STAIR CASE DETAILS

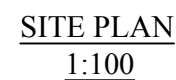

The diagram illustrates the components of a staircase. A hand rail is supported by a series of vertical balusters. The vertical distance between two consecutive balusters is labeled as the **RISER = 0.175 M**. The horizontal distance between two consecutive balusters is labeled as the **TREAD = 0.25 M**. The horizontal slab supporting the stairs is labeled as the **WAIST SLAB**. A dimension of **0.12** is shown for the width of the hand rail.

Figure 10 shows the floor plan of the 1st floor. The overall dimensions are 7.86 by 10.47. The layout includes a Bedroom (2.45x3.53), two Toilets (1.37x1.98 and 1.98x2.22), and a Utility room (1.91x3.05). There are also two vestibules (V) and a door (D). A QR code is located at the bottom left of the plan.
