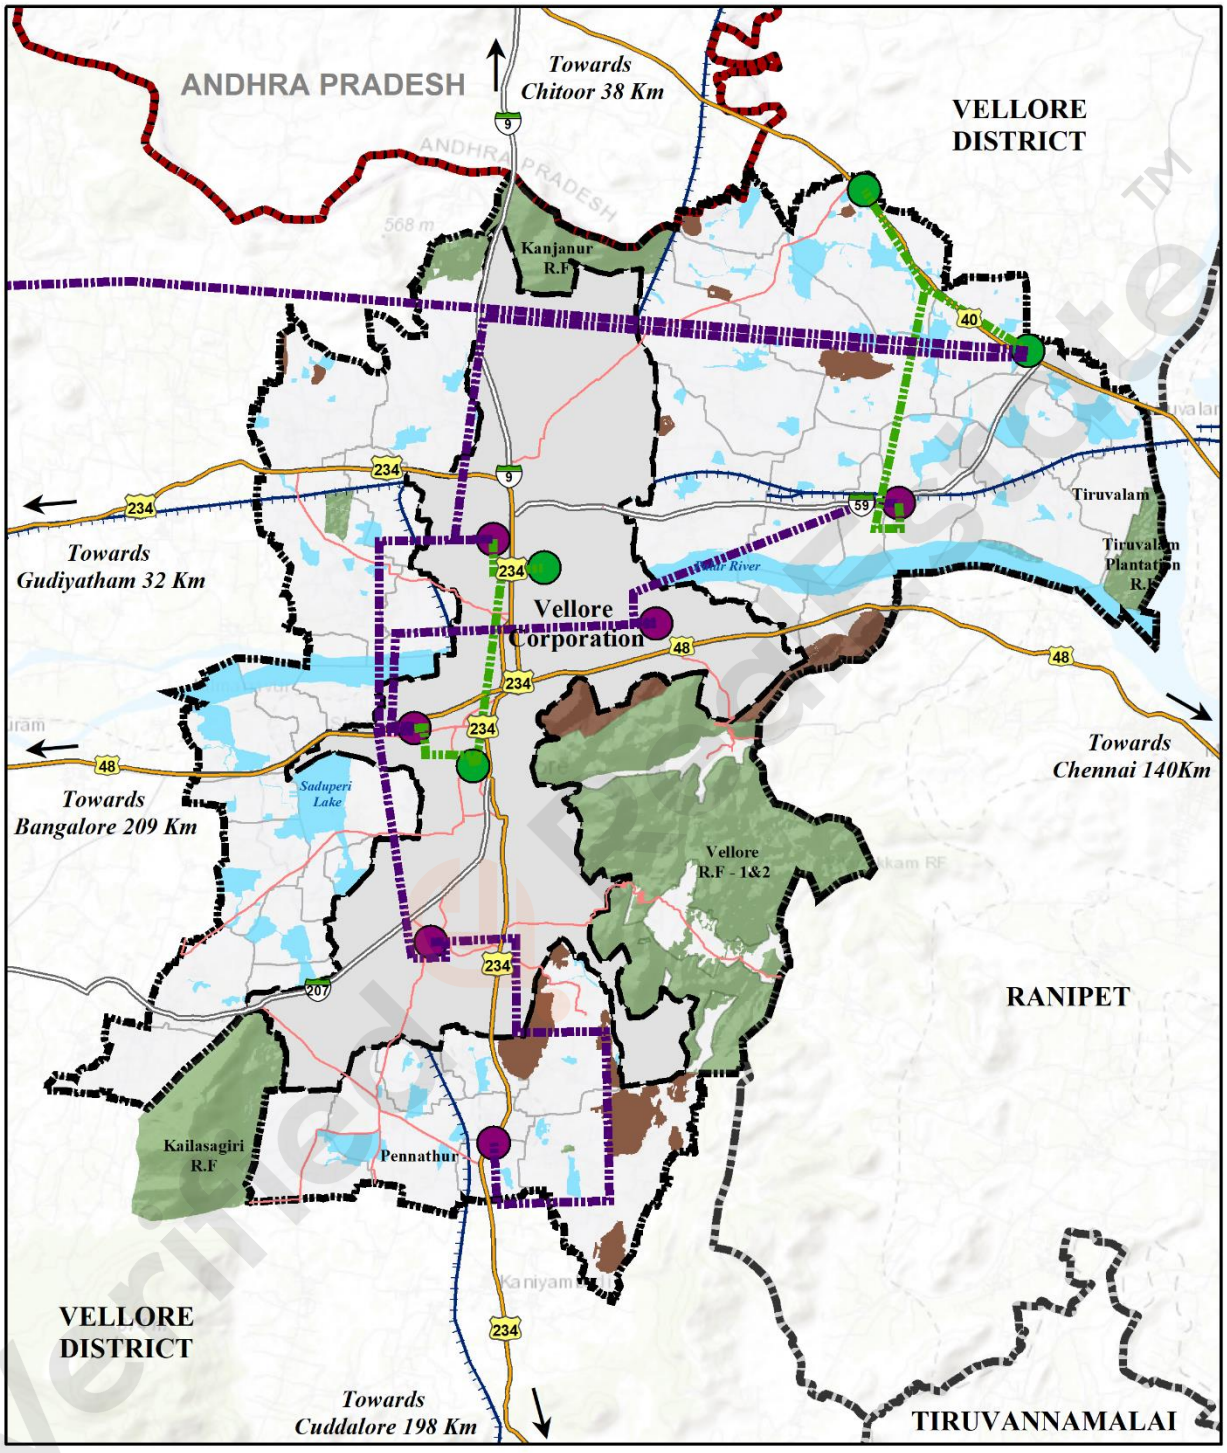

There are 10 sub-stations located within the local planning area. Out of which six substations 110/33 – 11 KV and all the substations. A 110kV/33kV substation refers to the voltage levels that the substation is designed to handle. 110kV is the incoming voltage level, while 33kV is the outgoing voltage level. This type of substation is commonly used in urban areas to supply power to residential and commercial customers. A 33-kV substation is usually used for voltage regulation and distribution over multiple feeders. The projected requirement for electricity is given in Table 7.14. The current facilities are sufficient to satisfy the future population.

Table 7.14 Projected requirement for electricity

Description	Details
Population 2011	659742
No. of Sub Station Existing within LPA	10
Capacity of Existing Sub-Station	110/33-11 KV and 33KV
Projected Population 2041	1045253
Additional Population	385511
As per URDPFI Guidelines 11 KV Sub-Station serves for every 15000 Population

7.5 Summary

Vellore meets its water supply requirements through sub-surface sources and groundwater sources. The bore well / open well at the Otteri Lake, Palar River bed, Karugampathur head works and Ponnai river head works are the subsurface sources – which act the source of water for Vellore Municipal Corporation as Vellore does not have any perennial water source. According to the detailed project report of WSIS for Vellore Corporation, 78.65 MLD of water would be provided upon implementation of this CWSS to benefit the 5.49 Lakh people in 2017, 102.67 MLD to the 7.20 Lakh intermediate population (2032), and 133.36 MLD to the 9.20 Lakh final population (2047).

Vellore City Municipal Corporation does not have a separate system for sewage and stormwater disposal. Approximately 75% of the households in this Corporation have septic tanks and soak pits for sewage disposal. The remaining households release the generated sewage into open drains. These drains are located on either side of most roads and carry both sullage and stormwater. For the projected population, an additional STP capacity of 42.34 MLD has to be created. There are no existing STPs in the town panchayats and village level. Decentralized Waste Water Treatment Systems (DEWATS) can be proposed in villages. Also, Ariyanendal Panchayat's greywater management model offers a sustainable solutional to the rural communities.

The storm water drainage network in the town is absent in the northern parts, i.e., the east-to-west portions south of the Palar River, except for one or two streets. The southeastern part, which is partly a hilly area, lacks drainage facilities. The southwestern area of the fort, namely Vasanthapuram, has drainage facilities on one side along the roads. Thus, approximately two-thirds of the town has drainage facilities, while one-third lacks such facilities.

Verified by PeqEstate™

Verified RealEstate™

8. Social Infrastructure

Services and facilities that address community needs and enhance quality of life are included in the category of social infrastructure. It covers education facilities, health care, emergency facilities, youth, recreation, sports, and community amenities. The rapid growth of the city necessitates the expansion of social infrastructure to foster inclusive and robust communities.

8.1 Education

As per the 2011 census, the literacy rate is at 76.71% of Vellore LPA which is higher than the national average of 74.04% but less than the state average which stands at 80.09%. The literacy rate in the LPA is 81.53% for males and 71.96% for females. In the LPA, Gandhi Nagar has the highest literacy rate at 88.98% and Balamadai has the lowest literacy rate at 51.65%. The details of the educational facilities (Schools) in LPA is given in Table 8.1 below:

Table 8.1 Educational Facilities in LPA

(Source: Primary Survey and School Report Card)

The URDPFI norms for educational facilities suggest a provision of one primary school for 5000 population and one senior secondary school for 7500 population. Except for special schools, the existing number of schools in Vellore LPA is satisfactory for the present population. According to the Tamil Nadu School Education Department, any place with a population of 300 and above must have schools located at a distance as mentioned in Table 8.2.

Table 8.2 Tamil Nadu School Education Norms

S.No	Type of Institution	Distance
1	Primary school	1 Km
2	High School	5 Km
3	Higher Secondary School	8 Km

(Source: Primary Survey and School Report Card)

According to the RTE Act 2009, a primary school must be accessed within a 1 km radius and a middle school within a 3 km radius. Presently, all the areas in Vellore LPA are adequately covered by school facilities based on the above-mentioned norms. Improving the existing facilities

Verified RealEstate™

will enhance the quality of education in Vellore LPA. Spatial distribution of schools as per the standards must be ensured in the future.

There are a total of 26 higher education facilities in the LPA, this includes 2 Medical Colleges, 2 Engineering Colleges, 6 Nursing Colleges, 9 Arts and Science Colleges, 5 it is, 1 Law college and 1 university. The educational institutions in Vellore LPA meet the planning norms for higher education mentioned in URDPFI guidelines and there is no need for the provision of additional facilities for the present population. The list of colleges in Vellore LPA is given in Table 8.3 below:

8.1.1 Education demand and gap analysis

A gap analysis has been done for Vellore LPA based on the URDPFI Guidelines. It suggests one primary school for every 5,000 population and one senior secondary school for every 7,500 population. A professional college for 10 Lakh population. Table 8.4 shows the gap analysis for educational facilities in Vellore LPA, this is based on the projected population and URDPFI guidelines

Table 8.4 Gap Analysis for Educational Facilities

No. of Educational Facilities in Vellore Municipal Corporation			
Category	**Existing Units served**	**Deficit/surplus - 2021**	**Deficit/surplus - 2041**

(Source: Primary Survey)

From the above table it is observed that primary schools will be deficient in the municipal corporation and villages for the year 2041 which has to be catered to. There is a deficit of special schools in the whole of LPA.

8.2 Health Care

One of the most important forms of social infrastructure is health facilities. There must be sufficient clinics or hospitals available for people to get treated. There are 37 hospitals in the Vellore that provides medical assistance, out of which Christian Medical College and Hospital is the major one.

There are two Government hospital named Vellore Pentland Government hospital and ESI hospital. There are 10 urban Primary Health care centre in the Corporation. One Government Veterinary Hospital is operational in Vellore. Around 3 Siddha and Unani dispensary are operational in town. The details of Health Care facilities is given in Table 8.5.

8.3 Recreational Facilities

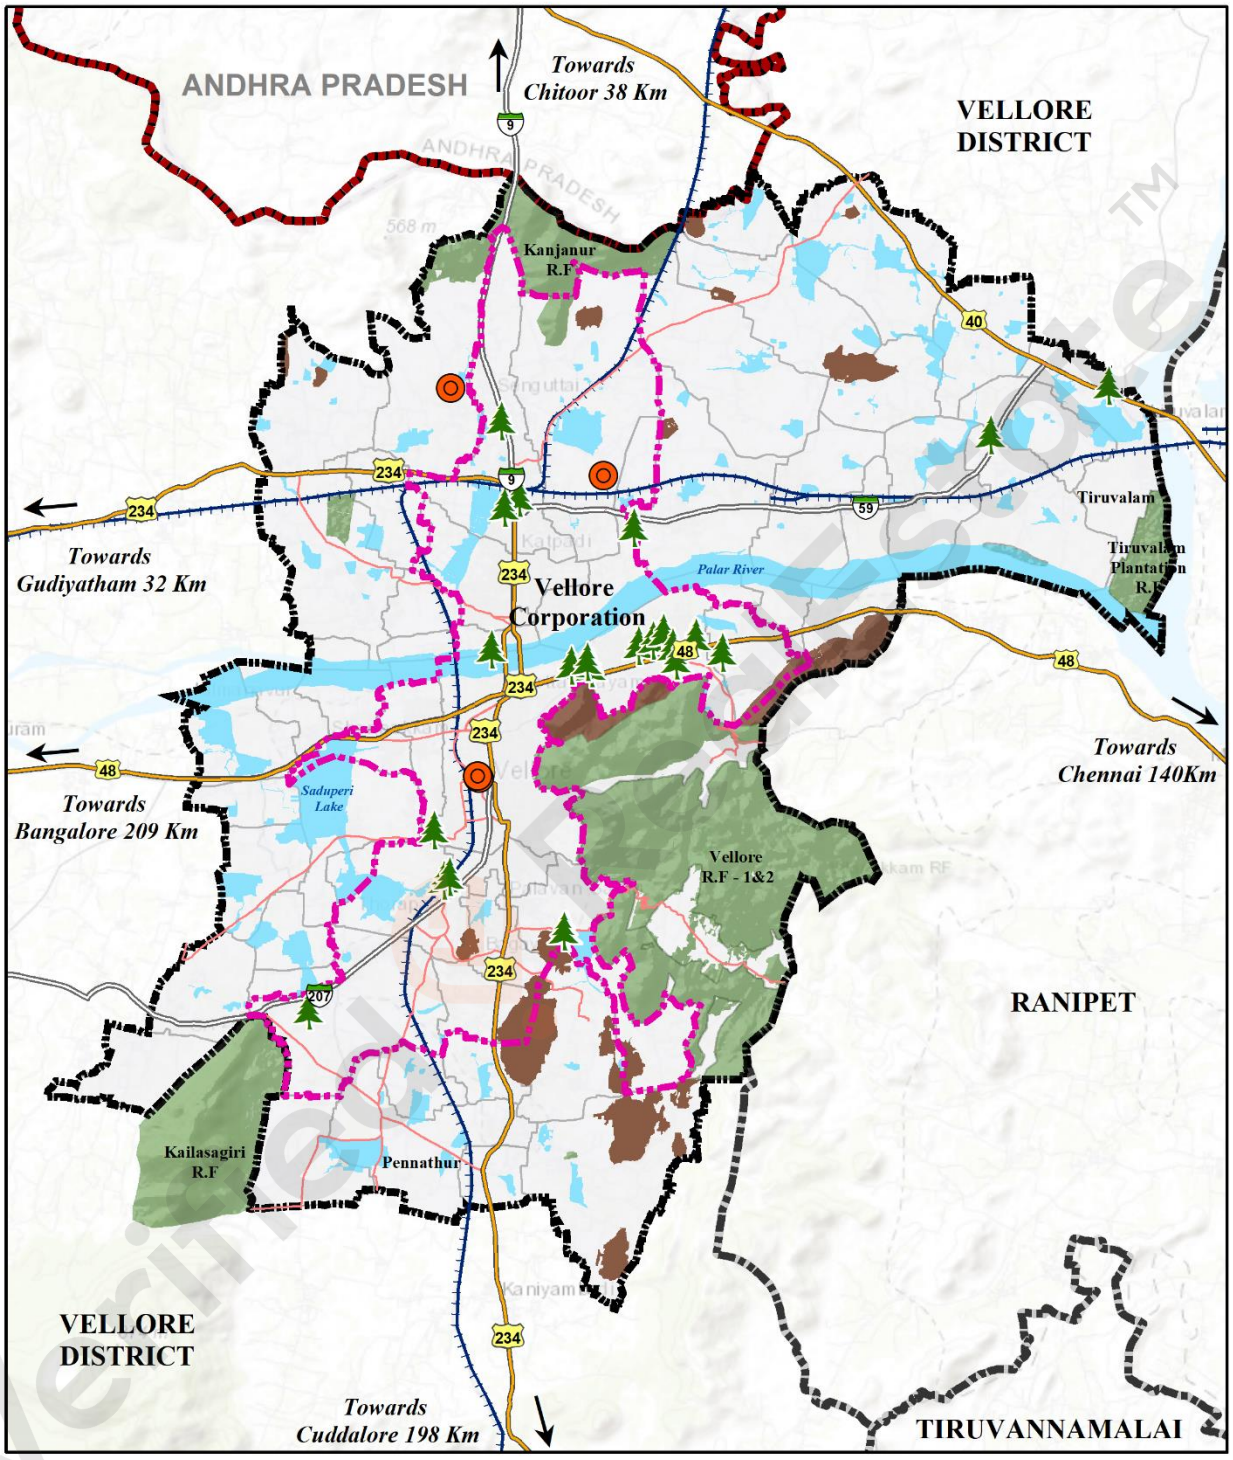

Recreational facilities include parks, playgrounds, open spaces, and cinema theatres. Parks and open spaces create a high quality of life and promote inner-city revitalization. Open space boosts local economies by attracting tourists and supporting outdoor recreation. According to NBC rules, 3 Sq. m/person is the minimum norm for open space in a built-up area. The open space reserved for recreational activities at any layout must not be less than 100 Sq.m with a minimum dimension of 10 meters as recommended in TNCDBR 2019. The following Table 8.7 provides the Demand Gap analysis for Recreational Facilities. Total of 2.83 Sq. Km open space has to be created in the LPA.

8.4 Miscellaneous facilities

The details of miscellaneous facilities like police station, fire station, community halls, burial grounds and crematorium is given in the Table 8.7 below:

Table 8.8 Details of other social infrastructure facilities

Description	Urban	Rural
Fire & Rescue Department	2	
Police Station	26	1
Burial Ground	41	58
Community Hall	9	1

A gap analysis has been done for each of the above facilities. The details of which follows. In the Vellore LPA region, comprising 41 burial grounds in the Vellore Municipal Corporation and 58 in town panchayats and villages, a shortage of electrical crematoriums is evident.

According to URDPFI Guidelines, there should be 2 crematoriums/burial grounds for every 5 lakh population.

Despite the presence of several community-based burial grounds, there remains a deficit of two electrical crematorium, a gap to be addressed in upcoming proposals.

As per URDPFI guidelines, there should be a community hall for every 15,000 population; a police station for every 90,000 population and a fire station for 2,00,000 population serving a radius of 5 to 7 Km., based on these data a gap analysis has been done, the results of which are given in Table 8.9.

8.5 Tourism

Vellore Local Planning Area has a unique heritage base that traces its roots back to the Megalithic period (2500 BC). It was ruled by Vijayanagara Kings, Bijapur Sultans to Marathas, the Carnatic Nawabs, and the British and traces of each of their periods in terms of sculpture and art is scattered across the city. The Vellore city and the periphery areas have several iconic spots for tourism such as Vellore Fort, Golden temple, Government Museum, science parks and Amirthi Zoological Park.

8.5.1 Vellore Fort

The ancient Vellore Fort built in the year 1566 by Chinna Bommi Nayak and Thimma Reddy Nayak is the main attraction for tourists. This historically famous fort retains the past glory with its ramparts, battlements, turrets, posts, and sally gates and with perennial water supply. During the Carnatic War the first revolt of Indian Soldiers against British East India Company took place here on July 10th 1806 and 200 British soldiers were killed. This was a prelude to the half century later version of yearlong Great Revolt or Indian / Vellore mutiny (Sippoy Kalagam) happened here in 1857. The fort is an excellent example of military architecture and has withstood several revolts. The rectangular fort with a circumference of 3 Km is built entirely with massive granite cut stones and double walls fortify it. The moat runs over all 3 Km around the fort with an average depth of 29 feet. Fort contains both secular and religious structures including Tippu Mahal, Begum Mahal, Kandi Mahal, Jalakanteswara Temple, a Mosque and a Church which are protected by the Archaeological Survey of India (ASI). Other than that, many government offices are located inside the Fort. Museums is established inside in 01, April 1999 by the ASI and State Department. People allowed to visit Fort all days from 8 AM to 6 PM.

Figure 8.1: Vellore Fort

8.5.2 Jalagandeeswarar Temple

The Temple inside the Fort is dedicated to Lord Siva named as Jalagandeeswarar and is noted for its sculptures, which speak volumes of the exquisite craftsmanship of the highly skilled artisans of that period. The sculptures in the Porch on the left of the entrance are connoisseurs. It has a big marriage hall adorned with elegant engravings and monolithic sculptures. The Temple was used for long as an arsenal and remained without deity. A few years back it has been sanctified with a deity Lord Siva which is worshipped by pilgrims and tourists.

Figure 8.2: Jalagandeeshwarar Temple

Verified & RedIES

8.5.3 Government Museum

Government Museum is located inside the Fort and it give great importance for tourism. This is a multi-purpose museum maintained by the department of Museums of Tamil Nadu Government. It treasures ancient and present-day curios relating to anthropology Art and Archaeology, Botany, Geology, Numismatics, Prehistory, Zoology etc., The historical monuments of the erstwhile composite North Arcot District are gracefully depicted in the gallery. This Museum is kept open on all days from 9 AM - 12.30 PM and 2 PM - 5 PM except on public holidays where entry fee is Rs. 5 for person.

Figure 8.3: Government Museum

8.5.4 Muthu Mandabam

Muthu Mandabam was inaugurated on 01.07.1990 by the then Honourable Chief Minister of Tamil Nadu Mr. M. Karunanidhi. From 1815 Vikrama Raja Singhan was arrested and imprisoned in the Vellore Fort jail and died in 1832. Vikrama Raja Singhan, the last Tamil ruler to rule Kandy (Sri Lanka) was originally named Kannuswamy. He belonged to the Nayak dynasty of Madurai. The Britishers fought with him for 16 years. In his memory the “Muthu Mandabam” was established in Vellore. His samadhi was erected by his son, A. Vikrama Raja Singham on 27.07.1832. There are six cemeteries of which three have their names written on it. One of them is the cemetery of Vikrama Raja Singhan. To the right of it is the samadhi of his great grandson, Thiru C.K. Narasimhala Raja who died on 08.10.1948. To the left is the samadhi of great granddaughter Sow. Raualakshmi Devi, wife of Shri. V. Rangarajah (direct great grant son of the last ex-king of Ceylon who died at Tanjore on 09.03.1944). The Govt. of Tamil Nadu was appreciated for preserving the truth of the last Tamil king of Ceylon. The building construction was started on 20.04.1990 and was finished on 01.07.1990.

Figure 8.4: Muthu Mandabam

8.5.5 Golden Temple

Narayani temple or Mahalakshmi temple whose Vimanam and Ardha Mandapam have been coated with gold both in the interior and exterior. The temple is located on 20 acres of land and has been constructed by Vellore-based Sri Narayani Peedam, headed by spiritual leader Sri Sakthi Amma. The temple, covering 55,000 sq. ft, has intricate carvings and sculptures in gold. The lighting is arranged in such a way that the temple glitters even during night. Sripuram is the biggest structure made out of gold. Even the Sadari, a crown with feet of the lord engraved on it, is made of solid gold weighing 1 kg. The outer pathway of the temple is made out in the shape of a Star. The walls of the pathway have inscriptions of teachings of Sakthi amma, Gita, Bible, Quran and the Guru Granth Sahib Ji. All people have to go through the star shaped pathway to reach the sanctum. The Inner praharam of the temple resembles the circular structure of the Parliament of India. The temple is at the southern end of the city of Vellore, at Tirumalaikodi. It is located on the way to Anaicut, on Usoor road which under Corporation limits.

Figure 8.5: Golden Temple

Verified @ RealEstate™

8.5.6 Amirthi Zoological Park

Amirthi zoological park is situated 25 kms away from Vellore and well known as a tourism spot. It was started in the October 1967. The area of the park is 25 hectares and also having beautiful water falls. There are also different kinds of birds and animals. swings, seesaw etc., are there for children to play. Numerous kinds of herbal plants and trees and sandal wood trees also grow here. There are 2 rest houses and five members can stay in one dormitory. There is a meditating hall where one can have full concentration and be in serenity. The inflow of tourists is more only during the holidays. This zoological park has been recognized recently and so the state Government has taken initiative to develop this area. The entrance fee is only Rs 2 per head, for cycles Rs.3, for van Rs.5, for motor cycles Rs.2. The Government earns Rs.6000 per month and Rs. 72,000 per year by this entrance fees. The tribal people reside in this area. There is a range office at Amirthi headed by the forest ranger. There is also a hill tribe society at Nimmiyambattu near Amirthi. The main aim is to give employment opportunities to the hill tribal in that area and get revenue from tourism development.

Figure 8.6: Amirthi Zoological Park

8.5.7 Central Jail

The Central Jail, Vellore was established on 19.03.1867 with 160 convicts. It is the largest jail in the district. The prison has historical importance. Political leaders like former president Sri R. Venkat Raman, Dr. Aringer C. N Anna Durai, late Tr.V.V.Giri, late Tr. Kamaraj and Sri Vinoba Bhave were confined in this prison. The expenditure in the jail is recovered by the value of the convict's labour. The chief industry carried

Verified © RealEst

out in the jail is weaving. A great variety of clothes of various patterns as well as table clothes, gunnies, choir mats, carpets etc are woven. Central jail is famous for its carpets. The manufacture was first taught to the convicts by a carpet weaver of Ellore. The fabrics are excellently woven and find ready sale in England. Carpentry, shoe making, iron and brass work and tent making are also carried on and the prison is well worth a visit. By extreme hard work and good conduct, convicts may earn a remission not exceeding 1/6th of the total period of imprisonment awarded them. There is a small sub jail attached to the central prison to accommodate the remand and under-trail prisoners of this dist. They will be sent to the concerned courts on the dates under police escorts.

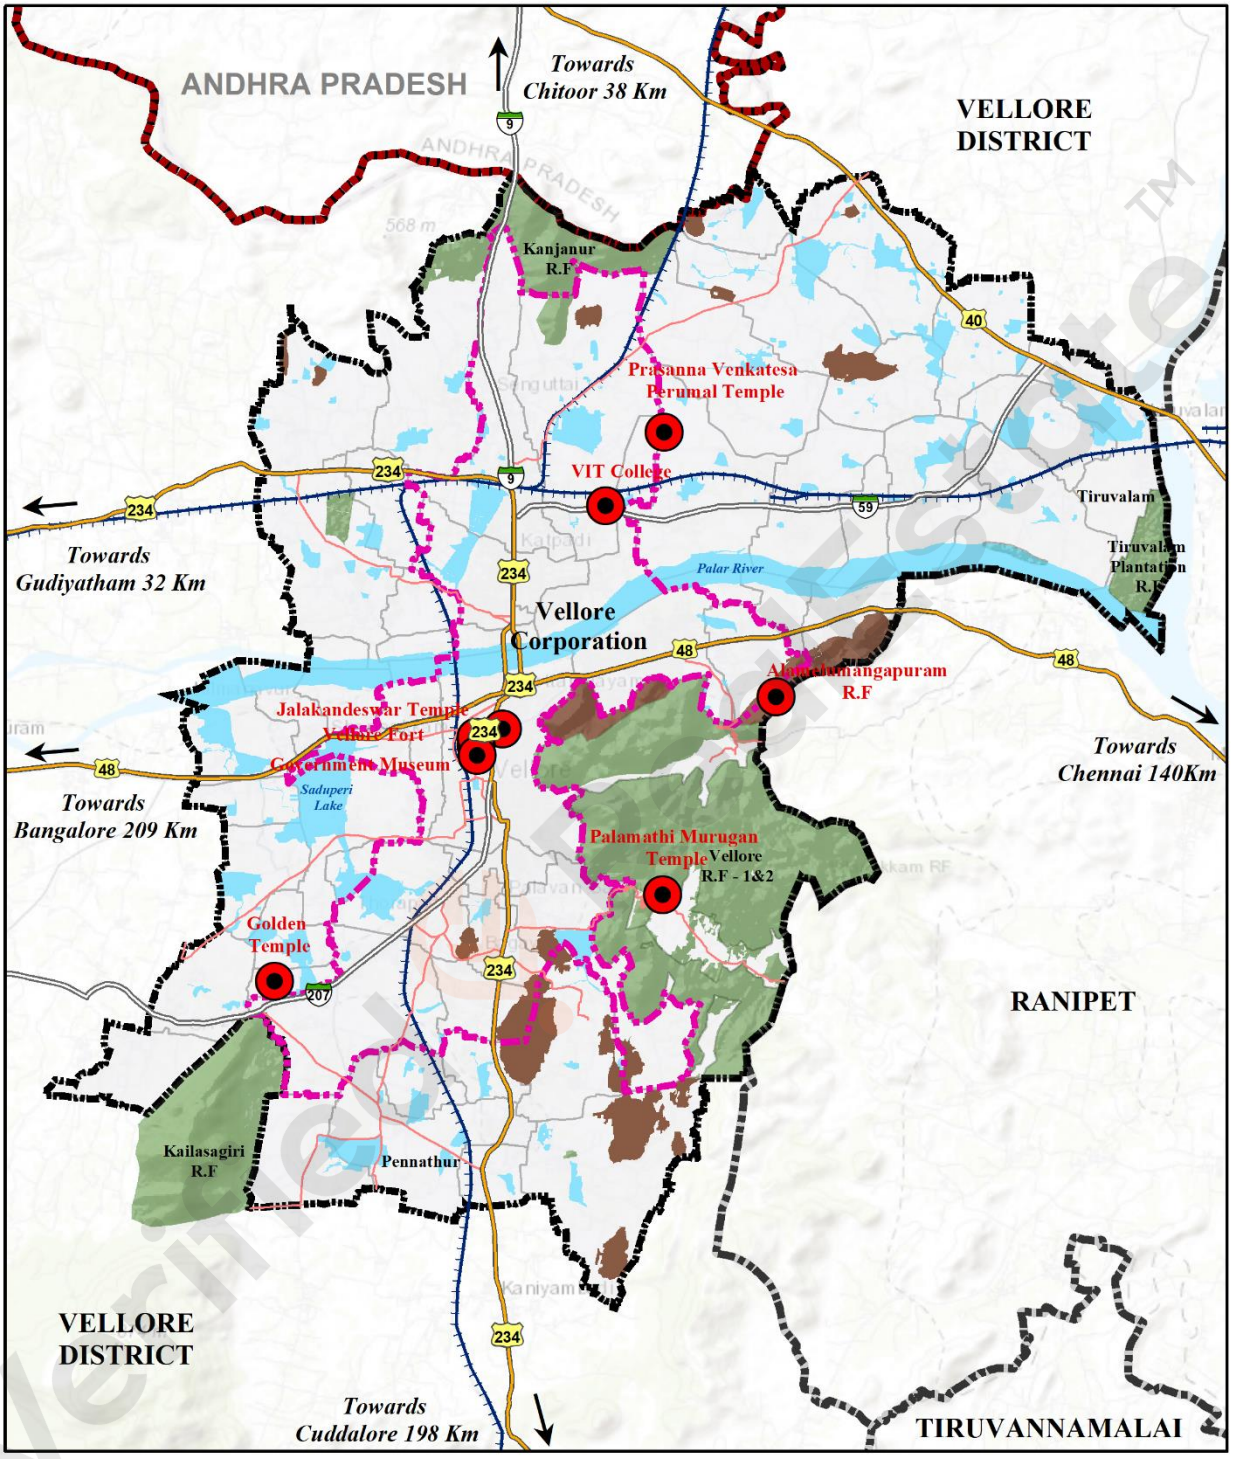

Figure 8.7: Central Jail

8.5.8 Clock Tower

The Clock Tower is located on K.V. Road, which is at the heart of the city. The tower was constructed to honour the coronation of King George V. This tower is dedicated to the 14 English soldiers out of the 22 soldiers who went to fight in World War I (1914 – 1918). These English soldiers lost their lives while fighting in the First World War. The Clock Tower is an interesting place to visit for travellers heading to Vellore, with a historic lineage to explore. Presently, the Clock Tower building has been converted into the main flower market on Long Bazaar

DIRECTORATE OF TOWN & COUNTRY PLANNING - TAMIL NADU

8.6 Summary

Social infrastructure covers a range of services and facilities that meet local needs and contribute towards a good quality of life. As per the 2011 census, the literacy rate is at 76.71% of Vellore LPA which is higher than the national average of 74.04% but less than the state average which stands at 80.09%. The literacy rate in the LPA is 81.53% for males and 71.96% for females. In the LPA, Gandhi Nagar has the highest literacy rate at 88.98% and Balamadai has the lowest literacy rate at 51.65%.

According to the RTE Act 2009, a primary school must be accessed within a 1 km radius and a middle school within a 3 km radius. Presently, all the areas in Vellore LPA are adequately covered by school facilities based on the above-mentioned norms. Improving the existing facilities will enhance the quality of education in Vellore LPA. Spatial distribution of schools as per the standards must be ensured in the future.

The URDPFI norms for educational facilities suggest a provision of one primary school for 5000 population and one senior secondary school for 7500 population. Except for special schools, the existing number of schools in Vellore LPA is satisfactory for the present population.

There are a total of 26 higher education facilities in the LPA, this includes 2 Medical Colleges, 2 Engineering Colleges, 6 Nursing Colleges, 9 Arts and Science Colleges, 5 it is, 1 Law college, and 1 university. The educational institutions in Vellore LPA meet the planning norms for higher education mentioned in URDPFI guidelines and there is no need for the provision of additional facilities for the present population.

There are 37 hospitals in the Vellore that provides medical assistance, out of which Christian Medical College and Hospital is the major one. There are two Government hospital named Vellore Pentland Government hospital and ESI hospital. There are 10 urban Primary Health care centre in the Corporation. One Government Veterinary Hospital is

Verified by PadEstate™

operational in Vellore. Around 3 Siddha and Unani dispensary are operational in town. There is deficit of dispensaries in the Municipal Corporation and Village for the years 2021 and 2041. There is also a deficit of family welfare centres in the villages. Other health care facilities satisfy the norms.

Recreational facilities include parks, playgrounds, open spaces, and cinema theatres. Parks and open spaces create a high quality of life and promote inner-city revitalization. Open space boosts local economies by attracting tourists and supporting outdoor recreation. According to NBC rules, 3 Sq. m/person is the minimum norm for open space in a built-up area. The open space reserved for recreational activities at any layout must not be less than 100 Sq. M with a minimum dimension of 10 meters as recommended in TNCDBR 2019. A total of 2.83 Sq. Km open space has to be created in the LPA.

Verified RedEstate™

9. Traffic and Transportation

An area's development and the foundation of any economy are greatly influenced by its transportation infrastructure. It is among a city's most crucial infrastructural components. Analysing and comprehending the role of transportation in the current urban and surrounding environment is the goal of studying the transportation sector. The goal of the study is to comprehend the transportation sector's current potential as well as its strengths, shortcomings, and limits in order to establish strategies and initiatives that will be essential to the growth of the city.

Vellore district has good connectivity with Vellore Municipal Corporation with other municipalities and town Panchayat in the district and also outside connected by National Highway and State Highways. The Vellore district undivided has the total length of 1530.390 Km. Out of total road in the district, minor district roads are contributing more about 58.98% to total length, which is the integral part in regional connectivity in the district. National Highways and State Highways length is about 14.85%,12.75% respectively due to the presence of Chennai – Bangalore NH 48 and Mangalore – Villupuram NH 234.

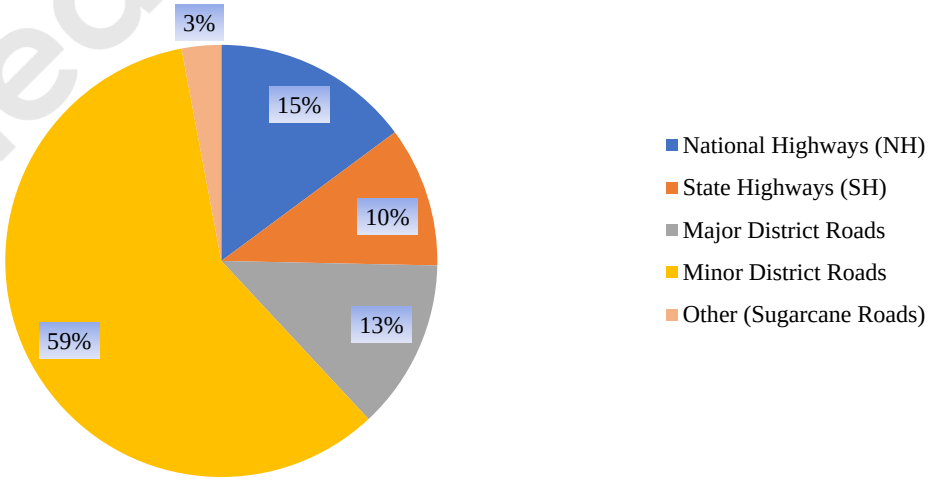

Figure 9.1 Distribution of road in the districts by length
(Source: District Census Handbook)

Verified RealEstate™

9.1 Existing Scenario

9.1.1 Road Network

Vellore has a well-developed transport infrastructure and is well connected by road and rail network with most cities and towns in India. National Highways NH 48 and NH 234 crisscross the city. Vellore is well connected by rail and bus routes to major towns of the Tamil Nadu and neighbouring states like Andhra Pradesh, Karnataka and Kerala. The NH 48 from Ranipet to Krishnagiri (forming part of Chennai – Bangalore corridor) and the NH 234 (Cuddalore – Chittoor) cut across the LPA. The NH 234 from Andhra Pradesh Border - Peranampattu - Gudiyatham - Vellore City - Polur - Tiruvanamalai - Villupuram passes through Vellore city and connects the other cities of Tamil Nadu.

As per the Comprehensive Mobility Plan of Vellore, the Total length of road network in the city is 702 km out of which 650 km of the roads are maintained by the Municipal Corporation. Approximately 6-8% of the total area under the Municipal Corporation lies under the road network. SH – 9 passes through the center of the city dividing it into two parts.

The principal transportation corridors are lined by major commercial and government entities and public centres such as shopping malls, residential complexes, commercial complexes, and other important institutional buildings.

Major congestion corridors and junctions in the city are Arcot Road, Katpadi road, Allapuram, Bazar Road, Chittoor Road, CMC Junction, Junction near Gandhi statue and VIT. These corridors and junctions need immediate revamping for traffic regularization. The town lacks pedestrian footpaths resulting in pedestrians using the paved carriageways and further adding to the congestion.

Verified RedEstate™

The city has 2 bus stands. The old bus stand is close to the Vellore Fort whereas the new Bus Stand is located near Old Palar Bridge Road. More than 1650 no. of buses are being operated in the new bus stand per day.

The major intersections within the LPA areas are Gudiyatham, VIT road junction, Viruthampet, Green Circle, National Theatre, CMC hospital junction, Vellore Fort junction, TTD junction, Muslim High School junction, Mumme Hospital junction, Lakshmi Theatre junction, Velapadi junction, toll gate junction and Jail junction.

Flyovers are built to cater traffic along different corridors without interfering each other. The only flyover within Vellore LPA area is located near Green circle along Chennai-Bangalore (NH- 48)

At grade crossings are observed near Vellore station on Kasba main road, Vasanthapuram road, R.N Palayam road, Ariyur and Kalinjur main road. There is road over bridges near Katpadi station along NH 234 and NH 48, Karnambattu ROB over SH 59.

9.1.2 Traffic Analysis

Mobility analysis has been done based on the survey conducted at 7 important and prominent locations, viz., Anna Salai, CMC – Ambur Road, Chennai Ambur Road, Katpadi Chennai Road, Chittor Vellore Road (2 Locations), Bagayam Anna Salai. Table 9.1 shows the cumulative vehicle observations from the above locations.

Based on the observations, the modal share of vehicles has been calculated, which is shown in Table 9.2 below. From the table it could be observed that two-wheelers contribute to the maximum, 70% of the total share, followed by auto rikshaws and cars.

Verified RealEstate™

Table 9.1 Vehicles observed at the locations

Location	Total Vehicles Observed

9.1.3 Parking Survey

Parking at present is provided at various locations closer to the demand. It is observed from the parking surveys that the present provision meets the demand. However, it is observed that on street parking is

Verified by RealEstate™

followed, though off street parking is available, due to traffic regulation issues. The Parking Survey Summary is given IN Table 9.3 below.

Table 9.3 Results of Parking Survey

Location	Peak Time	Peak Accumulation Equivalent Car Space (ECS)	Parking Type
Chittoor Bus Stand	19:30-20:00	62	Off
New Bus Stand Left	18:00-18:30	35	Off
New Bus Stand Right	17:30-18:00	27	Off
Old Bus Stand Side 1	10:00-10:30	99	Off
Old Bus Stand Side 2	10:00-10:30	55	Off
CMC Hospital Left	19:30-20:00	35	Off
CMC Hospital Right	11:00-11:30	21	Off

Verified RealEstate™

Parking index: Parking index is also called occupancy or efficiency. It is defined as the ratio of number of bays occupied in time duration to the total space available. It gives an aggregate measure of how effectively the parking space is utilized. Parking index can be found out as follows

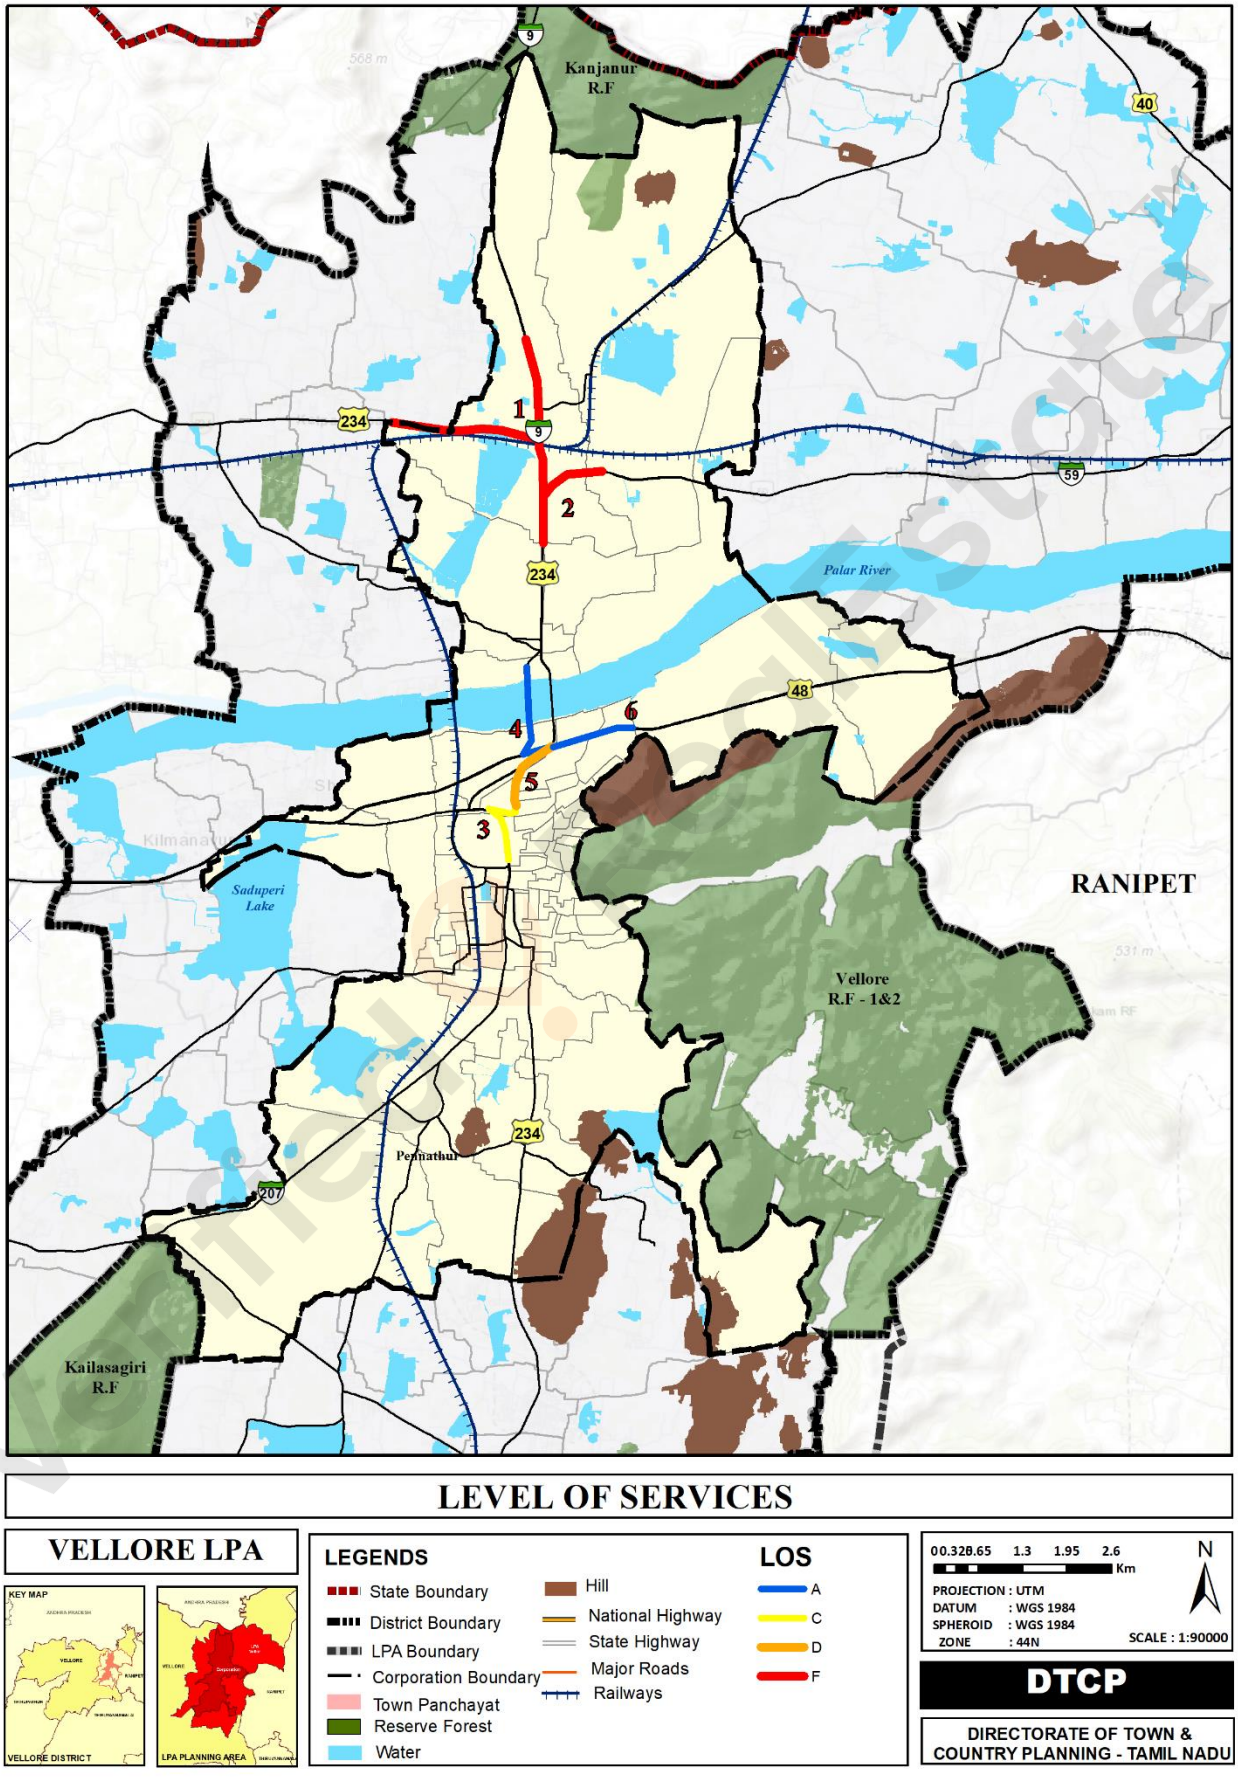

Parking index = (Parking Load/Parking Capacity) X 100

Table 9.4 Peak Hour Parking Index

Location	Parking Index
Chittoor Bus Stand	1.16
New Bus Stand Left	1.17
New Bus Stand Right	2.09
Old Bus Stand Side 1	1.19

Vellore Corporation

9.1.4 Public Transportation System

Public transport is administrated by city governments around the world as a top development priority. A good public transport system is often one of the defining features of a city, attracting residents, businesses, and tourists. Public Transport system (bus) is being presently operated by both public and private sectors which having the total fleet of 275 buses running on 18 routes in the city as per Comprehensive Mobility Plan for Vellore LPA, 2014.

Presently Bus transport is being used as the only Public Transport system. The public transport is mainly concentrated on one corridor. Figure 9.2 shows the existing public transport routes in Vellore LPA.

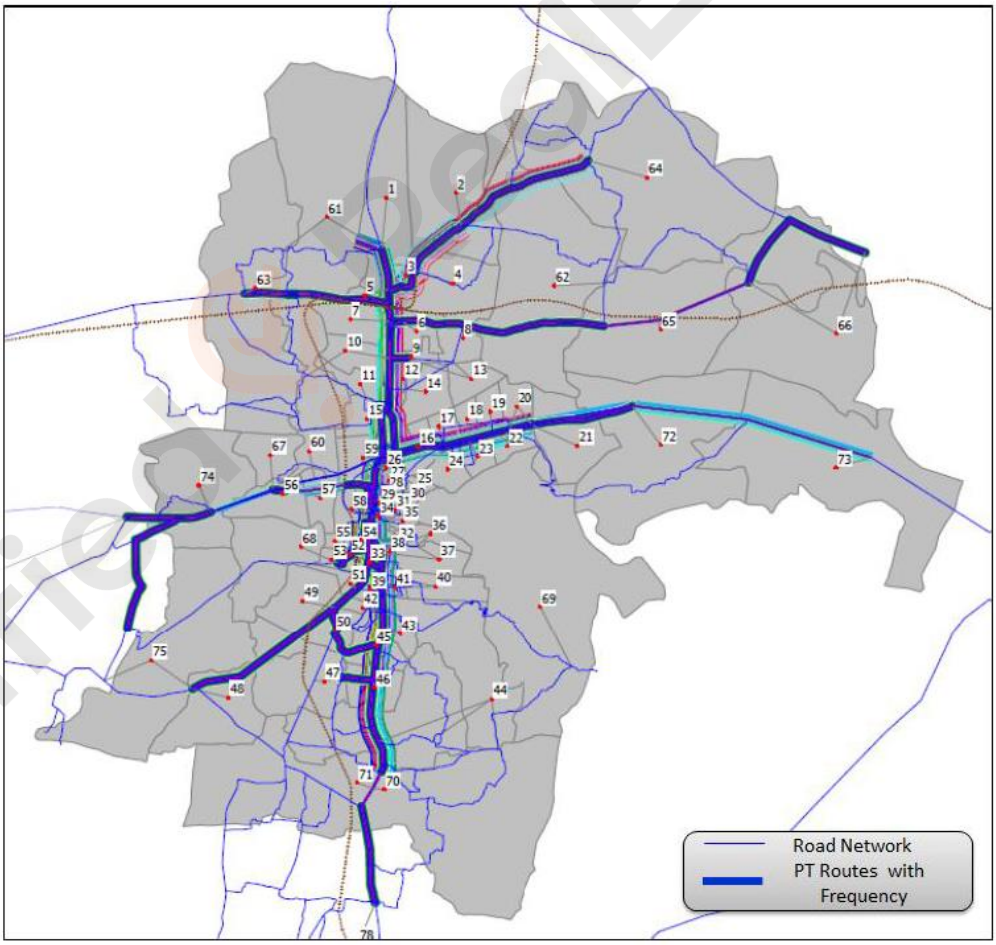

Figure 9.2 Public Transport Routes in Vellore LPA

(Source: Comprehensive Mobility Plan Vellore)

VerifiedRealEstate™

Some of the salient features of public transportation system are as below:

The frequency of buses in the peak hour varies from 10 min to 15 minutes, while in the non-peak hour it varies from 20 min to 25 minutes.

The buses are sheltered in two bus terminals – one is old bus terminal located near CMC hospital and a new bus terminal near river bridge at Vellore operating intercity services which is under construction. So only busses towards north like Chennai, Andhra area operating from there and other busses are starting from old bus terminal.

There are three bus depots are in Vellore LPA area i.e. two depots in Konavattam and one is at Krishna Nagar.

Bus queue shelters and bus box markings on carriageway are almost absent in the city, as a result of which the buses tend to stop erratically on roads depending on passengers' demand for boarding-alighting. This hinders smooth traffic movement and also creates potential for accidents.

Shared auto-rickshaws and autos together account for about 20 % of all peak hour trips and form the lifeline of Vellore city transport system, especially in the inner areas.

There are rickshaws and cycle-rickshaws in the Vellore LPA area but they are used for the movement of goods not for the people which mostly used near market areas.

Verified RedEstate™

9.2 Grid of Roads

The grid of roads is prepared for Vellore LPA in order to improve the road infrastructure and the circulation pattern. The grid of roads helps in mobility of the traffic in a planned manner neglecting major traffic congestion issue in the LPA. This provides good connectivity and access to the major roads also to maintain the hierarchy of the roads. As per IRC norms, the minimum standard distance to reach Arterial, sub arterial and Collector roads are,

- Arterial Roads – 4 Km
- Sub Arterial Roads – 2 Km
- Collector Roads – 1 Km

A grid pattern is prepared for each type of road 4Km X4Km grid is prepared for Arterial Road, 2Km X 2Km grid for Sub- Arterial roads and 1km X 1Km grid for the Collector roads. The following image represent the conceptual drawing for the grid of roads

The Grid of roads are proposed for Vellore LPA with an aim to ease the flow of traffic and to support the future development of the LPA. The proposed grid of roads for the LPA will improve accessibility to the rural area and new developable area of LPA. Vellore LPA has 2 major corridors and 3 major corridors.

The proposed grid of roads for Vellore LPA is of Grid iron road pattern incorporating the existing road pattern. The LPA has well developed arterial road, Sub arterial roads collector roads and local roads are provided at various places of LPA to provide linkage to the arterial and sub arterial roads. The grid of roads improve access to villages where the connectivity are less when compared to other parts of the LPA.

Verified RealEstate™

The gird of roads includes proposal of new road and road widening of existing roads. In order to achieve better grid of road pattern certain roads and road widening are proposed out of LPA limit considering the future population growth and new development along the outer ring road.

PROPOSED ROADS

There are 6 Sub arterial roads, 18 collector roads proposed based on the grid of road pattern, these roads covers the missing link between the urban and the rural area and falls in villages will less connectivity such as Karigeri, Kandipedu, Oodanthangal, Erangthangal, Kattupathur, Pemathur etc.

The Sub arterial roads are proposed with 30 m road width and the collector roads with 24m, 21m,18m etc based on the connecting roads. These collector roads will improve the mobility of Traffic volume and also provide better connectivity between the core and the periphery of the LPA.

From the Comprehensive Mobility Plan, the alignment of Radial Ring Road is incorporated into the Grid of road network. The main objective of radial ring roads is to divert the excess flow of traffic into the core city. The ring road also increases the connectivity to the villages located outside the Vellore Corporation boundary.

The Ring Road is being executed in three phases where the Phase I 13.28 Km, Phase III is strengthening and Widening of existing road, and Phase III is 29 Km. The road starts from Arapakkam (NH48) and ends in Sathumadurai (NH243).

The ring road connects important government locations like the District Collector Office, S.P Office, District Court, District head quarter hospital, Government Medical College, Government Engineering College, Tiruvallur University and Golden Temple. This road will majorly reduce the truck traffic going to Chittoor from Chennai flowing through Katpadi.

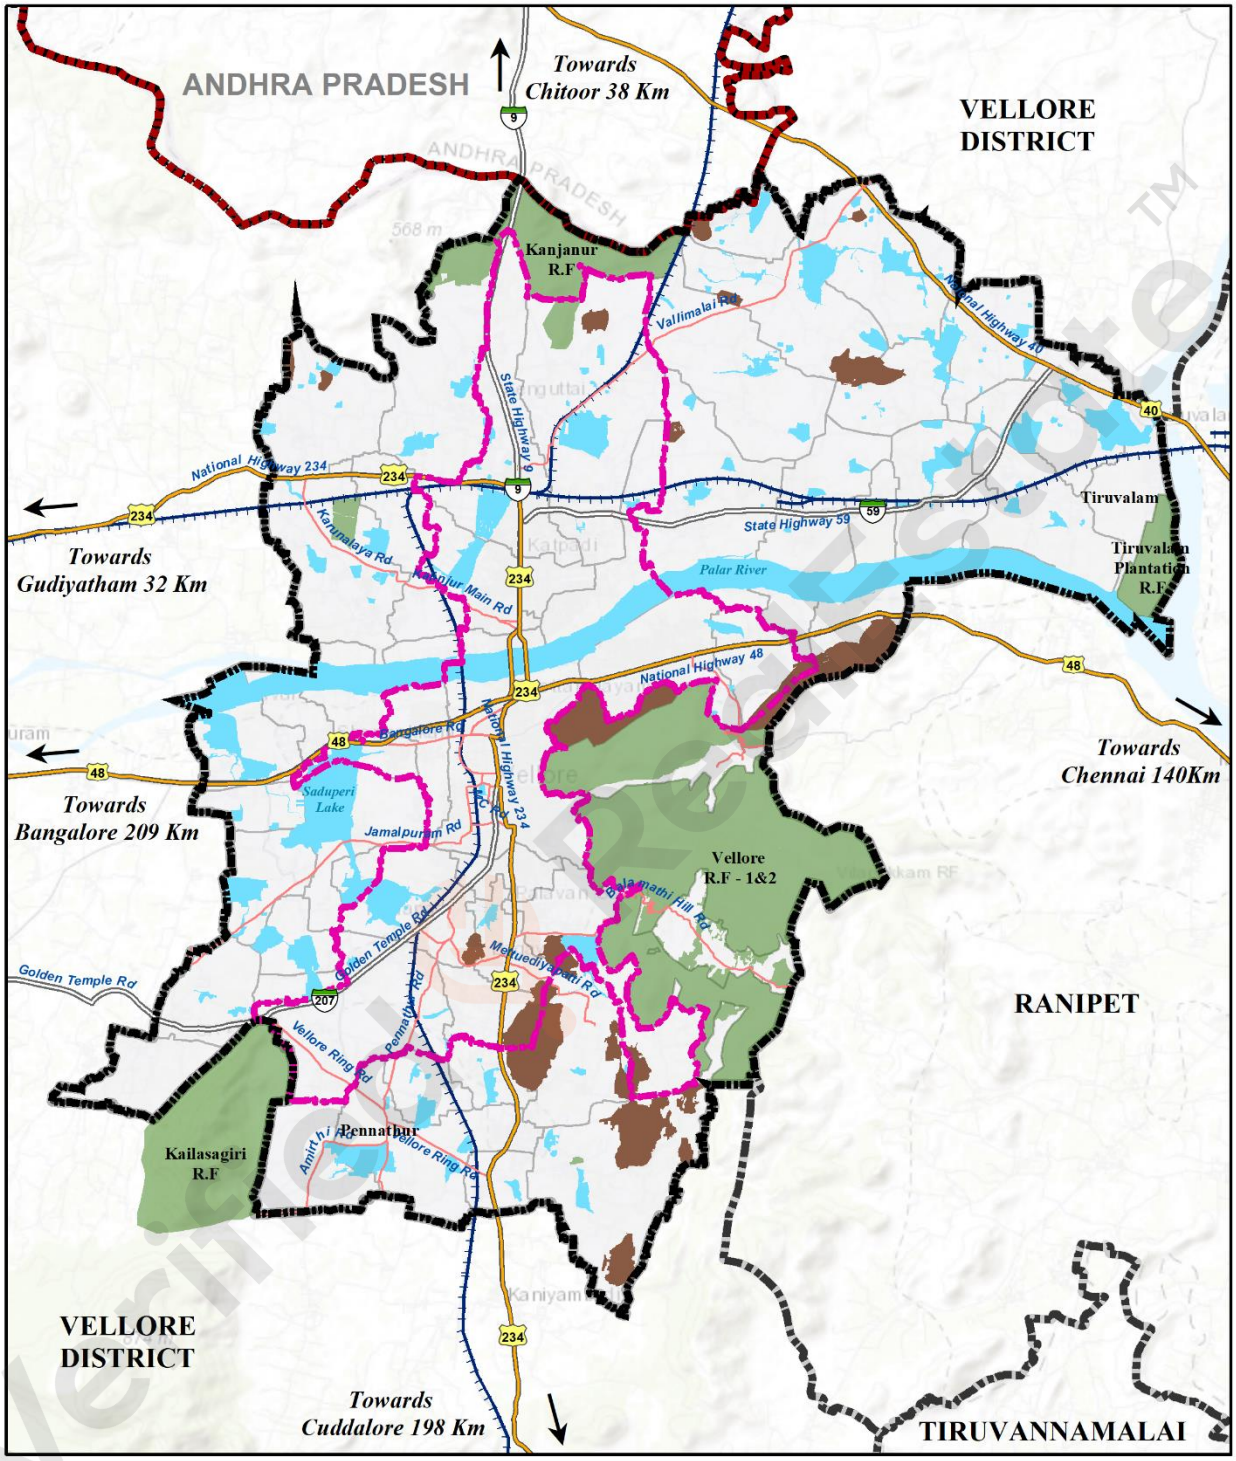

Verified © RealEstate ™

As per Indian Road Congress 86-1983, the space standards for Arterial Road is 50-60 M, Sub – Arterial is 30-40 M, Collector Road is 20-30 M and Local Street is 10-20 M. In case of Vellore there are two arterial road are running one is NH 48 and other is NH 234.

The two National Highway is considered as arterial roads and for sub – arterial the road width of 30 M is considered and for collector roads it is sub divided into two parts one is of 18 M and other is 15 M of width. Based on the above road width the grid of road pattern is derived.

Verified Report

9.3 Bus Terminus

The present new bus stand was constructed during 1985 with an area of 8.89 acres, which is inadequate. Now the Government Transport Corporation is operating a huge number of buses from various towns for providing good and sufficient conveyance facilities the public visiting this pilgrimage and tourism town. As such be the case a new bus stand would be constructed with more bays and facilities under Smart City Mission (SCM).

The 51 crore Integrated Bus Terminus, off the Bangalore Highway (NH 48) in Vellore, is nearing completion with over 80% of the total work, including the terminus, bus bays, shopping area, parking lot and cloak room, completed. Apart from buses to Chennai and Bangalore, the new terminus is planned to host buses to Tiruvannamalai, Arani, Kancheepuram and Chittoor and it would ease the pressure on the old bus stand.

9.3.1 New Bus Terminus

As per the Comprehensive Mobility plan of Vellore, the new terminus would have bays to park 84 buses. Eleven bays are being built to park idle buses that ply mainly outstations. A parking lot that to hold 96 two-wheelers and 15 cars, besides retiring rooms and rest rooms for the crew will come up at the terminus. The new terminus will have two restaurants, ATM kiosks, a public address system and 63 shops. Ramps for persons with disabilities will be provided. The entire terminus will come under surveillance with a police outpost monitoring the vehicles round-the-clock. Free Wi-Fi connections will also be provided.

Corporation officials said that 3,000 sq. ft of private land behind the terminus will be acquired by the district administration to provide one more exit for buses. It is funded under the multi-crore Smart City Project by the Vellore Corporation; the new terminus is being built on the spacious 3,187 square metres connecting most of the arterial roads and intersections in

Verified RealEstate™

the town. It will also help long-distance travelers board buses easily. It proposed by parking area 771.00 Sq. m which occupies 96 No of two Wheelers

9.4 Rail Network

Vellore LPA has three railway stations, namely Katpadi junction, Vellore Cantonment and Vellore Town connecting the city with Chennai, Bangalore, Tirupati and Trichy. One of the major railway corridors in the country, Chennai – Bangalore/ Coimbatore/ Ernakulam runs about 5 km north from the town. In this, Katpadi junction is the major junction which is in the path of Chennai – Bangalore corridor and acts as the feeder railway junction to the LPA. Another railway line passes through the LPA with Vellore cantonment and Vellore town railway stations.

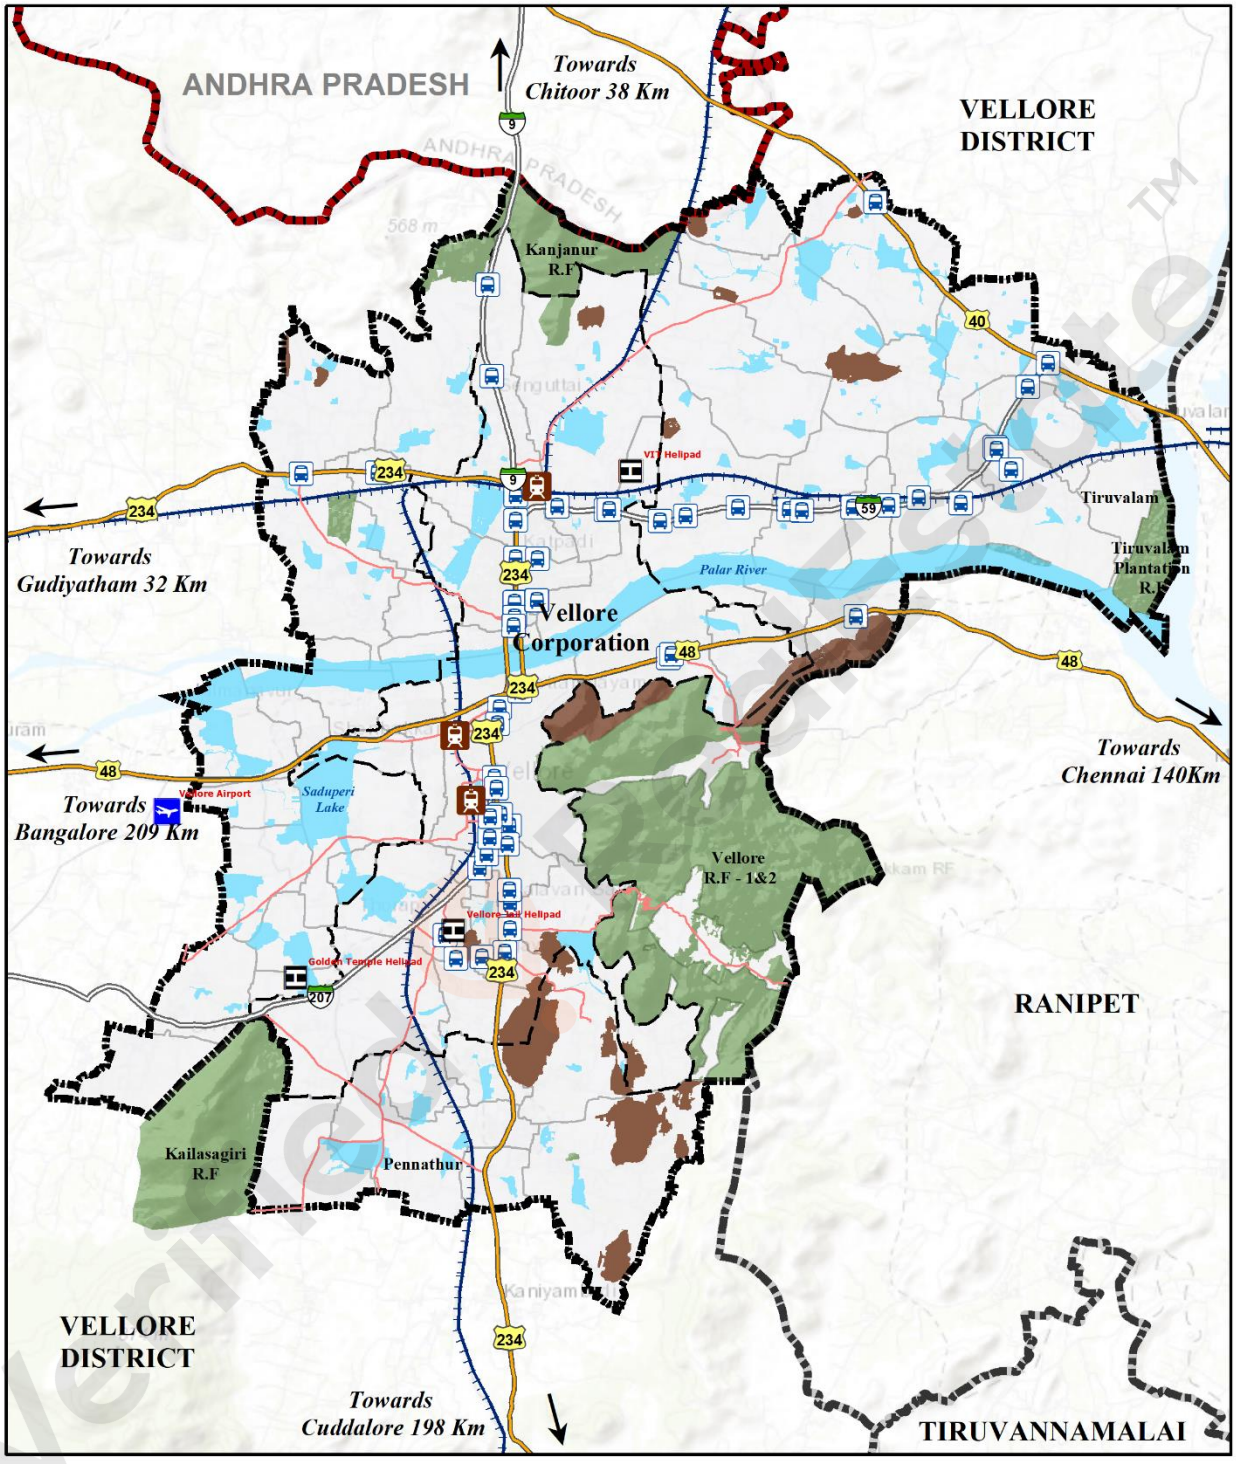

9.5 Airport

The Vellore Airport was sanctioned under the second phase of the UDAN-RCS (Ude Desh ka Aam Naagrik- Regional Connectivity) scheme and planning to operate 20-seater planes connect the Chennai-Vellore-Bengaluru route in both directions. There is about 51.5 acres of land is reserved for this and named as Vellore Greenfield Airport.

This new Vellore airport is under construction and works almost over which is planned to operational by 2021 but delaying for various reasons. Nearest airports are at Chennai (130 km), Bengaluru (200 km); and Tirupati (100 km).

10. Environment and Natural Hazards

The environment is important because everything that helps humans survive depends on it. People's quality of life is intimately correlated with the state of the environment. The environment is crucial to the design of space. Spatial planning must take environmental factors into consideration in order to protect natural resources and use them wisely for the benefit of both the current and future generations, as well as to ensure population safety and adequate living conditions and to reduce the adverse effects of economic and other activities on the environment.

10.1 Climate and Rainfall

The climate in Vellore is tropical. Precipitation levels in the winter are substantially less than those in the summer. This specific weather pattern is classified as Aw (Tropical Savannah) by the Köppen-Geiger climate classification system. Based on available statistics, the average annual temperature recorded in Vellore is 26.9 °C. According to weather records, there is 938 mm of precipitation on an annual basis.

The difference in precipitation between the wettest and driest months is 169 mm. The average temperature varies by 8.7 °C during the year. November has the highest relative humidity of any month at 76.82 percent. May has the lowest relative humidity of any month with 52.38%. October (1.90 days) is the month with the most rainfall. February has the fewest number of days (18.03) in the year.

10.2 Topography, Soil and Groundwater

Vellore lies in the Eastern Ghats region, Palar River Basin. The topography is almost flat with a slope from west to east. The average elevation of Vellore is 283m, minimum elevation is 153m and maximum elevation is 882m.

Verified RealEstate™

The types of soil in the Vellore city are chiefly gravelly, stony, and sandy of the red variety. Black cotton soil is not available in Vellore Taluk. Out of all, red loam soil is well distributed in Vellore.

The groundwater levels from 53 observation wells of TWAD have been analyzed for Pre monsoon and Post monsoon. The 5 year average groundwater level in m below ground level for pre and post-monsoon is shown in table 10.1.

Table 10.1 Ground Water Levels

Jan 2017	May 2017	Jan 2018	May 2018	Jan 2019	May 2019	Jan 2020	May 2020	Jan 2021	May 2021	5 Years Pre Monsoon Average	5Years Post Monsoon Average
12.5	19.6	8.1	17.0	12.6	21.3	13.7	19.3	26.4	38.6	16.1	10.1

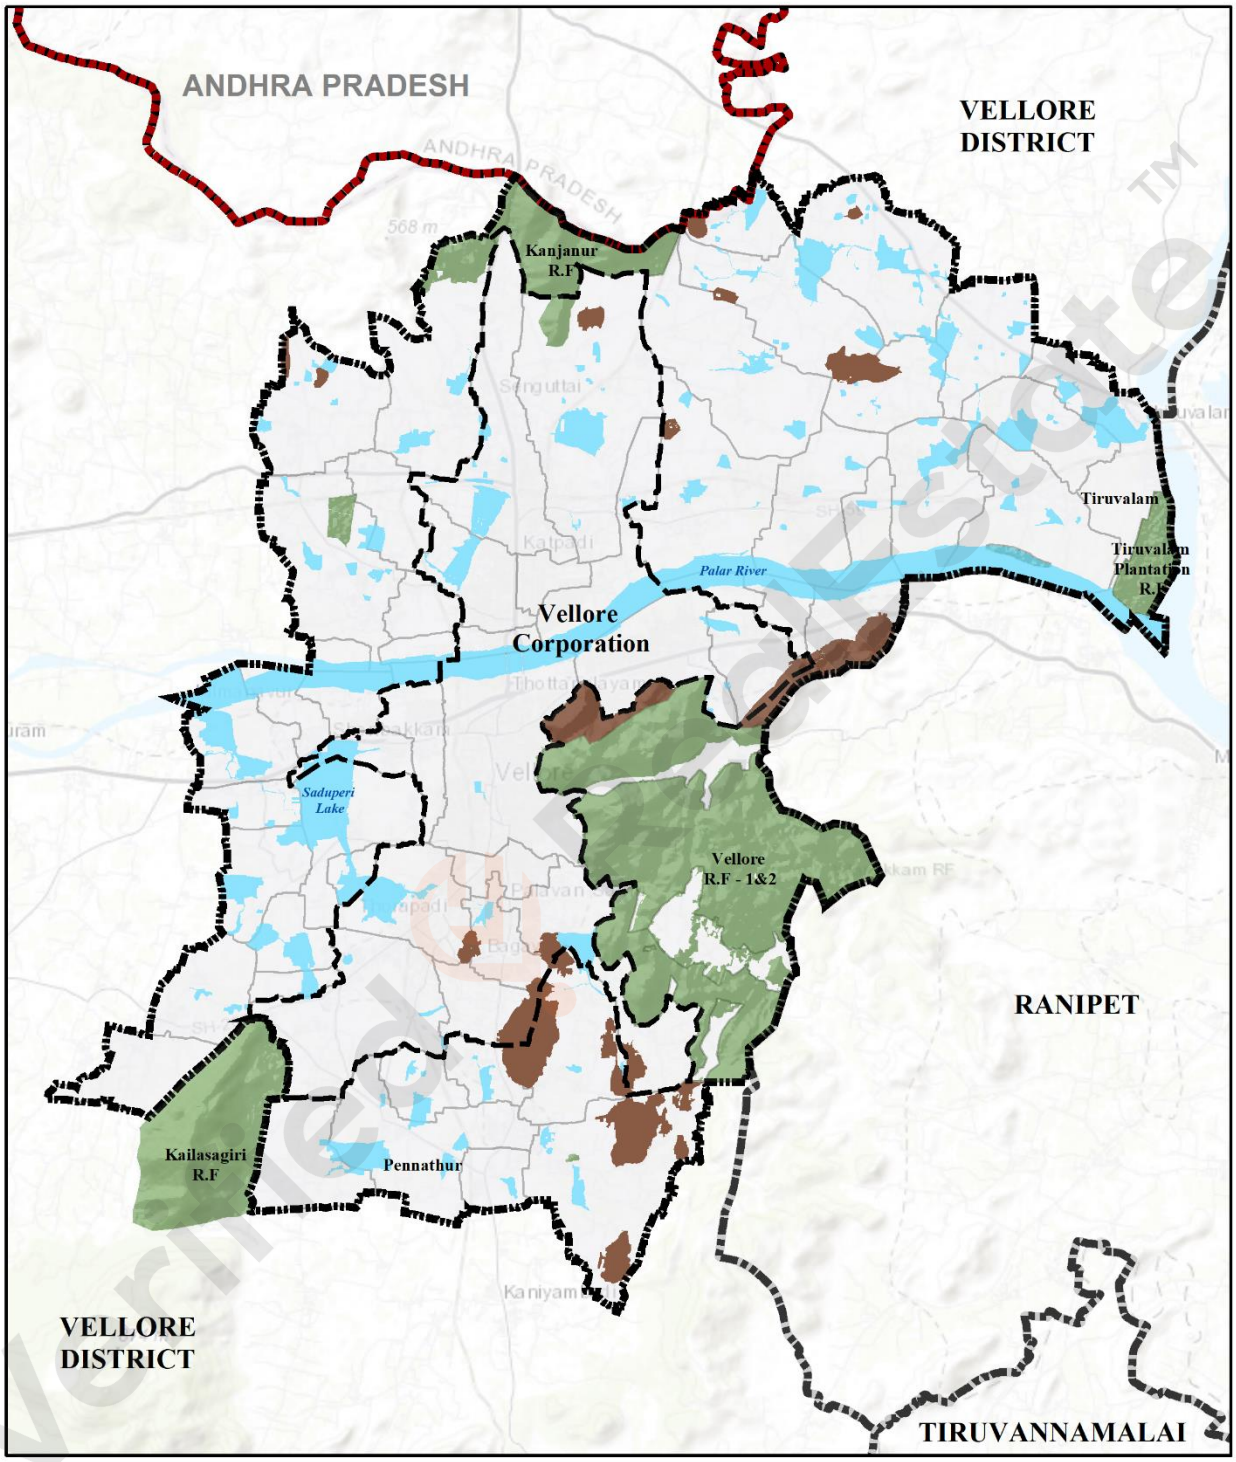

(Source: TWAD Board)

10.3 Forests

There are three reserved forests in the Vellore Local Planning Area, viz., Konjanur reserved forest, Vellore reserved forest, Tiruvalam plantation reserved forest and Vellore reserved forest. Konjanur lies in the Northern part of LPA, Tiruvalam Plantation reserved forest lies in the North Eastern part of the LPA, and Vellore Forest lies in the Eastern of LPA.

10.4 Hazards affecting Vellore LPA

10.4.1 Earthquake

Vellore is prone to Seismic Zone III (moderate Seismic Hazard – Expected Magnitude up to 6.9) as per Bureau of Indian Standard. As per the study in Disaster Management Revised Goals-2017, the magnitude ranges from 2.2 to 5.0. The maximum magnitude 5.0 recorded in the year 02/08/1865 is the highest recorded in the district so far from the history. However, the district is classified under Zone III and that expecting a magnitude upto 6.9.

10.4.2 Draught

Vellore District is arid and dry as the rainfall is scanty and erratic in its nature. The drought condition during summer generally affects people for their need of water. Agriculturists suffer a lot by drought. Sometimes it may affect wild life survival and animal behaviour and movement is mainly influenced by the availability of water inside the forest. Vellore is under moderate to high risk zone for Drought Hazard. Drought affected throughout the District in the year 2016 and 12818 farmers were affected.

10.4.3 Flood and flash floods

Palar River is the major river draining the district, flowing towards east for a distance of about 295 km. It has a vast flood plain in the lower reaches, but is dry for major part of the year. Vellore is moderately prone to floods and flash floods. Based upon the details of past flood and flash flood details, revised goals for earthquake risk reduction – 2017-2030, the areas have been classified based on vulnerability

Vulnerable areas for flood in the urban part of LPA are as follows, the status of their vulnerability is low and they are located in Vellore taluk.

- Thidir Nagar, Shenbakkam
- Kansalpet
- Sambath Nagar
- Indira Nagar, Puliyanthoppe, Rangasamy Nagar, Vasanthapuram

Verified RealEstate TM

Vulnerable areas for floods in the rural areas area as follows:

- Edaiyansathu
- Nelvoy Eri, Nelvoy
- Kilvallam AD Colony, Kilvallam
- Kilpallipattu
- Kaniyambadi AD Colony, Kaniyambadi

The above areas are located in Vellore Taluk and have low vulnerability. The following areas are of medium vulnerability and are located in Katpadi Taluk.

- Ponnai
- Melur
- Kalinjur.

10.5 Flood Mitigation for Vellore LPA

The Vellore district is far from Coast and landlocked, because of its climatic conditions Vellore district is prone to water and climate-related disasters. Drought, Floods, earthquakes (Zone- III), Fire Incidents, Heat Waves, Cold Waves, and High Wind have been recurrent phenomena. Floods have been a recurrent phenomenon in India and cause huge losses to lives, properties, livelihood systems, infrastructure and public utilities. Palar River is the major river draining the district, flowing towards the east for a distance of about 295 km. It has a vast flood plain in the lower reaches but is dry for a major part of the year. The houses built in the villages next to the embankments are vulnerable to floods. The most vulnerable to flood in Vellore is agriculture crops, Transport, Houses, Construction, Drinking Water, Cattle, Irrigation Equipment, and Educational Institutes. In this scenario, the Central and State Governments have taken various measures to mitigate the effects of floods. These mitigation plans include both structural and non – structural measures.

Verified RealEstate™

10.5.1 Flood Mitigation Plan

Both structural and non-structural measures shall be taken as part of the mitigation plan. Structural mitigation refers to any physical construction to reduce or avoid possible impacts of hazards, which includes engineering measures and the construction of hazard-resistant and protective structures and infrastructure. Non-structural mitigation refers to policies, awareness, knowledge development, public commitment, and methods and operating practices, including participatory mechanisms and the provision of information, which can reduce risk with related impacts.

Table 10.2 Structural and non-structural measures

Structural Measures	Non – Structural Measures
Housing • Disaster Resistant Housing, • Multi-Purpose Evacuation Shelters	**Economic measures** • Diversification of Economic Activity • Subsides, • Credit Waiver
Water resources • Restoration of River drainage systems • River Grading/Stream Training, Flood Routing • Clearing inflow channels	**Risk Transfer** Insurance, Credit & Tax Policies
Infrastructures • Roads, • Bridges • Drinking water, • Power, • Communication, • Education, • Heritage, • Tourism	**Societal Measures** • Public Information Campaigns, • Non formal Education • Community Involvement

(Source: DDMP Vellore)

Verified RealEstate™

10.5.2 Multi Hazard Mitigation Actions

The following structural and non-structural measures may also be considered in addition to above hazard specific actions.

Structural Mitigation Measures

All public buildings like schools, hospitals, health centres should be multi-hazard resilient being built on raised grounds and platforms with retrofitting and having adequate exit gates and fire extinguishers in place. Construct multipurpose community shelters in all vulnerable areas, houses built in the area should have multi-hazard resilient features keeping in tune with cultural housing practices

Watershed management

A study may be conducted by the District Administration to assess the existing structures and systems in place for watershed management and recommend the best options for effective watershed management. Periodically cleaning, de-silting, and deepening of natural water reservoir and drainage channels. Construction of irrigation channels. Sluice gates may be linked with ponds which could be used as a water resource for enhancing livelihood.

Structural Mitigation Measures

Risk transfer mechanisms: Establishment and strengthening of insurance schemes and policies that would transfer losses of the risk due to hazards to a third party. Insurance schemes for crops, cattle, small businesses and life should be strengthened and promoted to minimize economic losses.

Verified RealEstate ™

Formation of groups of architects, engineers, and masons and training for them on building safe infrastructure. Alternate safe housing technology along with rainwater harvesting structures is constantly encouraged & mainstreamed for long-term vulnerability reduction. Policies and bye-laws could be developed for the same.

Continuous Awareness campaign & encouragement for disaster-proof Habitat planning at the community level including shifting/relocating from low-lying areas and villages within embankments to safe raised grounds. (with some incentives if feasible).
Disaster management may include first-aid and rescue and evacuation as a part of school, college, and educational institutions (both techno-tech) curricula starting from the primary level.

The DDMA may suggest conducting Research on alternative cropping to reduce adverse effects due to flood, water logging or drought.

Structural Mitigation for Floods

- Construction, maintenance, and protection of flood control structures like embankments, ring bunds, etc.
- Dams and levees can also be constructed which can be used as temporary storage space which reduces the chances of lower plains getting flooded.
- Critical buildings as well as private houses in flood-prone areas should be constructed on an elevated area and if necessary on stilts and platforms.
- Construction of tube wells on raised platforms
- Construction of seed bank on higher ground

Non-structural Mitigation for Floods

- Well-maintained boats available at all times at GP level.

Verified RealEstate™

- Crops that can be harvested before the onset of monsoon/flood season and crops that are flood-friendly should be grown in the region.
- Awareness on flood-proof habitat planning with long-term goal of flood plain zoning and rehabilitating all to safer zones.

The above methods not only help in flood mitigation but also in recharging ground water level. In addition to the above plans, two other plans, linking of water tanks and repurposing of abandoned quarries for water storage is also proposed.

Verified by RegiEstate

10.6 FLOOD SUSCEPTIBILITY

Flood susceptibility refers to the likelihood of an area experiencing flooding. It is determined by factors like topography, land use, climate, hydrology, infrastructure, and soil type. Assessing flood susceptibility is essential for disaster preparedness and land-use planning.

Methods like GIS and remote sensing are used to map and analyse susceptibility, aiding in the implementation of proactive measures to mitigate flood. Flood Susceptibility overlaid with Social Vulnerability can also be utilised to generate Flood Risk areas.

The parameters involved for accessing the Flood Susceptibility are,

1. Slope
2. Elevation
3. Drainage Density
4. Soil Type
5. Rainfall
6. NDVI
7. TWI
8. LULC
9. Distance from Road
10. Distance from River

The Analytic Hierarchy Process (AHP) is a decision-making technique that breaks down complex problems into a hierarchy. Decision-makers conduct pairwise comparisons, assign relative importance, and use mathematical methods to determine the overall ranking of alternatives.

AHP is widely applied in various fields for systematic decision analysis. The weightage of different parameters is calculated using Analytic Hierarchy Process (AHP) by comparing and grading each parameter against the other.

Verified RealEstate™

Priorities

These are the resulting weights for the criteria based on your pairwise comparisons:

Table 10.3 Parameters and Rank for Flood Susceptibility

Parameters	Priority	Rank
Slope	2.60%	9
Elevation	2.80%	8
Drainage Density	9.60%	6
Soil Type	1.50%	10
Rainfall	11.50%	3
NDVI	9.90%	4
TWI	23.50%	2
LULC	9.60%	5
Distance from Road	3.30%	7
Distance from River	25.70%	1

Consistency Ration: 7.55%

In our study area, we have identified areas based on their susceptibility associated with flooding or other water-related issues. High-risk areas encompass low-lying regions and those proximate to water bodies, where the potential for adverse impacts from water-related events is elevated. Conversely, low-risk areas are characterized by higher altitudes and elevated plains, indicating a reduced susceptibility to water-related risks. These areas are less prone to flooding or other water-related challenges.

Verified by RegEstate™

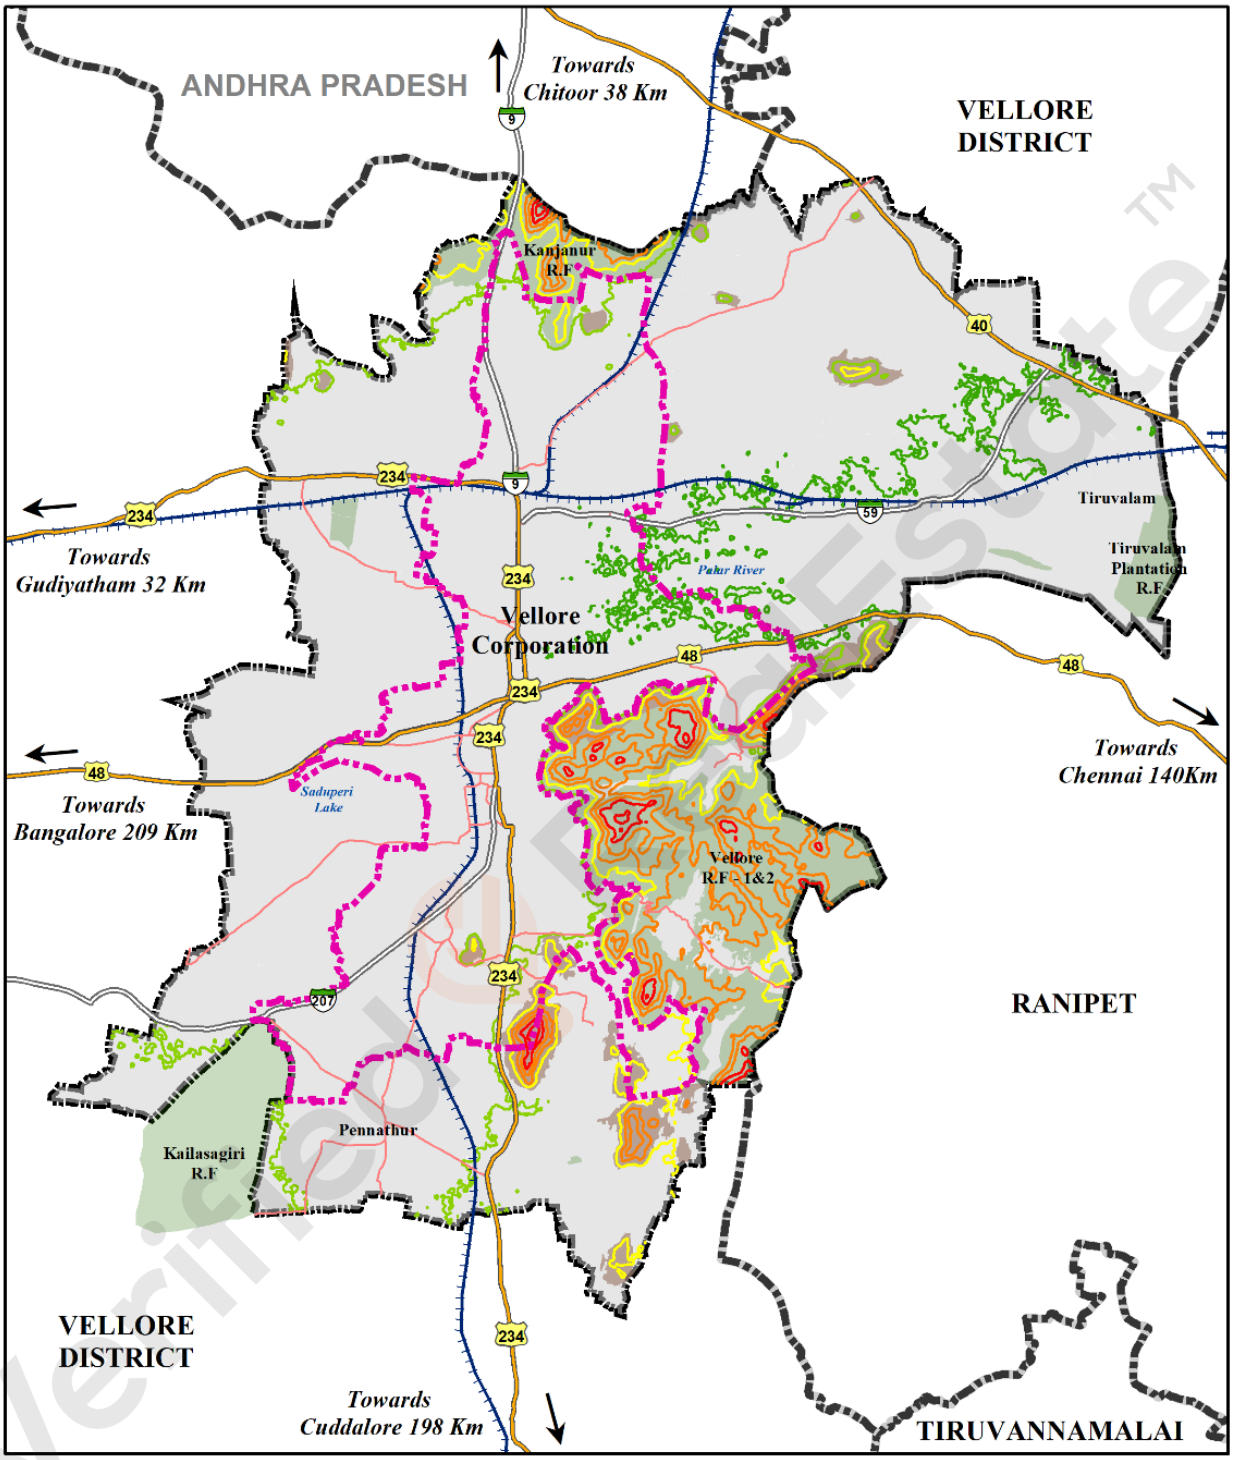

Decision Matrix:

	1	2	3	4	5	6	7	8	9	10
1	1	1	0.2	4	0.2	0.14	0.17	0.14	1	0.11
2	1	1	0.17	4	0.2	0.25	0.14	0.17	1	0.17
3	5	6	1	6	1	0.5	0.2	1	4	0.5
4	0.25	0.25	0.17	1	0.14	0.17	0.14	0.17	0.2	0.12
5	5	5	1	7	1	2	0.5	1	4	0.5
6	7	4	2	6	0.5	1	0.2	1	5	0.17
7	6	7	5	7	2	5	1	4	5	0.5
8	7	6	1	6	1	1	0.25	1	2	0.33
9	1	1	0.25	5	0.25	0.2	0.2	0.5	1	0.12
10	9	6	2	8	2	6	2	3	8	1

Furthermore, we identify no-risk areas, which are situated at high altitudes such as the Vellore Reserve Forest and Kanjanur Reserve Forest in our study area. These locations are deemed to be at minimal risk, suggesting a lower likelihood of experiencing issues related to water bodies or flooding.This categorization is useful in understanding and managing the varying degrees of physical vulnerability across different zones within the study area, aiding in the formulation of targeted strategies for risk mitigation and land-use planning.

10.7 LAND SURFACE TEMPERATURE

Land Surface Temperature (LST) is the temperature of the Earth's Surface. The Land Surface Temperature depends majorly on the dense vegetation cover on the urban area. In areas where there is dense vegetation, the LST will not rise above 35 degrees Celsius. LST has crucial importance in an urban microclimate, this is taken as an indicator to evaluate the hottest region in the urban fabric. The LST is measured directly with ground-based instruments or indirectly using satellite remote sensing. LST is crucial for climate studies, environmental monitoring, agriculture, and natural resource management, providing insights into temperature variations across different land surfaces.

In the study, an analysis of the land surface temperature across the designated area was conducted and the results indicate distinct thermal characteristics among different land types. Specifically, areas classified as barren land and built-up structures were found to emit higher levels of heat compared to water bodies and regions covered with vegetation.

Within our study area, the Vellore Corporation stands out for its elevated heat emissions, surpassing other parts of the region. This observation suggests a localized concentration of heat, potentially linked to urbanization or specific land use patterns within the Vellore Corporation boundaries. Conversely, the Vellore Reserve Forest exhibits notably lower heat emissions in our analysis.

This could be attributed to the cooling effects of the forest canopy and the overall preservation of natural vegetation, which tends to mitigate the heat island effect often associated with urban areas.

Vellore is known for its highest temperature in Tamil Nadu during the summer season, the temperature will touch 45 Degrees Celsius in mid of May. The Vellore is a land lock area where the LPA is surrounded with hillocks and reserved forest. The heat during the summer gets trapped

Verified RedEstate™

and increases the urban heat island effect. Due to the rocky landscape the heat gets reflected and get trapped which significantly increases the micro temperature within Vellore Corporation.

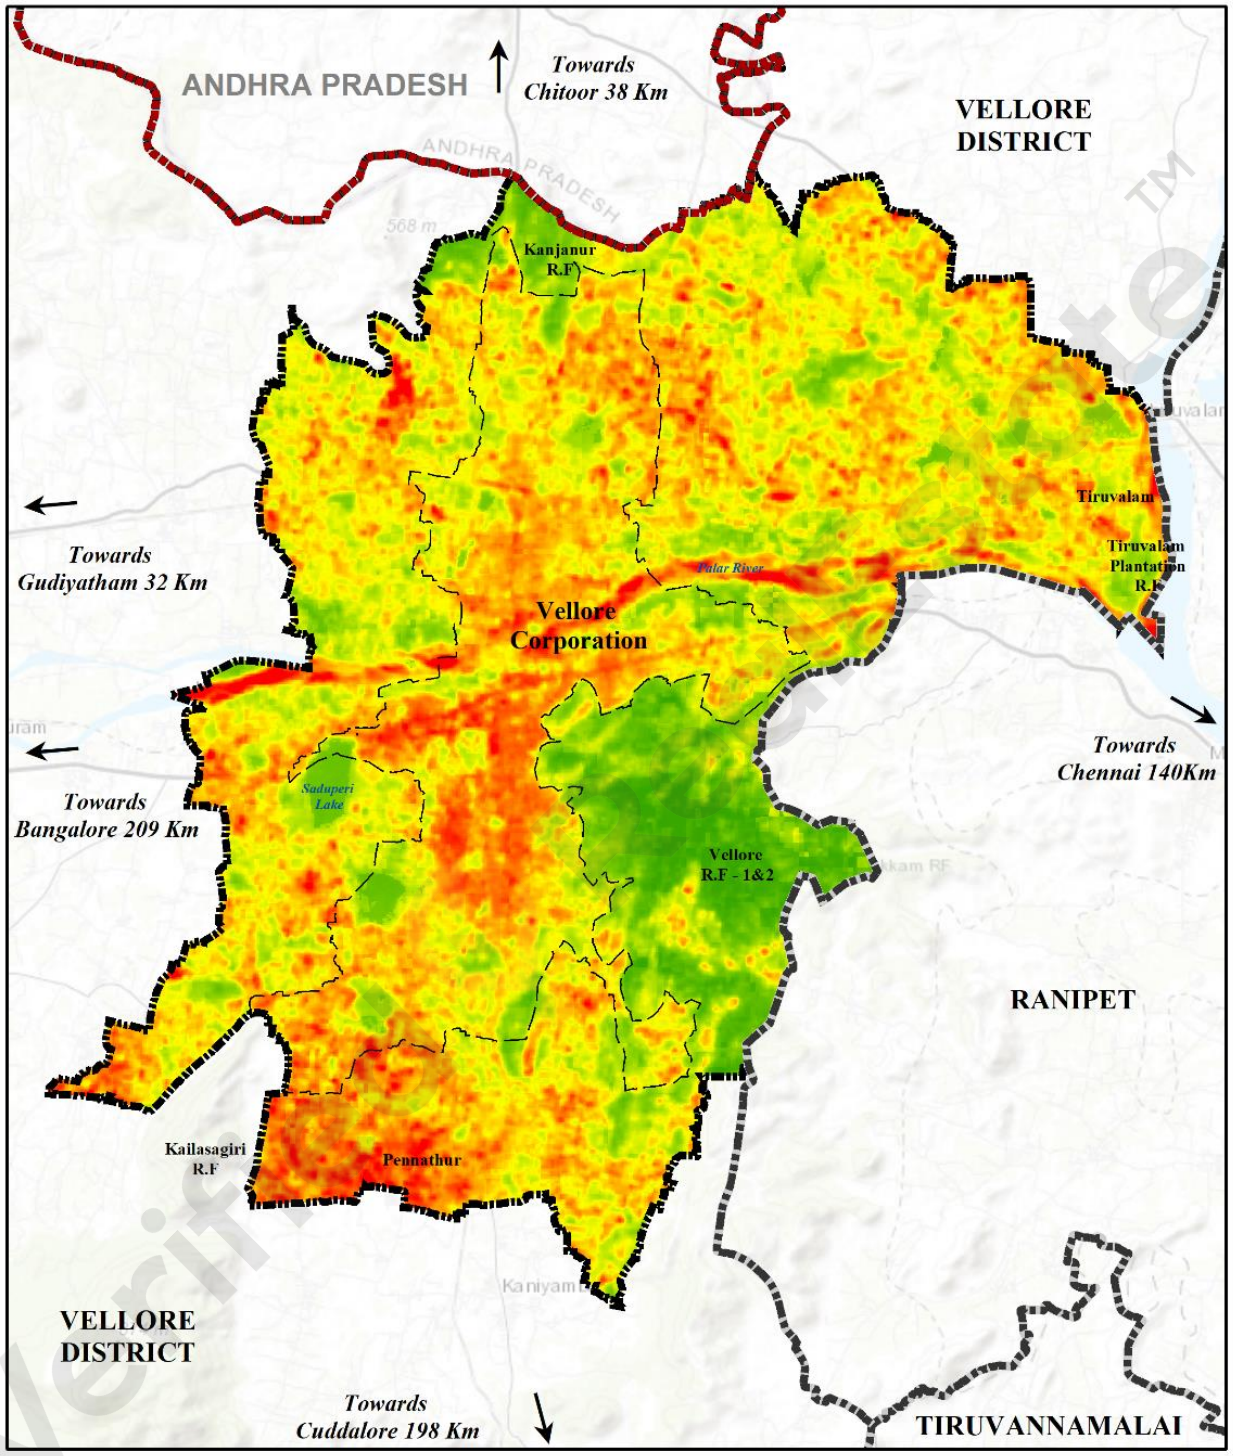

The LST Map 10.5 show the surface temperature in Vellore LPA. The Dark red indicates the surface temperature is more and green indicates the temperature is low. The surface temperature is more in core area where there is dense building cover and less tree cover. In fringe areas the surface temperature is less since the presence of hillocks and reserve forests.

10.8 Summary

Vellore Master Plan aims for holistic development of the area by improving the socio-economic conditions and enhancing the quality of life by the generation of employment opportunities, increasing the connectivity and improving the infrastructure facilities. Vellore LPA covers a total area of 314 Sq. Km., consisting of Vellore Municipal Corporation, 3 taluks, 2 Town panchayats and 37 revenue villages along with 3 Reserved Forests. Vellore is well connected to other districts in Tamil Nadu and with the districts of Andhra Pradesh and Karnataka. Vellore lies in the Palar River Basin and the topography is almost flat with a slope from west to east.Vellore lies in Seismic Zone III. Though the instances of floods is low in the LPA, Vellore had experienced occasional droughts as it lies in the moderate to high risk zone.

Verified

11. Existing Land Use

11.1 Existing Land Use

The Existing land use is an important factor in determining the future growth pattern of the city, and formulating alternatives and proposals in the master plan. The land use zoning for the existing land use plan is categorized based on Master plan rules. The existing land use maps show various current land uses indicating residential, commercial, industrial, Institutional, recreational, vacant land, land under agriculture Reserve Forest, hills and water bodies.

The existing land use map for Vellore LPA has been prepared by conducting a field survey with the support of high-resolution satellite imagery and base maps provided by the National Remote Sensing Centre (NRSC). The existing land use is analysed to understand the composition and the share by different uses and also to find the demand and surplus land use. The inference from the existing land sue study is considered in the preparation of the proposed land use

11.1.1 Residential

Based on the Existing Land use of 2021 the residential land use accounts for about 43.18 Sq. Km of total area which is about 13.75%. Vellore LPA falls under large city category as per URDPFI guidelines, it suggests that a medium town can have 36-39% of the developed area for residential use.

The residential area is concentrated in corporation followed by Pennathur Town Panchayat, within Vellore Municipal Corporation the residential land use is highly concentrated in older Vellore municipal limit followed by Sattuvacheri, Dharapadavedu and Katpadi. About 60.50% of total residential land use is concentrated within the greater Municipal

Verified RedEstate™

corporation area of Vellore LPA. The least residential area is found is Thalarayampattu village with only 1.65 Ha as residential area.

11.1.2 Commercial

Commercial land use in Vellore LPA is concentrated in the heart of the LPA in the Vellore town, it has a share of 2.64% of total commercial use in Vellore LPA. Followed by Vellore Town Dharpadvedu has higher concentration of commercial area with about 16.60 Ha of land use as commercial which shares about 6% of total commercial are in Vellore LPA.

The higher concentration of commercial land use in their area is due to the major arterial roads NH- 46 and SH -9. Netaji Market is the famous market located in Vellore town and has the highest concentration of commercial use

11.1.3 Industrial

The existing Industrial use in Vellore LPA is about 1.72 Sq.km which is only 0.55% of the total LPA area. Ammudi village has the higher share (13.4%) of industrial land use due to the presence of Vellore Cooperative sugar mill factory. Shoe manufacturing industry is found in higher concentration in Vellore LPA along NH 46.

11.1.4 Institutional

Vellore LPA has a well-established educational and Health care institutions like CMC, VIT and it contributes to the higher concentration of institutional land use in the LPA. Institutional land use has a share of 4.12% of total area of Vellore LPA. Apart from the major educational and health care institutions Vellore also has the famous Vellore Fort at the heart of the LPA and Sri Lakshmi Narayani golden Temple. Higher concentration of institutional land use is found in Vellore town due to their presence of CMC hospital, Vellore fort, police station, it shares about 15% of total institutional land use.

Verified RealEstate™

11.1.5 Transportation

According to the Existing land use 2021 the transportation land use used for traffic and transportation purpose which facilitates for the movement within the LPA is about 4.14% (13.01 sq. Km). Roads and well-established railway network line contributes to this higher percentage; the roads are in grid iron pattern in the core area and in the villages has tree like pattern. The corporation contributes to about 51% (6.74 Sq. Km) of the total Transportation land use followed by Ammudi village and Pennathur Town panchayat. Thalarayampattu has very less percentage of only 0.02% (0.2 Ha.)

11.1.6 Open Space and Recreational

Recreational land use includes open space, parks and playground, they act as the breathing space of the LPA. According to the existing land use only about 0.71 Sq. Km (0.23%) of land is use for recreational purpose of which higher contribution is from the Katpadi which accounts for about 17% of total recreational land use and it is due to the presence of Vellore District sports complex. The extended Municipal Corporation of Vellore has a total recreational land use share of 71.04% (29 Ha). The recreational land use for larger cities is found to be 14-15% as per URDPFI guidelines.

11.1.7 Agriculture

According to the Existing Land use 2021, the predominant use is Agriculture which accounts for about 45.73% (143.70 Sq. Km). Katpadi has higher agricultural land use of 656.4 ha (5.4%) followed by Karigeri village with 5.25% (632 Ha) the agricultural land use is in abundance in the villages surrounding the extended Municipal corporation of Vellore. The Municipal Corporation contributes to 22.38% (19.69 Sqkm) of total agriculture land use in LPA and the remaining is distributed in the Town panchayat and villages of Vellore LPA

Verified RealEstate

11.1.8 Forest

Palamadi Reserve Forest, Kunjanur Reserve Forest, Tiruvalam Plantation Reserve Forest and Vellore Reserve Forest contributes to the total forest area of Vellore LPA. Forest has a total land use share of 15.80% (49.64 Sq. Km) of the total Land use of Vellore LPA area. 60% share of the total forest area of Vellore LPA is by Palamadi RF which is spread over 21 Sq. Km followed by Kunjanur Reserve Forest 4.24 Sq. Km which contributes 8.54% of the total Reserve Forest area in Vellore LPA.

11.1.9 Hills

According to the existing land use of 2021 the land use under hills contributes to about 3.77% of the total land use of which Tholla Malai of Munjirupattu village contributes for about 18.80% of total hill land use of LPA. Vellore hill, Toad hill and Palamadi Hill are some of the major hills in Vellore which contributes to the total hill area of LPA.

11.1.10 Water bodies

The LPA has a large number of water bodies like Rivers, lakes, tanks, canals spread throughout LPA. The existing land use of Vellore LPA show about 14.82% (46.55 Sq. Km) of total land is covered by water bodies. Palar River following in the LPA contributes to about 30% (1.2 Sq.km) of total area of water bodies in LPA. Ariyur Lake, Sathuperi, Konavattam Lake, Kalinjur Lake, Dharapadvedu Lake and Katpadi Lake are the major water bodies of Vellore LPA.

11.1.11 Agricultural Wet

According to the Existing land use about 9.65% (8.49 Sq. Km) of the total land is vacant which can be utilised for the future development of the LPA based on the suitability of the land. The higher percentage of vacant land is found in Katpadi (2.43 sq.Km) followed by Dharapadvedu village 1.97sq.Km.

Verified RealEstate™

11.2 Land Use Breakup – 2021

The following Table 11.1 gives the existing land use composition of Vellore LPA, the predominant use is found to be Agriculture followed by water bodies, forest and residential land use and the least share is by recreational land use.

Table 11.1: Existing Land use 2021 - Vellore LPA

Vellore Corporation			Rest of LPA	
Land Use	**Existing Land Use 2021 (Sq. Km)**	**Land Use Percentage**	**Existing Land Use 2021 (Sq. Km)**	**Land Use Percentage**
Residential	25.36	28.83	17.82	7.88
Commercial	2.02	2.30	0.62	0.27
Industrial	0.59	0.67	1.13	0.50
Institutional	8.11	9.22	4.84	2.14
Open Space & Recreational	0.71	0.81	0.004	0.01
Transport	6.74	7.66	6.27	2.77
Agriculture	28.18	32.23	115.52	51.08
Water Body	13.35	15.18	32.20	14.68
Reserve Forest	2.91	3.31	46.73	20.66
Total	**87.96**	**100.00**	**226.14**	**100.00**

Source: Land use survey-2021

Verified RealEstate™

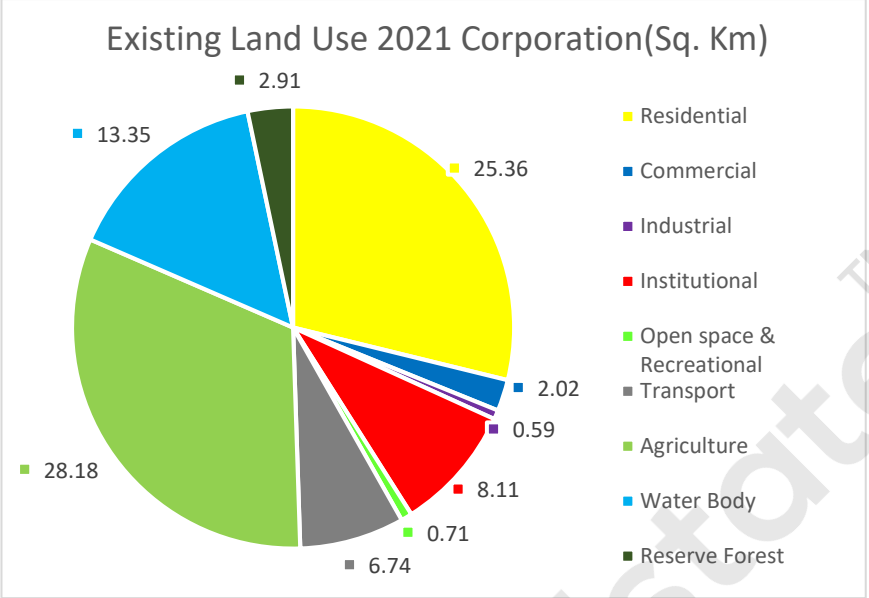

Figure 11.1: Land use Breakup of Vellore Corporation - 2021

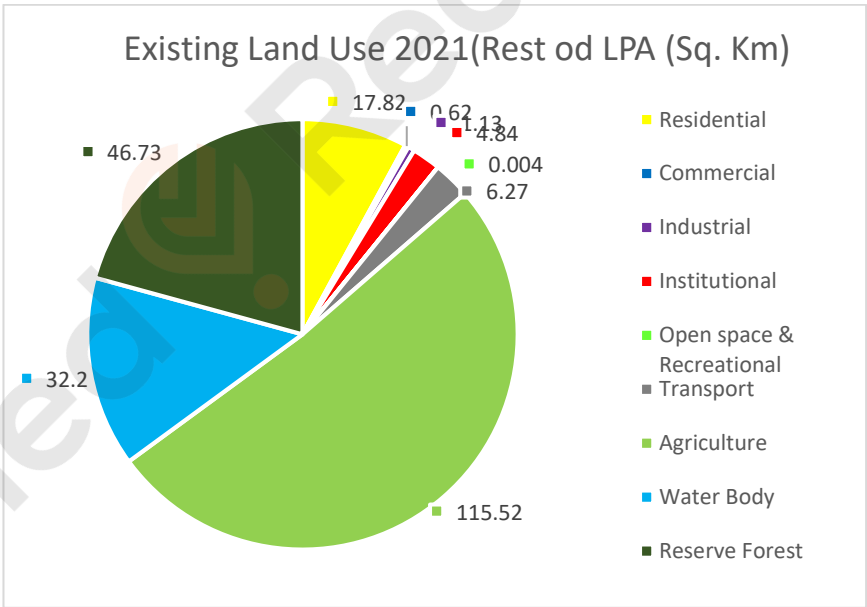

Figure 11.2: Land use Breakup of Vellore Rest of LPA - 2021

It can be inferred from above Table 11.1 that about 13.72% of total area of LPA is vacant which gives the potential land to accommodate the future development. It is also important to study the suitability of the land use which gives the idea of the concentration and dispersion of particular land use based on this the future proposed Land use can be obtained.

Verified by RealEstate™

The percentage of area that can be developed and utilized for each category of land use can be obtained from URDPFI guidelines, which specify the land use breakup for different type of urban settlements.

Based on the population of the settlements are classified as large, medium and small town as per URDPFI guideline Existing land use. Vellore LPA consist of Vellore Municipal Corporation, 2 Town Panchayats, 3 Census towns and 36 Villages and has a total population of 6,59,742 as per 2011 census. On considering LPA as a single unit, it falls under Large City as per URDPFI guidelines and hence all the infrastructure facilities and proposed land use will be provided to LPA based on URDPFI guideline for medium town. The following Table 11.2 provides the classification of urban settlements.

Table 11.2: Classification of Settlements based on URDPFI guidelines

S.No	Classifications	Sub-category	Population Range
1.	Small Town	Small Town I	5,000-20,000
		Small Town II	20,000-50,000
2.	Medium Town	Medium Town I	50,000 – 1,00,000
		Medium Town II	1lakh to 5 lakh
3.	Large City	-	5 lakh to 10 lakh
4.	Metropolitan city	Metropolitan City I	10 lakh to 50 lakh
		Metropolitan City II	50 lakh to 1 Crore
5.	Mega polis	-	More than 1 Crore

(Source: URDPFI guidelines, 2014. Ministry of Urban Development)

Verified PadEstate™

11.3 Comparison of Existing Land Use with URDPFI Guidelines

The following Table 11.3 gives the percentage of developed area for large city as per URDPFI guidelines and their comparison with the existing land use breakup for Vellore LPA. This gives the additional area that can be added for the future development, this additional area to be added can be used as and yardstick to convert the vacant and fallow agriculture land into different land use as per the development requirement to serve the future population.

The existing land use of Vellore LPA in classified into 7 categories as per URDPFI guideline. Agriculture, water bodies, vacant land, forest, hills and waste land are combined to class 7 of which vacant area and waste land will be completely utilised for future development and will be given a compatible use in proposed land use of Vellore LPA.

It is observed that about 66.53% of total area of Vellore LPA falls in no development zone including water body, hills and forest and hence to obtain the actual additional area for future the 66.53% of total LPA are is neglected.

From the above table it can be seen that the recreational area has to be increased, which indicates the need for establishment of parks, open spaces etc. to cater the population needs. The percentage of industrial land use is low even with higher established industries in Vellore LPA and for future more of service-based industry are to be proposed for Vellore LPA.

Verified by RealEstate™

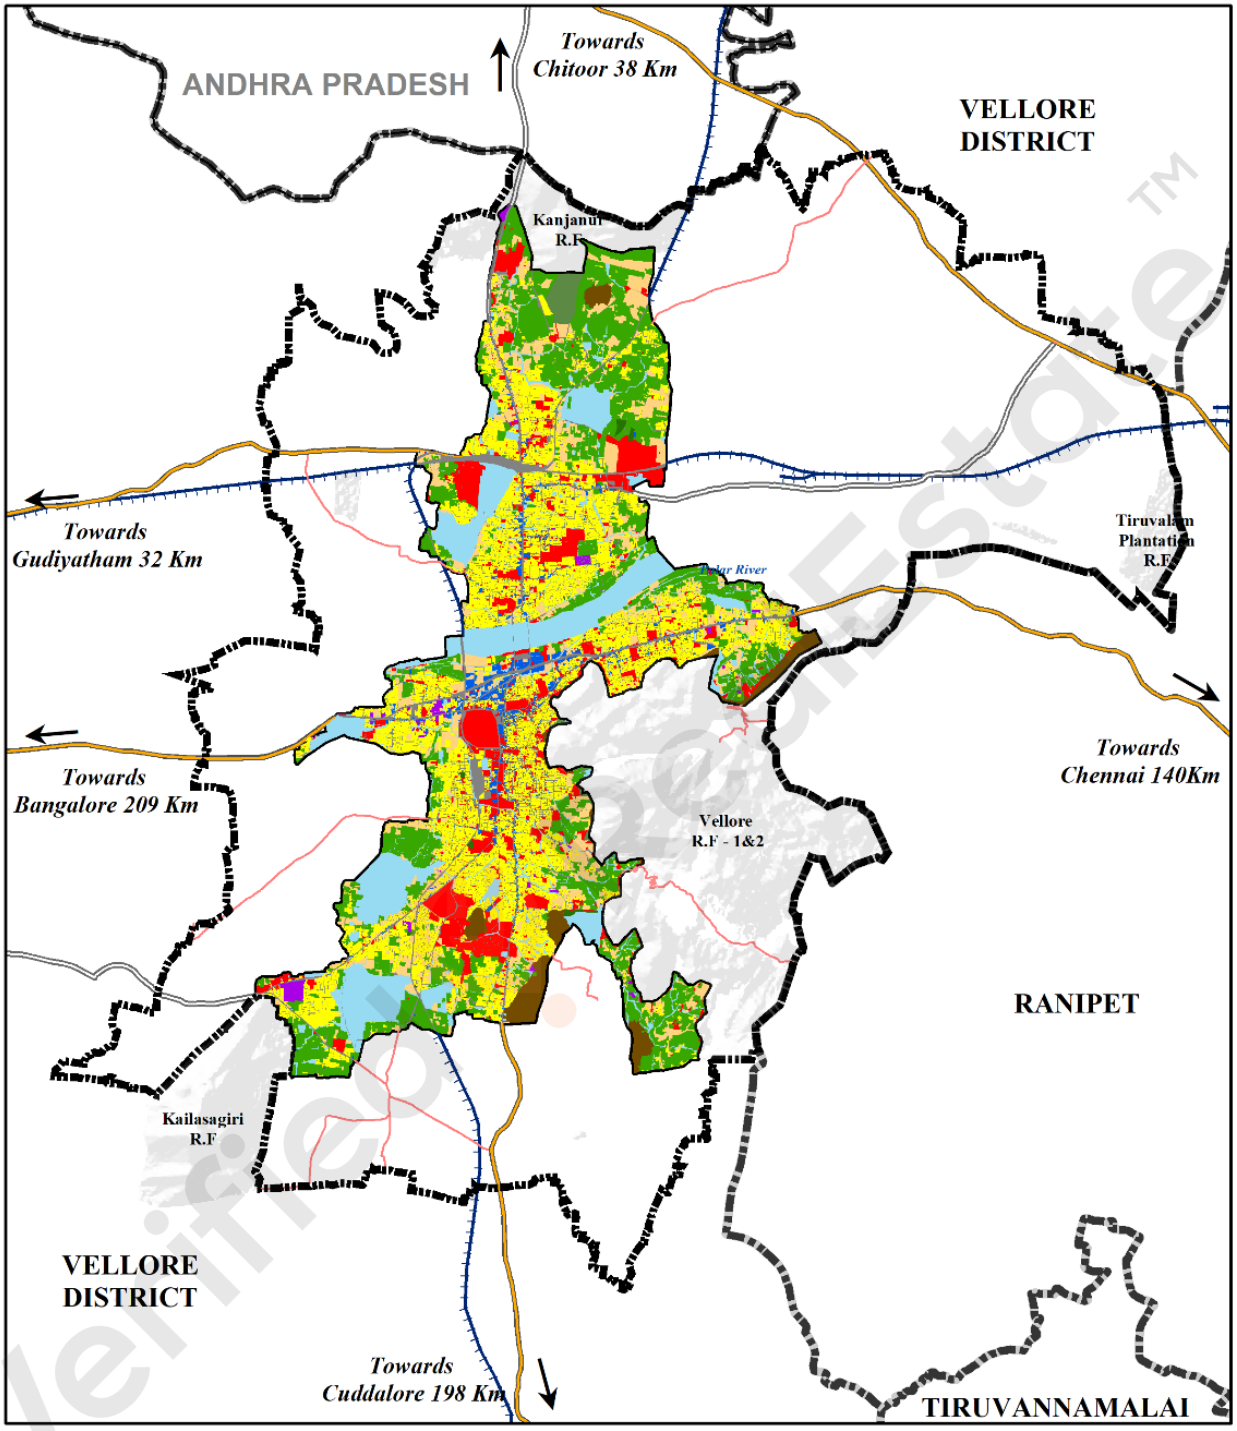

Table 11.3: Comparison of existing land Use 2021 with URDPFI

Corporation			URDPFI Guidelines
Land Use	**Land Use Area**	**Land Use Percentage**	**Land Use Percentage**
Residential	25.36	28.83	36-39 %
Commercial	2.02	2.30	5-6 %
Industrial	0.59	0.67	7-8 %
Institutional	8.11	9.22	10-12 %
Open space & Recreational	0.71	0.81	14-16 %
Transportation	6.74	7.66	12-14 %

Verified Pending State

12. Issues and Potentials

12.1 Issues

The following section discusses the issues present in the major sectors.

12.1.1 Issues related to the workforce

- Lack of proper industrial development: An analysis of existing land use revealed that less than 1% of the land is designated for industrial use, indicating a lack of a substantial manufacturing base.
- Underdeveloped cottage and household industries: These sectors have not reached their full potential.
- Improper distribution of commercial centers: Commercial centers are predominantly concentrated in the core part of the city and are not evenly distributed.
- Underutilization of tourism potentials in rural areas: The tourism opportunities in rural areas are not being fully exploited.

12.1.2 Issues related to housing and slum

- Housing stock is not available to cater to the needs of the increasing population
- A large share of the population lives in rented accommodation
- The absence of private developers in the housing sector and the lack of integrated townships
- Absence of adequate implementation mechanism for building by-laws
- Housing densities are very high in the inner core of the city and need to be decongested
- High Housing shortage both in quantity and quality in the GPA

Verified RedEstate™

- About 9.54% of the total population of LPA (66,403 persons) are living in slums, Slums percentage is lesser than the national and state average
- Most slums are deprived of basic services and facilities
- Lack of secure tenure in slum dwellers

12.1.3 Issues related to physical Infrastructure

- Unhygienic conditions arise from the direct disposal of rainwater and human waste into open drains.
- Encroachment over drains in certain areas, stemming from unregulated cleaning and the dumping of solid waste, leads to drain clogging.
- The city lacks an integrated drainage plan.
- Contamination of ground and surface water occurs due to the transfer and disposal of wastewater through unlined canals and Nallahs.
- Sewage and stormwater intermingle.
- Drains in the city lack covers, and there is insufficient coverage overall.
- Low-lying areas experience waterlogging and flooding issues.
- Indiscriminate disposal of waste by the residents;
- Non-Segregation and Recycling/Reuse of Solid Waste: The intermixing of waste during collection and transportation leads to the increase in the quantum of waste to be disposed

Verified RedEstate ™

12.2 Potentials

- District Headquarters - The district headquarters for the Vellore district is located in Vellore. Given that it is a district quarter, there is a greater chance that it will draw more business and industrial investment. There will be an increase in institutional developments, including public, health, and educational institutions, near district headquarters.
- Major Industrial Hub
- Potential for Lake front Development
- Potential to achieve min 25% Green Cover
- Potential for development for tourism circuit
- Potential for establishing Leather Skill Training Institute as Vellore LPA is surrounded by leather manufacturing industries
- Major Transit Multimodal hub

Verified RedEstate™

13. Land Suitability

Suitable land must be identified to meet the needs of future development, playing a major role in preparing the proposed land-use plan. Land suitability analysis helps ensure efficient land utilization and serves as a benchmark for future proposed land use. The analysis results depend on the selected parameters and their assigned weights. The DELPHI technique and pairwise comparison matrix are employed for parameter selection and weight finalization. Land suitability analysis is conducted for each land-use zone type, and the results are overlaid to create a comprehensive land-use zoning plan for the year 2041.

13.1 Parameters for Suitability Analysis

The analysis is carried out for each of the land use separately, based on the type of land use the parameters and the weightages are varied. The following are the common parameter considered for most of the land use suitability analysis

- Existing Land use
- Elevation
- Proximity to Road
- Proximity to Educational and Health care facilities
- Distance from Water bodies
- Proximity to Eco Sensitive Area

13.1.1 Existing Land use

Existing land use of Vellore LPA is considered in the suitability of all land uses, it is given higher weightage during the overlay analysis when compared to other parameters. Higher preference is provided for vacant and agriculture land while the eco sensitive zone like water bodies, hills and forest area are considered as not suitable classes. Moderate preference is provided for the built-up area.

13.1.2 Elevation

Verified © RedEstate™

The elevation is considered an important element in land suitability. From the elevation map the lower and higher low-lying area are considered as not suitable for development. The higher elevation is found along the Easter side of Vellore LPA. Highest evaluation points are long Vellore hill, Palamadi reserve forest and along Kunjanur Reserve Forest and the lower elevation is observed along the Palar river and major water bodies in Vellore LPA and these places are considered as not suitable for urban development.

13.1.3 Proximity to Road

Proximity to roads is also an important parameter in urban development. The area nearest to the roads is considered highly suitable for urban development. The priority descends as the distance to the road is increased. Area which are close to the major roads are considered as suitable land for commercial land use for residential land use the proximity is considered from sub arterial road network.

There are two major roads running north south and east west in Vellore LPA. Commercial zone is highly suitable for 250m from the Major arterial roads.

13.1.4 Proximity to Educational and Health care facilities

Educational and Health care facilities are considered as an important parameter for the suitability analysis of residential, commercial and industrial land use suitability. For residential use the area near to residential and hospital area given priority while for the industrial use higher distance from the hospital and residential facility are considered as suitable.

Verified RealEstate™

13.1.5 Distance from water bodies

Water bodies are considered as another major parameter for the suitability analysis of all land use category. The area close to water body is considered as not suitable while the area far from high Suitable area for the urban development. The major water body like Palar River, Saduperi and other major lakes are conserved by provided it as not suitable for development. 1000m buffer from Palar River is considered as not suitable for industrial development. Buffer of 30 m is provided along Palar River and considered as no development zone.

13.1.6 Distance from Eco sensitive Zone

Vellore LPA has forest and hills as major Eco sensitive zone the area near to forest and hills are less preferred for development. Total forest area as per Cadastral record are considered as no development zone. Industrial development are not allowed neat eco sensitive zones.

13.2 Land Suitability Analysis

The following are the various parameters and the weightage used to identify the most suitable and unsuitable land for each type of land use for future development. The cumulative of these suitable lands are taken for the future land suitable land for development in Vellore LPA the analysis is carried out for the following land use.

- Residential,
- Commercial,
- Industrial,
- Institutional

14. Proposals

The proposals for Vellore LPA could be categorized into following categories, viz.,

- Economy
- Environment (Blue – Green Infrastructure)
- Grid of Roads
- Tourism

14.1 Blue Green Infrastructure Proposals

The neighborhood, the region, and the river may all benefit greatly from mixed-use waterfront development. It produces distinctive and appealing urban landscapes that improve the city's appeal and image while promoting social cohesiveness and identity. Additionally, it provides communities with sustainable economic potential by fostering the expansion of the creative and cultural industries as well as tourism. Furthermore, the integration of ecological factors and green infrastructure into mixed-use waterfront development promotes sustainable development and the preservation of ecosystems. It serves a reciprocal role between the land and the city, creating an environment that is well-organized and works to better support activities along the shoreline.

Moreover, mixed-use waterfront development enriches and enhances communities while supporting cities' socioeconomic roles on a national and worldwide scale. Additionally, it offers chances for socioeconomic advancement, improves community resilience and reduces risk in water front areas. There are a couple of lake front development projects in the LPA, the details of which are explained below.

Verified by RedEstate ™

14.1.1 Kalinjur – Dharapadavedu Lake

Improving the Kalinjur – Dharapadvedu lake by desilting and providing enhancing it by providing boating facilities. This is a government proposed project with a fund allocation of 28.45 crores. The main aim of the project is to preserve the lake and to improve the micro economy of the village. The lake is one of the major points of the proposed local tourism circuit in Vellore LPA.

Figure 14.1 View of Kalinjur - Dharapadavedu lake

Figure 14.2 Aerial View of the Lake

14.1.2 Lake Front Development – Saduperi Lake

Saduperi Lake is located adjacent to the major highway NH48 (Chennai – Bengaluru), where area of the lake is 39 Ha. Lakefront development is proposed along the highway which is the major point of the lake. The major activity in the lakefront development includes Walking tracks, exercising area, a yoga area, and Boating.

Figure 14.3 View of the Lake Front Development

Figure 14.4 Saduperi Lake Front Development Project

14.1.3 Urban Forest – Karugambathur

The Karugambathur Urban Forest project is a special assistance project that was carried out by the Government of India along with Tamil Nadu. In this project, 2.72 Acres of land is identified within LPA, and plants are planted.

Functional Benefits of urban forests include:

- Air Pollution Removal: The urban forest helps improve air quality by reducing air temperature, directly removing pollutants from the air through their leaves, and offsetting carbon dioxide emissions. Reducing energy consumption in buildings consequently reduces air pollutant emissions from the power sources.
- Oxygen Production: Oxygen is needed by all humans and wildlife and is one of the most commonly cited benefits of urban trees.
- Climate Management: Urban vegetation provides direct and indirect benefits, including heat regulation. Trees cool air through evapotranspiration and provide shade.
- Carbon Sequestration: Trees reduce the carbon in the atmosphere by sequestering carbon in new growth every year. The amount of carbon annually sequestered increases with the size, age, and health of the trees. Carbon storage has attracted significant attention due to climate change.
- Stormwater Management: Surface stormwater runoff can cause concern in many urban areas as it can contribute to pollution of surface water bodies such as streams, wetlands, rivers, lakes, and oceans.
- Energy Savings: Trees reduce building energy use in warm months and allow warmth from sunlight in winter while protecting from wind.

Verified RealEstate TM

Figure 14.5 Site Clearance for Urban Forestry

Figure 14.6 Tree Plantation for Urban Forest

Verified

14.1.4 Restoration of degraded Urban Forest

Vellore experiences very high heat during the Peak summer season, the temperature goes above 40 degrees Celsius in mid of May month. The Major factor for the increase in the heat wave is major because of the hard rocks reflecting the heat waves into the settlements. The heat island effect can be reduced by scientifically restoring the degraded forest Vellore Reserve Forest I and II. This will increase the green cover and improve the microclimate in the area.

14.1.5 Linking of water tanks

This proposal involves connecting existing water tanks with the Ponnai River and Palar River. The list of tanks identified for this proposal are:

- Tharapadavedu Tank
- Kalinur Tank
- Katpadi Big Tank
- Karnambattu tank
- Eranthangal Tank
- Sembarayanallur Tank
- Serkadu Tank
- Kandipedu Big Tank
- Kandipedu Oddanthangal Tank
- Gugaiyanallur Tank
- Kembarajapuram Tank
- Pandian Maduvu Channel

Verified RealEstate™

This proposal not only helps in channelling excess water, but also in recharging groundwater. The water tank linkage flowchart is shown below:

14.1.6 Repurposing old defunct Quarries

With climate change and increasing water demand, there is a growing need to conserve water to prevent drought. There is a total of 29 defunct quarries in the LPA which could be utilized for water storage and groundwater recharge. These quarries which when rehabilitated and repurposed effectively, will turn out to be potential tourist attractions and weekend getaways. The list of tanks which have been identified for repurposing are as follows:

Table 14.1: Details of Road Proposal in Vellore LPA

Name of the Taluk	Name of the Revenue Village	SF.No.	Extent in Ha.	Land Classification	Water depth
Vellore	Ariyur	277/1A1(p-14)	0.80.0	Govt.land	85 ft water

Katpadi	Katpadi	786(p-2)	0.80.0	Govt.Land	75 ft water

14.2 Economy

14.2.1 Shifting of Market – Melmanavanur

Shifting of the existing Fruits and Vegetable market near the Old Bus Stand to Melmanavnur village which is located near the Chennai – Bengaluru Highway (NH48). The area of new market is 31 acres which houses 846 shops. This will majorly reduce traffic congestion in the core area.

Figure 14.8 View of Melmanavanur Market

VerifiedPedEstate™

14.2.2 Tidal Neo – Park

New Tidel Neo Park is being proposed in Melmanavanur village with an area of 5 Acres. Located adjacent to the National Highway 48 (Chennai – Bengaluru). The main objective of the neo-park is to increase the skilled labour in rural areas and also to stop the out-migration of people.

TIDEL Neo will see the creation of 'mini' IT parks with an area of just 50,000 – 1 lakh square feet, based on market demand assessment at identified towns of Tamil Nadu, in a phased manner.

The main goal of the project is to introduce the services sector across Tamil Nadu and boost the development of Tier 2 and Tier 3 towns. And businesses will now have access to world-class spaces across the state at affordable cost, thereby making them more competitive and efficient. TIDEL Neo has the potential to take the benefits of IT sector growth to smaller towns and villages of the State. There by accelerating growth that is spread across the state by making the global meet the local.

14.2.3 Skill Training Institute – Eranthangal

Vellore is surrounded with leather manufacturing industries, a major leather belt of Tamil Nadu. Since the location of the major leather industries around Vellore LPA, there is an opportunity for the proposal of Leather Skill Training Institute. On the northeastern side adjacent to the LPA boundary Ranipet SIPCOT is located where the major leather industries are housed. This creates the scope for setting up of Skill Training Institute in Eranthangal Village.

Verified RealEstate™

Figure 14.9 View of Skill Development Centre

14.2.4 Affordable Rental Housing Complexes (ARHC)

The scheme is a sub-scheme of Pradhan Mantri Awas Yojana – Urban (PMAY-U). In this scheme, an affordable rental dormitory is created for urban migrants or urban poor. In case of Vellore, there are more medical charity health care people from the southern part of Vellore are travelling for medical treatment. The presence of affordable dormitory around Christian Medical College is less. To address the issue an affordable dormitory under the scheme of ARHC is proposed in the site of old bus stand. The area of the site is 1.00 Acres.

Beneficiaries for ARHCs are urban migrants/ poor from EWS/LIG categories comprising street vendors, rickshaw pullers and other service providers, industrial workers along with migrants working with market/ trade associations, educational/ health institutions, hospitality sector, long-term tourists/ visitors, students or any other category.

Verified & Reg

ARHCs will be a mix of single/ double bedroom Dwelling Units and Dormitory of 4/6 beds including all common facilities and will be exclusively used for rental housing for a minimum period of 25 years.

The ARHCs will ensure a dignified living environment for urban migrants/poor close to their workplaces at affordable rates. This will unlock existing vacant housing stock and make them available in urban spaces.

14.2.5 Truck Terminal at Melmanavanur

A truck terminal, also known as a trucking terminal or truck depot, is a facility where trucks are loaded, unloaded, and serviced. These terminals play a crucial role in the logistics and transportation industry, serving as hubs for the transfer of goods between different modes of transportation, such as between trucks and trains or trucks and ships.

Truck Terminal is proposed along the NH – 48 Chennai Banglore Highway adjacent to NH. The truck terminal is proposed at the area of 5 acres. The main purpose of the proposing truck terminal in Melmanavanur is reduce the on-street parking of truck along National Highway. Figure 14.10 shows 3- Dimension illustration of truck terminal.

Figure 14.10 View of Truck Terminal

Verified by PeqEstate™

14.3 Grid of Roads

The grid of roads is prepared for Vellore LPA in order to improve the road infrastructure and the circulation pattern. The grid of roads helps in mobility of the traffic in a planned manner neglecting major traffic congestion issue in the LPA. This provides good connectivity and access to the major roads also to maintain the hierarchy of the roads. As per IRC norms, the minimum standard distance to reach Arterial, sub arterial and Collector roads are,

- Arterial Roads – 4 Km
- Sub Arterial Roads – 2 Km
- Collector Roads – 1 Km

A grid pattern is prepared for each type of roads 4Kmx 4Km grid is prepared for Arterial Road, 2Km X 2Km grid for Sub- Arterial roads and 1km X 1Km grid for the Collector roads. The following image represent the conceptual drawing for the grid of roads

The Grid of roads are proposed for Vellore LPA with an aim to ease the flow of traffic and to support the future development of the LPA. The proposed grid of roads for the LPA will improve accessibility to the rural area and new developable area of LPA. Vellore LPA has 2 major corridors and 3 major corridors. The proposed grid of roads for Vellore LPA is of Grid iron road pattern incorporating the existing road pattern. The LPA has well developed arterial road, Sub arterial roads collector roads and local roads are provided at various places of LPA to provide linkage to the arterial and sub arterial roads.

The grid of roads improve access to villages where the connectivity are less when compared to other parts of the LPA. The gird of roads includes proposal of new road and road widening of existing roads. In order to achieve better grid of road pattern certain roads and road widening are proposed out of LPA limit considering the future population growth and new development along the outer ring road.

Verified RealEstate™

14.3.1 PROPOSED ROADS

There are 6 Sub arterial roads, 18 collector roads proposed based on the grid of road pattern, these roads covers the missing link between the urban and the rural area and falls in villages will less connectivity such as Karigeri, Kandipedu, Oodanthangal, Erangthangal, Kattupathur, Pemathur etc. The Sub arterial roads are proposed with 30 M road width and the collector roads with 18 M, 15 M based on the connecting roads.

These collector roads will improve the mobility of Traffic volume and also provide better connectivity between the core and the periphery of the LPA.

From the Comprehensive Mobility Plan, the alignment of Radial Ring Road is incorporated into the Grid of road network. The main objective of radial ring roads is to divert the excess flow of traffic into the core city. The ring road also increases the connectivity to the villages located outside the Vellore Corporation boundary.

The Ring Road is being executed in three phases where the Phase I 13.28 Km, Phase III is strengthening and Widening of existing road, and Phase III is 29 Km. The road starts from Arapakkam (NH48) and ends in Sathumadurai (NH243).

The ring road connects important government locations like the District Collector Office, S.P Office, District Court, District head quarter hospital, Government Medical College, Government Engineering College, Tiruvallur University and Golden Temple. This road will majorly reduce the truck traffic going to Chittoor from Chennai flowing through Katpadi.

14.3.2 BRTS Corridor

Bus Rapid Transit System is a bus based public transport system which that aims to improve capacity and reliability compared to a regular transportation system. A priority bus lane is allotted on the right of way on the existing road. In Vellore LPA, BRTS corridor is identified along the National Highway 234 and State Highway 9. A priority bus lane is proposed on the centre of the road to ease the movement of the bus. This BRTS connects the high dense development zone to the major CBD area. Map 14.2 shows the proposed BRTS lane in Vellore LPA.

14.4 Tourism Circuit

The total length of 80.9 Km starting from Vellore Fort and finishing in Kalinjur Dharapavedu Lake. The Vellore Fort is the major tourist attraction in the corporation the average tourist foot fall per day is around 10,000. Next location is Golden Temple which is located 9.4 Km away from golden temple. The golden temple is another famous religious tourist place where the tourist foot fall per day is around 15,000. After golden temple next location is Palamathi Murugan Temple which is located around 13.7 Km from golden temple on the Palamathi Hill.

Since the temple is located on the higher elevation, the entire Vellore City view can be observed. Next Location is picnic spot in Alameumangapurm Reserve Forest which is 20 Km away from Palamathi Murugan Temple, this place is also located on above the ground level. The Place is now developed by central government under Nagar Vanam Scheme with a fund of 5 crores.

The main objective of the place is to create a picnic spot, a full view of Palar River can be observed from the place. The next place Prasanna Venkatesa Perumal Temple is located 19.5 Km from Alameumangapuram Reserve Forest. The temple is a major pilgrimage tourist attraction, the place is also located above the ground level where a beautiful view of Vellore agricultural field can be observed.

The last location is Kalinjur – Dharapadavedu Lake, which is 9.6 Km away from Prasanna Venkatesa perumal Temple, the lake is now being de-silted and enhancing the recreational infrastructure facilities by the Water Resource Department with a fund of 28.45 Crores.

14.5 Subway Under Green Circle Junction

Green Circle junction is the major junction in Vellore city. It connects the Vellore city in the south to Katpadi Junction in the north. 90% of the vehicular traffic flows through the green circle junction. During peak hours, the level of service in the roads connecting the green circle is F. There is the absence of pedestrian crossing in the junction. Crossing from one side of the road to the other side is very difficult for pedestrians. There is no pedestrian crossing sign or infrastructure for pedestrian crossing in the junction. A pedestrian Sub way is proposed in green circle along the Chennai – Banglore highway. This will ensure the safe crossing of pedestrian and reduce pedestrian accidents. Figure 14.8 shows the aerial view of Green Circle junction. Figure 14.9 show the cross-section illustration of pedestrian sub-way under green circle junction.

Figure 14.12 Green Circle

RealEstate TN

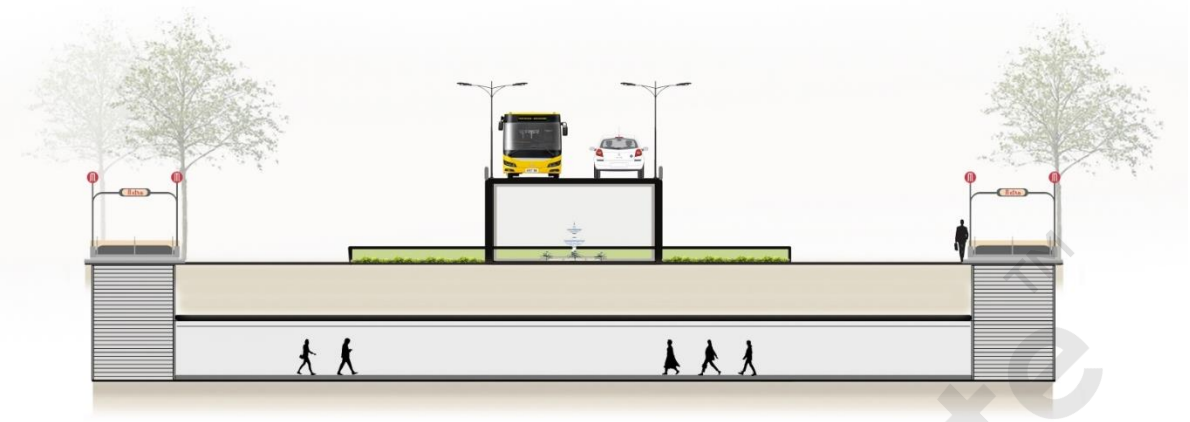

Figure 14.13 Proposed Subway under Green Circle Junction

14.6 Box Culvert Bridge - Green Circle Junction

The Vehicular traffic moving from Vellore city to Katpadi will cross Green Circle junction by taking a circle turn. This will increase the traffic in road and also bring down the Level of Service creates bottleneck in the junction. Figure 14.10 shows the vehicular traffic flow in green circle junction.

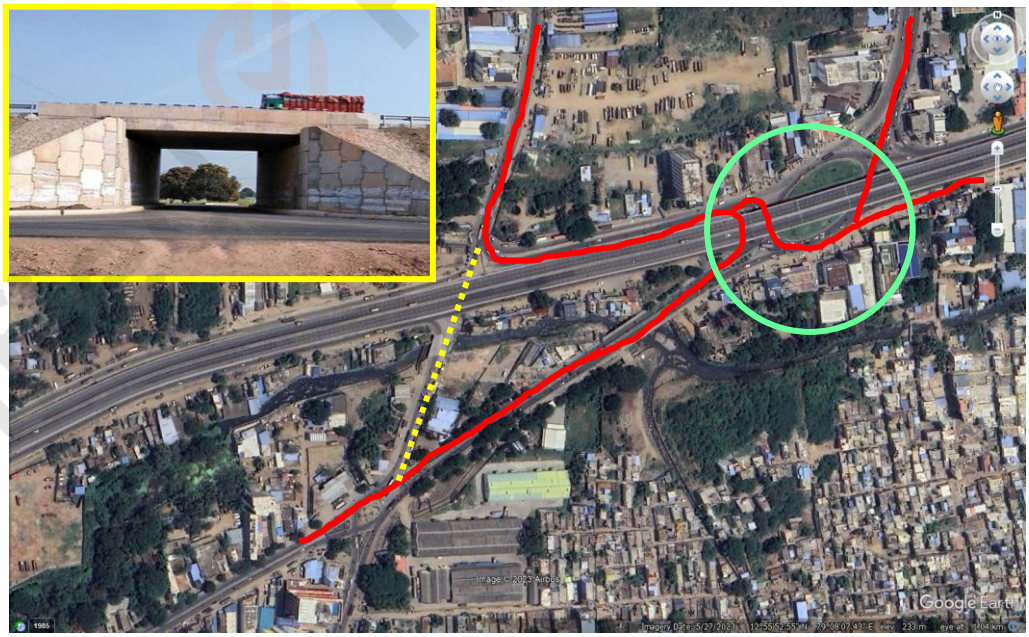

Figure 14.14 Traffic Flow in Green Circle Junction

Verified © RedEstate

Figure 14.15 Identified Junction from Velloretowards NH 48

Figure 14.16 Identified Junction from Katpadi towards NH 48

Verified RedEsc

A box culvert bridge (as shown in the Figure 14.14) is proposed along the existing road which run cross the NH-48. This is an elevated bridge that bridges the two National Highway 48. This reduce the significant amount of traffic follow towards Katpadi from Vellore city. This will also reduce the traffic jam in green circle junction. Figure 14.11 and Figure 14.12 shows the location of the proposed bridge. Figure 14.13 show the illustration of box culvert bridge along the NH – 48.

Figure 14.17 Proposed Underpass to divert traffic from Vellore towards Green Circle

14.7 Children's Park

Open spaces are most important places in urban fabric. The open spaces like parks and playgrounds not only serves the purpose of recreation but also acts as the hotspots for the community interactions. The open spaces ensure the green spaces and public interaction space in urban area. In case of Vellore LPA, there are very fewer open spaces is very less and the minimum area for the open spaces as per URDPFI Guidelines is not satisfied. To address this problem, a children's park is proposed in Vellore corporation. The site is located in Otteri, next to Muthurangam Arts and Science College. The area of the site is 18.3 acres.

Verified RealEstate™

A walking track, Yoga area, children's play area, and place for some commercial shops is proposed within the park. Figure 14.14 shows the site area for the proposed children's park. The proposed park is located in the heart of the residential zone where the park can be used as an interactive recreational space.

Figure 14.18 Site Area for Children's Park

14.8 Walking Streets Around Vellore Fort

A street is a vital place for community interactions, where the different sets of people come together. Streets not only provide the movement of traffic but also accommodates the street vendors, these vendors attract people to the streets. In Vellore there is no pedestrian-friendly street and street vending-friendly streets.

To address this a walking street is proposed for Fort Round Road which runs behind the Vellore Fort. Vellore Town station is present in the corner of the street. During the day time the street can be used as the normal street, after 6 PM the street can be convertible to walking street where the footloose vending stalls can be placed on the either side of the street. In the evening the vehicular traffic can be restricted.

This street not a pedestrian friendly street but also will increase the economic activity. This street will also attract the tourist visiting the Vellore fort. Figure 14.15 shows illustration of street section of walking street. Figure 14.16 shows the illustration of the walking street section with zones of activity.

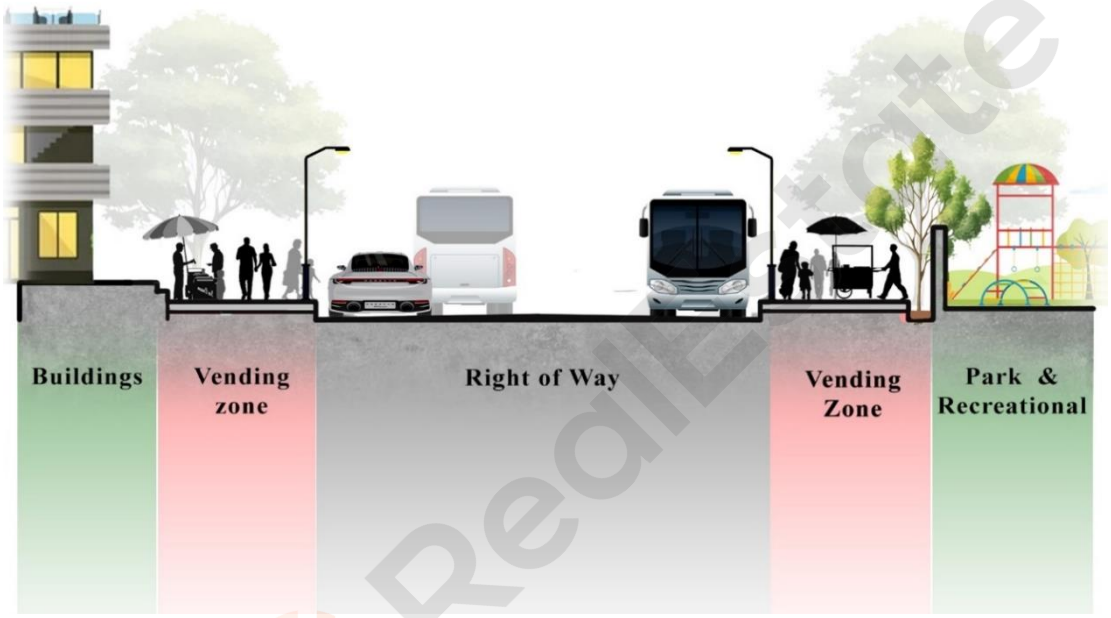

Figure 14.19 Section of Walking Street

Figure 14.20 Section of Walking Street with activity zones

Verified RedEfate ™

14.9 Development strategies for high-density development

Increasing the FSI doesn't necessarily create additional housing stock / facilitate high-density development. The effectiveness of achieving increased FSI depends on many factors like:

- Proximity to CBD
- Availability of services
- Road Network/ Connectivity
- Land use
- Land Value

To achieve a high-density development, a combination of the above factors is mandatory. The carrying capacity of various services should be sufficient to suit the increased FSI, along with connectivity plays a major role in determining the urban form. Transit Oriented Development corridors are potential places for achieving high density.

By focusing development around transit facilities cities can significantly improve accessibility, and ridership patterns and maximize the land value around the transit developments. Other benefits include:

- Improved access to jobs and economic opportunities for low-income citizens
- Potential for sustainable property value creation
- Affordable housing
- Reduced driving and car usage leading to lowered transport congestion and air pollution
- Healthy and active lifestyle due to the development of walkable communities

While an increased FSI leads to redevelopment in core areas, based on the condition of the buildings and their age along with the above-

Verified PropEstate™

mentioned parameters, the efficiency/ acceptance rate of increased FSI could be seen only in Greenfield developments. It should also be noted that the projected population and economic projection should be considered with setting the FSI so that both the living conditions of the people and green spaces for the well-being of people and the environment are satisfied.

Higher FSI should be implemented by putting a cap on the number of private vehicles. One of the disadvantages of higher FSI is that the number of households per building may increase, which would in turn lead to a rise in the number of private vehicles which will ultimately choke the roadways. Higher FSI with a robust public transport network will lead to compact developments that are more pedestrian-friendly with utilities available at walkable distances. The dependency on private vehicles would decrease and compact developments would be created.

Higher FSI allows developers to distribute construction costs across a greater built-up area, potentially reducing the per-unit cost of housing. Additionally, increased housing supply resulting from higher FSI could contribute to stabilizing property prices, making homes more affordable for the general population.

The impact of the FSI increase on India's GDP cannot be understated. A more streamlined development process leads to increased economic activity, job creation, and greater investment in urban areas.
Thus, to sum up, higher FSI when meticulously implemented, along with an increased carrying capacity of services and road connectivity is a boon to people as it not only aids in increasing the housing stock, it also leads to a compact self-sufficient development.

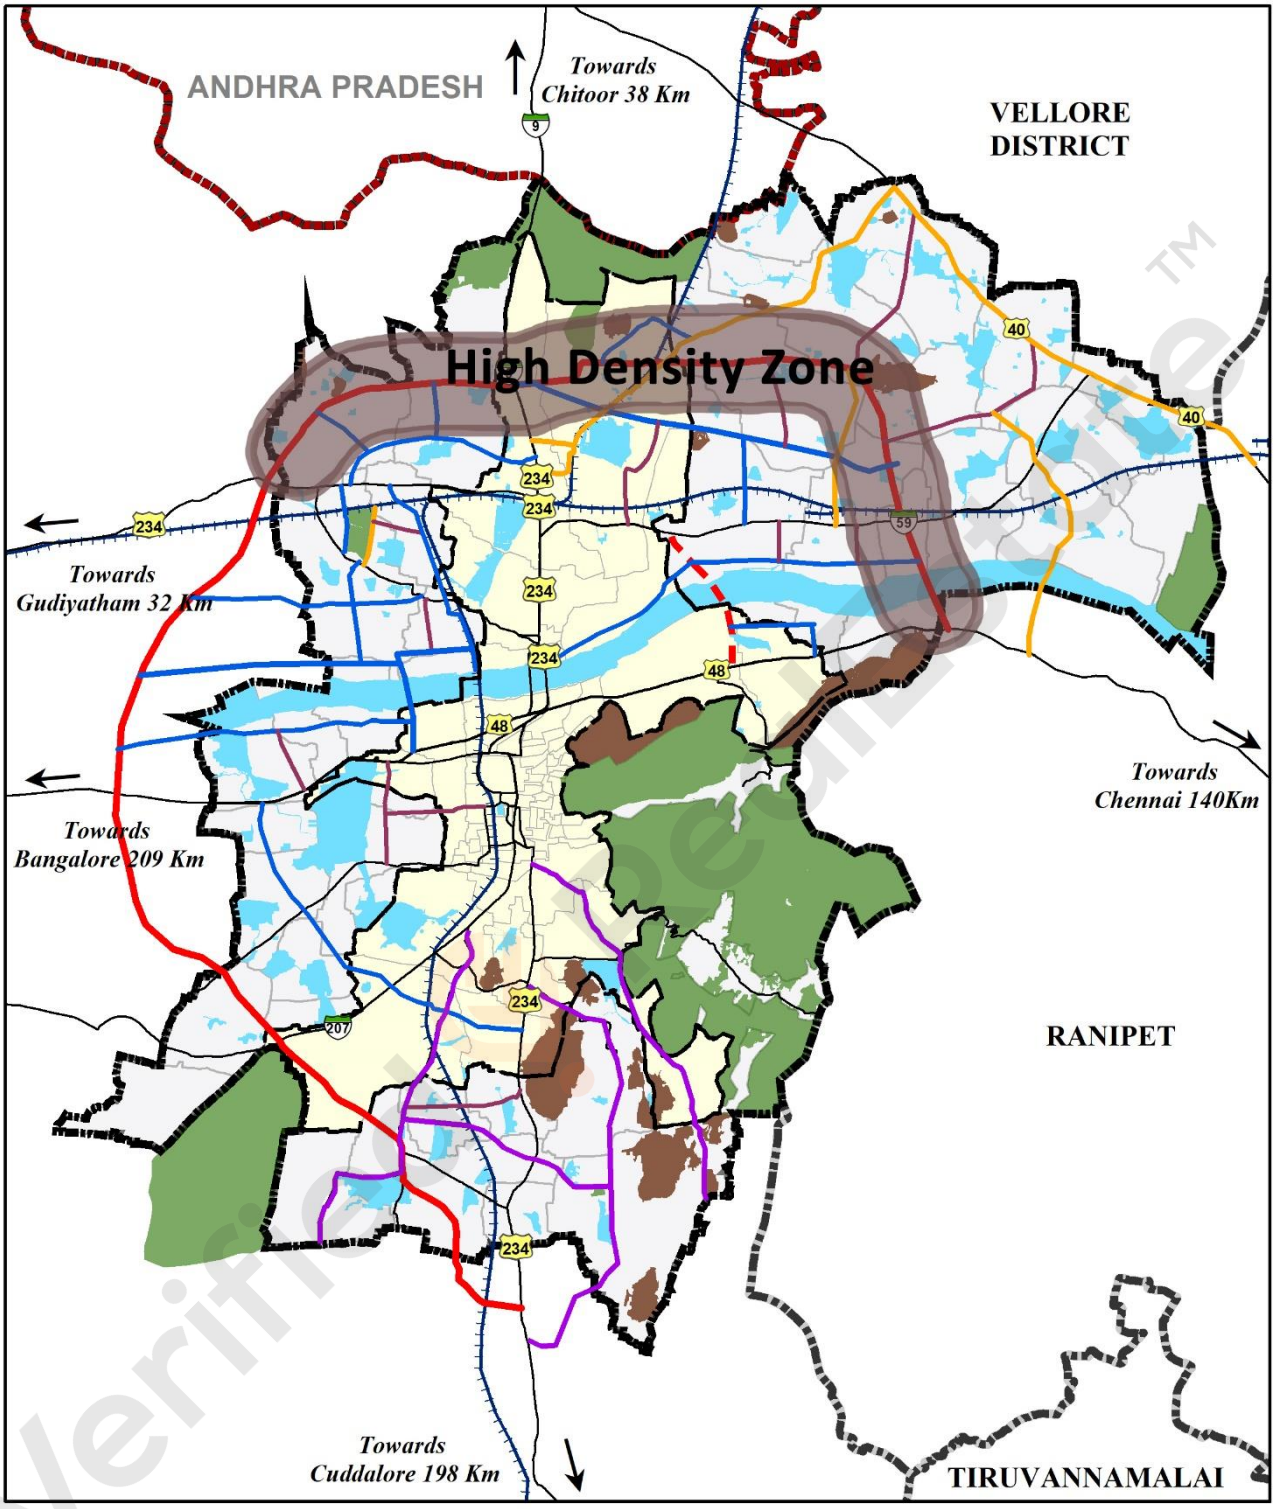

Verified RedEstate™

14.9.1 High Rise Development Zone

In Vellore LPA are high rise development zone is identified in Northernmost area along the ring road which starts from Perumugai ends at Sathumadurai junction. The road is executed in three phases, width of the proposed road is 100 feet. The road connects the major places which are located on the periphery of Vellore LPA. The high-rise development zone is identified along the ring road, where there is an enough road width to accommodate the physical infrastructure. This area is in close proximity to Katpadi junction, the main railway junction which connects Chennai and Bengaluru. Vellore Institute of Technology is also nearer, which is an major educational institution. The proposed high-rise area is close proximity to the Chennai – Bengaluru Green Field express highway. Map 14.2 shows the high-density zone identified on the ring road. Bus Rapid Transit System is also proposed on the major spin road NH – 234. The BRTS corridor runs along the north south direction of Vellore LPA.

15. Proposed Land Use

15.1 Proposed Land Use 2041

Proposed land use for 2041 is prepared with a main objective to regulate the growth of the local planning area in an order manner and also to ensure economic & social development and to maintain environment suitability. It helps in easy management for the land utilisation for the present and the future demands it is made possible by master plan zoning and development regulations. The concept of zoning is the segregation of certain use from any conflicting use and to create a compatible land use pattern. Based on the project proposal and land suitability analysis the proposed land use is prepared for Vellore LPA for 2041. The following Table 15.1 provide the land us breakup for Vellore LPA .

Table 15.1: Proposed Land use Vellore LPA – 2041

Vellore Corporation			Rest of LPA		
Land Use	**Proposed Land Use 2041 (Sq. Km)**	**Land Use Percentage**	**Land Use**	**Proposed Land Use 2041 (Sq. Km)**	**Land Use Percentage**
Residential	25.74	29.26	**Residential**	22.51	9.95
Commercial	5.12	5.82	**Commercial**	4.10	1.81
Industrial	2.93	3.33	**Industrial**	7.23	3.19

Open Space & Recreational	0.95	1.08	**Open Space & Recreational**	0.115	0.051
Transport	7.13	8.11	**Transport**	7.87	3.48
Agriculture	21.50	24.45	**Agriculture**	99.48	43.99
Water Body	13.35	15.17	**Water Body**	33.20	14.68
Reserve Forest	2.91	3.31	**Reserve Forest**	46.73	20.67
Total	**87.96**		**Total**	**226.13**	**100.00**

Verified by PeqEstate™

The main objective of the proposed land use is to improve the economy and to cater the demands of the future population. The proposed land use is prepared as per Master plan rules. Institutional land use includes all Public & Semi Public, religious land use and the infrastructure utilities. The residential area of Vellore LPA as per proposed land use is 13.49% and it forms to the predominant land use followed by agriculture, Industrial and commercial land use which will improve the economic development are given much importance.

Residential area is improved along the all major corridors in order to promote growth of the LPA. Industrial land use is provided along the North and Eastern part of the LPA along which there is higher potential for the industrial growth. In order to protect the eco-sensitive area like water bodies, hills and reserve forest buffer area is provided and as a measure to reduce encroachment of these area compatible land us is provide along the water bodies and forest area this will ensure the environmental sustainability. Industrial and commercial land use are provided away from the eco sensitive zones.

Verified © RedEstate™

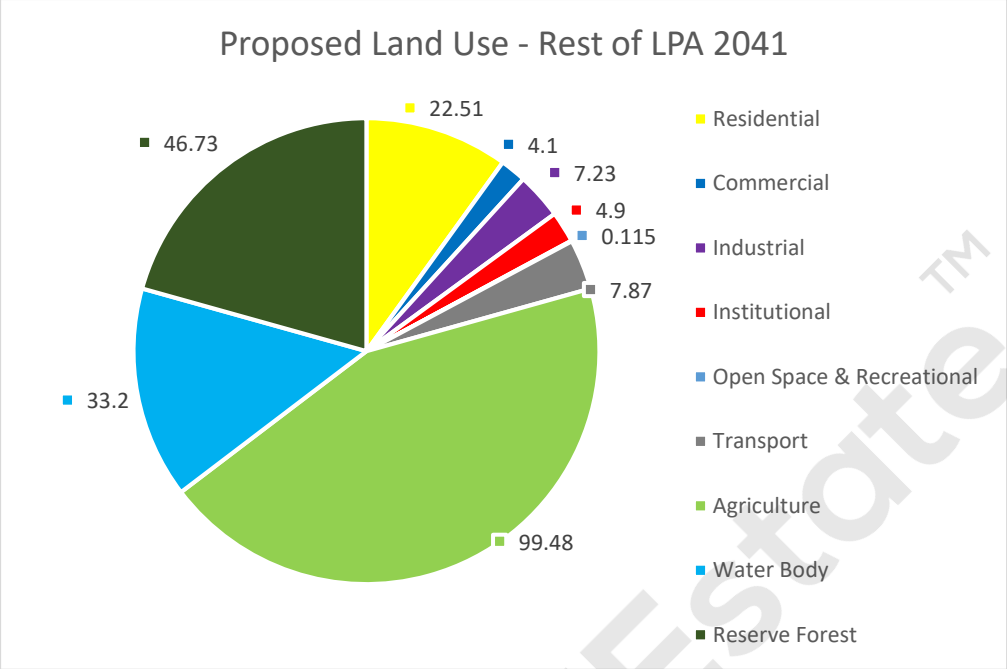

Figure 15.2: Proposed Land use Breakup for Rest of Vellore LPA - 2041

15.2 Land Use Comparison

The following Table 15.2 provides the comparison between existing and the proposed land use of Vellore LPA. It can be seen in proposed land use the vacant land has been completely utilised to cater the needs and requirements of the future development. The residential area is increased by 3.63% which will serve the estimate population. The commercial and industrial area is improved as measure to promote economic development. Institutional area is increased with respect to the needs of each of the Villages. The increase in eco sensitive areas like hills and water bodies is based on the cadastral maps which provides the encroached are and hence the original area is preserved in order to avoid future encroachment of the sensitive areas this in turn will help to maintain the environmental sustainability. The recreational area is improved and the village which lacked Recreational area are provided with required recreational land use

The proposed land use of Vellore LPA for the year 2041 will promote the growth of the LPA by improving the development in a sustainable manner. The proposed land use can be used as a tool to induce and regulate the growth of LPA, to ensure economic development and social improvement for the present and the future population.

The project proposals for each sector are clearly drafted based on the existing condition, future requirement, suitability analysis.

Verified by RealEstate™

Adequate land requirement for the project proposal is provided in proposed Land use for Vellore LPA 2041. This will ensure employment generation, enhance the quality of life of the people and also convert Vellore as the higher order settlement of the region. As per URDPFI guidelines a Vellore LPA falls under large city category and for a larger city the breakup for residential area has to be 35-36%, the percentage of residential land use in proposed only for 13.49 % and that is because about 70% of the total land use falls in to eco sensitive and non-developable use zones including agriculture, water bodies, hills and forest.

In Vellore 68.20% of the land falls under the un developed area which includes agriculture lands, Water Bodies, Reserve Forest and Hillocks. Balance 31.80% of the land only comes under developed land where the majority of the development is proposed.

ORDER

Vellore Local Planning Area was notified and declared under sub sections (1) and (4) of sections 10 of Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972) in the Government orders first and second read above respectively.

2. The Commissioner of Town and Country Planning in his letters read above has requested the Government to add certain villages to Vellore Local Planning Area under clause (b) of sub-section (1) of section 10 of Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972).

3. The Government, after careful consideration of the above proposal of the Commissioner of Town and Country Planning have decided to declare the intention of the Government to include additional areas to the Vellore Local Planning Area under clause (b) of sub section (1) of section 10 of the Tamil Nadu Town and Country Planning Act 1971 (Tamil Nadu Act 35 of 1972). The appended Notification will be published in the Tamil Nadu Government Gazette.

4. The Collector of Vellore District is directed to republish the Notification in the District Gazette.

APPENDIX.

NOTIFICATION.

In exercise of the powers conferred by clause (b) of sub-section (1) of section 10 of the Tamil Nadu Town and Country Planning Act, 1971 (Tamil Nadu Act 35 of 1972), the Governor of Tamil Nadu hereby declares his intention to include certain additional areas in the Vellore Local Planning Area and to make the following amendment to the Rural Development and Local Administration Department Notification No.II(2)/RUL/730/75 published at page 104 of Part II-Section 2 of the Tamil Nadu Government Gazette, dated (5th March, 1975.

2. Notice is hereby given that the following draft amendment will be taken into consideration on or after the expiry of two months from the date of publication of this Notification in the Tamil Nadu Government Gazette and that any objection or suggestion, which may be received from any inhabitant or any local authority or institution in the local areas, with respect thereto, before the expiry of the period aforesaid will be duly considered by the Government of Tamil Nadu. Objection or suggestion in writing, if any, should be addressed to the Secretary to Government, Housing and Urban Development Department, Secretariat, Fort Saint George, Chennai-600 009.

DRAFT AMENDMENT.

In the said Notification, for "THE TABLE", the following "TABLE" shall be substituted, namely:-

Classes of employees. (1)	*Minimum rates of basic wages (per month) Rs. P.* (2)		
	Zone-A	Zone -B	Zone -C
Non - Teaching Staff			
(*a*) Clerk / Typist / Cashier / Librarian	5532.00	5360.00	5188.00
(*b*) Driver	5360.00	5188.00	5016.00
(*c*) Office Assistant/Gardener/ Ayah/Watchman	4500.00	4414.00	4328.00
(*d*) Scavenger	4414.00	4328.00	4242.00

Explanations—

(1) Classification of Zones: The Classification of Zones shall be as follows:—

Zone A, B, and C shall comprise of the following areas:-

Zone A : Corporations.

Zone B: Municipalities.

Zone C: Town Panchayats, Panchayats and other Places.

(2) Dearness Allowance: In addition to the minimum rates of basic wages the employees shall be paid dearness allowance as indicated below:—

(i) The dearness allowance is linked to the Average Chennai City Consumer Price Index Number for the year 2010, that is 161 points with base 2001 =100 and for every rise of one point over and above 161 points, an increase of RS. 26.30 (Rupees twenty six and paise thirty Only) per month shall be paid as dearness allowance.

(ii) The dearness allowance shall be calculated every year on the first April on the basis of the average of the indices for the preceding twelve months, namely, from January to December.

(iii) The first calculation shall be effective from the date of publication of the Notification in the *Tamil Nadu Government Gazette* based on the Average Chennai City Consumer Price Index Number for the previous year.

(3) Where the nature of work is the same, no distinction in the payment of wages shall be made between men and women employees.

(4) To arrive at the daily rates of wages the monthly wages shall be divided by 26.

(5) Wherever the existing wages are higher than the minimum wages fixed herein, the same shall be continued to be paid.

Appointment of Certain Person as Presiding Officer of Labour Court Tiruchirappalli on Adhoc Basis under the Industrial Disputes Act.

[G.O. Ms. No. 171, Labour and Employment (D2), 4th July 2013, Aani 20, Vijaya, Thiruvalluvar Aandu-2044.]

LABOUR AND EMPLOYMENT DEPARTMENT

Exemption to the Tamil Nadu State Marketing Corporation Limited, Chennai for certain period under the Employees State Insurance Act.

[G.O. (3D) No. 9, Labour and Employment (L1), 30th September 2016, புரட்டாசி 14, துன்முகி, திருவள்ளுவர் ஆண்டு 2047.]

No. II(2)/LE/721/2016.—In exercise of the powers conferred by section 87 read with section 91-A of the Employees State Insurance Act, 1948 (Central Act XXXIV of 1948), the Governor of Tamil Nadu hereby exempts the Tamil Nadu State Marketing Corporation Limited, Chennai from the operation of the said Act for the period of one year from 01-10-2016 to 30-09-2017.

(1) The above exemption is subject to the following conditions, namely:-

(a) The aforesaid Corporation where the employees are employed shall maintain a Register showing the names and designations of the exempted employees.

(b) Notwithstanding the exemption, the employees shall continue to receive such benefits under the said Act to which they might have become entitled to on the basis of the contributions paid prior to the date from which exemption granted by this Notification operates.

(c) The contribution for the exempted period, if already paid shall not be refunded.

(2) The employer of the said Corporation shall submit in

Verified RealEstate™

respect of the period during which that Corporation was subject to the operation of the said Act (hereinafter referred to as "the said period") returns, in such form and containing such particulars as were due from it in respect of the said period under the Employees State Insurance (General) Regulations, 1950.

(3) Any Social Security Officer appointed by the Corporation under sub-section (1) of section 45 of the said Act, or other official authorised in this behalf shall, for the purpose of,-

(*i*) verifying the particulars contained in any return submitted under sub-section (1) of section 44 of the said Act for the said period; or

(*ii*) ascertaining whether registers and records were maintained as required by the Employees State Insurance (General) Regulations, 1950 for the said period; or

(*iii*) ascertaining whether the employees continue to be entitled to the benefits provided by the employer in cash and in kind, being benefits in consideration of which exemption is being granted under this Notification; or

(*iv*) ascertaining whether any of the provisions of the said Act had been complied with during the period when such provisions were in force in relation to the said workshops and stores be empowered to,-

(*a*) require the principal or immediate employer to furnish to him such information as he may consider necessary; or

(*b*) enter any Corporation office or other premises occupied by such principal or immediate employer at any reasonable time and require any person found in charge thereof to produce to such Social Security Officer or other official and allow him to examine such documents, books and other documents relating to the employment of persons and payment of wages or to furnish to him such information as he may consider necessary; or

(*c*) examine the principal or immediate employer, his agent or servant, or any persons found in such Corporation office or other premises, or any person when the said Social Security Officer or other official has reasonable cause to believe to have been an employee; or

(*d*) make copies of or take extracts from any register, account book or other document maintained in such Corporation office or other premises.

Appointment of certain Officers as Inspectors and defining of their Local Limits under the Maternity Benefit Act.

Amendment to Noticiation

[G.O. Ms. No. 189, Labour and Employment (H2), 3rd October 2016, புரட்டாசி 17, துன்முகி, திருவள்ளுவர் ஆண்டு 2047.]

No. II(2)/LE/722/2016.—In exercise of the powers conferred by section 14 of the Maternity Benefit Act, 1961 (Central Act, 53 of 1961), the Governor of Tamil Nadu hereby makes the following amendment to the Labour and Employment Department Notification No.II(2)/LE/718/2005, published at page 374 of part II-Section 2 of the *Tamil Nadu Government Gazette,* dated the 7th September, 2005.

Sub: Implementation of the Ancient Monuments and Archaeological Sites and Remains (Amendment and Validation) Ordinance 2010 issued on 23.01.2010 - Regarding.

*****

Sir,

With reference to the subject cited above, I am to enclose herewith a xerox copy of the Gazette of India No.1 of 2010 dt.23.01.2010 containing the ordinance "The Ancient Monuments and Archaeological Sites and Remains (Amendment and Validation) Ordinance, 2010" promulgated by H.E. the President of India regulating construction activities in the zone of centrally protected monuments. Xerox copies of the (1) AMASR Act, 1958, (2) Rules, 1959 and Amendment 1992 for your reference. A list of centrally protected monuments and sites under the jurisdiction of this office is enclosed. Consequent on the promulgation of the above ordinance by the Government of India, no construction activity including new construction/ repairs and renovation to the existing buildings is permissible in the prohibited and regulated areas of any centrally protected monument under the jurisdiction of Chennai Circle in Tamil Nadu and the Union Territory of Puducherry till such time further direction is issued by the Government of India in the matter. Necessary instructions may please be issued to the respective Town & Country Planning Officers in the State of Tamil Nadu for stopping all construction activities in the prohibited and regulated areas of centrally protected monuments forthwith till such time further direction is issued by the Government of India in the matter

A reply on the action taken is solicited.

Yours faithfully.

Encl: As above

(SATHYABHAMA BADHREENATH)
SUPERINTENDING ARCHAEOLOGIST
