STAIRCASE DETAILS

Diagram illustrating a rainwater harvesting system. Rainwater from an **OPEN TERRACE** flows through a **RAIN WATER PIPE** into a **SAND FILLING** layer. Below the sand is a **NETLINE** and a **PEBBLES BED**. The water then flows into a **RAIN WATER COLLECTION PIT**. The ground level is marked as **GL**.

[illegible]

Diagram illustrating a solar water heating system configuration. The system includes a vertical riser pipe with a 6" DIA P.V.C. CASING, 1.5" DIA P.V.C. SUCTION, and 2" DIA P.V.C. VENT PIPE. The total height is 100' DEPTH. The system is connected to a SOLAR collector at the bottom and a tank at the top.
