

Er. J. BENNY GABRIEL
B.E., M. Tech (Structural Engineering)
GRADE I STRUCTURAL ENGINEER
D.T.C.P., CMDA & CHENNAI CORPORATION

*No.2/5, First Floor,
7th East Street, Kamaraj Nagar,
Thiruvananthapuram,
Chennai – 600 041*

STABILITY CERTIFICATE

DATE: 04-06-2026

1. The detailed engineering and structure design of the proposed building comprising of **STILT + 5 FLOORS RESIDENTIAL BUILDING (HEIGHT - 18.30M) WITH 35 DWELLING UNITS AVAILING PREMIUM FSI AT PLOT NO. 1 TO 4, PADASALAI STREET, NOLAMBUR, CHENNAI COMPRISED IN S.NO.208/1A1 & 208/2A1B OF NOLAMBUR VILLAGE, MADURAVOYAL TALUK, CHENNAI DISTRICT**, has been done by me/us based on the report of geotechnical investigation done by **GEO DESIGN PRIVATE LIMITED, CHENNAI – 94**, Report No. **GEO/CH/136/2025**, Dated **10.09.2025** and considering the functional requirement of the building.
2. It is certified that among other factors, the proposed building has been designed to resist earthquake. I/We have checked various parameters and found that the proposed building would be safe.
3. I/We further certify that:
 - (i) The minimum grade of concrete is **M25**
 - (ii) The design and analysis has been done using the code of practice for plain and reinforced concrete as per IS 456, design loads as per IS Codes No. **IS 456:2000** and design of earthquake resistant structure as per IS Code No. **IS 1893:2016**
4. The building will be safe and sound when used for the purpose for which it is designed.

PROFESSIONAL REGISTRATION CERTIFICATE

This is to certify that the Thiru / Tmt. / M/s. **Benny Gabriel J** has enrolled as **Registered Structural Engineer Grade-I (SE)** with Chennai Metropolitan Development Authority (CMDA) who has the qualification of **M.E Structures** and experience in the relevant field for 8 years.

He/She has been given the Registration No. **SE/1/2024/7/0105** on **11-Jul-2024** He/She shall be required to comply with the duties and responsibilities prescribed by the Government of Tamil Nadu in Part V, "Registration of Professionals", Tamil Nadu Combined Development and Building Rules, 2019 approved vide G.O.(ms) No.18 MAWS (MA1) Dept. Dated. 04.02.2019.

This Registration is valid upto **10-Jul-2029**.

DESIGN ANALYSIS REPORT

FOR THE PROPOSED RESIDENTIAL BUILDING AT
PLOT NO.1 to 4, PADASALAI STREET, NOLAMBUR,
CHENNAI 600095. COMPRISED IN S.NO.208/1A1,
2A1, NOLAMBUR VILLAGE IN GREATER CHENNAI
CORPORATION.

CERTIFICATE

With respect to the proposed Stilt + 5 Floor Residential Building at Plot No.1 To 4, Padasalai Street, Nolambur, Chennai 600095, comprised in S.No.208/1A1, 2A1, Nolambur Village In Greater Chennai Corporation, it is certified that the structural plans of the building meet the structural safety including earthquake loads as stipulated under I.S. 456:2000, I.S. 1893:2016 and I.S. 875 (Part 1 and 2) and other relevant codes for residential loading conditions and is structurally safe and sound.

EXECUTIVE SUMMARY

This report pertains to the construction of a residential Building at Nolambur, Chennai. The proposed structure is a STILT + FIVE (S+5) residential building,

As Chennai city is falling under the Zone III area of seismicity, classified as per Indian Standard I.S.1893:2016, the building is designed considering the seismic loads in addition to the gravity loads.

The building will be modeled and analysed using STAAD PRO and the design results are used for the design of footings, grade beams, columns and roof beams based on I.S. 456:2000.

Pile foundation is proposed as per the soil report and 600 dia pile is used with a capacity of 80t at a depth of 27m

The grade of concrete and steel considered in the design is M25 and Fe500 respectively. Light weight partition blocks shall be used for infilling and partitions. Detailed structural drawings based on the design are prepared catering to all the codal requirements.

I. INTRODUCTION

1. SCOPE:

This document describes the general requirements and various design parameters that are to be considered in the design of Stilt + 5 floors.

2. UNITS OF MEASUREMENT:

The units of measurement adopted in design shall be the SI system of units.

3. COMPUTER PROGRAM/ SOFTWARE:

STAAD Pro is used for the analysis of the structures.

4. DESIGN STANDARDS AND CODES OF PRACTICES:

All design shall be prepared in accordance with Indian Standards and Codes of Practices. Various codes of practices being referred to are listed below. Any other Indian Code not Listed shall not be considered.

- ☐ **IS 875 - 1987** Code of practices for Design loads (other than Earth Quake) for building and structures
- ☐ **SP -16** Code of practices for design aids for reinforced concrete
- ☐ **IS 456-2000** Code of practices for plain and reinforced concrete
- ☐ **IS 1893-2016** Criteria for Earthquake resistance design of structure

J. BENNY GABRIEL, B.E., M.Tech.,

No:11-A/1, Toovipuram 11th Street,
Thoothukudi - 628003. M : 9894290905.
Email : bennygabrielj@gmail.com

II. DESIGN DETAILS

The proposed structure is a Stilt + 5 Floors residential building. The type of the structure proposed is a regular class 1 R.C.C. framed structure, designed for gravity loads and seismic loads

1. Foundation Type:

As per the soil report received, pile foundation is suggested

Depth of pile: 27m

Safe carrying capacity: 80t

2. Building Materials Used:

Grade of Concrete: M25

Grade of Steel: Fe500

Brick: Class 1 bricks with unit weight 20kN/m³

3. Load Calculations:

a. Dead load

Slab load incl. floor finish from (Ground to 5th floor) = 6.5 kN/m²

Slab load (Terrace floor) incl. floor finish = 6.5 kN/m²

Slab load (Bath floor) incl. floor finish = 10.00 kN/m²

Wall load 230mm Thk (Light weight blocks) = 5.00 kN/m

Wall load 115mm Thk (Light weight blocks) = 2.50 kN/m

Parapet wall load on terrace - 1000mm height. = 5.00 kN/m

Slab Load for Lift Machine Room = 15.0 kN/m²

b. Live Load

1st to 5th floor = 2.00 kN/m²

Terrace floor = 1.50 kN/m²

c. Seismic Load

Zone classification as per I.S. 1893:2016 - ZONE 3 (Chennai)

Zone factor 'Z' = 0.16

Important factor = 1.0 (General Buildings)

Reduction Factor = 5 (Special Moment Resisting Frame)

Type of Structure = 5 (Building with infills)

Damping Factor = 5%

4. Method of analysis

The structure will be analyzed by Equivalent Static Method (ESM) as per I.S. 1893:2016 and linear elastic analysis by using STAAD Pro software.

The structure is idealized in the form of horizontal and vertical members using beam element and loads are applied and analyzed for various load combinations as given in I.S. 456:2000

5. Interpretation of results

The support reactions obtained from the analysis shall be used for the design of foundations. The beam end forces in the form of shear forces and bending moments from the horizontal and vertical members shall be used for the design of beams and columns respectively.
